## 1.2. What's New in HDF 3.0.1.1

HDF 3.0.1.1 is a hotfix release that includes the following bug fix:

- [BUG-85312](#) – Substitute registry.version for NiFi builds.

For complete information about the HDF 3.x release, see:

- [HDF 3.0.0 Release Notes](#)
- [HDF 3.0.1 Release Notes](#)

## 1.3. Unsupported Features

Some features exist within HDF 3.0.1.1, but Hortonworks does not currently support these capabilities.

- [Technical Preview Features \[3\]](#)
- [Community Driven Features \[3\]](#)

- [Unsupported Customizations \[5\]](#)

### 1.3.1. Technical Preview Features

The following features are available within HDF 3.0.1.1 but are not ready for production deployment. Hortonworks encourages you to explore these technical preview features in non-production environments and provide feedback on your experiences through the [Hortonworks Community Forums](#).

**Table 1.1. Technical Previews**

Component	Feature
MiNiFi	MiNiFi C++
Streaming Analytics Manager	<ul style="list-style-type: none"> <li>• SAM Stream Insights module (Druid and Apache Superset)</li> <li>• Sinks               <ul style="list-style-type: none"> <li>• Cassandra</li> <li>• OpenTSDB</li> <li>• Solr</li> </ul> </li> <li>• Sources               <ul style="list-style-type: none"> <li>• HDFS</li> </ul> </li> </ul>

### 1.3.2. Community Driven Features

The following features are developed and tested by the Hortonworks community but are not officially supported by Hortonworks. These features are excluded for a variety of reasons, including insufficient reliability or incomplete test case coverage, declaration of non-production readiness by the community at large, and feature deviation from Hortonworks best practices. Do not use these features in your production environments.

### **1.3.3. Unsupported Customizations**

Hortonworks cannot guarantee that default NiFi processors are compatible with proprietary protocol implementations or proprietary interface extensions. For example, we support interfaces like JMS and JDBC that are built around standards, specifications, or open protocols. But we do not support customizations of those interfaces, or proprietary extensions built on top of those interfaces.

## 1.4. Deprecated Technologies

This section points out any technology from previous releases that has been deprecated or removed from this release (operating systems, Java versions, databases, product features). Use this section as a guide for your implementation plans.

**Deprecated** Technology that Hortonworks is removing in a future release. Deprecated items are supported until they are removed; deprecation gives you time to plan for removal.

**Removed** Technology that Hortonworks has removed from production and is no longer supported.

**Table 1.2. Deprecated Operating Systems**

Operating System	Release Deprecated	Release Removed
Debian 6	HDF 2.1.2	HDF 3.0.0
