Upgrading MiNiFi C++ agents.....4

Upgrading MiNiFi C++ agents

Learn how to upgrade your MiNiFi C++ agents.

Procedure

1. Stop the previous MiNiFi instance.
2. Unpack the new assembly.
3. Copy the following files from the conf directory of the previous instance to the conf directory of the new instance:
 - minifi-log.properties
 - minifi-uid.properties
 - config.yml
 - minifi.properties
4. Migrate the following directories to the root of the new instance:
 - content_repository
 - flowfile_repository
 - provenance_repository
5. Migrate the following file(s) to the root of the new instance from the root of the previous instance:
 - .device_id
6. Start the new MiNiFi instance.

Note: You should add upgraded agents to a new agent class, otherwise new features will not be available for use (for example, commands, processors, and so on). It also helps you to avoid manifest conflicts.
