Iceberg Replication Properties in Cloudera Runtime 7.2.18

Role groups:

Admin Server

Advanced

Admin Server Advanced Configuration Snippet (Safety Valve) for iceberg_replication.xml

Description	For advanced use only. A string to be inserted into iceberg_replication.xml for this role only.
Related Name	
Default Value	
API Name	iceberg_replication.xml_role_safety_valve
Required	false

Admin Server Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
Related Name	
Default Value	
API Name	ICEBERG_REPLICATION_ADMINSERVER_role_env_safety_valve
Required	false

Admin Server Logging Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, a string to be inserted into log4j2.properties for this role only.
Related Name	
Default Value	
API Name	log4j_safety_valve
Required	false

Enable auto refresh for metric configurations

Description	When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.
Related Name	

Default Value

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name

Default Value

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name

Default Value

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/ crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name	
Default Value	20
API Name	process_start_secs
Required	false

Logs

Admin Server Log Directory

Description	The log directory for log files of the role Admin Server.
Related Name	log_dir
Default Value	/var/log/iceberg_replication/admin_server
API Name	log_dir
Required	false

Admin Server Logging Threshold

Description	The minimum log level for Admin Server logs
Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

Admin Server Maximum Log File Backups

Description	The maximum number of rolled log files to keep for Admin Server logs. Typically used by log4j or logback.
Related Name	
Default Value	10
API Name	max_log_backup_index
Required	false

Admin Server Max Log Size

Description	The maximum size, in megabytes, per log file for Admin Server logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB
API Name	max_log_size
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts
Required	false

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	

iceberg_replication_adminserver_fd_thresholds
Required
false

Admin Server Host Health Test

Description
When computing the overall Admin Server health, consider the host's health.
Related Name
Default Value
true
API Name
iceberg_replication_adminserver_host_health_enabled
Required
false

Admin Server Process Health Test

Description
Enables the health test that the Admin Server's process state is consistent with the role configuration
Related Name
Default Value
true
API Name
iceberg_replication_adminserver_scm_health_enabled
Required
false

Enable JMX Exporter (beta)

Description
JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. See the JMX Exporter documentation.
Related Name
Default Value
false
API Name
jmx_exporter_enabled
Required
true

JMX Exporter Port

Description
JMX Exporter needs a port to implement a Prometheus exporter.
Related Name
Default Value

API Name

jmx_exporter_port

Required

false

JMX Exporter configuration YAML**Description**

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name**Default Value****API Name**

jmx_exporter_yaml

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.

- **Default Dashboard Metric Set** - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- **Include/Exclude Custom Metrics** - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- **Metric Name** - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- **Include only Health Test Metric Set:** Selected.
- **Include/Exclude Custom Metrics:** Set to Include.
- **Metric Name:** `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`exporters: prometheusremotewrite/$ROLE_NAME: endpoint: $ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s max_elapsed_time: 300s`

API Name

`otelcol_exporters`

Required

`false`

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section

Description

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

API Name

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name

Default Value

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name

Default Value

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name

Default Value

5 minute(s)

API Name

unexpected_exits_window

Required

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name

Default Value

API Name

rlimit_fds

Required

false

Ports and Addresses

Admin Server Port Number

Description

The port number on which admin server runs

Related Name

admin_server_port_number

Default Value

2288

API Name

admin_server_port_number

Required

true

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name	rm_memory_hard_limit
Required	true

Cgroup Memory Soft Limit

Description	Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'
Related Name	memory.soft_limit_in_bytes
Default Value	-1 MiB
API Name	rm_memory_soft_limit
Required	true

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	100 MiB
API Name	stacks_collection_data_retention
Required	false

Stacks Collection Directory

Description	The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name	stacks_collection_directory
Default Value	
API Name	

stacks_collection_directory
Required
false

Stacks Collection Enabled

Description
Whether or not periodic stacks collection is enabled.
Related Name
stacks_collection_enabled
Default Value
false
API Name
stacks_collection_enabled
Required
true

Stacks Collection Frequency

Description
The frequency with which stacks are collected.
Related Name
stacks_collection_frequency
Default Value
5.0 second(s)
API Name
stacks_collection_frequency
Required
false

Stacks Collection Method

Description
The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name
stacks_collection_method
Default Value
jstack
API Name
stacks_collection_method
Required
false

Suppressions

Suppress Parameter Validation: Admin Server Port Number

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Server Port Number parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_admin_server_port_number
Required	true

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Parameter Validation: Admin Server Advanced Configuration Snippet (Safety Valve) for iceberg_replication.xml

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Server Advanced Configuration Snippet (Safety Valve) for iceberg_replication.xml parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_iceberg_replication.xml_role_safety_valve
Required	true

Suppress Parameter Validation: Admin Server Environment Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Server Environment Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	

Default Value

false

API Name

role_config_suppression_iceberg_replication_adminserver_role_env_safety_valve

Required

true

Suppress Parameter Validation: JMX Exporter Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Parameter Validation: JMX Exporter configuration YAML**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_yaml

Required

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_role_triggers
Required	true

Suppress Parameter Validation: Stacks Collection Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_stacks_collection_directory
Required	true

Suppress Health Test: Audit Pipeline Test

Description	Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_iceberg_replication_iceberg_replication_adminserver_audit_health
Required	true

Suppress Health Test: File Descriptors

Description	Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_iceberg_replication_iceberg_replication_adminserver_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_iceberg_replication_iceberg_replication_adminserver_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_iceberg_replication_iceberg_replication_adminserver_log_directory_free_space

Required

true

Suppress Health Test: Otelcol Health**Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_iceberg_replication_iceberg_replication_adminserver_otelcol_health

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_iceberg_replication_iceberg_replication_adminserver_scm_health

Required

Service-Wide

Advanced

Iceberg Replication Service Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

ICEBERG_REPLICATION_service_env_safety_valve

Required

false

Advanced log4j properties for "export" step of iceberg replication.

Description

Add log4j properties that will be referred by "export" step of iceberg replication. Property added here will be appended in the log4j.properties file generated in run directory of this step.

Related Name**Default Value****API Name**

log4j_safety_valve_for_export

Required

false

Advanced log4j properties for "get checkpoint" names step of iceberg replication.

Description

Add log4j properties that will be referred by "get checkpoint" step of iceberg replication. Property added here will be appended in the log4j.properties file generated in run directory of this step.

Related Name**Default Value****API Name**

log4j_safety_valve_for_get_checkpoint

Required

false

Advanced log4j properties for "get identity" step of iceberg replication.**Description**

Add log4j properties that will be referred by "get identity" step of iceberg replication. Property added here will be appended in the log4j.properties file generated in run directory of this step.

Related Name**Default Value****API Name**

log4j_safety_valve_for_get_identity

Required

false

Advanced log4j properties for "get table names" step of iceberg replication.**Description**

Add log4j properties that will be referred by "get table names" step of iceberg replication. Property added here will be appended in the log4j.properties file generated in run directory of this step.

Related Name**Default Value****API Name**

log4j_safety_valve_for_get_table_names

Required

false

Advanced log4j properties for "set origin" step of iceberg replication.**Description**

Add log4j properties that will be referred by "set origin" step of iceberg replication. Property added here will be appended in the log4j.properties file generated in run directory of this step.

Related Name**Default Value****API Name**

log4j_safety_valve_for_set_origin

Required

false

Advanced log4j properties for "sync" step of iceberg replication.**Description**

Add log4j properties that will be referred by "sync" step of iceberg replication. Property added here will be appended in the log4j.properties file generated in run directory of this step.

Related Name**Default Value****API Name**

log4j_safety_valve_for_sync

Required

false

Advanced log4j properties for "transfer(distcp)" step of iceberg replication.

Description	Add log4j properties that will be referred by "transfer(distcp)" step of iceberg replication. Property added here will be appended in the log4j.properties file generated in run directory of this step.
Related Name	
Default Value	
API Name	log4j_safety_valve_for_xfer

Required	true

System User

Description	The user that this service's processes should run as.
Related Name	
Default Value	hdfs
API Name	process_username
Required	true

Monitoring

Enable Service Level Health Alerts

Description	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific service.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

false

Catalog Server HDFS Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into hdfs-site.xml for this role only.

Related Name

Default Value

API Name

catalogd_hdfs_site_conf_safety_valve

Required

false

Catalog Server Hive Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into hive-site.xml for this role only.

Related Name

Default Value

API Name

catalogd_hive_conf_safety_valve

Required

false

Java Configuration Options for Catalog Server

Description

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here. Note: When CM version is 6.3.0 or greater, {{JAVA_GC_ARGS}} will be replaced by JVM Garbage Collection arguments based on the runtime Java JVM version.

Related Name

Default Value

API Name

catalogd_java_opts

Required

false

Impala Catalog Server Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name

Default Value

API Name

CATALOGSERVER_role_env_safety_valve

Required

false

Catalog Server Core Dump Directory

Description

Directory where the Catalog Server core dump is placed.

Related Name

core_dump_dir

Default Value

/var/log/catalogd

API Name

core_dump_dir

Required

false

Catalog Server Hive Metastore Connection Retries

Description

Number of retry attempts the Catalog Server will make when connecting to the Hive Metastore Server. By default, the Catalog Server waits one second between retries.

Related Name

hive.metastore.connect.retries

Default Value

5

API Name

hive_metastore_connect_retries

Required

false

Catalog Server Hive Metastore Connection Timeout

Description

Timeout for requests to the Hive Metastore Server from Catalog Server. Consider increasing this if you have tables with a lot of metadata and see timeout errors.

Related Name

hive.metastore.client.socket.timeout

Default Value

1 hour(s)

API Name

hive_metastore_timeout

Required

false

Metastore Notification Polling Interval

Description

The value of this configuration determines the interval with which the Catalog Server fetches new notifications from Hive Metastore. The feature is disabled when it is set to 0.

Related Name

	hms_event_polling_interval_s
Default Value	2 second(s)
API Name	hms_event_polling_interval_s
Required	false

Load Catalog in Background

Description	If true, loads catalog metadata in the background. If false, metadata is loaded lazily (on access). Only effective in CDH 5 and Impala 1.2.4 and higher.
Related Name	load_catalog_in_background
Default Value	false
API Name	load_catalog_in_background
Required	false

Catalog Server Max Breakpad Dump Files

Description	Maximum number of Breakpad dump files stored by Catalog Server Role.
Related Name	max_minidumps
Default Value	9
API Name	max_minidumps
Required	false

Enable auto refresh for metric configurations

Description	When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.
Related Name	
Default Value	false
API Name	metric_config_auto_refresh
Required	false

Catalog Server Breakpad Dump Directory

Description

Directory for storing Catalog Server Breakpad dumps.

Related Name

minidump_path

Default Value

/var/log/impala-minidumps

API Name

minidump_path

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name

Default Value

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

true

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description	The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
Related Name	
Default Value	20
API Name	process_start_secs
Required	false

Logs

Catalog Server Log Directory

Description	Directory where Catalog Server will place its log files.
Related Name	log_dir
Default Value	/var/log/catalogd
API Name	log_dir
Required	false

Impala Catalog Server Logging Threshold

Description	The minimum log level for Impala Catalog Server logs
Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

Catalog Server Verbose Log Level

Description	Verbose logging level for the GLog logger. These messages are always logged at 'INFO' log level, so this setting has no effect if Logging Threshold is set to 'WARN' or above.
Related Name	GLOG_v
Default Value	

1
API Name
log_verbose_level
Required
false

Catalog Server Log Buffer Level

Description
Buffer log messages logged at this level or lower (-1 means don't buffer; 0 means buffer INFO only; 1 means buffer WARNING only, ...)
Related Name
logbuflevel
Default Value
0
API Name
logbuflevel
Required
false

Catalog Server Maximum Log Files

Description
The number of log files that are kept for each severity level before all older log files are removed. The number has to be greater than 1 to keep at least the current log file open. If set to 0, all log files are retained and log rotation is effectively disabled.
Related Name
max_log_files
Default Value
10
API Name
max_log_files
Required
false

Impala Catalog Server Max Log Size

Description
The maximum size, in megabytes, per log file for Impala Catalog Server logs. Typically used by log4j or logback.
Related Name
Default Value
200 MiB
API Name
max_log_size
Required
false

Monitoring

Catalog Server Connectivity Health Test

Description	Enables the health test that verifies the Catalog Server is connected to the StateStore
Related Name	
Default Value	true
API Name	catalogserver_connectivity_health_enabled
Required	false

Catalog Server Connectivity Tolerance at Startup

Description	The amount of time to wait for the Catalog Server to fully start up and connect to the StateStore before enforcing the connectivity check.
Related Name	
Default Value	3 minute(s)
API Name	catalogserver_connectivity_tolerance
Required	false

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	catalogserver_fd_thresholds
Required	false

Impala Catalog Server Host Health Test

Description	When computing the overall Impala Catalog Server health, consider the host's health.
Related Name	
Default Value	true
API Name	

catalogserver_host_health_enabled
Required
false

Impala Catalog Server Process Health Test

Description
Enables the health test that the Impala Catalog Server's process state is consistent with the role configuration
Related Name
Default Value
true
API Name
catalogserver_scm_health_enabled
Required
false

Health Test Startup Tolerance

Description
The amount of time allowed after this role is started that failures of health tests that rely on communication with this role will be tolerated.
Related Name
Default Value
5 minute(s)
API Name
catalogserver_startup_tolerance
Required
false

Web Metric Collection

Description
Enables the health test that the Cloudera Manager Agent can successfully contact and gather metrics from the web server.
Related Name
Default Value
true
API Name
catalogserver_web_metric_collection_enabled
Required
false

Web Metric Collection Duration

Description
The health test thresholds on the duration of the metrics request to the web server.
Related Name

Default Value
Warning: 10 second(s), Critical: Never
API Name
catalogserver_web_metric_collection_thresholds
Required
false

Enable Health Alerts for this Role

Description
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name
Default Value
false
API Name
enable_config_alerts
Required
false

Heap Dump Directory Free Space Monitoring Absolute Thresholds

Description
The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory.
Related Name
Default Value
Warning: 10 GiB, Critical: 5 GiB
API Name
heap_dump_directory_free_space_absolute_thresholds
Required
false

Heap Dump Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Heap Dump Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

heap_dump_directory_free_space_percentage_thresholds

Required

false

Enable JMX Exporter (beta)

Description

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name

Default Value

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port

Description

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name

Default Value

API Name

jmx_exporter_port

Required

false

JMX Exporter configuration YAML

Description

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name

Default Value

API Name

jmx_exporter_yaml

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Navigator Audit Failure Thresholds

Description

The health test thresholds for failures encountered when monitoring audits within a recent period specified by the mgmt_navigator_failure_window configuration for the role. The value that can be specified for this threshold is the number of bytes of audits data that is left to be sent to audit server.

Related Name

mgmt.navigator.failure.thresholds

Default Value

Warning: Never, Critical: Any

API Name

mgmt_navigator_failure_thresholds

Required

false

Monitoring Period For Audit Failures

Description

The period to review when checking if audits are blocked and not getting processed.

Related Name

mgmt.navigator.failure.window

Default Value

20 minute(s)

API Name

mgmt_navigator_failure_window

Required

false

Navigator Audit Pipeline Health Check**Description**

Enable test of audit events processing pipeline. This will test if audit events are not getting processed by Audit Server for a role that generates audit.

Related Name

mgmt.navigator.status.check.enabled

Default Value

true

API Name

mgmt_navigator_status_check_enabled

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section

Description

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name

Default Value

false

API Name

otelcol_should_collect

Required

true

Resident Set Size Thresholds

Description

The health test thresholds on the resident size of the process.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

process_resident_set_size_thresholds

Required

false

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part of the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.

- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

`role_triggers`

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

`unexpected_exits_thresholds`

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

5 minute(s)

API Name

`unexpected_exits_window`

Required

false

Other

Enable Catalog Server Web Server

Description	Enable/Disable Catalog Server web server. This web server contains useful information about Catalog Server daemon.
Related Name	enable_webserver
Default Value	true
API Name	catalogd_enable_webserver
Required	false

Force the Catalog Server active

Description	Force the Catalog Server to be always active under HA mode if it is online.
Related Name	force_catalogd_active
Default Value	false
API Name	force_catalogd_active
Required	false

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	rlimit_fds
Required	false

Ports and Addresses

Catalog Server Service Port

Description	Port where Catalog Server is exported.
Related Name	

	catalog_service_port
Default Value	26000
API Name	catalog_service_port
Required	false

Catalog Server HTTP Server Port

Description	Port where Catalog Server debug web server runs.
Related Name	webserver_port
Default Value	25020
API Name	catalogserver_webserver_port
Required	false

Resource Management

Java Heap Size of Catalog Server in Bytes

Description	Maximum size in bytes for the Java Process heap memory. Passed to Java -Xmx.
Related Name	
Default Value	4 GiB
API Name	catalogd_embedded_jvm_heapsize
Required	false

Cgroup CPU Shares

Description	Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name	cpu.shares
Default Value	1024
API Name	rm_cpu_shares
Required	

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Catalog Server Webserver TLS/SSL Server Certificate File (PEM Format)

Description

The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Catalog Server Webserver is acting as a TLS/SSL server. The certificate file must be in PEM format.

Related Name

webserver_certificate_file

Default Value**API Name**

webserver_certificate_file

Required

false

Catalog Server Web Server User Password

Description

Password for Catalog Server web server authentication.

webserver_htpassword_password

Required

false

Catalog Server Web Server Username

Description

Username for Catalog Server web server authentication.

Related Name	webserver_htpassword_user
Default Value	
API Name	webserver_htpassword_user
Required	false

Catalog Server Webserver TLS/SSL Server Private Key File (PEM Format)

Description	The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Catalog Server Webserver is acting as a TLS/SSL server. The certificate file must be in PEM format.
Related Name	webserver_private_key_file
Default Value	
API Name	webserver_private_key_file
Required	false

Catalog Server Webserver TLS/SSL Private Key Password

Description	The password for the private key in the Catalog Server Webserver TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.
Related Name	webserver_private_key_password_cmd
Default Value	
API Name	webserver_private_key_password_cmd
Required	false

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	100 MiB
API Name	stacks_collection_data_retention
Required	

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value

API Name

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name	stacks_collection_method
Default Value	jstack
API Name	stacks_collection_method
Required	false

Suppressions

Suppress Parameter Validation: Catalog Server Service Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server Service Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_catalog_service_port
Required	true

Suppress Parameter Validation: Catalog Server Command Line Argument Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server Command Line Argument Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_catalogd_cmd_args_safety_valve
Required	true

Suppress Parameter Validation: Impala Catalog Server Advanced Configuration Snippet (Safety Valve) for core-site.xml

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Catalog Server Advanced Configuration Snippet (Safety Valve) for core-site.xml parameter.
Related Name	
Default Value	false

API Name`role_config_suppression_catalogd_core_site_safety_valve`**Required**`true`**Suppress Parameter Validation: Catalog Server HBase Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server HBase Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_catalogd_hbase_conf_safety_valve`**Required**`true`**Suppress Parameter Validation: Catalog Server HDFS Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server HDFS Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_catalogd_hdfs_site_conf_safety_valve`**Required**`true`**Suppress Parameter Validation: Catalog Server Hive Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server Hive Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_catalogd_hive_conf_safety_valve`**Required**`true`

Suppress Parameter Validation: Java Configuration Options for Catalog Server**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Configuration Options for Catalog Server parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_catalogd_java_opts

Required

true

Suppress Parameter Validation: Impala Catalog Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Catalog Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

false

API Name

role_config_suppression_catalogserver_role_env_safety_valve

Required

true

Suppress Parameter Validation: Catalog Server HTTP Server Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server HTTP Server Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_catalogserver_webserver_port

Required

true

Suppress Configuration Validator: CDH Version Validator**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator
Required
true

Suppress Parameter Validation: Catalog Server Core Dump Directory

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server Core Dump Directory parameter.
Related Name
Default Value
false
API Name
role_config_suppression_core_dump_dir
Required
true

Suppress Parameter Validation: JMX Exporter Port

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.
Related Name
Default Value
false
API Name
role_config_suppression_jmx_exporter_port
Required
true

Suppress Parameter Validation: JMX Exporter configuration YAML

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.
Related Name
Default Value
false
API Name
role_config_suppression_jmx_exporter_yaml
Required
true

Suppress Parameter Validation: Catalog Server Log Directory

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server Log Directory parameter.
Related Name

Default Value

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Catalog Server Breakpad Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server Breakpad Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_minidump_path

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_extensions
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_processors
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_receivers
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_password
Required	

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Parameter Validation: Catalog Server Webserver TLS/SSL Server Certificate File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server Webserver TLS/SSL Server Certificate File (PEM Format) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_certificate_file

Required

true

Suppress Parameter Validation: Catalog Server Web Server User Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server Web Server User Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_htpassword_password

Required

true

Suppress Parameter Validation: Catalog Server Web Server Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server Web Server Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_htpassword_user

Required

true

Suppress Parameter Validation: Catalog Server Webserver TLS/SSL Server Private Key File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server Webserver TLS/SSL Server Private Key File (PEM Format) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_private_key_file

Required

true

Suppress Parameter Validation: Catalog Server Webserver TLS/SSL Private Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Catalog Server Webserver TLS/SSL Private Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_private_key_password_cmd

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_catalogserver_audit_health

Required

true

Suppress Health Test: StateStore Connectivity**Description**

Whether to suppress the results of the StateStore Connectivity health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_catalogserver_connectivity

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_catalogserver_file_descriptor

Required

true

Suppress Health Test: Heap Dump Directory Free Space**Description**

Whether to suppress the results of the Heap Dump Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_catalogserver_heap_dump_directory_free_space

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_catalogserver_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_catalogserver_log_directory_free_space

Required

true

Suppress Health Test: Resident Set Size**Description**

Whether to suppress the results of the Resident Set Size health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_catalogserver_memory_rss_health

Required

true

Suppress Health Test: Otelcol Health**Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_catalogserver_otelcol_health

Required

true

Suppress Health Test: Ranger Plugin Hdfs Spool Directory Size**Description**

Whether to suppress the results of the Ranger Plugin Hdfs Spool Directory Size health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_catalogserver_ranger_plugin_hdfs_spool_directory_size_health

Required

true

Suppress Health Test: Ranger Plugin Solr Spool Directory Size**Description**

Whether to suppress the results of the Ranger Plugin Solr Spool Directory Size health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_catalogserver_ranger_plugin_solr_spool_directory_size_health

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_catalogserver_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_catalogserver_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_catalogserver_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value	false
API Name	role_health_suppression_catalogserver_unexpected_exits
Required	true

Suppress Health Test: Web Server Status

Description	Whether to suppress the results of the Web Server Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_catalogserver_web_metric_collection
Required	true

Impala Daemon

Advanced

Abort on Config Error

Description	Abort Impala startup if there are improper configs or running on unsupported hardware.
Related Name	abort_on_config_error
Default Value	true
API Name	abort_on_config_error
Required	false

Impala Daemon Core Dump Directory

Description	Directory where an Impala Daemon core dump is placed.
Related Name	core_dump_dir
Default Value	/var/log/impalad
API Name	core_dump_dir

Required

false

Impala Daemon Max Client Connections**Description**

Maximum number of concurrent client connections allowed. This determines how many queries can run simultaneously. When more clients try to connect to Impala than the value of this setting, the later arriving clients have to wait until previous clients disconnect. Setting this value too high could negatively impact query latency.

Related Name

fe_service_threads

Default Value

64

API Name

fe_service_threads

Required

false

Impala Daemon Hive Metastore Connection Retries**Description**

Number of retry attempts the Impala Daemon will make when connecting to the Hive Metastore Server. By default, the Impala Daemon waits one second between retries.

Related Name

hive.metastore.connect.retries

Default Value

5

API Name

hive_metastore_connect_retries

Required

false

Impala Daemon Hive Metastore Connection Timeout**Description**

Timeout for requests to the Hive Metastore Server from Impala. Consider increasing this if you have tables with a lot of metadata and see timeout errors.

Related Name

hive.metastore.client.socket.timeout

Default Value

1 hour(s)

API Name

hive_metastore_timeout

Required

false

Impala Daemon HDFS Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a string to be inserted into hdfs-site.xml for this role only.

Related Name

Default Value

API Name

impala_hdfs_site_conf_safety_valve

Required

false

Impala Daemon Hive Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into hive-site.xml for this role only.

Related Name

Default Value

API Name

impala_hive_conf_safety_valve

Required

false

Impala Daemon Llama Site Advanced Configuration Snippet (Safety Valve)

Description

An XML snippet to append to llama-site.xml for Impala Daemons. This configuration only has effect on Impala versions 1.3 or greater.

Related Name

Default Value

API Name

impala_llama_site_conf_safety_valve

Required

false

Impala Daemon Command Line Argument Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be added (verbatim) to Impala Daemon command-line flags. Key names should begin with a hyphen(-). For example: -log_filename=foo.log

Related Name

Default Value

API Name

impalad_cmd_args_safety_valve

Required

false

Impala Daemon Advanced Configuration Snippet (Safety Valve) for core-site.xml

Description

For advanced use only. A string to be inserted into core-site.xml for this role only.

Related Name**Default Value****API Name**

impalad_core_site_safety_valve

Required

false

Java Configuration Options for Impala Daemon

Description

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here. Note: When CM version is 6.3.0 or greater, {{JAVA_GC_ARGS}} will be replaced by JVM Garbage Collection arguments based on the runtime Java JVM version.

Related Name

Impala Daemon Java Options

Default Value**API Name**

impalad_embedded_java_opts

Required

false

Impala Daemon Fair Scheduler Advanced Configuration Snippet (Safety Valve)

Description

An XML string to use verbatim for the contents of fair-scheduler.xml for Impala Daemons. This configuration only has effect on Impala versions 1.3 or greater.

Related Name**Default Value****API Name**

impalad_fair_scheduler_safety_valve

Required

false

Impala Daemon HBase Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into hbase-site.xml for this role only.

Related Name**Default Value****API Name**

impalad_hbase_conf_safety_valve

Required

false

Result Cache Maximum Size

Description

Maximum number of query results a client may request to be cached on a per-query basis to support restarting fetches. This option guards against unreasonably large result caches requested by clients. Requests exceeding this maximum will be rejected.

Related Name

max_result_cache_size

Default Value

100000

API Name

impalad_result_cache_max_size

Required

false

Impala Daemon Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

IMPALAD_role_env_safety_valve

Required

false

Llama Maximum Request Attempts

Description

Maximum number of times a request to reserve, expand, or release resources is attempted until the request is cancelled.

Related Name

llama_max_request_attempts

Default Value

5

API Name

llama_max_request_attempts

Required

false

Llama Registration Timeout Seconds

Description

Maximum number of seconds that Impala attempts to register or re-register with Llama. If registration is unsuccessful, Impala cancels the action with an error, which could result in an impalad startup failure or a cancelled query. A setting of -1 seconds means try indefinitely.

Related Name

llama_registration_timeout_secs

Default Value
30 second(s)
API Name
llama_registration_timeout_secs
Required
false

Llama Registration Wait Seconds

Description
Number of seconds to wait between attempts during Llama registration.
Related Name
llama_registration_wait_secs
Default Value
3 second(s)
API Name
llama_registration_wait_secs
Required
false

Impala Daemon Logging Advanced Configuration Snippet (Safety Valve)

Description
For advanced use only, a string to be inserted into log4j.properties for this role only.
Related Name
Default Value
API Name
log4j_safety_valve
Required
false

Impala Daemon Max Breakpad Dump Files

Description
Maximum number of Breakpad dump files stored by Impala Daemon Role.
Related Name
max_minidumps
Default Value
9
API Name
max_minidumps
Required
false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name

Default Value

false

API Name

metric_config_auto_refresh

Required

false

Impala Daemon Breakpad Dump Directory

Description

Directory for storing Impala Daemon Breakpad dumps.

Related Name

minidump_path

Default Value

/var/log/impala-minidumps

API Name

minidump_path

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name

Default Value

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

true

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs**Impala Daemon Audit Log Directory****Description**

The directory in which Impala daemon audit event log files are written. If "Impala Audit Event Generation" property is enabled, Impala will generate its audit logs in this directory.

Related Name

audit_event_log_dir

Default Value

/var/log/impalad/audit

API Name

audit_event_log_dir

Required

true

Enable Impala Audit Event Generation**Description**

Enables audit event generation by Impala daemons. The audit log file will be placed in the directory specified by 'Impala Daemon Audit Log Directory' parameter.

Related Name

enable_audit_event_log

Default Value

	false
API Name	
	enable_audit_event_log
Required	
	false

Enable Impala Lineage Generation

Description	Enables lineage generation by Impala daemons. The lineage log file is placed in the directory specified by the 'Impala Daemon Lineage Log Directory' parameter.
Related Name	
	enable_lineage_log
Default Value	
	true
API Name	
	enable_lineage_log
Required	
	false

Impala Daemon Lineage Log Directory

Description	The directory in which Impala daemon lineage log files are written. If "Impala Lineage Generation" property is enabled, Impala generates its lineage logs in this directory.
Related Name	
	lineage_event_log_dir
Default Value	
	/var/log/impalad/lineage
API Name	
	lineage_event_log_dir
Required	
	true

Impala Daemon Log Directory

Description	Directory where Impala Daemon will place its log files.
Related Name	
	log_dir
Default Value	
	/var/log/impalad
API Name	
	log_dir
Required	
	false

Impala Daemon Logging Threshold

Description

The minimum log level for Impala Daemon logs

Related Name**Default Value**

INFO

API Name

log_threshold

Required

false

Impala Daemon Verbose Log Level

Description

Verbose logging level for the GLog logger. These messages are always logged at 'INFO' log level, so this setting has no effect if Logging Threshold is set to 'WARN' or above.

Related Name

GLOG_v

Default Value

1

API Name

log_verbose_level

Required

false

Impala Daemon Log Buffer Level

Description

Buffer log messages logged at this level or lower (-1 means don't buffer; 0 means buffer INFO only; 1 means buffer WARNING only, ...)

Related Name

logbuflevel

Default Value

0

API Name

logbuflevel

Required

false

Impala Daemon Maximum Audit Log File Size

Description

The maximum size (in queries) of the Impala Daemon audit event log file before a new one is created.

Related Name

max_audit_event_log_file_size

Default Value

5000 line(s)

API Name	max_audit_event_log_file_size
Required	false

Impala Daemon Maximum Lineage Log File Size

Description	The maximum size (in entries) of the Impala daemon lineage log file before a new one is created.
Related Name	max_lineage_log_file_size
Default Value	5000 line(s)
API Name	max_lineage_log_file_size
Required	false

Impala Maximum Log Files

Description	The number of log files that are kept for each severity level before all older log files are removed. The number has to be greater than 1 to keep at least the current log file open. If set to 0, all log files are retained and log rotation is effectively disabled.
Related Name	max_log_files
Default Value	10
API Name	max_log_files
Required	false

Impala Daemon Max Log Size

Description	The maximum size, in megabytes, per log file for Impala Daemon logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB
API Name	max_log_size
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts
Required	false

Query Monitoring Timeout

Description	The timeout used by the Cloudera Manager Agent's query monitor when communicating with the Impala Daemon web server, specified in seconds.
Related Name	
Default Value	15.0 second(s)
API Name	executing_queries_timeout_seconds
Required	false

Heap Dump Directory Free Space Monitoring Absolute Thresholds

Description	The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory.
Related Name	
Default Value	Warning: 10 GiB, Critical: 5 GiB

API Name

heap_dump_directory_free_space_absolute_thresholds

Required

false

Heap Dump Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Heap Dump Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

heap_dump_directory_free_space_percentage_thresholds

Required

false

Query Monitoring Failures Thresholds**Description**

The health test thresholds for failures encountered when monitoring queries within a recent period specified by the `impala_query_monitoring_failure_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

impala_query_monitoring_failure_thresholds

Required

false

Monitoring Period For Query Monitoring Failures**Description**

The period to review when computing query monitoring failures.

Related Name**Default Value**

5 minute(s)

API Name

impala_query_monitoring_failure_window

Required

false

Impala Daemon Query Collection Status Health Check**Description**

Enables the health check that determines if query collection for the Impala Daemon is successful.

Related Name

Default Value	true
API Name	impala_query_monitoring_status_check_enabled
Required	false

Impala Daemon Connectivity Health Test

Description	Enables the health test that verifies the Impala Daemon is connected to the StateStore.
Related Name	
Default Value	true
API Name	impalad_connectivity_health_enabled
Required	false

Impala Daemon Connectivity Tolerance at Startup

Description	The amount of time to wait for the Impala Daemon to fully start up and connect to the StateStore before enforcing the connectivity check.
Related Name	
Default Value	3 minute(s)
API Name	impalad_connectivity_tolerance
Required	false

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	impalad_fd_thresholds
Required	false

Impala Daemon Concurrent Client Connections Monitoring Percentage Thresholds

Description

The health check thresholds for monitoring of the number of concurrent client connections to Impala Daemon. Specified as a percentage of the maximum client connections parameter.

Related Name

Default Value

Warning: 80.0 %, Critical: 95.0 %

API Name

impalad_frontend_connections_thresholds

Required

false

Impala Daemon Host Health Test

Description

When computing the overall Impala Daemon health, consider the host's health.

Related Name

Default Value

true

API Name

impalad_host_health_enabled

Required

false

Pause Duration Thresholds

Description

The health test thresholds for the weighted average extra time the pause monitor spent paused. Specified as a percentage of elapsed wall clock time.

Related Name

Default Value

Warning: 30.0, Critical: 60.0

API Name

impalad_pause_duration_thresholds

Required

false

Pause Duration Monitoring Period

Description

The period to review when computing the moving average of extra time the pause monitor spent paused.

Related Name

Default Value

5 minute(s)

API Name

impalad_pause_duration_window

Required

false

Impala Daemon Ready Status Health Check

Description	Enables the health check that determines if the Impala daemon is ready to process queries.
Related Name	
Default Value	true
API Name	impalad_ready_status_check_enabled
Required	false

Impala Daemon Ready Status Startup Tolerance

Description	The amount of time at Impala Daemon startup allowed for the Impala Daemon to start accepting new queries for processing.
Related Name	
Default Value	3 minute(s)
API Name	impalad_ready_status_check_startup_tolerance
Required	false

Impala Daemon Process Health Test

Description	Enables the health test that the Impala Daemon's process state is consistent with the role configuration
Related Name	
Default Value	true
API Name	impalad_scm_health_enabled
Required	false

Impala Daemon Scratch Directories Free Space Monitoring Absolute Thresholds

Description	The health test thresholds for monitoring of free space on the filesystem that contains this role's Impala Daemon Scratch Directories.
Related Name	
Default Value	Warning: 10 GiB, Critical: 5 GiB
API Name	impalad_scratch_directories_free_space_absolute_thresholds

Required

false

Impala Daemon Scratch Directories Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's Impala Daemon Scratch Directories. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Impala Daemon Scratch Directories Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

impalad_scratch_directories_free_space_percentage_thresholds

Required

false

Web Metric Collection**Description**

Enables the health test that the Cloudera Manager Agent can successfully contact and gather metrics from the web server.

Related Name**Default Value**

true

API Name

impalad_web_metric_collection_enabled

Required

false

Web Metric Collection Duration**Description**

The health test thresholds on the duration of the metrics request to the web server.

Related Name**Default Value**

Warning: 10 second(s), Critical: Never

API Name

impalad_web_metric_collection_thresholds

Required

false

Enable JMX Exporter (beta)**Description**

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name
Default Value
false
API Name
jmx_exporter_enabled
Required
true

JMX Exporter Port

Description
JMX Exporter needs a port to implement a Prometheus exporter.
Related Name
Default Value
API Name
jmx_exporter_port
Required
false

JMX Exporter configuration YAML

Description
This configuration is passed to JMX Exporter as it is. See the JMX Exporter documentation.
Related Name
Default Value
API Name
jmx_exporter_yaml
Required
false

Log Directory Free Space Monitoring Absolute Thresholds

Description
The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
Related Name
Default Value
Warning: 10 GiB, Critical: 5 GiB
API Name
log_directory_free_space_absolute_thresholds
Required
false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Navigator Audit Failure Thresholds**Description**

The health test thresholds for failures encountered when monitoring audits within a recent period specified by the mgmt_navigator_failure_window configuration for the role. The value that can be specified for this threshold is the number of bytes of audits data that is left to be sent to audit server.

Related Name

mgmt.navigator.failure.thresholds

Default Value

Warning: Never, Critical: Any

API Name

mgmt_navigator_failure_thresholds

Required

false

Monitoring Period For Audit Failures**Description**

The period to review when checking if audits are blocked and not getting processed.

Related Name

mgmt.navigator.failure.window

Default Value

20 minute(s)

API Name

mgmt_navigator_failure_window

Required

false

Navigator Audit Pipeline Health Check**Description**

Enable test of audit events processing pipeline. This will test if audit events are not getting processed by Audit Server for a role that generates audit.

Related Name

mgmt.navigator.status.check.enabled

Default Value

true

API Name

mgmt_navigator_status_check_enabled

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/$ROLE_NAME: endpoint:
$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards.
Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Resident Set Size Thresholds**Description**

The health test thresholds on the resident size of the process.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_resident_set_size_thresholds

Required

false

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: Any, Critical: Any

API Name

process_swap_memory_thresholds

Required

false

Query Monitoring Full Sync Period

Description

The full sync period of the Impala query monitor in the Cloudera Manager Agent, specified in minutes. When a full sync is happening, all query profiles are sent over regardless of having been updated or not. If set to zero, a full sync is performed at each polling period.

Related Name**Default Value**

3.0 minute(s)

API Name

query_monitoring_full_sync_period_minutes

Required

false

Query Monitoring Period

Description

The polling period of the Impala query monitor in the Cloudera Manager Agent, specified in seconds. If set to zero, query monitoring is disabled.

Related Name**Default Value**

120.0 second(s)

API Name

query_monitoring_period_seconds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name

Default Value

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Impala Daemon Data Cache Per Directory Capacity

Description

Maximum amount of local disk space Impala will use per daemon in each of the configured directories for caching of remote read data.

Related Name

Default Value

API Name

datacache_capacity

Required

false

Impala Daemon Data Cache Directories

Description

Directories Impala Daemon will use for caching of remote read data.

Related Name

Default Value

API Name

datacache_dirs

Required

false

Enable Local Data Cache

Description

Enable the local Impala Daemon data cache for caching of remote reads.

Related Name

Default Value

false

API Name

datacache_enabled

Required

false

Impala Daemon Default Query Options

Description

A list of key-value pairs of additional query options to pass to the Impala Daemon command line, separated by ','.

Related Name

default_query_options

Default Value

default_file_format=parquet default_transactional_type=insert_only

API Name

default_query_options

Required

false

Impala Graceful Shutdown Deadline

Description

Deadline (in seconds) for the graceful shutdown process of Impala Daemons. Once this deadline is reached, the daemon shuts down regardless of any running queries. A value of 0 means immediate shutdown.

Related Name**Default Value**

5 minute(s)

API Name

impala_graceful_shutdown_deadline

Required

false

Impala Daemons Load Balancer

Description

Address of the load balancer used for Impala daemons. Should be specified in host:port format, where the port corresponds to the Beeswax protocol. If this is specified and Kerberos is enabled, Cloudera Manager adds a principal for 'impala/*load_balancer_host*@*realm*' to the keytab for all Impala daemons.

Related Name**Default Value****API Name**

impalad_load_balancer

Required

false

Maximum Cached File Handles

Description

Maximum number of cached HDFS file handles. Caching HDFS file handles reduces the number of new file handles opened and thus reduces the load on the HDFS NameNode.. Each cached file handle consumes a small amount of memory on the Impala Daemon. If set to zero, the file handle caching is disabled.

Related Name

	max_cached_file_handles
Default Value	20000
API Name	impalad_max_cached_file_handles
Required	false

Impala Daemon Specialization

Description	Configures Impala daemons to only execute queries or perform query coordination. When this setting is in use, daemons specializing in both tasks must exist.
Related Name	
Default Value	NO_SPECIALIZATION
API Name	impalad_specialization
Required	false

Unused Cached File Handle Timeout

Description	Maximum time, in seconds, that an unused HDFS file handle will remain in the HDFS file handle cache. When the underlying file for a cached file handle is deleted, the disk space may not be freed until the cached file handle is removed from the cache. Specifying this timeout allows the disk space of deleted files to be freed in a predictable period of time. If set to zero, unused cached HDFS file handles do not time out.
Related Name	unused_file_handle_timeout_sec
Default Value	21600
API Name	impalad_unused_file_handle_timeout_sec
Required	false

Local UDF Library Dir

Description	User-defined function (UDF) libraries are copied from HDFS into this local directory.
Related Name	local_library_dir
Default Value	/var/lib/impala/udfs
API Name	local_library_dir

Required
false

Impala Daemon Scratch Directories

Description
Directories where Impala Daemon will write data such as spilling information to disk to free up memory. This can potentially be large amounts of data.
Related Name
scratch_dirs
Default Value
API Name
scratch_dirs
Required
false

Performance

Maximum Process File Descriptors

Description
If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name
Default Value
API Name
rlimit_fds
Required
false

Ports and Addresses

Impala Daemon Backend Port

Description
Port on which thrift-based ImpalaInternalService is exported.
Related Name
be_port
Default Value
22000
API Name
be_port
Required
false

Impala Daemon Beeswax Port

Description
Port on which Beeswax client requests are served by Impala Daemons.
Related Name

beeswax_port
Default Value
21000
API Name
beeswax_port
Required
false

Impala Daemon HiveServer2 HTTP Port

Description
Port on which HiveServer2 client requests are served by Impala Daemons via HTTP.
Related Name
hs2_http_port
Default Value
28000
API Name
hs2_http_port
Required
false

Impala Daemon HiveServer2 Port

Description
Port on which HiveServer2 client requests are served by Impala Daemons via the thrift binary protocol.
Related Name
hs2_port
Default Value
21050
API Name
hs2_port
Required
false

Enable Impala Daemon Web Server

Description
Enable or disable the Impala Daemon web server. This web server contains useful information about Impala Daemon.
Related Name
enable_webserver
Default Value
true
API Name
impalad_enable_webserver
Required
false

Impala Daemon HTTP Server Port

Description	Port where Impala debug web server runs.
Related Name	webserver_port
Default Value	25000
API Name	impalad_webserver_port
Required	false

Impala Daemon KRPC Port

Description	Port on which KRPC-based ImpalaInternalService is exported.
Related Name	krpc_port
Default Value	27000
API Name	krpc_port
Required	false

Llama Callback Port

Description	Port where Llama notification callback should be started
Related Name	llama_callback_port
Default Value	0
API Name	llama_callback_port
Required	false

Second Statestore Host Name

Description	The hostname of the second statestore instance. Valid when statestore HA enabled.
Related Name	state_store_2_host
Default Value	
API Name	state_store_2_host

Required
false

Second Statestore Port

Description
The port of statestore service running on the second statestore instance. Valid when statestore HA enabled.
Related Name
state_store_2_port
Default Value
24000
API Name
state_store_2_port
Required
false

Statestore Host Name

Description
The hostname of the statestore instance. When statestore HA is enabled, this stands for the first statestore instance.
Related Name
state_store_host
Default Value
API Name
state_store_host
Required
false

Statestore Port

Description
The port of statestore service running on the statestore instance. When statestore HA is enabled, this stands for the first statestore instance.
Related Name
state_store_port
Default Value
24000
API Name
state_store_port
Required
false

StateStoreSubscriber Service Port

Description
Port where StateStoreSubscriberService is running.
Related Name

	state_store_subscriber_port
Default Value	23000
API Name	state_store_subscriber_port
Required	false

Resource Management

Java Heap Size of Impala Daemon in Bytes

Description	Maximum size in bytes for the Java Process heap memory. Passed to Java -Xmx.
Related Name	Impala Daemon JVM Heap
Default Value	4 GiB
API Name	impalad_embedded_jvm_heapsize
Required	false

Idle Query Timeout

Description	The time that a query may be idle (i.e. no processing work is done and no updates are received from the client) before it is cancelled. If 0, idle queries are never expired.
Related Name	idle_query_timeout
Default Value	0 second(s)
API Name	impalad_idle_query_timeout
Required	false

Idle Session Timeout

Description	The time that a session may be idle before it is closed (and all running queries cancelled) by Impala. If 0, idle sessions are never expired.
Related Name	idle_session_timeout
Default Value	0 second(s)
API Name	impalad_idle_session_timeout

Required

false

Impala Daemon Memory Limit**Description**

Memory limit for Impala Daemon, enforced by the daemon itself. This limit does not include memory consumed by the daemon's embedded JVM. The Impala Daemon uses up to this amount of memory for query processing, cached data, network buffers, background operations, etc. If exceeded, queries running on the Impala Daemon will be killed until the Impala Daemon is under the memory limit.

Related Name

mem_limit

Default Value**API Name**

impalad_memory_limit

Required

false

Cgroup CPU Shares**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Disk Spill Encryption

Description

Encrypt and verify the integrity of all data spilled to disk as part of a query. This feature is only supported for Impala 2.0 and higher and CDH 5.2 and higher (which includes Impala 2.0).

Related Name

disk_spill_encryption

Default Value

false

API Name

disk_spill_encryption

Required

false

LDAP Server CA Certificate

Description

The location on disk of the certificate, in .pem format, used to confirm the authenticity of the LDAP server certificate. This is the Certificate Authority (CA) certificate, and it was used to sign the LDAP server certificate. If not set, all certificates are trusted, which means that an attacker could potentially intercept otherwise encrypted usernames and passwords.

Related Name

ldap_ca_certificate

Default Value

API Name

impalad_ldap_ca_certificate

Required

false

JWKS Pull Timeout

Description

The time in seconds to wait for the JWKS to be downloaded from the specified URL before timing out.

Related Name

jwks_pulling_timeout_s

Default Value

10 second(s)

API Name

jwks_pulling_timeout_s

Required

false

JWKS Update Frequency

Description

The time in seconds to wait between re-downloading the JWKS from the specified URL.

Related Name

	jwks_update_frequency_s
Default Value	10 second(s)
API Name	jwks_update_frequency_s
Required	false

JWKS URL

Description	URL where the JSON Web Key Set (JWKS) can be downloaded for JWT verification.
Related Name	jwks_url
Default Value	
API Name	jwks_url
Required	false

Verify JWKS Server Certificate

Description	Specifies if the TLS certificate of the JWKS server is verified when retrieving the JWKS from the specified JWKS URL. This should only be set to false for development / testing.
Related Name	jwks_verify_server_certificate
Default Value	true
API Name	jwks_verify_server_certificate
Required	false

JWT Allow Without TLS

Description	Determines if JWT authentication is allowed without TLS being enabled on connections to the Impala daemon.
Related Name	jwt_allow_without_tls
Default Value	false
API Name	jwt_allow_without_tls
Required	false

Username JWT Custom Claim

Description	JWT claim that contains the username to use when authenticating with Impala.
Related Name	jwt_custom_claim_username
Default Value	
API Name	jwt_custom_claim_username
Required	false

JWT Token Authentication

Description	Determines if JWT token authentication is enabled.
Related Name	jwt_token_auth
Default Value	false
API Name	jwt_token_auth
Required	false

JWT Validate Signature

Description	Determines if the signatures on incoming JWTs are validated against the JWKS.
Related Name	jwt_validate_signature
Default Value	true
API Name	jwt_validate_signature
Required	false

Impala Daemon Webserver TLS/SSL Server Certificate File (PEM Format)

Description	The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Impala Daemon Webserver is acting as a TLS/SSL server. The certificate file must be in PEM format.
Related Name	webserver_certificate_file
Default Value	
API Name	

webserver_certificate_file
Required
false

Impala Daemon Web Server User Password

Description
Password for Impala Daemon webserver authentication.
Related Name
webserver_htpassword_password
Default Value
API Name
webserver_htpassword_password
Required
false

Impala Daemon Web Server Username

Description
Username for Impala Daemon webserver authentication.
Related Name
webserver_htpassword_user
Default Value
API Name
webserver_htpassword_user
Required
false

Impala Daemon Webserver TLS/SSL Server Private Key File (PEM Format)

Description
The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Impala Daemon Webserver is acting as a TLS/SSL server. The certificate file must be in PEM format.
Related Name
webserver_private_key_file
Default Value
API Name
webserver_private_key_file
Required
false

Impala Daemon Webserver TLS/SSL Private Key Password

Description
The password for the private key in the Impala Daemon Webserver TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.
Related Name
webserver_private_key_password_cmd

Default Value
API Name
webserver_private_key_password_cmd
Required
false

Stacks Collection

Stacks Collection Data Retention

Description
The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name
stacks_collection_data_retention
Default Value
100 MiB
API Name
stacks_collection_data_retention
Required
false

Stacks Collection Directory

Description
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name
stacks_collection_directory
Default Value
API Name
stacks_collection_directory
Required
false

Stacks Collection Enabled

Description
Whether or not periodic stacks collection is enabled.
Related Name
stacks_collection_enabled
Default Value
false
API Name
stacks_collection_enabled
Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Parameter Validation: Impala Daemon Audit Log Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Audit Log Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_audit_event_log_dir

Required

true

Suppress Parameter Validation: Impala Daemon Backend Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Backend Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_be_port

Required

true

Suppress Parameter Validation: Impala Daemon Beeswax Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Beeswax Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_beeswax_port

Required

true

Suppress Configuration Validator: CDH Version Validator**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Impala Daemon Core Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Core Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_core_dump_dir

Required

true

Suppress Parameter Validation: Impala Daemon Data Cache Directories

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Data Cache Directories parameter.

Related Name

Default Value

false

API Name

role_config_suppression_datacache_dirs

Required

true

Suppress Configuration Validator: Impala Daemon Default Memory Limit Validator

Description

Whether to suppress configuration warnings produced by the Impala Daemon Default Memory Limit Validator configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_default_impalad_memory_limit_validator

Required

true

Suppress Parameter Validation: Impala Daemon Default Query Options

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Default Query Options parameter.

Related Name

Default Value

false

API Name

role_config_suppression_default_query_options

Required

true

Suppress Parameter Validation: Impala Daemon HiveServer2 HTTP Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon HiveServer2 HTTP Port parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hs2_http_port

Required

true

Suppress Parameter Validation: Impala Daemon HiveServer2 Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon HiveServer2 Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hs2_port

Required

true

Suppress Configuration Validator: Impala Audit Enabled Validator**Description**

Whether to suppress configuration warnings produced by the Impala Audit Enabled Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_impala_audit_enabled_validator

Required

true

Suppress Parameter Validation: Impala Daemon HDFS Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon HDFS Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_impala_hdfs_site_conf_safety_valve

Required

true

Suppress Parameter Validation: Impala Daemon Hive Advanced Configuration Snippet (Safety Valve)**Description**

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Hive Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_impala_hive_conf_safety_valve
Required	true

Suppress Configuration Validator: Impala Lineage Enabled Validator

Description	Whether to suppress configuration warnings produced by the Impala Lineage Enabled Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_impala_lineage_enabled_validator
Required	true

Suppress Parameter Validation: Impala Daemon Llama Site Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Llama Site Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_impala_llama_site_conf_safety_valve
Required	true

Suppress Parameter Validation: Impala Daemon Command Line Argument Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Command Line Argument Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	

`role_config_suppression_impalad_cmd_args_safety_valve`**Required**`true`**Suppress Configuration Validator: Impala Daemon Command Line Arguments Safety Valve Validator****Description**

Whether to suppress configuration warnings produced by the Impala Daemon Command Line Arguments Safety Valve Validator configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_impalad_cmd_args_safety_valve_validator`**Required**`true`**Suppress Parameter Validation: Impala Daemon Advanced Configuration Snippet (Safety Valve) for core-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Advanced Configuration Snippet (Safety Valve) for core-site.xml parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_impalad_core_site_safety_valve`**Required**`true`**Suppress Parameter Validation: Java Configuration Options for Impala Daemon****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Configuration Options for Impala Daemon parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_impalad_embedded_java_opts`**Required**`true`**Suppress Parameter Validation: Impala Daemon Fair Scheduler Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Fair Scheduler Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_fair_scheduler_safety_valve

Required

true

Suppress Parameter Validation: Impala Daemon HBase Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon HBase Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_hbase_conf_safety_valve

Required

true

Suppress Parameter Validation: LDAP Server CA Certificate

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP Server CA Certificate parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_ldap_ca_certificate

Required

true

Suppress Parameter Validation: Impala Daemons Load Balancer

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemons Load Balancer parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_load_balancer

Required

true

Suppress Parameter Validation: Impala Daemon Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_role_env_safety_valve

Required

true

Suppress Parameter Validation: Impala Daemon HTTP Server Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon HTTP Server Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_webserver_port

Required

true

Suppress Parameter Validation: JMX Exporter Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Parameter Validation: JMX Exporter configuration YAML**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.

Related Name

Default Value	false
API Name	role_config_suppression_jmx_exporter_yaml
Required	true

Suppress Parameter Validation: JWKS URL

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the JWKS URL parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_jwks_url
Required	true

Suppress Parameter Validation: Username JWT Custom Claim

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Username JWT Custom Claim parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_jwt_custom_claim_username
Required	true

Suppress Parameter Validation: Impala Daemon KRPC Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon KRPC Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_krpc_port
Required	true

Suppress Parameter Validation: Impala Daemon Lineage Log Directory

Description	
--------------------	--

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Lineage Log Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_lineage_event_log_dir
Required	true

Suppress Parameter Validation: Llama Callback Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Llama Callback Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_llama_callback_port
Required	true

Suppress Parameter Validation: Local UDF Library Dir

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Local UDF Library Dir parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_local_library_dir
Required	true

Suppress Parameter Validation: Impala Daemon Logging Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Logging Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Impala Daemon Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Impala Daemon Breakpad Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Breakpad Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_minidump_path

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

	false
API Name	
	role_config_suppression_otelcol_exporters
Required	
	true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_otelcol_extensions
Required	
	true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_otelcol_processors
Required	
	true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_otelcol_receivers
Required	
	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description	
-------------	--

	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_password
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_url
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_user
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_service
Required	

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name

Default Value

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name

Default Value

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Impala Daemon Scratch Directories

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Scratch Directories parameter.

Related Name

Default Value

false

API Name

role_config_suppression_scratch_dirs

Required

true

Suppress Parameter Validation: Stacks Collection Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name

Default Value

false

API Name	role_config_suppression_stacks_collection_directory
Required	true

Suppress Parameter Validation: Second Statestore Host Name

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Second Statestore Host Name parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_state_store_2_host
Required	true

Suppress Parameter Validation: Statestore Host Name

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Statestore Host Name parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_state_store_host
Required	true

Suppress Parameter Validation: StateStoreSubscriber Service Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the StateStoreSubscriber Service Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_state_store_subscriber_port
Required	true

Suppress Configuration Validator: Impala Daemon Unlimited Memory Limit Validator

Description	Whether to suppress configuration warnings produced by the Impala Daemon Unlimited Memory Limit Validator configuration validator.
--------------------	--

Related Name**Default Value**

false

API Name

role_config_suppression_unlimited_impalad_memory_limit_validator

Required

true

Suppress Parameter Validation: Impala Daemon Webserver TLS/SSL Server Certificate File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Webserver TLS/SSL Server Certificate File (PEM Format) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_certificate_file

Required

true

Suppress Parameter Validation: Impala Daemon Web Server User Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Web Server User Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_htpassword_password

Required

true

Suppress Parameter Validation: Impala Daemon Web Server Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Web Server Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_htpassword_user

Required

true

Suppress Parameter Validation: Impala Daemon Webserver TLS/SSL Server Private Key File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Webserver TLS/SSL Server Private Key File (PEM Format) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_private_key_file

Required

true

Suppress Parameter Validation: Impala Daemon Webserver TLS/SSL Private Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Daemon Webserver TLS/SSL Private Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_private_key_password_cmd

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_audit_health

Required

true

Suppress Health Test: StateStore Connectivity**Description**

Whether to suppress the results of the StateStore Connectivity health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

	false
API Name	
	role_health_suppression_impalad_connectivity
Required	
	true

Suppress Health Test: File Descriptors

Description	Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	
	false
API Name	
	role_health_suppression_impalad_file_descriptor
Required	
	true

Suppress Health Test: Impala Concurrent Client Connections

Description	Whether to suppress the results of the Impala Concurrent Client Connections health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	
	false
API Name	
	role_health_suppression_impalad_frontend_connections
Required	
	true

Suppress Health Test: Heap Dump Directory Free Space

Description	Whether to suppress the results of the Heap Dump Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	
	false
API Name	
	role_health_suppression_impalad_heap_dump_directory_free_space
Required	
	true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_log_directory_free_space

Required

true

Suppress Health Test: Resident Set Size**Description**

Whether to suppress the results of the Resident Set Size health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_memory_rss_health

Required

true

Suppress Health Test: Otelcol Health**Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_impalad_otelcol_health

Required

true

Suppress Health Test: Pause Duration**Description**

Whether to suppress the results of the Pause Duration health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_pause_duration

Required

true

Suppress Health Test: Query Monitoring Status Check**Description**

Whether to suppress the results of the Query Monitoring Status Check health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_query_monitoring_status

Required

true

Suppress Health Test: Ranger Plugin Hdfs Spool Directory Size**Description**

Whether to suppress the results of the Ranger Plugin Hdfs Spool Directory Size health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_ranger_plugin_hdfs_spool_directory_size_health

Required

true

Suppress Health Test: Ranger Plugin Solr Spool Directory Size**Description**

Whether to suppress the results of the Ranger Plugin Solr Spool Directory Size health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_ranger_plugin_solr_spool_directory_size_health

Required

true

Suppress Health Test: Impala Daemon Ready Check**Description**

Whether to suppress the results of the Impala Daemon Ready Check health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_ready_status

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_scm_health

Required

true

Suppress Health Test: Impala Daemon Scratch Directories Free Space**Description**

Whether to suppress the results of the Impala Daemon Scratch Directories Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_impalad_scratch_directories_free_space

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_impalad_unexpected_exits

Required

true

Suppress Health Test: Web Server Status

Description	Whether to suppress the results of the Web Server Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_impalad_web_metric_collection
Required	true

Impala StateStore

Advanced

StateStore Core Dump Directory

Description	Directory where a StateStore core dump is placed.
Related Name	core_dump_dir
Default Value	/var/log/statestore
API Name	core_dump_dir
Required	false

Statestore Max Breakpad Dump Files

Description	Maximum number of Breakpad dump files stored by Statestore Role.
Related Name	max_minidumps
Default Value	9
API Name	max_minidumps
Required	false

Enable auto refresh for metric configurations

Description	When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.
Related Name	

Default Value
false
API Name
metric_config_auto_refresh
Required
false

Statestore Breakpad Dump Directory

Description
Directory for storing Statestore Breakpad dumps.
Related Name
minidump_path
Default Value
/var/log/impala-minidumps
API Name
minidump_path
Required
false

Automatically Restart Process

Description
When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.
Related Name
Default Value
true
API Name
process_auto_restart
Required
true

Enable Metric Collection

Description
Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.
Related Name
Default Value
true
API Name
process_should_monitor
Required
true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Statestore Command Line Argument Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be added (verbatim) to StateStore command line flags.

Related Name**Default Value****API Name**

statestore_cmd_args_safety_valve

Required

false

Impala StateStore Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

STATESTORE_role_env_safety_valve
Required
false

Logs

StateStore Log Directory

Description
Directory where StateStore will place its log files.
Related Name
log_dir
Default Value
/var/log/statestore
API Name
log_dir
Required
false

Impala StateStore Logging Threshold

Description
The minimum log level for Impala StateStore logs
Related Name
Default Value
INFO
API Name
log_threshold
Required
false

StateStore Verbose Log Level

Description
Verbose logging level for the GLog logger. These messages are always logged at 'INFO' log level, so this setting has no effect if Logging Threshold is set to 'WARN' or above.
Related Name
GLOG_v
Default Value
1
API Name
log_verbose_level
Required
false

StateStore Log Buffer Level

Description
Buffer log messages logged at this level or lower (-1 means don't buffer; 0 means buffer INFO only; 1 means buffer WARNING only, ...)

Related Name	logbuflevel
Default Value	0
API Name	logbuflevel
Required	false

StateStore Maximum Log Files

Description	The number of log files that are kept for each severity level before all older log files are removed. The number has to be greater than 1 to keep at least the current log file open. If set to 0, all log files are retained and log rotation is effectively disabled.
Related Name	max_log_files
Default Value	10
API Name	max_log_files
Required	false

Impala StateStore Max Log Size

Description	The maximum size, in megabytes, per log file for Impala StateStore logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB
API Name	max_log_size
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	

enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name
Default Value
false
API Name
enable_config_alerts
Required
false

Heap Dump Directory Free Space Monitoring Absolute Thresholds

Description
The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory.
Related Name
Default Value
Warning: 10 GiB, Critical: 5 GiB
API Name
heap_dump_directory_free_space_absolute_thresholds
Required
false

Heap Dump Directory Free Space Monitoring Percentage Thresholds

Description
The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Heap Dump Directory Free Space Monitoring Absolute Thresholds setting is configured.
Related Name
Default Value
Warning: Never, Critical: Never
API Name
heap_dump_directory_free_space_percentage_thresholds
Required
false

Log Directory Free Space Monitoring Absolute Thresholds

Description
The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
Related Name

Default Value

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Navigator Audit Failure Thresholds**Description**

The health test thresholds for failures encountered when monitoring audits within a recent period specified by the mgmt_navigator_failure_window configuration for the role. The value that can be specified for this threshold is the number of bytes of audits data that is left to be sent to audit server.

Related Name

mgmt.navigator.failure.thresholds

Default Value

Warning: Never, Critical: Any

API Name

mgmt_navigator_failure_thresholds

Required

false

Monitoring Period For Audit Failures**Description**

The period to review when checking if audits are blocked and not getting processed.

Related Name

mgmt.navigator.failure.window

Default Value

20 minute(s)

API Name

mgmt_navigator_failure_window

Required

false

Navigator Audit Pipeline Health Check

Description

Enable test of audit events processing pipeline. This will test if audit events are not getting processed by Audit Server for a role that generates audit.

Related Name

mgmt.navigator.status.check.enabled

Default Value

true

API Name

mgmt_navigator_status_check_enabled

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section

Description

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

extensions: basicauth/common: client_auth: username:
\$ROLE_PARAM(otelcol_remote_write_user) password:
'\$ROLE_PARAM(otelcol_remote_write_password)'

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name

Default Value

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Resident Set Size Thresholds**Description**

The health test thresholds on the resident size of the process.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_resident_set_size_thresholds

Required

false

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.
- streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]See the trigger rules documentation for more details on how to write triggers using tsquery.The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name

Default Value

[]

API Name

role_triggers

Required

true

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name

Default Value

Warning: 50.0 %, Critical: 70.0 %

API Name

statestore_fd_thresholds

Required

false

Impala StateStore Host Health Test

Description

When computing the overall Impala StateStore health, consider the host's health.

Related Name

Default Value

true

API Name

statestore_host_health_enabled

Required

false

Impala StateStore Process Health Test

Description

Enables the health test that the Impala StateStore's process state is consistent with the role configuration

Related Name

Default Value

true

API Name

statestore_scm_health_enabled

Required

false

Health Test Startup Tolerance

Description

The amount of time allowed after this role is started that failures of health tests that rely on communication with this role will be tolerated.

Related Name

Default Value

5 minute(s)

API Name

statestore_startup_tolerance

Required

false

Web Metric Collection

Description

Enables the health test that the Cloudera Manager Agent can successfully contact and gather metrics from the web server.

Related Name

Default Value

true

API Name

statestore_web_metric_collection_enabled

Required

false

Web Metric Collection Duration

Description

The health test thresholds on the duration of the metrics request to the web server.

Related Name

Default Value

Warning: 10 second(s), Critical: Never

API Name

statestore_web_metric_collection_thresholds

Required

false

Unexpected Exits Thresholds

Description

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name

Default Value	Warning: Never, Critical: Any
API Name	unexpected_exits_thresholds
Required	false

Unexpected Exits Monitoring Period

Description	The period to review when computing unexpected exits.
Related Name	
Default Value	5 minute(s)
API Name	unexpected_exits_window
Required	false

Other

Catalog HA Preemption Wait Period

Description	Wait period before choosing the primary catalog server.
Related Name	catalogd_ha_preemption_wait_period_ms
Default Value	10 second(s)
API Name	statestore_catalogd_ha_preemption_wait_period_ms
Required	false

Enable StateStore Web Server

Description	Enable/Disable StateStore web server. This web server contains useful information about StateStore daemon.
Related Name	enable_webserver
Default Value	true
API Name	statestore_enable_webserver
Required	false

Force the Statestore active

Description	Set to true to force the statestored instance to take active role. Valid when statestore HA enabled.
Related Name	statestore_force_active
Default Value	false
API Name	statestore_force_active
Required	false

Statestore HA Preemption Wait Period

Description	The time after which statestored designates itself in active role if the statestore does not receive negotiation request from its peer statestore during start up.
Related Name	statestore_ha_preemption_wait_period_ms
Default Value	10 second(s)
API Name	statestore_ha_preemption_wait_period_ms
Required	false

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	rlimit_fds
Required	false

StateStore Worker Threads

Description	Number of worker threads for the thread manager underlying the StateStore Thrift server.
Related Name	state_store_num_server_worker_threads
Default Value	4

API Name	state_store_num_server_worker_threads
Required	false

Maximum StateStore Pending Tasks

Description	Maximum number of tasks allowed to be pending at the thread manager underlying the StateStore Thrift server (0 allows infinitely many pending tasks)
Related Name	state_store_pending_task_count_max
Default Value	0
API Name	state_store_pending_task_count_max
Required	false

Ports and Addresses

Statestore HA Port

Description	The port of Thrift service for communication between two statestore instances in HA pair. Valid when statestore HA enabled.
Related Name	state_store_ha_port
Default Value	24020
API Name	state_store_ha_port
Required	false

Peer Statestore Port

Description	The port of Thrift service of peer statestore instance for statestore HA. Valid when statestore HA enabled.
Related Name	state_store_peer_ha_port
Default Value	24020
API Name	state_store_peer_ha_port
Required	false

Peer Statestore Host Name

Description	The hostname of peer statesore instance in HA pair. Valid when statestore HA enabled.
Related Name	state_store_peer_host
Default Value	
API Name	state_store_peer_host
Required	false

StateStore Service Port

Description	Port where StateStoreService is exported.
Related Name	state_store_port
Default Value	24000
API Name	state_store_port
Required	false

StateStore HTTP Server Port

Description	Port where StateStore debug web server runs.
Related Name	webserver_port
Default Value	25010
API Name	statestore_webserver_port
Required	false

Resource Management

Cgroup CPU Shares

Description	Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name	cpu.shares
Default Value	

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**StateStore Webserver TLS/SSL Server Certificate File (PEM Format)****Description**

The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when StateStore Webserver is acting as a TLS/SSL server. The certificate file must be in PEM format.

Related Name

webserver_certificate_file

Default Value**API Name**

webserver_certificate_file

Required

false

Statestore Web Server User Password**Description**

Password for Statestore webserver authentication.

Related Name

webserver_htpassword_password

Default Value**API Name**

webserver_htpassword_password

Required

false

Statestore Web Server Username

Description	Username for Statestore webserver authentication.
Related Name	webserver_htpassword_user
Default Value	
API Name	webserver_htpassword_user
Required	false

StateStore Webserver TLS/SSL Server Private Key File (PEM Format)

Description	The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when StateStore Webserver is acting as a TLS/SSL server. The certificate file must be in PEM format.
Related Name	webserver_private_key_file
Default Value	
API Name	webserver_private_key_file
Required	false

StateStore Webserver TLS/SSL Private Key Password

Description	The password for the private key in the StateStore Webserver TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.
Related Name	webserver_private_key_password_cmd
Default Value	
API Name	webserver_private_key_password_cmd
Required	false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	

role_config_suppression_cdh_version_validator
Required
true

Suppress Parameter Validation: StateStore Core Dump Directory

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the StateStore Core Dump Directory parameter.

Enable Dynamic Resource Pools

Description

Use Dynamic Resource Pools to configure Impala admission control or RM for this Impala service. These features are only supported in Impala 1.3 or higher deployments.

Related Name

Default Value

true

API Name

admission_control_enabled

Required

false

Admission Control Queue Timeout

Description

Maximum amount of time (in milliseconds) that a request waits to be admitted before timing out. Must be a positive integer.

Related Name

queue_wait_timeout_ms

Default Value

1 minute(s)

API Name

admission_control_queue_timeout

Required

false

Single Pool Max Queued Queries

Description

Configures the maximum number of queued queries for admission control when using a single pool. -1 or 0 disables queuing, i.e. incoming requests are rejected if they can not be executed immediately. Ignored when Dynamic Resource Pools for Admission Control is enabled.

Related Name

default_pool_max_queued

Default Value

200

API Name

admission_control_single_pool_max_queued

Required

false

Single Pool Max Running Queries

Description

Configures the maximum number of concurrently running queries for admission control when using a single pool. -1 indicates no limit and 0 indicates all incoming requests will be rejected. Ignored when Dynamic Resource Pools for Admission Control is enabled.

Related Name

default_pool_max_requests

Default Value

200

API Name

admission_control_single_pool_max_requests

Required

false

Single Pool Mem Limit

Description

Configures the max memory of running queries for admission control when using a single pool. -1 or 0 indicates no limit. Ignored when Dynamic Resource Pools for Admission Control is enabled.

Related Name

default_pool_mem_limit

Default Value

-1 B

API Name

admission_control_single_pool_mem_limit

Required

false

Enable Impala Admission Control

Description

Use Impala Admission Control to throttle Impala requests. Unless 'Enable Dynamic Resource Pools' is enabled, Impala uses a single, default pool that is configured using the Single Pool configurations below. These features are only supported in Impala 1.3 or higher deployments.

Related Name**Default Value**

true

API Name

all_admission_control_enabled

Required

false

Advanced

Impala Service Advanced Configuration Snippet (Safety Valve) for atlas-application.properties

Description

For advanced use only, a string to be inserted into atlas-application.properties. Applies to configurations of all roles in this service except client configuration.

Related Name
Default Value
API Name
application_properties_safety_valve
Required
false

Enable Core Dump

Description
Used to generate a core dump to get more information about an Impala crash. Unless otherwise configured systemwide using /proc/sys/kernel/core_pattern, the dump is generated in the 'current directory' of the Impala process (usually a subdirectory of the /var/run/cloudera-scm-agent/process directory). The core file can be very large.
Related Name
Default Value
false
API Name
enable_core_dump
Required
false

Maximum HBase Client Retries

Description
Maximum number of HBase client retries for Impala. Used as a maximum for all operations such as fetching of the root region from the root RegionServer, getting a cell's value, and starting a row update. Overrides configuration in the HBase service.
Related Name
hbase.client.retries.number
Default Value
3
API Name
hbase_client_retries_number
Required
false

HBase RPC Timeout

Description
Timeout in milliseconds for all HBase RPCs made by Impala. Overrides configuration in HBase service.
Related Name
hbase.rpc.timeout
Default Value
3 second(s)
API Name
hbase_rpc_timeout

Required

false

Impala Command Line Argument Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be added (verbatim) to Impala Daemon command-line flags. Applies to all roles in this service. Key names should begin with a hyphen(-).
For example: -log_filename=foo.log

Related Name**Default Value****API Name**

impala_cmd_args_safety_valve

Required

false

Fair Scheduler Configuration Rules (Deployed)**Description**

A list specifying the rules to run to determine which Fair Scheduler configuration to use. The value specified here is deployed to all hosts. This configuration has effect only on Impala versions 1.3 or greater.

Related Name**Default Value**

[]

API Name

impala_schedule_rules

Required

false

Fair Scheduler Configuration Rules (Staged)**Description**

A list specifying the rules to run to determine which Fair Scheduler configuration to use. Typically edited using the Rules configuration UI. This configuration only has effect on Impala versions 1.3 or greater.

Related Name**Default Value****API Name**

impala_schedule_rules_draft

Required

false

Fair Scheduler Allocations (Deployed)**Description**

JSON representation of all the configurations that the Fair Scheduler can take across all schedules. This configuration has effect only on Impala versions 1.3 or greater.

Related Name

Default Value

```
queues: [ name: root, queues: [ name: default, queues: [], schedulablePropertiesList:
[ scheduleName: default ] ], schedulablePropertiesList: [ scheduleName: default ] ], users: []
```

API Name

```
impala_scheduled_allocations
```

Required

```
false
```

Fair Scheduler Allocations (Staged)**Description**

JSON representation of all the configurations that the Fair Scheduler can take across all schedules. Typically edited using the Pools configuration UI. This configuration only has effect on Impala versions 1.3 or greater.

Related Name**Default Value****API Name**

```
impala_scheduled_allocations_draft
```

Required

```
false
```

Impala Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

```
impala_service_env_safety_valve
```

Required

```
false
```

Impala Service Advanced Configuration Snippet (Safety Valve) for sentry-site.xml**Description**

For advanced use only, a string to be inserted into sentry-site.xml. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

```
impalad_sentry_safety_valve
```

Required

```
false
```

Use HDFS Rules to Map Kerberos Principals to Short Names**Description**

If checked and Impala is using Kerberos, Impala will use the `hadoop.security.auth_to_local` rules from HDFS configuration. The relevant HDFS configuration is derived from Additional Rules to Map Kerberos Principals to Short Names.

Related Name

`load_auth_to_local_rules`

Default Value

`false`

API Name

`load_hdfs_auth_to_local_rules`

Required

`false`

Impala Client Advanced Configuration Snippet (Safety Valve) for `navigator.client.properties`

Description

For advanced use only, a string to be inserted into the client configuration for `navigator.client.properties`.

Related Name

Default Value

API Name

`navigator_client_config_safety_valve`

Required

`false`

Impala Client Advanced Configuration Snippet (Safety Valve) for `navigator.lineage.client.properties`

Description

For advanced use only, a string to be inserted into the client configuration for `navigator.lineage.client.properties`.

Related Name

Default Value

API Name

`navigator_lineage_client_config_safety_valve`

Required

`false`

Impala System Group (except Llama)

Description

The group that this Impala's processes should run as (except Llama, which has its own group).

Related Name

Default Value

`impala`

API Name

`process_groupname`

Required

`true`

Impala System User (except Llama)

Description	The user that this Impala's processes should run as (except Llama, which has its own user).
Related Name	
Default Value	impala
API Name	process_username
Required	true

Impala Service Advanced Configuration Snippet (Safety Valve) for ranger-impala-audit.xml

Description	For advanced use only, a string to be inserted into ranger-impala-audit.xml. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	ranger_audit_safety_valve
Required	false

Impala Service Advanced Configuration Snippet (Safety Valve) for ranger-impala-policymgr-ssl.xml

Description	For advanced use only, a string to be inserted into ranger-impala-policymgr-ssl.xml. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	ranger_policymgr_ssl_safety_valve
Required	false

Impala Service Advanced Configuration Snippet (Safety Valve) for ranger-impala-security.xml

Description	For advanced use only, a string to be inserted into ranger-impala-security.xml. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	ranger_security_safety_valve
Required	false

Use Debug Build

Description

Use debug build of Impala binaries when starting roles. Useful when performing diagnostic activities to get more information in the stacktrace or core dump.

Related Name

Default Value

false

API Name

use_debug_build

Required

false

Cloudera Navigator

Enable Audit Collection

Description

Enable collection of audit events from the service's roles.

Related Name

navigator.audit.enabled

Default Value

true

API Name

navigator_audit_enabled

Required

false

Audit Event Filter

Description

Event filters are defined in a JSON object like the following: { "defaultAction" : ("accept", "discard"), "rules" : [{ "action" : ("accept", "discard"), "fields" : [{ "name" : "fieldName", "match" : "regex" }] }] } A filter has a default action and a list of rules, in order of precedence. Each rule defines an action, and a list of fields to match against the audit event. A rule is "accepted" if all the listed field entries match the audit event. At that point, the action declared by the rule is taken. If no rules match the event, the default action is taken. Actions default to "accept" if not defined in the JSON object. The following is the list of fields that can be filtered for Impala events:

- userName: the user performing the action.
- ipAddress: the IP from where the request originated.
- operation: the Impala operation being performed.
- databaseName: the databaseName for the operation.
- tableName: the tableName for the operation.

Related Name

navigator.event.filter

Default Value

API Name

navigator_audit_event_filter

Required

false

Audit Queue Policy

Description

Action to take when the audit event queue is full. Drop the event or shutdown the affected process.

Related Name

navigator.batch.queue_policy

Default Value

DROP

API Name

navigator_audit_queue_policy

Required

false

Audit Event Tracker

Description

Configures the rules for event tracking and coalescing. This feature is used to define equivalency between different audit events. When events match, according to a set of configurable parameters, only one entry in the audit list is generated for all the matching events. Tracking works by keeping a reference to events when they first appear, and comparing other incoming events against the "tracked" events according to the rules defined here. Event trackers are defined in a JSON object like the following: { "timeToLive" : [integer], "fields" : [{ "type" : [string], "name" : [string] }] } Where:

- timeToLive: maximum amount of time an event will be tracked, in milliseconds. Must be provided. This defines how long, since it's first seen, an event will be tracked. A value of 0 disables tracking.
- fields: list of fields to compare when matching events against tracked events.

Each field has an evaluator type associated with it. The evaluator defines how the field data is to be compared. The following evaluators are available:

- value: uses the field value for comparison.
- userName: treats the field value as a userName, and ignores any host-specific data. This is useful for environment using Kerberos, so that only the principal name and realm are compared.

The following is the list of fields that can be used to compare Impala events:

- operation: the Impala operation being performed.
- username: the user performing the action.
- ipAddress: the IP from where the request originated.
- allowed: whether the operation was allowed or denied.
- databaseName: the database affected by the operation.
- tableName: the table affected by the operation.
- objectType: the type of object affected by the operation.
- privilege: the privilege associated with the operation.

Related Name

Required	false

Healthy Impala Catalog Server Monitoring Thresholds

Description	The health test thresholds of the overall Impala Catalog Server health. The check returns "Concerning" health if the percentage of "Healthy" Impala Catalog Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Impala Catalog Servers falls below the critical threshold.
Related Name	
Default Value	Warning: 99.0 %, Critical: 1.0 %
API Name	impala_catalogserver_healthy_thresholds
Required	false

Healthy Impala Daemon Monitoring Thresholds

Description	The health test thresholds of the overall Impala Daemon health. The check returns "Concerning" health if the percentage of "Healthy" Impala Daemons falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Impala Daemons falls below the critical threshold.
Related Name	
Default Value	Warning: 95.0 %, Critical: 90.0 %
API Name	impala_impalads_healthy_thresholds
Required	false

Healthy Impala Llama ApplicationMaster Monitoring Thresholds

Description	The health test thresholds of the overall Impala Llama ApplicationMaster health. The check returns "Concerning" health if the percentage of "Healthy" Impala Llama ApplicationMasters falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Impala Llama ApplicationMasters falls below the critical threshold.
Related Name	
Default Value	Warning: 99.0 %, Critical: 51.0 %
API Name	impala_llamas_healthy_thresholds
Required	false

Impala Query Aggregates

Description

Controls the aggregate metrics generated for Impala queries. The structure is a JSON list of the attributes to aggregate and the entities to aggregate to. For example, if the attributeName is 'hdfs_bytes_read' and the aggregationTargets is ['USER'] then the Service Monitor will create the metric 'impala_query_hdfs_bytes_read_rate' and, every ten minutes, will record the total hdfs bytes read for each user across all their Impala queries. By default it will also record the number of queries issues ('num_impala_queries_rate') for both users and pool. For a full list of the supported attributes see the Impala search page. Note that the valid aggregation targets are USER, YARN_POOL, and IMPALA (the service), and that these aggregate metrics can be viewed on both the reports and charts search pages.

Related Name

Default Value

```
[ {attributeName: hdfs_bytes_read, aggregationTargets: [USER, IMPALA_POOL_USER,
IMPALA_POOL, IMPALA, CLUSTER] }, {attributeName: hdfs_bytes_written, aggregationTargets:
[USER, IMPALA_POOL_USER, IMPALA_POOL, IMPALA, CLUSTER] }, {attributeName:

cm_cpu_milliseconds, aggregationTargets: [USER, IMPALA_POOL_USER, IMPALA_POOL,
IMPALA, CLUSTER] }, {attributeName: query_duration, aggregationTargets: [USER,
IMPALA_POOL_USER, IMPALA_POOL, IMPALA, CLUSTER] }, {attributeName:
admission_wait, aggregationTargets: [USER, IMPALA_POOL_USER, IMPALA_POOL,
IMPALA, CLUSTER] }, {attributeName: memory_accrual, aggregationTargets: [USER,
IMPALA_POOL_USER, IMPALA_POOL, IMPALA, CLUSTER] }, {attributeName:
thread_cpu_time, aggregationTargets: [USER, IMPALA_POOL_USER, IMPALA_POOL,
IMPALA, CLUSTER] }, {attributeName: memory_spilled, aggregationTargets: [USER,
IMPALA_POOL_USER, IMPALA_POOL, IMPALA, CLUSTER] } ]
```

API Name

impala_query_aggregates

Required

false

Healthy Impala StateStore Monitoring Thresholds

Description

The health test thresholds of the overall Impala StateStore health. The check returns "Concerning" health if the percentage of "Healthy" Impala StateStores falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Impala StateStores falls below the critical threshold.

Related Name

Default Value

Warning: 99.0 %, Critical: 1.0 %

API Name

impala_statestore_healthy_thresholds

Required

false

Service Triggers

Description

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

YARN Service for Resource Management

Description

Name of YARN service to use for resource management integration between Impala and YARN.
This service dependency and the existence of a Llama role is required for using said integration.

Related Name

Default Value

API Name

yarn_service
Required
false

ZooKeeper Service for Llama HA

Description
Name of the ZooKeeper service to use for leader election and fencing when Llama is configured for high availability. This service dependency is required when more than one Llama role is present.
Related Name
Default Value
API Name
zookeeper_service
Required
false

Performance

Enable HDFS Short-Circuit Read

Description
Enable HDFS short-circuit read. This allows a client colocated with the DataNode to read HDFS file blocks directly. This gives a performance boost to distributed clients that are aware of locality.
Related Name
dfs.client.read.shortcircuit
Default Value
true
API Name
dfs_client_read_shortcircuit
Required
false

StateStoreSubscriber Timeout

Description
Time in seconds before Impala Daemon or Catalog Server times out with the StateStore.
Related Name
statestore_subscriber_timeout_seconds
Default Value
30 second(s)
API Name
statestore_subscriber_timeout
Required
false

Security

Atlas Kafka Messages Spool Directory

Description

Spool directory for Atlas Kafka Messages.	
Related Name	atlas.hook.spool.dir
Default Value	/var/log/impala/atlas-spool
API Name	atlas_message_spool_path
Required	false

Enable TLS/SSL for Impala

Description	
Encrypt communication between clients and Impala using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).	
Related Name	client_services_ssl_enabled
Default Value	false
API Name	client_services_ssl_enabled
Required	false

Enable LDAP Authentication

Description	
When checked, LDAP-based authentication for users is enabled.	
Related Name	enable_ldap_auth
Default Value	false
API Name	enable_ldap_auth
Required	false

Enable LDAP TLS

Description	
If true, attempts to establish a TLS (Transport Layer Security) connection with an LDAP server that was specified with ldap://. Not required when using an LDAP URL with prefix ldaps://, because that already specifies TLS. This option is also known as "Use StartTLS".	
Related Name	ldap_tls
Default Value	false
API Name	

enable_ldap_tls
Required
false

Enable Kerberos Authentication for HTTP Web-Consoles

Description
Enables Kerberos authentication for Hadoop HTTP web consoles for all roles of this service using the SPNEGO protocol. Note: This is effective only if Kerberos is enabled.
Related Name
Default Value
false
API Name
hadoop_secure_web_ui
Required
false

Proxy Group Configuration

Description
Specifies the set of authorized proxy groups (users who can impersonate other users belonging to the specified groups during authorization) and whom they are allowed to impersonate. Input is a semicolon-separated list of key=value pairs of authorized proxy users to the group(s) they can impersonate. These groups are specified as a comma separated list of groups, or '*' to indicate all groups. For example: joe=group1,group2;hue=*;admin=*. Only valid when Sentry is enabled.
Related Name
authorized_proxy_group_config
Default Value
API Name
impala_authorized_proxy_group_config
Required
false

Proxy User Configuration

Description
Specifies the set of authorized proxy users (users who can impersonate other users during authorization) and whom they are allowed to impersonate. Input is a semicolon-separated list of key=value pairs of authorized proxy users to the user(s) they can impersonate. These users are specified as a comma separated list of short usernames, or '*' to indicate all users. For example: joe=alice,bob;hue=*;admin=*. Only valid when Sentry is enabled.
Related Name
authorized_proxy_user_config
Default Value
hue=*;knox=*
API Name
impala_authorized_proxy_user_config
Required
false

LDAP URL**Description**

The URL of the LDAP Server. The URL must be prefixed with ldap:// or ldaps:// . The URL can optionally specify a custom port if necessary, but by default the ldap:// will connect to port 389, and the ldaps:// will connect to port 636. Note that passwords will be in the clear if ldap:// is used, and by fall 2020 Active directory servers will no longer allow non LDAPS connections to bind to AD hosts with LDAP signing enabled. See microsoft knowledge document 935834 for more information.

Related Name

ldap_uri

Default Value**API Name**

impala_ldap_uri

Required

false

impala TLS/SSL Trust Store File**Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that impala might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name**Default Value****API Name**

impala_truststore_file

Required

false

impala TLS/SSL Trust Store Password**Description**

The password for the impala TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name**Default Value****API Name**

impala_truststore_password

Required

false

Kerberos Principal**Description**

Kerberos principal short name used by all roles of this service.

Related Name

Default Value

impala

API Name

kerberos_princ_name

Required

true

Kerberos Re-init Interval**Description**

Number of minutes between reestablishing our ticket with the Kerberos server.

Related Name

kerberos_reinit_interval

Default Value

1 hour(s)

API Name

kerberos_reinit_interval

Required

false

LDAP BaseDN**Description**

This parameter is useful when authenticating against a non-Active Directory server, such as OpenLDAP. When set, this parameter is used to convert the username into the LDAP Distinguished Name (DN), so that the resulting DN looks like uid=username,*this parameter*. For example, if this parameter is set to "ou=People,dc=cloudera,dc=com", and the username passed in is "mike", the resulting authentication passed to the LDAP server look like "uid=mike,ou=People,dc=cloudera,dc=com". This parameter is mutually exclusive with Active Directory Domain.

Related Name

ldap_baseDN

Default Value**API Name**

ldap_baseDN

Required

false

LDAP Pattern**Description**

When set, this parameter allows arbitrary mapping from usernames into a Distinguished Name (DN). The string specified must have a placeholder named "#UID" inside it, and that #UID is replaced with the username. For example, you could mimic the behavior of LDAP BaseDN by specifying "uid=#UID,ou=People,dc=cloudera,dc=com". When the username of "mike" comes in, it replaces the #UID and the result is "uid=mike,ou=People,dc=cloudera,dc=com". This option should be used when more control over the DN is needed. This parameter is mutually exclusive with LDAP Domain and LDAP BaseDN.

Related Name

ldap_bind_pattern

Default Value**API Name**

ldap_bind_pattern

Required

false

Impala Client LDAP Password**Description**

The password for connecting to Impala when using LDAP authentication. This is used by Cloudera Manager to execute Impala APIs like cancelling a query.

Related Name

ldap_cm_password

Default Value**API Name**

ldap_cm_password

Required

false

Impala Client LDAP Username**Description**

The username for connecting to Impala when using LDAP authentication. This is used by Cloudera Manager to execute Impala APIs like cancelling a query.

Default Value

/var/lib/ranger/impala/policy-cache

API Name

ranger_policy_cache_dir

Required

false

The allowed set of OpenSSL ciphers**Description**

A list of OpenSSL ciphers, optionally including other notation. See the output of 'man ciphers' for the full set of keywords and notation allowed in the arguments.

Related Name

ssl_cipher_list

Default Value**API Name**

ssl_cipher_list

Required

false

Impala TLS/SSL CA Certificate**Description**

The location on disk of the certificate, in PEM format, used to confirm the authenticity of SSL/TLS servers that the Impala daemons might connect to. Because the Impala daemons connect to each other, this should also include the CA certificate used to sign all the SSL/TLS Certificates. Without this parameter, SSL/TLS between Impala daemons will not be enabled.

Related Name

ssl_client_ca_certificate

Default Value**API Name**

ssl_client_ca_certificate

Required

false

Impala TLS/SSL Server Private Key File (PEM Format)**Description**

The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Impala is acting as a TLS/SSL server. The certificate file must be in PEM format.

Related Name

ssl_private_key

Default Value**API Name**

ssl_private_key

Required

false

Impala TLS/SSL Private Key Password**Description**

The password for the private key in the Impala TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.

Related Name	ssl_private_key_password_cmd
Default Value	
API Name	ssl_private_key_password
Required	false

Impala TLS/SSL Server Certificate File (PEM Format)

Description	The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Impala is acting as a TLS/SSL server. The certificate file must be in PEM format.
Related Name	ssl_server_certificate
Default Value	
API Name	ssl_server_certificate
Required	false

Suppressions

Suppress Configuration Validator: Impala Daemon Audit Log Directory

Description	Whether to suppress configuration warnings produced by the Impala Daemon Audit Log Directory configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_audit_event_log_dir
Required	true

Suppress Configuration Validator: Impala Daemon Backend Port

Description	Whether to suppress configuration warnings produced by the Impala Daemon Backend Port configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_be_port
Required	

true

Suppress Configuration Validator: Impala Daemon Beeswax Port

Description	Whether to suppress configuration warnings produced by the Impala Daemon Beeswax Port configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_beeswax_port
Required	true

Suppress Configuration Validator: Catalog Server Service Port

Description	Whether to suppress configuration warnings produced by the Catalog Server Service Port configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_catalog_service_port
Required	true

Suppress Configuration Validator: Catalog Server Command Line Argument Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the Catalog Server Command Line Argument Advanced Configuration Snippet (Safety Valve) configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_catalogd_cmd_args_safety_valve
Required	true

Suppress Configuration Validator: Impala Catalog Server Advanced Configuration Snippet (Safety Valve) for core-site.xml

Description	Whether to suppress configuration warnings produced by the Impala Catalog Server Advanced Configuration Snippet (Safety Valve) for core-site.xml configuration validator.
Related Name	

Default Value

false

API Name

role_config_suppression_catalogd_core_site_safety_valve

Required

true

Suppress Configuration Validator: Catalog Server HBase Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Catalog Server HBase Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_catalogd_hbase_conf_safety_valve

Required

true

Suppress Configuration Validator: Catalog Server HDFS Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Catalog Server HDFS Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_catalogd_hdfs_site_conf_safety_valve

Required

true

Suppress Configuration Validator: Catalog Server Hive Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Catalog Server Hive Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_catalogd_hive_conf_safety_valve

Required

true

Suppress Configuration Validator: Java Configuration Options for Catalog Server**Description**

Whether to suppress configuration warnings produced by the Java Configuration Options for Catalog Server configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_catalogd_java_opts

Required

true

Suppress Configuration Validator: Impala Catalog Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Impala Catalog Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_catalogserver_role_env_safety_valve

Required

true

Suppress Configuration Validator: Catalog Server HTTP Server Port**Description**

Whether to suppress configuration warnings produced by the Catalog Server HTTP Server Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_catalogserver_webserver_port

Required

true

Suppress Configuration Validator: CDH Version Validator**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator
Required
true

Suppress Configuration Validator: Impala Daemon Core Dump Directory

Description
Whether to suppress configuration warnings produced by the Impala Daemon Core Dump Directory configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_core_dump_dir
Required
true

Suppress Configuration Validator: Impala Daemon Data Cache Directories

Description
Whether to suppress configuration warnings produced by the Impala Daemon Data Cache Directories configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_datacache_dirs
Required
true

Suppress Configuration Validator: Impala Daemon Default Memory Limit Validator

Description
Whether to suppress configuration warnings produced by the Impala Daemon Default Memory Limit Validator configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_default_impalad_memory_limit_validator
Required
true

Suppress Configuration Validator: Impala Daemon Default Query Options

Description
Whether to suppress configuration warnings produced by the Impala Daemon Default Query Options configuration validator.
Related Name

Default Value

false

API Name

role_config_suppression_default_query_options

Required

true

Suppress Configuration Validator: Impala Daemon HiveServer2 HTTP Port**Description**

Whether to suppress configuration warnings produced by the Impala Daemon HiveServer2 HTTP Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hs2_http_port

Required

true

Suppress Configuration Validator: Impala Daemon HiveServer2 Port**Description**

Whether to suppress configuration warnings produced by the Impala Daemon HiveServer2 Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hs2_port

Required

true

Suppress Configuration Validator: Impala Audit Enabled Validator**Description**

Whether to suppress configuration warnings produced by the Impala Audit Enabled Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_impala_audit_enabled_validator

Required

true

Suppress Configuration Validator: Impala Daemon HDFS Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Impala Daemon HDFS Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_impala_hdfs_site_conf_safety_valve

Required

true

Suppress Configuration Validator: Impala Daemon Hive Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Impala Daemon Hive Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_impala_hive_conf_safety_valve

Required

true

Suppress Configuration Validator: Impala Lineage Enabled Validator**Description**

Whether to suppress configuration warnings produced by the Impala Lineage Enabled Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_impala_lineage_enabled_validator

Required

true

Suppress Configuration Validator: Impala Daemon Llama Site Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Impala Daemon Llama Site Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

	false
API Name	role_config_suppression_impala_llama_site_conf_safety_valve
Required	true

Suppress Configuration Validator: Impala Daemon Command Line Argument Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the Impala Daemon Command Line Argument Advanced Configuration Snippet (Safety Valve) configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_impalad_cmd_args_safety_valve
Required	true

Suppress Configuration Validator: Impala Daemon Command Line Arguments Safety Valve Validator

Description	Whether to suppress configuration warnings produced by the Impala Daemon Command Line Arguments Safety Valve Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_impalad_cmd_args_safety_valve_validator
Required	true

Suppress Configuration Validator: Impala Daemon Advanced Configuration Snippet (Safety Valve) for core-site.xml

Description	Whether to suppress configuration warnings produced by the Impala Daemon Advanced Configuration Snippet (Safety Valve) for core-site.xml configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_impalad_core_site_safety_valve
Required	true

Suppress Configuration Validator: Java Configuration Options for Impala Daemon**Description**

Whether to suppress configuration warnings produced by the Java Configuration Options for Impala Daemon configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_embedded_java_opts

Required

true

Suppress Configuration Validator: Impala Daemon Fair Scheduler Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Impala Daemon Fair Scheduler Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_fair_scheduler_safety_valve

Required

true

Suppress Configuration Validator: Impala Daemon HBase Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Impala Daemon HBase Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_hbase_conf_safety_valve

Required

true

Suppress Configuration Validator: LDAP Server CA Certificate**Description**

Whether to suppress configuration warnings produced by the LDAP Server CA Certificate configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_ldap_ca_certificate

Required

true

Suppress Configuration Validator: Impala Daemons Load Balancer**Description**

Whether to suppress configuration warnings produced by the Impala Daemons Load Balancer configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_load_balancer

Required

true

Suppress Configuration Validator: Impala Daemon Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Impala Daemon Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_role_env_safety_valve

Required

true

Suppress Configuration Validator: Impala Daemon HTTP Server Port**Description**

Whether to suppress configuration warnings produced by the Impala Daemon HTTP Server Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_impalad_webserver_port

Required

true

Suppress Configuration Validator: JMX Exporter Port**Description**

Whether to suppress configuration warnings produced by the JMX Exporter Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Configuration Validator: JMX Exporter configuration YAML**Description**

Whether to suppress configuration warnings produced by the JMX Exporter configuration YAML configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_yaml

Required

true

Suppress Configuration Validator: JWKS URL**Description**

Whether to suppress configuration warnings produced by the JWKS URL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_jwks_url

Required

true

Suppress Configuration Validator: Username JWT Custom Claim**Description**

Whether to suppress configuration warnings produced by the Username JWT Custom Claim configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_jwt_custom_claim_username

Required

true

Suppress Configuration Validator: Impala Daemon KRPC Port**Description**

Whether to suppress configuration warnings produced by the Impala Daemon KRPC Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_krpc_port

Required

true

Suppress Configuration Validator: Impala Daemon Lineage Log Directory**Description**

Whether to suppress configuration warnings produced by the Impala Daemon Lineage Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_lineage_event_log_dir

Required

true

Suppress Configuration Validator: Llama Callback Port**Description**

Whether to suppress configuration warnings produced by the Llama Callback Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_llama_callback_port

Required

true

Suppress Configuration Validator: Local UDF Library Dir**Description**

Whether to suppress configuration warnings produced by the Local UDF Library Dir configuration validator.

Related Name**Default Value**

false

API Name

`role_config_suppression_local_library_dir`**Required**`true`**Suppress Configuration Validator: Impala Daemon Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Impala Daemon Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_log4j_safety_valve`**Required**`true`**Suppress Configuration Validator: Impala Daemon Log Directory****Description**

Whether to suppress configuration warnings produced by the Impala Daemon Log Directory configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_log_dir`**Required**`true`**Suppress Configuration Validator: Impala Daemon Breakpad Dump Directory****Description**

Whether to suppress configuration warnings produced by the Impala Daemon Breakpad Dump Directory configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_minidump_path`**Required**`true`**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Service Section

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_service
Required
true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)

Description
Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_rm_custom_resources
Required
true

Suppress Configuration Validator: Role Triggers

Description
Whether to suppress configuration warnings produced by the Role Triggers configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_role_triggers
Required
true

Suppress Configuration Validator: Impala Daemon Scratch Directories

Description
Whether to suppress configuration warnings produced by the Impala Daemon Scratch Directories configuration validator.
Related Name

Default Value

false

API Name

role_config_suppression_scratch_dirs

Required

true

Suppress Configuration Validator: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Configuration Validator: Second Statestore Host Name**Description**

Whether to suppress configuration warnings produced by the Second Statestore Host Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_state_store_2_host

Required

true

Suppress Configuration Validator: Statestore HA Port**Description**

Whether to suppress configuration warnings produced by the Statestore HA Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_state_store_ha_port

Required

true

Suppress Configuration Validator: Statestore Host Name**Description**

	Whether to suppress configuration warnings produced by the Statestore Host Name configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_state_store_host
Required	true

Suppress Configuration Validator: Peer Statestore Host Name

Description	Whether to suppress configuration warnings produced by the Peer Statestore Host Name configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_state_store_peer_host
Required	true

Suppress Configuration Validator: StateStoreSubscriber Service Port

Description	Whether to suppress configuration warnings produced by the StateStoreSubscriber Service Port configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_state_store_subscriber_port
Required	true

Suppress Configuration Validator: Statestore Command Line Argument Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the Statestore Command Line Argument Advanced Configuration Snippet (Safety Valve) configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_statestore_cmd_args_safety_valve

Required

true

Suppress Configuration Validator: Impala StateStore Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Impala StateStore Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_statestore_role_env_safety_valve

Required

true

Suppress Configuration Validator: StateStore HTTP Server Port**Description**

Whether to suppress configuration warnings produced by the StateStore HTTP Server Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_statestore_webserver_port

Required

true

Suppress Configuration Validator: Impala Daemon Unlimited Memory Limit Validator**Description**

Whether to suppress configuration warnings produced by the Impala Daemon Unlimited Memory Limit Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_unlimited_impalad_memory_limit_validator

Required

true

Suppress Configuration Validator: Impala Daemon Webserver TLS/SSL Server Certificate File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the Impala Daemon Webserver TLS/SSL Server Certificate File (PEM Format) configuration validator.

Related Name
Default Value
false
API Name
role_config_suppression_webserver_certificate_file
Required
true

Suppress Configuration Validator: Impala Daemon Web Server User Password

Description
Whether to suppress configuration warnings produced by the Impala Daemon Web Server User Password configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_webserver_htpassword_password
Required
true

Suppress Configuration Validator: Impala Daemon Web Server Username

Description
Whether to suppress configuration warnings produced by the Impala Daemon Web Server Username configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_webserver_htpassword_user
Required
true

Suppress Configuration Validator: Impala Daemon Webserver TLS/SSL Server Private Key File (PEM Format)

Description
Whether to suppress configuration warnings produced by the Impala Daemon Webserver TLS/SSL Server Private Key File (PEM Format) configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_webserver_private_key_file
Required
true

Suppress Configuration Validator: Impala Daemon Webserver TLS/SSL Private Key Password**Description**

Whether to suppress configuration warnings produced by the Impala Daemon Webserver TLS/SSL Private Key Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_private_key_password_cmd

Required

true

Suppress Parameter Validation: Impala Service Advanced Configuration Snippet (Safety Valve) for atlas-application.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Service Advanced Configuration Snippet (Safety Valve) for atlas-application.properties parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_application_properties_safety_valve

Required

true

Suppress Parameter Validation: Atlas Kafka Messages Spool Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Atlas Kafka Messages Spool Directory parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_atlas_message_spool_path

Required

true

Suppress Configuration Validator: Impala Catalog Server Count Validator**Description**

Whether to suppress configuration warnings produced by the Impala Catalog Server Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_catalogserver_count_validator

Required

true

Suppress Configuration Validator: Secure Web UI Validator**Description**

Whether to suppress configuration warnings produced by the Secure Web UI Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_hadoop_secure_web_ui

Required

true

Suppress Configuration Validator: Ranger Plugin Url Auth Validator for filesystem schemes**Description**

Whether to suppress configuration warnings produced by the Ranger Plugin Url Auth Validator for filesystem schemes configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_hive_ranger_url_auth_validator

Required

true

Suppress Parameter Validation: Proxy Group Configuration**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Proxy Group Configuration parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_impala_authorized_proxy_group_config

Required

true

Suppress Parameter Validation: Proxy User Configuration**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Proxy User Configuration parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_impala_authorized_proxy_user_config

Required

true

Suppress Configuration Validator: Bypass Hive Metastore Validator**Description**

Whether to suppress configuration warnings produced by the Bypass Hive Metastore Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_impala_bypass_hms_validator

Required

true

Suppress Parameter Validation: Impala Command Line Argument Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Command Line Argument Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_impala_cmd_args_safety_valve

Required

true

Suppress Configuration Validator: Impala Command Line Arguments Safety Valve Validator**Description**

Whether to suppress configuration warnings produced by the Impala Command Line Arguments Safety Valve Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_impala_cmd_args_safety_valve_validator

Required

true

Suppress Configuration Validator: Impala Short-Circuit Read Validator

Description	Whether to suppress configuration warnings produced by the Impala Short-Circuit Read Validator configuration validator.
Related Name	
Default Value	false
API Name	service_config_suppression_impala_dfsc_client_read_shortcircuit_validator
Required	true

Suppress Configuration Validator: Enable HDFS Block Metadata API Configuration Validator

Description	Whether to suppress configuration warnings produced by the Enable HDFS Block Metadata API Configuration Validator configuration validator.
Related Name	
Default Value	false
API Name	service_config_suppression_impala_hdfs_dfsc_datanode_hdfs_blocks_metadata_enabled_set_validator
Required	true

Suppress Parameter Validation: LDAP URL

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP URL parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_impala_ldap_uri
Required	true

Suppress Configuration Validator: LDAP Configuration Validator

Description	Whether to suppress configuration warnings produced by the LDAP Configuration Validator configuration validator.
Related Name	
Default Value	false
API Name	

service_config_suppression_impala_ldap_validator
Required
true

Suppress Configuration Validator: Impala Llama Supported Validator

Description
Whether to suppress configuration warnings produced by the Impala Llama Supported Validator configuration validator.
Related Name
Default Value
false
API Name
service_config_suppression_impala_llama_supported_validator
Required
true

Suppress Parameter Validation: Impala Query Aggregates

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Query Aggregates parameter.
Related Name
Default Value
false
API Name
service_config_suppression_impala_query_aggregates
Required
true

Suppress Parameter Validation: Impala Service Environment Advanced Configuration Snippet (Safety Valve)

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Service Environment Advanced Configuration Snippet (Safety Valve) parameter.
Related Name
Default Value
false
API Name
service_config_suppression_impala_service_env_safety_valve
Required
true

Suppress Configuration Validator: Impala Specialization Validator

Description
Whether to suppress configuration warnings produced by the Impala Specialization Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_impala_specialization_validator

Required

true

Suppress Parameter Validation: impala TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the impala TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_impala_truststore_file

Required

true

Suppress Parameter Validation: impala TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the impala TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_impala_truststore_password

Required

true

Suppress Configuration Validator: Impala Daemon Count Validator**Description**

Whether to suppress configuration warnings produced by the Impala Daemon Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_impalad_count_validator

Required

true

Suppress Parameter Validation: Impala Service Advanced Configuration Snippet (Safety Valve) for sentry-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Service Advanced Configuration Snippet (Safety Valve) for sentry-site.xml parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_impalad_sentry_safety_valve

Required

true

Suppress Parameter Validation: Kerberos Principal**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_kerberos_princ_name

Required

true

Suppress Parameter Validation: LDAP BaseDN**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP BaseDN parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ldap_basedn

Required

true

Suppress Parameter Validation: LDAP Pattern**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP Pattern parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ldap_bind_pattern
Required
true

Suppress Parameter Validation: Impala Client LDAP Password

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Client LDAP Password parameter.
Related Name
Default Value
false
API Name
service_config_suppression_ldap_cm_password
Required
true

Suppress Parameter Validation: Impala Client LDAP Username

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Client LDAP Username parameter.
Related Name
Default Value
false
API Name
service_config_suppression_ldap_cm_user
Required
true

Suppress Parameter Validation: Active Directory Domain

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Directory Domain parameter.
Related Name
Default Value
false
API Name
service_config_suppression_ldap_domain
Required
true

Suppress Parameter Validation: Audit Event Filter

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Audit Event Filter parameter.
Related Name

Default Value

false

API Name

service_config_suppression_navigator_audit_event_filter

Required

true

Suppress Parameter Validation: Impala Client Advanced Configuration Snippet (Safety Valve) for navigator.client.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Impala Client Advanced Configuration Snippet (Safety Valve) for navigator.client.properties parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_navigator_client_config_safety_valve

Required

true

Suppress Parameter Validation: Audit Event Tracker**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Audit Event Tracker parameter.

Related Name**Default Value**

false

API Name

Java KeyStore KMS Properties in Cloudera Runtime 7.2.18

Role groups:

Key Management Server

Advanced

Key Management Server Advanced Configuration Snippet (Safety Valve) for core-site.xml

Description

For advanced use only. A string to be inserted into core-site.xml for this role only.

Related Name

Default Value

API Name

core-site.xml_role_safety_valve

Required

false

Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-acls.xml

Description

For advanced use only. A string to be inserted into kms-acls.xml for this role only.

Related Name

Default Value

API Name

kms-acls.xml_role_safety_valve

Required

false

Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-site.xml

Description

For advanced use only. A string to be inserted into kms-site.xml for this role only.

Related Name

Default Value

API Name

kms-site.xml_role_safety_valve

Required

false

Key Management Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

KMS_role_env_safety_valve

Required

false

Key Management Server Logging Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions

and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name

Default Value

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name

Default Value

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name

Default Value

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name

Default Value

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

Required

false

Key Management Server Advanced Configuration Snippet (Safety Valve) for ssl-server.xml

Description

For advanced use only. A string to be inserted into ssl-server.xml for this role only.

Related Name

Default Value

API Name

ssl-server.xml_role_safety_valve

Required

false

Logs

Key Management Server Log Directory

Description

The log directory for log files of the role Key Management Server.

Related Name

log.dir

Default Value

/var/log/hadoop-kms

API Name

log_dir

Required

false

Key Management Server Logging Threshold

Description

The minimum log level for Key Management Server logs

Related Name

Default Value

INFO

API Name

log_threshold

Required

false

Key Management Server Maximum Log File Backups

Description

The maximum number of rolled log files to keep for Key Management Server logs. Typically used by log4j or logback.

Related Name

Default Value

10

API Name

max_log_backup_index

Required

false

Key Management Server Max Log Size**Description**

The maximum size, in megabytes, per log file for Key Management Server logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Enable JMX Exporter (beta)**Description**

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name**Default Value**

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port**Description**

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name**Default Value****API Name**

jmx_exporter_port

JMX Exporter configuration YAML**Description**This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)**Related Name****Default Value****API Name**

jmx_exporter_yaml

Required

false

File Descriptor Monitoring Thresholds**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name**Default Value**

Warning: 50.0 %, Critical: 70.0 %

API Name

kms_fd_thresholds

Required

false

Key Management Server Host Health Test**Description**

When computing the overall Key Management Server health, consider the host's health.

Related Name**Default Value**

true

API Name	kms_host_health_enabled
Required	false

Key Management Server Process Health Test

Description	Enables the health test that the Key Management Server's process state is consistent with the role configuration
Related Name	
Default Value	true
API Name	kms_scm_health_enabled
Required	false

Log Directory Free Space Monitoring Absolute Thresholds

Description	The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
Related Name	
Default Value	Warning: 10 GiB, Critical: 5 GiB
API Name	log_directory_free_space_absolute_thresholds
Required	false

Log Directory Free Space Monitoring Percentage Thresholds

Description	The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.
Related Name	
Default Value	Warning: Never, Critical: Never
API Name	log_directory_free_space_percentage_thresholds
Required	false

Metric Filter

Description	
--------------------	--

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`exporters: prometheusremotewrite/$ROLE_NAME: endpoint:
$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s`

API Name

`otelcol_exporters`

Required

`false`

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name**Default Value**

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name

Default Value

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

false

Mapred Proxy User Hosts**Description**

Comma-delimited list of hosts where you want to allow the mapred user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host_'.

Related Name

hadoop.kms.proxyuser.mapred.hosts

Default Value

*

API Name

hadoop_kms_proxyuser_mapred_hosts

Required

false

Oozie Proxy User Groups**Description**

Allows the oozie superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.

Related Name

hadoop.kms.proxyuser.oozie.groups

Default Value

*

API Name

hadoop_kms_proxyuser_oozie_groups

Required

false

Oozie Proxy User Hosts**Description**

Comma-delimited list of hosts where you want to allow the oozie user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host_'.

Related Name

	hadoop.kms.proxyuser.oozie.hosts
Default Value	*
API Name	
	hadoop_kms_proxyuser_oozie_hosts
Required	false

YARN Proxy User Groups

Description	Allows the yarn superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.
Related Name	
	hadoop.kms.proxyuser.yarn.groups
Default Value	*
API Name	
	hadoop_kms_proxyuser_yarn_groups
Required	false

YARN Proxy User Hosts

Description	Comma-delimited list of hosts where you want to allow the yarn user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host_'.
Related Name	
	hadoop.kms.proxyuser.yarn.hosts
Default Value	*
API Name	
	hadoop_kms_proxyuser_yarn_hosts
Required	false

JavaKeyStoreProvider Directory

Description	Directory of the keystore file kms.keystore used by JavaKeyStoreProvider that backs the KMS.
Related Name	
	hadoop.kms.key.provider.uri
Default Value	/var/lib/kms
API Name	
	hadoop_security_key_provider_dir

Required

true

KMS Accept Count**Description**

The maximum queue length for incoming connection requests when all possible request processing threads are in use. Any requests received when the queue is full will be refused. This configuration is only supported in CDH 5.11 and up.

Related Name

hadoop.http.accept.queue.size

Default Value

500

API Name

kms_accept_count

Required

false

KMS Blacklist Users**Description**

A comma-separated list of users (no spaces) for whom to disallow access to key material. These users can still fetch key metadata and create encrypted encryption keys, but are unable to do any other KMS operations. Typically, HDFS superusers will be specified here.

Related Name

kms_blacklist_users

Default Value**API Name**

kms_blacklist_users

Required

false

KMS Heap Size**Description**

Maximum heap size of the KMS.

Related Name

kms_heap_size

Default Value

1 GiB

API Name

kms_heap_size

Required

true

Additional Java Configuration Options for KMS**Description**

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here.

Related Name	kms_java_opts
Default Value	
API Name	kms_java_opts
Required	false

KMS Max Threads

Description	Maximum number of threads used to handle KMS requests.
Related Name	hadoop.http.max.threads
Default Value	250
API Name	kms_max_threads
Required	false

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	rlimit_fds
Required	false

Ports and Addresses

KMS HTTP Port

Description	Port used by clients to interact with the KMS.
Related Name	hadoop.kms.http.port
Default Value	16000
API Name	kms_http_port
Required	

true

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Key Management Server TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Key Management Server might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.server.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required
false

Key Management Server TLS/SSL Trust Store Password

Description
The password for the Key Management Server TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name
ssl.server.truststore.password
Default Value
API Name
ssl_client_truststore_password
Required
false

Enable TLS/SSL for Key Management Server

Description
Encrypt communication between clients and Key Management Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).
Related Name
hadoop.kms.ssl.enabled
Default Value
false
API Name
ssl_enabled
Required
false

Key Management Server TLS/SSL Server Keystore Key Password

Description
The password that protects the private key contained in the keystore used when Key Management Server is acting as a TLS/SSL server.
Related Name
ssl.server.keystore.keypassword
Default Value
API Name
ssl_server_keystore_keypassword
Required
false

Key Management Server TLS/SSL Server Keystore File Location

Description

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Key Management Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.server.keystore.location

Default Value

API Name

ssl_server_keystore_location

Required

false

Key Management Server TLS/SSL Server Keystore File Password

Description

The password for the Key Management Server keystore file.

Related Name

ssl.server.keystore.password

Default Value

API Name

ssl_server_keystore_password

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value

API Name	stacks_collection_directory
Required	false

Stacks Collection Enabled

Description	Whether or not periodic stacks collection is enabled.
Related Name	stacks_collection_enabled
Default Value	false
API Name	stacks_collection_enabled
Required	true

Stacks Collection Frequency

Description	The frequency with which stacks are collected.
Related Name	stacks_collection_frequency
Default Value	5.0 second(s)
API Name	stacks_collection_frequency
Required	false

Stacks Collection Method

Description	The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name	stacks_collection_method
Default Value	jstack
API Name	stacks_collection_method
Required	false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Parameter Validation: Key Management Server Advanced Configuration Snippet (Safety Valve) for core-site.xml

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Advanced Configuration Snippet (Safety Valve) for core-site.xml parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_core-site.xml_role_safety_valve
Required	true

Suppress Parameter Validation: Flume Proxy User Groups

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Flume Proxy User Groups parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_flume_groups
Required	true

Suppress Parameter Validation: Flume Proxy User Hosts

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Flume Proxy User Hosts parameter.
Related Name	

Default Value
false
API Name
role_config_suppression_hadoop_kms_proxyuser_flume_hosts
Required
true

Suppress Parameter Validation: HDFS Proxy User Groups

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the HDFS Proxy User Groups parameter.
Related Name
Default Value
false
API Name
role_config_suppression_hadoop_kms_proxyuser_hdfs_groups
Required
true

Suppress Parameter Validation: HDFS Proxy User Hosts

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the HDFS Proxy User Hosts parameter.
Related Name
Default Value
false
API Name
role_config_suppression_hadoop_kms_proxyuser_hdfs_hosts
Required
true

Suppress Parameter Validation: Hive Proxy User Groups

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Hive Proxy User Groups parameter.
Related Name
Default Value
false
API Name
role_config_suppression_hadoop_kms_proxyuser_hive_groups
Required
true

Suppress Parameter Validation: Hive Proxy User Hosts

Description

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Hive Proxy User Hosts parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_hive_hosts
Required	true

Suppress Parameter Validation: HTTP Proxy User Groups

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Proxy User Groups parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_http_groups
Required	true

Suppress Parameter Validation: HTTP Proxy User Hosts

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Proxy User Hosts parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_http_hosts
Required	true

Suppress Parameter Validation: HttpFS Proxy User Groups

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the HttpFS Proxy User Groups parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_httpfs_groups
Required	

true

Suppress Parameter Validation: HttpFS Proxy User Hosts

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the HttpFS Proxy User Hosts parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hadoop_kms_proxyuser_httpfs_hosts

Required

true

Suppress Parameter Validation: Hue Proxy User Groups

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hue Proxy User Groups parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hue_groups

Required

true

Suppress Parameter Validation: Hue Proxy User Hosts

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hue Proxy User Hosts parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hadoop_kms_proxyuser_hue_hosts

Required

true

Suppress Parameter Validation: Mapred Proxy User Groups

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Mapred Proxy User Groups parameter.

Related Name

Default Value

false

API Name`role_config_suppression_hadoop_kms_proxyuser_mapred_groups`**Required**`true`**Suppress Parameter Validation: Mapred Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Mapred Proxy User Hosts parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_hadoop_kms_proxyuser_mapred_hosts`**Required**`true`**Suppress Parameter Validation: Oozie Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Proxy User Groups parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_hadoop_kms_proxyuser_oozie_groups`**Required**`true`**Suppress Parameter Validation: Oozie Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Proxy User Hosts parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_hadoop_kms_proxyuser_oozie_hosts`**Required**`true`**Suppress Parameter Validation: YARN Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the YARN Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_yarn_groups

Required

true

Suppress Parameter Validation: YARN Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the YARN Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_yarn_hosts

Required

true

Suppress Parameter Validation: JavaKeyStoreProvider Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JavaKeyStoreProvider Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_security_key_provider_dir

Required

true

Suppress Parameter Validation: JMX Exporter Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Parameter Validation: JMX Exporter configuration YAML**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_yaml

Required

true

Suppress Parameter Validation: Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-acls.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-acls.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms-acls.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: KMS Blacklist Users**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the KMS Blacklist Users parameter.

Related Name

Default Value

false

API Name

role_config_suppression_kms_blacklist_users

Required

true

Suppress Parameter Validation: KMS HTTP Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the KMS HTTP Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms_http_port

Required

true

Suppress Parameter Validation: Additional Java Configuration Options for KMS**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional Java Configuration Options for KMS parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms_java_opts

Required

true

Suppress Parameter Validation: Key Management Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kms_role_env_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_extensions
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_processors
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_receivers
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.
Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Key Management Server Advanced Configuration Snippet (Safety Valve) for ssl-server.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Advanced Configuration Snippet (Safety Valve) for ssl-server.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl-server.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Key Management Server TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Key Management Server TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Key Management Server TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Parameter Validation: Key Management Server TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Key Management Server TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

	false
API Name	
	role_config_suppression_ssl_server_keystore_password
Required	
	true

Suppress Parameter Validation: Stacks Collection Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.
Related Name	
Default Value	false
API Name	
	role_config_suppression_stacks_collection_directory
Required	
	true

Suppress Health Test: Audit Pipeline Test

Description	Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	
	role_health_suppression_kms_kms_audit_health
Required	
	true

Suppress Health Test: File Descriptors

Description	Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	
	role_health_suppression_kms_kms_file_descriptor
Required	
	true

Suppress Health Test: Host Health

Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kms_kms_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kms_kms_log_directory_free_space

Required

true

Suppress Health Test: Otelcol Health

Description

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kms_kms_otelcol_health

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kms_kms_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kms_kms_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kms_kms_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kms_kms_unexpected_exits

Required

true

Service-Wide

Advanced

Java KeyStore KMS Service Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name

Default Value

API Name

KMS_service_env_safety_valve

Required

false

System Group

Description

The group that this service's processes should run as.

Related Name

Default Value

kms

API Name

process_groupname

Required

true

System User

Description

The user that this service's processes should run as.

Related Name

Monitoring

Enable Service Level Health Alerts

Description

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name

Default Value

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific service.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Suppress Parameter Validation: Gateway Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name

Default Value	false
API Name	role_config_suppression_log4j_safety_valve
Required	true

Kafka Broker

Advanced

Kafka Broker Advanced Configuration Snippet (Safety Valve) for atlas-application.properties

Description	For advanced use only. A string to be inserted into atlas-application.properties for this role only.
Related Name	
Default Value	
API Name	atlas-application.properties_role_safety_valve
Required	false

Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties

Description	For advanced use only. A string to be inserted into kafka-monitoring.properties for this role only.
Related Name	
Default Value	
API Name	kafka-monitoring.properties_role_safety_valve
Required	false

Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties

Description	For advanced use only. A string to be inserted into kafka.properties for this role only.
Related Name	
Default Value	
API Name	kafka.properties_role_safety_valve
Required	false

Kafka Broker Environment Advanced Configuration Snippet (Safety Valve)

Description	
--------------------	--

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment.
Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

KAFKA_BROKER_role_env_safety_valve

Required

false

Kafka Broker Logging Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name

Default Value

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml**Description**

For advanced use only. A string to be inserted into ranger-kafka-audit.xml for this role only.

Related Name**Default Value****API Name**

ranger-kafka-audit.xml_role_safety_valve

Required

false

Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml**Description**

For advanced use only. A string to be inserted into ranger-kafka-policymgr-ssl.xml for this role only.

Related Name**Default Value****API Name**

ranger-kafka-policymgr-ssl.xml_role_safety_valve

Required

false

Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml**Description**

For advanced use only. A string to be inserted into ranger-kafka-security.xml for this role only.

Related Name**Default Value****API Name**

ranger-kafka-security.xml_role_safety_valve

Required

false

Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties**Description**

For advanced use only. A string to be inserted into ssl.properties for this role only.

Related Name**Default Value****API Name**

ssl.properties_role_safety_valve

Required

false

Kafka Broker Advanced Configuration Snippet (Safety Valve) for zookeeper-ssl.properties**Description**

For advanced use only. A string to be inserted into zookeeper-ssl.properties for this role only.

Related Name**Default Value****API Name**

zookeeper-ssl.properties_role_safety_valve

Required

false

Logs**Kafka Broker Log Directory****Description**

The log directory for log files of the role Kafka Broker.

Related Name	kafka.log4j.dir
Default Value	/var/log/kafka
API Name	log_dir
Required	false

Kafka Broker Logging Threshold

Description	The minimum log level for Kafka Broker logs
Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

Kafka Broker Maximum Log File Backups

Description	The maximum number of rolled log files to keep for Kafka Broker logs. Typically used by log4j or logback.
Related Name	
Default Value	10
API Name	max_log_backup_index
Required	false

Kafka Broker Max Log Size

Description	The maximum size, in megabytes, per log file for Kafka Broker logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB
API Name	max_log_size
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts
Required	false

Enable JMX Exporter (beta)

Description	JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. See the JMX Exporter documentation.
Related Name	
Default Value	false
API Name	jmx_exporter_enabled
Required	true

JMX Exporter Port

Description	JMX Exporter needs a port to implement a Prometheus exporter.
Related Name	
Default Value	
API Name	

`jmx_exporter_port`**Required**`false`**JMX Exporter configuration YAML****Description**

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name**Default Value****API Name**`jmx_exporter_yaml`**Required**`false`**Enable Lagging Replicas Test****Description**

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

Related Name**Default Value**`true`**API Name**`KAFKA-KAFKA_BROKER-7.2.0-LAGGING_REPLICAS_test_enable`**Required**`false`**Enable Network Processor Capacity Test****Description**

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

Related Name**Default Value**`true`**API Name**`KAFKA-KAFKA_BROKER-7.2.0-NETWORK_PROCESSOR_CAPACITY_test_enable`**Required**`false`**Enable Offline Directory Test****Description**

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

Related Name**Default Value**

	true
API Name	KAFKA-KAFKA_BROKER-7.2.0-OFFLINE_DIRECTORIES_test_enable
Required	false

Enable Offline Partitions Test

Description	Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.
Related Name	
Default Value	true
API Name	KAFKA-KAFKA_BROKER-7.2.0-OFFLINE_PARTITIONS_test_enable
Required	false

Enable Request Handler Capacity Test

Description	Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.
Related Name	
Default Value	true
API Name	KAFKA-KAFKA_BROKER-7.2.0-REQUEST_HANDLER_CAPACITY_test_enable
Required	false

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	kafka_broker_fd_thresholds
Required	false

Kafka Broker Host Health Test

Description	When computing the overall Kafka Broker health, consider the host's health.
-------------	---

Related Name**Default Value**

true

API Name

kafka_broker_host_health_enabled

Required

false

Kafka Broker Process Health Test**Description**

Enables the health test that the Kafka Broker's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

kafka_broker_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/$ROLE_NAME: endpoint:
$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s
```

API Name

`otelcol_exporters`

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name
Default Value

API Name
otelcol_remote_write_password
Required
false

OpenTelemetry Collector Remote Write URL

Description
Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.
Related Name
Default Value
\$INFRA(cdp_request_signer_url)
API Name
otelcol_remote_write_url
Required
false

OpenTelemetry Collector Remote Write Username

Description
Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.
Related Name
Default Value
\$INFRA(cdp_request_signer_username)
API Name
otelcol_remote_write_user
Required
false

OpenTelemetry Collector Service Section

Description
Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.
Related Name
Default Value
API Name
otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Advertised Host

Description

If set, this is the hostname given out to producers, consumers, and other brokers to use in establishing connections. Never set this property at the group level; it should always be overridden on instance level.

Related Name

advertised.host.name

Default Value**API Name**

advertised.host.name

Required

false

Enable Auditing to Atlas

Description

When enabled, Kafka will audit Kafka Topics, Producers and Consumers to Atlas

Related Name

atlas.audit.enabled

Default Value

false

API Name

atlas.audit.enabled

Required

false

Authenticate Zookeeper Connection

Description

Enables authentication of SASL connections with zookeeper, if Kerberos authentication is enabled. It also allows a broker to set SASL ACL on zookeeper nodes, which locks these nodes down so that only a Kafka broker can modify it.

Related Name

authenticate.zookeeper.connection

Default Value	true
API Name	authenticate.zookeeper.connection
Required	false

Broker ID

Description	ID uniquely identifying each broker. Never set this property at the group level; it should always be overridden on instance level.
Related Name	broker.id
Default Value	
API Name	broker.id
Required	false

Additional Broker Java Options

Description	These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here.
Related Name	broker_java_opts
Default Value	-server -XX:+UseG1GC -XX:MaxGCPauseMillis=20 -XX:InitiatingHeapOccupancyPercent=35 -XX:G1HeapRegionSize=16M -XX:MinMetaspaceFreeRatio=50 -XX:MaxMetaspaceFreeRatio=80 -XX:+DisableExplicitGC -Djava.awt.headless=true -Djava.net.preferIPv4Stack=true -Dcom.sun.management.jmxremote.host=127.0.0.1 -Dcom.sun.management.jmxremote.local.only=true -Djava.rmi.server.hostname=127.0.0.1
API Name	broker_java_opts
Required	false

Java Heap Size of Broker

Description	Maximum size for the Java process heap memory. Passed to Java -Xmx. Measured in megabytes. Kafka does not generally require setting large heap sizes. It is better to let the file system cache utilize the available memory.
Related Name	broker_max_heap_size
Default Value	1 GiB
API Name	

broker_max_heap_size
Required
false

Kafka Broker Diagnostics Collection Timeout

Description
The timeout in milliseconds to wait for diagnostics collection to complete.
Related Name
Default Value
5 minute(s)
API Name
csd_role_diagnostics_timeout
Required
false

Enable Rack Awareness

Description
Enable rack awareness. If it is enabled, broker.rack property is set for each broker according to rack settings for the hosts in CM.
Related Name
enable.rack.awareness
Default Value
false
API Name
enable.rack.awareness
Required
false

Graceful Shutdown Timeout

Description
The timeout in milliseconds to wait for graceful shutdown to complete.
Related Name
Default Value
2 minute(s)
API Name
graceful_stop_timeout
Required
false

Enable Authenticated Communication with the JMX Agent

Description
Enables Authenticated Communication with the JMX Agent.
Related Name
jmx.auth.enabled

Default Value

false

API Name

jmx.auth.enabled

Required

false

Name of User with Read-Write Access to the JMX Agent**Description**

Specifies the name of the user that has read-write privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.control.user

Default Value

controlRole

API Name

jmx.control.user

Required

false

Password of user with read-write access to the JMX agent**Description**

Specifies the password of the user that has read-write privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.control.user.passwd

Default Value**API Name**

jmx.control.user.passwd

Required

false

Name of User with read-only access to the JMX Agent**Description**

Specifies the name of the user that has read-only privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.monitor.user

Default Value

monitorRole

API Name

jmx.monitor.user

Required

false

Password of User with read-only Access to the JMX agent**Description**

Specifies the password of the user that has read-only privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.monitor.user.passwd

Default Value**API Name**

jmx.monitor.user.passwd

Required

false

Enable TLS client authentication for JMX port**Description**

If enabled, a valid client certificate must be presented by the JMX client in order to connect to the JMX port. Ensure that the trusted CA certificates are present in either the Kafka JMX TLS/SSL Server Trust Store file or the global trust store.

Related Name

jmx.ssl.client.auth.enabled

Default Value

false

API Name

jmx.ssl.client.auth.enabled

Required

false

Enable TLS/SSL for Kafka JMX**Description**

Encrypt communication between clients and Kafka JMX using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

jmx.ssl.enabled

Default Value

false

API Name

jmx.ssl.enabled

Required

false

Enable HTTP Metric Report Basic Authentication**Description**

Enable Basic Authentication for Kafka Metric HTTP Endpoint.

Related Name

kafka.http.metrics.authentication.enabled

Default Value

false

API Name

kafka.http.metrics.authentication.enabled

Required

false

HTTP Metric Report Host**Description**

The host that the HTTP metric reporter binds to.

Related Name

kafka.http.metrics.host

Default Value

0.0.0.0

API Name

kafka.http.metrics.host

Required

false

HTTP Metric Report Password**Description**

The password used for Basic Authentication.

Related Name

kafka.http.metrics.password

Default Value**API Name**

kafka.http.metrics.password

Required

false

SSL Encryption For HTTP Metric Reporter**Description**

Enable SSL Encryption for HTTP Metrics Endpoint. IMPORTANT: SSL encryption will be enabled if ssl_enabled config is enabled as well!

Related Name

kafka.http.metrics.ssl.enabled

Default Value

false

API Name

kafka.http.metrics.ssl.enabled

Required

false

HTTP Metric Report User**Description**

The username used for Basic Authentication.

Related Name

kafka.http.metrics.user

Default Value**API Name**

kafka.http.metrics.user

Required

false

Data Directories**Description**

A list of one or more directories in which Kafka data is stored.. Each new partition created is placed in the directory that currently has the least amount of partitions.. Each directory should be on its own separate drive.

Related Name

log.dirs

Default Value

/var/local/kafka/data

API Name

log.dirs

Required

true

Data Retention Size**Description**

The amount of data to retain in the log for each topic-partition. This is the limit per partition. Multiply it by the number of partitions to get the total amount of data retained for the topic. This property can take -1 as a value, which is interpreted as unlimited. If both log.retention.ms and log.retention.bytes are set, a segment is deleted when either limit is exceeded.

Related Name

log.retention.bytes

Default Value

-1 B

API Name

log.retention.bytes

Required

false

Data Retention Check Interval**Description**

The frequency, in milliseconds, that the log cleaner checks whether any log segment is eligible for deletion, per retention policies.

Related Name

log.retention.check.interval.ms

Default Value

5 minute(s)

API Name	log.retention.check.interval.ms
Required	false

Data Retention Time

Description	The maximum time before a new log segment is rolled out. If both log.retention.ms and log.retention.bytes are set, a segment is deleted when either limit is exceeded. This property can take -1 as a value, which is interpreted as unlimited.
Related Name	log.retention.ms
Default Value	7 day(s)
API Name	log.retention.ms
Required	true

Data Log Roll Time

Description	The maximum time before a new log segment is rolled out.
Related Name	log.roll.ms
Default Value	
API Name	log.roll.ms
Required	false

Segment File Size

Description	The log for a topic partition is stored as a directory of segment files. This setting controls the size to which a segment file can grow before a new segment is rolled over in the log. This value has to be larger than message.max.bytes.
Related Name	log.segment.bytes
Default Value	1 GiB
API Name	log.segment.bytes
Required	false

Maximum Connections per IP Address

Description

Maximum number of connections allowed from each IP address.

Related Name

max.connections.per.ip

Default Value**API Name**

max.connections.per.ip

Required

false

Number of I/O Threads

Description

The number of I/O threads that the server uses for executing requests. You should have at least as many threads as you have disks.

Related Name

num.io.threads

Default Value

8

API Name

num.io.threads

Required

false

Number of Network Threads

Description

Number of threads that the server uses to handle incoming requests and outgoing responses.

Related Name

num.network.threads

Default Value

8

API Name

num.network.threads

Required

false

Number of Recovery Threads per data directory

Description

Number of threads per data directory that the server uses for log recovery during startup and log flushing during shutdown. Increasing this value may improve broker startup performance if you have a high number of segments. The total number of recovery threads (number of threads per data dir * number of data dirs) should not exceed the number of CPU cores. The default value is 1.

Related Name

num.recovery.threads.per.data.dir

Default Value

1

API Name

num.recovery.threads.per.data.dir

Required

false

Number of Alter Log Dir Threads**Description**

Number of threads that the server uses to move data between log directories. The default value of this property is the same as the number of log directories.

Related Name

num.replica.alter.log.dirs.threads

Default Value**API Name**

num.replica.alter.log.dirs.threads

Required

false

Ranger Kafka Plugin Conf Path**Description**

Staging directory for Ranger Kafka Plugin Configuration. This should generally not be changed.

Related Name

ranger_kafka_plugin_conf_path

Default Value

/etc/ranger/kafka-plugin

API Name

ranger_kafka_plugin_conf_path

Required

true

Ranger Kafka Plugin Audit Hdfs Spool Directory Path**Description**

Spool directory for Ranger audits being written to DFS.

Related Name

xasecure.audit.destination.hdfs.batch.filespool.dir

Default Value

/var/log/kafka/audit/hdfs/spool

API Name

ranger_kafka_plugin_hdfs_audit_spool_directory

Required

true

Ranger Kafka Plugin Policy Cache Directory Path**Description**

The directory where Ranger security policies are cached locally.

Related Name`ranger.plugin.kafka.policy.cache.dir`**Default Value**`/var/lib/ranger/kafka/policy-cache`**API Name**`ranger_kafka_plugin_policy_cache_directory`**Required**`true`**Ranger Kafka Plugin Audit Solr Spool Directory Path****Description**

Spool directory for Ranger audits being written to Solr.

Related Name`xasecure.audit.destination.solr.batch.filespool.dir`**Default Value**`/var/log/kafka/audit/solr/spool`**API Name**`ranger_kafka_plugin_solr_audit_spool_directory`**Required**`true`**Ranger Plugin Trusted Proxy IP Address****Description**

Accepts a list of IP addresses of proxy servers for trusting.

Related Name`ranger.plugin.kafka.trusted.proxy.ipaddress`**Default Value****API Name**`ranger_plugin_trusted_proxy_ipaddress`**Required**`false`**Ranger Plugin Use X-Forwarded For IP Address****Description**

The parameter is used for identifying the originating IP address of a user connecting to a component through proxy for audit logs.

Related Name`ranger.plugin.kafka.use.x-forwarded-for.ipaddress`**Default Value**`false`**API Name**`ranger_plugin_use_x_forwarded_for_ipaddress`**Required**`false`

Inter Broker Protocol

Description	Protocol to be used for inter-broker communication. INFERRED uses the same protocol that is configured for external clients.
Related Name	security.inter.broker.protocol
Default Value	INFERRED
API Name	security.inter.broker.protocol
Required	false

Socket receive buffer size.

Description	The SO_RCVBUF buffer of the socket server sockets. If the value is -1, the OS default will be used.
Related Name	socket.receive.buffer.bytes
Default Value	100 KiB
API Name	socket.receive.buffer.bytes
Required	false

Socket receive buffer size.

Description	The maximum number of bytes in a socket request
Related Name	socket.request.max.bytes
Default Value	100 MiB
API Name	socket.request.max.bytes
Required	false

Socket send buffer size.

Description	The SO_SNDBUF buffer of the socket server sockets. If the value is -1, the OS default will be used.
Related Name	socket.send.buffer.bytes
Default Value	100 KiB
API Name	

socket.send.buffer.bytes

Required

false

SSL Client Authentication

Description

Client authentication mode for SSL connections. This configuration has three valid values, "required", "requested" and "none". If set to "required", client authentication is required. If set to "requested", client authentication is requested and clients without certificates can still connect. If set to "none", which is the default value, no client authentication is required.

Related Name

ssl.client.auth

Default Value

none

API Name

ssl.client.auth

Required

false

Enable Zookeeper ACL

Description

Enables brokers to set SASL ACL on zookeeper nodes if authenticate.zookeeper.connection is enabled.

Related Name

zookeeper.set.acl

Default Value

true

API Name

zookeeper.set.acl

Required

false

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name

Default Value

API Name

rlimit_fds

Required

false

Ports and Addresses

Advertised Port

Description	The port to give out to producers, consumers, and other brokers to use in establishing connections. This only needs to be set if this port is different from the port the server should bind to.
Related Name	advertised.port
Default Value	
API Name	advertised.port
Required	false

JMX Port

Description	Port for JMX.
Related Name	jmx_port
Default Value	9393
API Name	jmx_port
Required	false

HTTP Metric Report Port

Description	The port that the HTTP metric reporter listens on.
Related Name	kafka.http.metrics.port
Default Value	24042
API Name	kafka.http.metrics.port
Required	false

TCP Port

Description	Kafka broker port.
Related Name	port
Default Value	9092

API Name

port

Required

false

TLS/SSL Port**Description**

Kafka broker secure port.

Related Name

ssl_port

Default Value

9093

API Name

ssl_port

Required

false

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Kafka Broker TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Kafka Broker might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

Kafka Broker TLS/SSL Trust Store Password**Description**

The password for the Kafka Broker TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.truststore.password.generator

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Kafka Broker**Description**

Encrypt communication between clients and Kafka Broker using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ssl_enabled

Default Value

false

API Name

ssl_enabled

Required

false

Kafka Broker TLS/SSL Server Keystore Key Password

Description	The password that protects the private key contained in the keystore used when Kafka Broker is acting as a TLS/SSL server.
Related Name	ssl.key.password.generator
Default Value	
API Name	ssl_server_keystore_keypassword
Required	false

Kafka Broker TLS/SSL Server Keystore File Location

Description	The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Kafka Broker is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.
Related Name	ssl.keystore.location
Default Value	
API Name	ssl_server_keystore_location
Required	false

Kafka Broker TLS/SSL Server Keystore File Password

Description	The password for the Kafka Broker keystore file.
Related Name	ssl.keystore.password.generator
Default Value	
API Name	ssl_server_keystore_password
Required	false

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	

100 MiB
API Name
stacks_collection_data_retention
Required
false

Stacks Collection Directory

Description
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name
stacks_collection_directory
Default Value
API Name
stacks_collection_directory
Required
false

Stacks Collection Enabled

Description
Whether or not periodic stacks collection is enabled.
Related Name
stacks_collection_enabled
Default Value
false
API Name
stacks_collection_enabled
Required
true

Stacks Collection Frequency

Description
The frequency with which stacks are collected.
Related Name
stacks_collection_frequency
Default Value
5.0 second(s)
API Name
stacks_collection_frequency
Required
false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Parameter Validation: Advertised Host

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Advertised Host parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_advertised.host.name

Required

true

Suppress Parameter Validation: Advertised Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Advertised Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_advertised.port

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for atlas-application.properties

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for atlas-application.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_atlas-application.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Broker ID**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Broker ID parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_broker.id

Required

true

Suppress Parameter Validation: Additional Broker Java Options**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional Broker Java Options parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_broker_java_opts

Required

true

Suppress Parameter Validation: Java Heap Size of Broker**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of Broker parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_broker_max_heap_size

Required

true

Suppress Configuration Validator: CDH Version Validator**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Name of User with Read-Write Access to the JMX Agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Name of User with Read-Write Access to the JMX Agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.control.user

Required

true

Suppress Parameter Validation: Password of user with read-write access to the JMX agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password of user with read-write access to the JMX agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.control.user.passwd

Required

true

Suppress Parameter Validation: Name of User with read-only access to the JMX Agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Name of User with read-only access to the JMX Agent parameter.

Related Name**Default Value**

	false
API Name	role_config_suppression_jmx.monitor.user
Required	true

Suppress Parameter Validation: Password of User with read-only Access to the JMX agent

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Password of User with read-only Access to the JMX agent parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_jmx.monitor.user.passwd
Required	true

Suppress Parameter Validation: JMX Exporter Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_jmx_exporter_port
Required	true

Suppress Parameter Validation: JMX Exporter configuration YAML

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_jmx_exporter_yaml
Required	true

Suppress Parameter Validation: JMX Port

Description	
-------------	--

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_port

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka-monitoring.properties_role_safety_valve

Required

true

Suppress Parameter Validation: HTTP Metric Report Host

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Metric Report Host parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.http.metrics.host

Required

true

Suppress Parameter Validation: HTTP Metric Report Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Metric Report Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.http.metrics.password

Required

true

Suppress Parameter Validation: HTTP Metric Report Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Metric Report Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.http.metrics.port

Required

true

Suppress Parameter Validation: HTTP Metric Report User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Metric Report User parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.http.metrics.user

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Kafka Broker Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka_broker_role_env_safety_valve

Required

true

Suppress Parameter Validation: Data Directories**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Data Directories parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log.dirs

Required

true

Suppress Parameter Validation: Segment File Size**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Segment File Size parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log.segment.bytes

Required

true

Suppress Parameter Validation: Kafka Broker Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Kafka Broker Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Number of I/O Threads**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of I/O Threads parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_num.io.threads

Required

true

Suppress Parameter Validation: Number of Network Threads**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Network Threads parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_num.network.threads

Required

true

Suppress Parameter Validation: Number of Recovery Threads per data directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Recovery Threads per data directory parameter.

Related Name**Default Value**

false

API Name

`role_config_suppression_num.recovery.threads.per.data.dir`**Required**`true`**Suppress Parameter Validation: Number of Alter Log Dir Threads****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Alter Log Dir Threads parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_num.replica.alter.log.dirs.threads`**Required**`true`**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_oom_heap_dump_dir`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Exporters Section****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_exporters`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Extensions Section****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: TCP Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the TCP Port parameter.

Related Name

Default Value

false

API Name

role_config_suppression_port

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kafka-audit.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kafka-policymgr-ssl.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kafka-security.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ranger Kafka Plugin Conf Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Conf Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_conf_path

Required

true

Suppress Parameter Validation: Ranger Kafka Plugin Audit Hdfs Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Audit Hdfs Spool Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_hdfs_audit_spool_directory

Required

true

Suppress Parameter Validation: Ranger Kafka Plugin Policy Cache Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Policy Cache Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_policy_cache_directory

Required

true

Suppress Parameter Validation: Ranger Kafka Plugin Audit Solr Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Audit Solr Spool Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_solr_audit_spool_directory

Required

true

Suppress Parameter Validation: Ranger Plugin Trusted Proxy IP Address

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Plugin Trusted Proxy IP Address parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_plugin_trusted_proxy_ipaddress

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties parameter.

Related Name**Default Value**

	false
API Name	
	role_config_suppression_ssl.properties_role_safety_valve
Required	
	true

Suppress Parameter Validation: Kafka Broker TLS/SSL Trust Store File

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Trust Store File parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_ssl_client_truststore_location
Required	
	true

Suppress Parameter Validation: Kafka Broker TLS/SSL Trust Store Password

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Trust Store Password parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_ssl_client_truststore_password
Required	
	true

Suppress Parameter Validation: TLS/SSL Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the TLS/SSL Port parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_ssl_port
Required	
	true

Suppress Parameter Validation: Kafka Broker TLS/SSL Server Keystore Key Password

Description	
-------------	--

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Server Keystore Key Password parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Parameter Validation: Kafka Broker TLS/SSL Server Keystore File Location

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Server Keystore File Location parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Kafka Broker TLS/SSL Server Keystore File Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Server Keystore File Password parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for zookeeper-ssl.properties

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for zookeeper-ssl.properties parameter.

Related Name

Default Value

false

API Name

role_config_suppression_zookeeper-ssl.properties_role_safety_valve

Required

true

Suppress Health Test: Lagging Replicas Test

Description

Whether to suppress the results of the Lagging Replicas Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka-kafka_broker-7.2.0-lagging_replicas

Required

true

Suppress Health Test: Network Processor Capacity Test

Description

Whether to suppress the results of the Network Processor Capacity Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka-kafka_broker-7.2.0-network_processor_capacity

Required

true

Suppress Health Test: Offline Directory Test

Description

Whether to suppress the results of the Offline Directory Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka-kafka_broker-7.2.0-offline_directories

Required

true

Suppress Health Test: Offline Partitions Test

Description

Whether to suppress the results of the Offline Partitions Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka-kafka_broker-7.2.0-offline_partitions

Required

true

Suppress Health Test: Request Handler Capacity Test

Description

Whether to suppress the results of the Request Handler Capacity Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka-kafka_broker-7.2.0-request_handler_capacity

Required

true

Suppress Health Test: Audit Pipeline Test

Description

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka_kafka_broker_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_log_directory_free_space

Required

true

Suppress Health Test: Otelcol Health**Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_otelcol_health

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka_kafka_broker_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_broker_unexpected_exits

Required

true

Kafka Connect**Advanced****Kafka Connect Advanced Configuration Snippet (Safety Valve) for connect-distributed.properties****Description**

For advanced use only. A string to be inserted into connect-distributed.properties for this role only.

Related Name**Default Value****API Name**

connect-distributed.properties_role_safety_valve

Required

false

Kafka Connect Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

KAFKA_CONNECT_role_env_safety_valve

Required

false

Kafka Connect Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name	oom_heap_dump_enabled
Required	true

Kill When Out of Memory

Description	When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.
Related Name	
Default Value	true
API Name	oom_sigkill_enabled
Required	true

Automatically Restart Process

Description	When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.
Related Name	
Default Value	false
API Name	process_auto_restart
Required	true

Enable Metric Collection

Description	Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.
Related Name	
Default Value	true
API Name	process_should_monitor
Required	true

Process Start Retry Attempts

Description	
--------------------	--

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

Required

false

Logs

Kafka Connect Log Directory

Description

The log directory for log files of the role Kafka Connect.

Related Name

kafka_connect.log4j.dir

Default Value

/var/log/kafka

API Name

log_dir

Required

false

Kafka Connect Logging Threshold

Description

The minimum log level for Kafka Connect logs

Related Name

Default Value

INFO

API Name

log_threshold
Required
false

Kafka Connect Maximum Log File Backups

Description
The maximum number of rolled log files to keep for Kafka Connect logs. Typically used by log4j or logback.
Related Name
Default Value
10
API Name
max_log_backup_index
Required
false

Kafka Connect Max Log Size

Description
The maximum size, in megabytes, per log file for Kafka Connect logs. Typically used by log4j or logback.
Related Name
Default Value
200 MiB
API Name
max_log_size
Required
false

Monitoring

Enable Health Alerts for this Role

Description
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Enable JMX Exporter (beta)**Description**

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name**Default Value**

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port**Description**

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name**Default Value****API Name**

jmx_exporter_port

Required

false

JMX Exporter configuration YAML**Description**

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name**Default Value****API Name**

jmx_exporter_yaml

Required

false

File Descriptor Monitoring Thresholds**Description**

	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	kafka_connect_fd_thresholds
Required	false

Kafka Connect Host Health Test

Description	When computing the overall Kafka Connect health, consider the host's health.
Related Name	
Default Value	true
API Name	kafka_connect_host_health_enabled
Required	false

Kafka Connect Process Health Test

Description	Enables the health test that the Kafka Connect's process state is consistent with the role configuration
Related Name	
Default Value	true
API Name	kafka_connect_scm_health_enabled
Required	false

Log Directory Free Space Monitoring Absolute Thresholds

Description	The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
Related Name	
Default Value	Warning: 10 GiB, Critical: 5 GiB
API Name	log_directory_free_space_absolute_thresholds
Required	false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Bootstrap Servers****Description**

A comma-separated list of IP:port or hostname:port pairs of the brokers that Kafka Connect should connect to. The brokers you specify here must be brokers that are running in the same cluster that Kafka Connect is deployed in. Cloudera recommends that you specify multiple brokers for high availability.

Related Name

bootstrap.servers

Default Value**API Name**

bootstrap.servers

Required

true

Configuration Storage Topic Replication Factor**Description**

Replication factor used when creating the configuration storage topic.

Related Name

	config.storage.replication.factor
Default Value	1
API Name	config.storage.replication.factor
Required	true

Configuration Storage Topic Name

Description	The name of the Kafka topic which stores connector and task configurations.
Related Name	config.storage.topic
Default Value	connect-configs
API Name	config.storage.topic
Required	true

Cluster Group Id

Description	A unique name used to identify the Connect cluster group. The name specified here cannot conflict with consumer group IDs.
Related Name	group.id
Default Value	connect-cluster
API Name	group.id
Required	true

Include Connector Context In Logs

Description	If this is enabled, the log layout includes connector-specific and task-specific information in the log message, where appropriate. This makes it easier to identify those log messages that apply to a specific connector.
Related Name	include.connector.context
Default Value	true
API Name	include.connector.context
Required	

false

Kafka Connect Configuration Directory

Description

Directory with all configurations for Kafka Connect daemons.

Related Name

kafka.connect.conf.directory

Default Value

\$CONF_DIR

API Name

kafka.connect.conf.directory

Required

true

Java Home Path Override

Description

Java Home Path Override for Kafka Connect.

Related Name

kafka.connect.jdk.home

Default Value**API Name**

kafka.connect.jdk.home

Required

false

Kafka Connect Heap Java Options

Description

Memory heap params while using Kafka Connect.

Related Name

KAFKA_HEAP_OPTS

Default Value

-Xms256M -Xmx2G

API Name

KAFKA_HEAP_OPTS

Required

false

Key Converter

Description

The key converter class used to convert between the Kafka Connect format and the serialized form that is written to Kafka. The key converter controls the format of the keys in the messages written to or read from Kafka. Since the key converter is independent of the connectors, it allows any connector to work with any serialization format. Examples of common formats include JSON and Avro.

Related Name

key.converter
Default Value
org.apache.kafka.connect.json.JsonConverter
API Name
key.converter
Required
true

Enable Key Converter Schema

Description
Enables the key converter to include schemas within each of the serialized keys.
Related Name
key.converter.schemas.enable
Default Value
true
API Name
key.converter.schemas.enable
Required
true

Jetty Metrics Port

Description
Jetty Metrics port to expose JMX Jsn.
Related Name
metrics.jetty.server.port
Default Value
28084
API Name
metrics.jetty.server.port
Required
true

Offset Flush Interval

Description
The interval, in milliseconds, at which Kafka Connect attempts to commit task offsets.
Related Name
offset.flush.interval.ms
Default Value
1 minute(s)
API Name
offset.flush.interval.ms
Required
true

Offset Storage Topic Replication Factor

Description

Replication factor used when creating the offset storage topic.

Related Name

offset.storage.replication.factor

Default Value

1

API Name

offset.storage.replication.factor

Required

true

Offset Storage Topic Name

Description

The name of the Kafka topic which stores connector offsets. If this topic does not exist, Kafka Connect will attempt to create it. Alternatively, you can also choose to create the topic manually before starting Kafka Connect.

Related Name

offset.storage.topic

Default Value

connect-offsets

API Name

offset.storage.topic

Required

true

Plugin Path

Description

Path to directories immediately containing jars with plugins and their dependencies, uber-jars with plugins and their dependencies and classes of plugins and their dependencies.

Related Name

plugin.path

Default Value

/var/lib/kafka

API Name

plugin.path

Required

false

Rest Extension Classes

Description

Comma-separated names of ConnectRestExtension classes, loaded and called in the order specified. Typically used to add custom capability like logging, security, etc.

Related Name

rest.extension.classes

Default Value`com.cloudera.dim.kafka.metrics.JmxJsonMetricsRestExtension`**API Name**`rest.extension.classes`**Required**`true`**Kafka Connect Rest Port****Description**

The port that the REST API listens on for connection requests. This port is used by Kafka Connect if TLS/SSL is disabled.

Related Name`rest.port`**Default Value**`28083`**API Name**`rest.port`**Required**`true`**Secure Kafka Connect Rest Port****Description**

The secure port that the REST API listens on for connection requests. This port is used by Kafka Connect if TLS/SSL is enabled.

Related Name`secure.rest.port`**Default Value**`28085`**API Name**`secure.rest.port`**Required**`true`**SSL Client Authentication****Description**

Client authentication mode for SSL connections. If set to "required", client authentication is required. If set to "requested", client authentication is requested and clients without certificates can still connect. If set to "none", which is the default value, no client authentication is required.

Related Name`ssl.client.auth`**Default Value**`none`**API Name**`ssl.client.auth`**Required**

false

Status Storage Topic Replication Factor

Description

Replication factor used when creating the offset storage topic.

Related Name

status.storage.replication.factor

Default Value

1

API Name

status.storage.replication.factor

Required

true

Status Storage Topic Name

Description

The name of the Kafka topic which stores connector and task status.

Related Name

status.storage.topic

Default Value

connect-status

API Name

status.storage.topic

Required

true

Value Converter

Description

The value converter class used to convert between the Kafka Connect format and the serialized form that is written to Kafka. The value converter controls the format of the values in the messages written to or read from Kafka. Since the value converter is independent of the connectors, it allows any connector to work with any serialization format. Examples of common formats include JSON and Avro.

Related Name

value.converter

Default Value

org.apache.kafka.connect.json.JsonConverter

API Name

value.converter

Required

true

Enable Value Converter Schema

Description

Enables the value converter to include schemas within each of the serialized values.

Related Name

value.converter.schemas.enable
Default Value
true
API Name
value.converter.schemas.enable
Required
true

Performance

Maximum Process File Descriptors

Description
If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name
Default Value
API Name
rlimit_fds
Required
false

Ports and Addresses

Kafka Connect Prometheus Metrics Port

Description
Port for exposing Kafka Connect metrics as Prometheus metrics / OpenMetrics format.
Related Name
connect.prometheus.metrics.port
Default Value
28086
API Name
connect.prometheus.metrics.port
Required
false

Resource Management

Cgroup CPU Shares

Description
Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name
cpu.shares
Default Value
1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

`rm_memory_hard_limit`**Required**`true`**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name`memory.soft_limit_in_bytes`**Default Value**`-1 MiB`**API Name**`rm_memory_soft_limit`**Required**`true`**Security****Kafka Connect TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Kafka Connect might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name`ssl.truststore.location`**Default Value****API Name**`ssl_client_truststore_location`**Required**`false`**Kafka Connect TLS/SSL Trust Store Password****Description**

The password for the Kafka Connect TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name`ssl.truststore.password.generator`**Default Value****API Name**`ssl_client_truststore_password`

Required

false

Enable TLS/SSL for Kafka Connect**Description**

Encrypt communication between clients and Kafka Connect using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ssl_enabled

Default Value

false

API Name

ssl_enabled

Required

false

Kafka Connect TLS/SSL Server Keystore Key Password**Description**

The password that protects the private key contained in the keystore used when Kafka Connect is acting as a TLS/SSL server.

Related Name

ssl.key.password.generator

Default Value**API Name**

ssl_server_keystore_keypassword

Required

false

Kafka Connect TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Kafka Connect is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.keystore.location

Default Value**API Name**

ssl_server_keystore_location

Required

false

Kafka Connect TLS/SSL Server Keystore File Password**Description**

The password for the Kafka Connect keystore file.

Related Name

ssl.keystore.password.generator
Default Value
API Name
ssl_server_keystore_password
Required
false

Stacks Collection

Stacks Collection Data Retention

Description
The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name
stacks_collection_data_retention
Default Value
100 MiB
API Name
stacks_collection_data_retention
Required
false

Stacks Collection Directory

Description
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name
stacks_collection_directory
Default Value
API Name
stacks_collection_directory
Required
false

Stacks Collection Enabled

Description
Whether or not periodic stacks collection is enabled.
Related Name
stacks_collection_enabled
Default Value
false
API Name
stacks_collection_enabled

Required

true

Stacks Collection Frequency**Description**

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Parameter Validation: Bootstrap Servers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Bootstrap Servers parameter.

Related Name**Default Value**

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Secure Kafka Connect Rest Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Kafka Connect Rest Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_secure.rest.port

Required

true

Suppress Parameter Validation: Kafka Connect TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Kafka Connect TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Kafka Connect TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Parameter Validation: Kafka Connect TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Kafka Connect TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Parameter Validation: Status Storage Topic Replication Factor**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Status Storage Topic Replication Factor parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_status.storage.replication.factor

Required

true

Suppress Parameter Validation: Status Storage Topic Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Status Storage Topic Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_status.storage.topic
Required
true

Suppress Parameter Validation: Value Converter

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Value Converter parameter.
Related Name
Default Value
false
API Name
role_config_suppression_value.converter
Required
true

Suppress Health Test: Audit Pipeline Test

Description
Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name
Default Value
false
API Name
role_health_suppression_kafka_kafka_connect_audit_health
Required
true

Suppress Health Test: File Descriptors

Description
Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name
Default Value
false
API Name
role_health_suppression_kafka_kafka_connect_file_descriptor
Required
true

Suppress Health Test: Host Health

Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_log_directory_free_space

Required

true

Suppress Health Test: Otelcol Health**Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_otelcol_health

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_connect_unexpected_exits

Required

true

Kafka MirrorMaker

Advanced

Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

KAFKA_MIRROR_MAKER_role_env_safety_valve

Required

false

Kafka MirrorMaker Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_consumers.properties

Description

For advanced use only. A string to be inserted into mirror_maker_consumers.properties for this role only.

Related Name**Default Value**

API Name

mirror_maker_consumers.properties_role_safety_valve

Required

false

Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_producers.properties**Description**

For advanced use only. A string to be inserted into mirror_maker_producers.properties for this role only.

Related Name**Default Value****API Name**

mirror_maker_producers.properties_role_safety_valve

Required

false

Heap Dump Directory**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3
API Name
process_start_retries
Required
false

Process Start Wait Timeout

Description
The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
Related Name
Default Value
20
API Name
process_start_secs
Required
false

Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_client.properties

Description
For advanced use only. A string to be inserted into ssl_client.properties for this role only.
Related Name
Default Value
API Name
ssl_client.properties_role_safety_valve
Required
false

Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_server.properties

Description
For advanced use only. A string to be inserted into ssl_server.properties for this role only.
Related Name
Default Value
API Name
ssl_server.properties_role_safety_valve
Required
false

Logs

Kafka MirrorMaker Log Directory

Description
The log directory for log files of the role Kafka MirrorMaker.

Related Name	kafka_mirrormaker.log4j.dir
Default Value	/var/log/kafka
API Name	log_dir
Required	false

Kafka MirrorMaker Logging Threshold

Description	The minimum log level for Kafka MirrorMaker logs
Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

Kafka MirrorMaker Maximum Log File Backups

Description	The maximum number of rolled log files to keep for Kafka MirrorMaker logs. Typically used by log4j or logback.
Related Name	
Default Value	10
API Name	max_log_backup_index
Required	false

Kafka MirrorMaker Max Log Size

Description	The maximum size, in megabytes, per log file for Kafka MirrorMaker logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB
API Name	max_log_size
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts
Required	false

Enable JMX Exporter (beta)

Description	JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. See the JMX Exporter documentation.
Related Name	
Default Value	false
API Name	jmx_exporter_enabled
Required	true

JMX Exporter Port

Description	JMX Exporter needs a port to implement a Prometheus exporter.
Related Name	
Default Value	
API Name	

jmx_exporter_port
Required
false

JMX Exporter configuration YAML

Description
This configuration is passed to JMX Exporter as it is. See the JMX Exporter documentation.
Related Name
Default Value
API Name
jmx_exporter_yaml
Required
false

File Descriptor Monitoring Thresholds

Description
The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name
Default Value
Warning: 50.0 %, Critical: 70.0 %
API Name
kafka_mirror_maker_fd_thresholds
Required
false

Kafka MirrorMaker Host Health Test

Description
When computing the overall Kafka MirrorMaker health, consider the host's health.
Related Name
Default Value
true
API Name
kafka_mirror_maker_host_health_enabled
Required
false

Kafka MirrorMaker Process Health Test

Description
Enables the health test that the Kafka MirrorMaker's process state is consistent with the role configuration
Related Name
Default Value
true

API Name

kafka_mirror_maker_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

extensions: basicauth/common: client_auth: username:
\$ROLE_PARAM(otelcol_remote_write_user) password:
'\$ROLE_PARAM(otelcol_remote_write_password)'

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name**Default Value**

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value`$INFRA(cdp_request_signer_url)`**API Name**`otelcol_remote_write_url`**Required**`false`**OpenTelemetry Collector Remote Write Username****Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_user)` expression. Specify `$INFRA(cdp_request_signer_username)` when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**`$INFRA(cdp_request_signer_username)`**API Name**`otelcol_remote_write_user`**Required**`false`**OpenTelemetry Collector Service Section****Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**`otelcol_service`**Required**`false`**Enable OpenTelemetry Collector (beta)****Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**`false`**API Name**`otelcol_should_collect`**Required**`true`

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part of the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.

- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Abort on Send Failure

Description	Stop the entire mirror maker when a send failure occurs.
Related Name	abort.on.send.failure
Default Value	true
API Name	abort.on.send.failure
Required	false

Producer Batch Size

Description	This configuration controls the batch size in bytes. The producer will attempt to batch records together into fewer requests whenever multiple records are being sent to the same partition. This helps performance on both the client and the server.
Related Name	batch.size
Default Value	16 KiB
API Name	batch.size
Required	false

Destination Broker List

Description	Comma-separated list of IP:port (or hostname:port) pairs of brokers on destination cluster. This should be more than one, for high availability, but there's no need to list all brokers.
Related Name	bootstrap.servers
Default Value	
API Name	bootstrap.servers
Required	true

Producer Buffer Memory

Description	The total bytes of memory the producer can use to buffer records waiting to be sent to the server.
Related Name	buffer.memory

Default Value	32 MiB
API Name	buffer.memory
Required	false

Producer Compression Type

Description	The compression type for all data generated by the producer.
Related Name	compression.type
Default Value	none
API Name	compression.type
Required	false

MirrorMaker Consumer Rebalance Listener

Description	A consumer rebalance listener of the ConsumerRebalanceListener type. Invoked when MirrorMaker's consumer rebalances.
Related Name	consumer.rebalance.listener
Default Value	
API Name	consumer.rebalance.listener
Required	false

MirrorMaker Consumer Rebalance Listener Arguments

Description	Arguments used by MirrorMaker consumer rebalance listener.
Related Name	consumer.rebalance.listener.args
Default Value	
API Name	consumer.rebalance.listener.args
Required	false

Consumer Request Timeout

Description	
--------------------	--

The maximum amount of time the consumer will wait for the response of a request. If the response is not received before the timeout elapses, the consumer will resend the request if necessary or fail the request if retries are exhausted.

Related Name

consumer.request.timeout.ms

Default Value

40 second(s)

API Name

consumer.request.timeout.ms

Required

false

Destination Kafka Cluster's Security Protocol**Description**

Protocol used for communication with destination Kafka cluster.

Related Name

destination.security.protocol

Default Value

PLAINTEXT

API Name

destination.security.protocol

Required

false

Destination Kafka Cluster's Client Auth**Description**

Only required if destination Kafka cluster requires client authentication.

Related Name

destination.ssl.client.auth

Default Value

false

API Name

destination.ssl.client.auth

Required

false

Consumer Minimum Fetch Size**Description**

The minimum amount of data the server should return for a fetch request. If insufficient data is available, the request will wait for that much data to accumulate before answering the request. Setting this property to something greater than 1 will cause the server to wait for larger amounts of data to accumulate which can improve server throughput a bit at the cost of some additional latency.

Related Name

fetch.min.bytes

Default Value

1 B

API Name

fetch.min.bytes

Required

false

Consumer Group ID**Description**

Name of the consumer group used by MirrorMaker. When multiple role instances are configured with the same topics and same group ID, the role instances load-balance replication for the topics. When multiple role instances are configured with the same topics but different group ID, each role instance replicates all the events for those topics - this can be used to replicate the source cluster into multiple destination clusters.

Related Name

group.id

Default Value

cloudera_mirrormaker

API Name

group.id

Required

false

Enable Authenticated Communication with the JMX Agent**Description**

Enables Authenticated Communication with the JMX Agent.

Related Name

jmx.auth.enabled

Default Value

false

API Name

jmx.auth.enabled

Required

false

Name of User with Read-Write Access to the JMX Agent**Description**

Specifies the name of the user that has read-write privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.control.user

Default Value

controlRole

API Name

jmx.control.user

Required

false

Password of user with read-write access to the JMX agent

Description

Specifies the password of the user that has read-write privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.control.user.passwd

Default Value

API Name

jmx.control.user.passwd

Required

false

Name of User with read-only access to the JMX Agent

Description

Specifies the name of the user that has read-only privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.monitor.user

Default Value

monitorRole

API Name

jmx.monitor.user

Required

false

Password of User with read-only Access to the JMX agent

Description

Specifies the password of the user that has read-only privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

Related Name

jmx.monitor.user.passwd

Default Value

API Name

jmx.monitor.user.passwd

Required

false

Enable TLS client authentication for JMX port

Description

If enabled, a valid client certificate must be presented by the JMX client in order to connect to the JMX port. Ensure that the trusted CA certificates are present in either the ZooKeeper JMX TLS/SSL Server Trust Store file or the global trust store.

Related Name

jmx.ssl.client.auth.enabled

Default Value

false

API Name

jmx.ssl.client.auth.enabled

Required

false

Enable TLS/SSL for Kafka JMX**Description**

Encrypt communication between clients and Kafka JMX using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

jmx.ssl.enabled

Default Value

false

API Name

jmx.ssl.enabled

Required

false

Producer Linger Time**Description**

The upper bound on the delay for batching. Once the producer gets a batch.size worth of records for a partition it will be sent immediately regardless of this setting. However, if fewer than this many bytes accumulated for this partition the producer will 'linger' for the specified time waiting for more records to show up.

Related Name

linger.ms

Default Value

0 second(s)

API Name

linger.ms

Required

false

MirrorMaker Message Handler**Description**

A MirrorMaker message handler of the MirrorMakerMessageHandler type that will process every record in-between producer and consumer.

Related Name

message.handler

Default Value**API Name**

message.handler

Required
false

MirrorMaker Message Handler Arguments

Description
Arguments used by MirrorMaker message handler.
Related Name
message.handler.args
Default Value
API Name
message.handler.args
Required
false

Additional MirrorMaker Java Options

Description
These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here.
Related Name
mirror_maker_java_opts
Default Value

API Name
mirror_maker_java_opts
Required
false

Java Heap Size of MirrorMaker

Description
Maximum size for the Java process heap memory. Passed to Java -Xmx. Measured in megabytes.
Related Name
mirror_maker_max_heap_size
Default Value
1 GiB
API Name
mirror_maker_max_heap_size
Required
false

Number of Consumer Threads

Description
Number of consumer threads.

Related Name

num.streams

Default Value

1

API Name

num.streams

Required

false

Offset Commit Interval**Description**

Offset commit interval in milliseconds.

Related Name

offset.commit.interval.ms

Default Value

60000

API Name

offset.commit.interval.ms

Required

false

Producer Request Timeout**Description**

The maximum amount of time the producer will wait for the response of a request. If the response is not received before the timeout elapses, the producer will resend the request if necessary or fail the request if retries are exhausted.

Related Name

producer.request.timeout.ms

Default Value

30 second(s)

API Name

producer.request.timeout.ms

Required

false

Consumer Session Timeout**Description**

The timeout used to detect failures when using the group management facilities of Kafka. When the heartbeat of a consumer is not received within the session timeout, the broker will mark the consumer as failed and rebalance the group. Note that the value must be in the allowable range as configured in the broker by group.min.session.timeout.ms and group.max.session.timeout.ms.

Related Name

session.timeout.ms

Default Value

30 second(s)

API Name

session.timeout.ms

Required

false

Source Broker List**Description**

Comma-separated list of IP:port (or hostname:port) pairs of brokers on source cluster. This should be more than one, for high availability, but there's no need to list all brokers.

Related Name

source.bootstrap.servers

Default Value**API Name**

source.bootstrap.servers

Required

true

Source Kafka Cluster's Security Protocol**Description**

Protocol used for communication with source Kafka cluster.

Related Name

source.security.protocol

Default Value

PLAINTEXT

API Name

source.security.protocol

Required

false

Source Kafka Cluster's Client Auth**Description**

Only required if the source Kafka cluster requires client authentication.

Related Name

source.ssl.client.auth

Default Value

false

API Name

source.ssl.client.auth

Required

false

Topic Whitelist**Description**

Regular expression that represents a set of topics to mirror.

Related Name

whitelist
Default Value
API Name
whitelist
Required
true

Performance

Maximum Process File Descriptors

Description
If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name
Default Value
API Name
rlimit_fds
Required
false

Ports and Addresses

JMX Port

Description
Port for JMX.
Related Name
jmx_port
Default Value
9394
API Name
jmx_port
Required
false

Resource Management

Cgroup CPU Shares

Description
Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name
cpu.shares
Default Value
1024
API Name

`rm_cpu_shares`**Required**`true`**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the `cgexec` command: `resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`
These settings override other cgroup settings.

Related Name`custom.cgroups`**Default Value****API Name**`rm_custom_resources`**Required**`false`**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name`blkio.weight`**Default Value**`500`**API Name**`rm_io_weight`**Required**`true`**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name`memory.limit_in_bytes`**Default Value**`-1 MiB`**API Name**`rm_memory_hard_limit`

Required
true

Cgroup Memory Soft Limit

Description
Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'
Related Name
memory.soft_limit_in_bytes
Default Value
-1 MiB
API Name
rm_memory_soft_limit
Required
true

Security

Kafka MirrorMaker TLS/SSL Trust Store File

Description
The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Kafka MirrorMaker might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.
Related Name
ssl.truststore.location
Default Value
API Name
ssl_client_truststore_location
Required
false

Kafka MirrorMaker TLS/SSL Trust Store Password

Description
The password for the Kafka MirrorMaker TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name
ssl.truststore.password.generator
Default Value
API Name
ssl_client_truststore_password

Required
false

Enable TLS/SSL for Kafka MirrorMaker

Description
Encrypt communication between clients and Kafka MirrorMaker using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).
Related Name
ssl_enabled
Default Value
false
API Name
ssl_enabled
Required
false

Kafka MirrorMaker TLS/SSL Server Keystore Key Password

Description
The password that protects the private key contained in the keystore used when Kafka MirrorMaker is acting as a TLS/SSL server.
Related Name
ssl.key.password.generator
Default Value
API Name
ssl_server_keystore_keypassword
Required
false

Kafka MirrorMaker TLS/SSL Server Keystore File Location

Description
The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Kafka MirrorMaker is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.
Related Name
ssl.keystore.location
Default Value
API Name
ssl_server_keystore_location
Required
false

Kafka MirrorMaker TLS/SSL Server Keystore File Password

Description
The password for the Kafka MirrorMaker keystore file.
Related Name

ssl.keystore.password.generator

Default Value

API Name

ssl_server_keystore_password

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value

API Name

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required
true

Stacks Collection Frequency

Description
The frequency with which stacks are collected.
Related Name
stacks_collection_frequency
Default Value
5.0 second(s)
API Name
stacks_collection_frequency
Required
false

Stacks Collection Method

Description
The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name
stacks_collection_method
Default Value
jstack
API Name
stacks_collection_method
Required
false

Suppressions

Suppress Parameter Validation: Destination Broker List

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Destination Broker List parameter.
Related Name
Default Value
false
API Name
role_config_suppression_bootstrap.servers
Required
true

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: MirrorMaker Consumer Rebalance Listener**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the MirrorMaker Consumer Rebalance Listener parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_consumer.rebalance.listener

Required

true

Suppress Parameter Validation: MirrorMaker Consumer Rebalance Listener Arguments**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the MirrorMaker Consumer Rebalance Listener Arguments parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_consumer.rebalance.listener.args

Required

true

Suppress Parameter Validation: Consumer Group ID**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Consumer Group ID parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_group.id

Required

true

Suppress Parameter Validation: Name of User with Read-Write Access to the JMX Agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Name of User with Read-Write Access to the JMX Agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.control.user

Required

true

Suppress Parameter Validation: Password of user with read-write access to the JMX agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password of user with read-write access to the JMX agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.control.user.passwd

Required

true

Suppress Parameter Validation: Name of User with read-only access to the JMX Agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Name of User with read-only access to the JMX Agent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.monitor.user

Required

true

Suppress Parameter Validation: Password of User with read-only Access to the JMX agent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password of User with read-only Access to the JMX agent parameter.

Related Name**Default Value**

false

API Name`role_config_suppression_jmx.monitor.user.passwd`**Required**`true`**Suppress Parameter Validation: JMX Exporter Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_jmx_exporter_port`**Required**`true`**Suppress Parameter Validation: JMX Exporter configuration YAML****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_jmx_exporter_yaml`**Required**`true`**Suppress Parameter Validation: JMX Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Port parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_jmx_port`**Required**`true`**Suppress Parameter Validation: Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka_mirror_maker_role_env_safety_valve

Required

true

Suppress Parameter Validation: Kafka MirrorMaker Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Kafka MirrorMaker Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: MirrorMaker Message Handler**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the MirrorMaker Message Handler parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_message.handler

Required

true

Suppress Parameter Validation: MirrorMaker Message Handler Arguments**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the MirrorMaker Message Handler Arguments parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_message.handler.args

Required

true

Suppress Parameter Validation: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_consumers.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_consumers.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_consumers.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Additional MirrorMaker Java Options**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional MirrorMaker Java Options parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_java_opts

Required

true

Suppress Parameter Validation: Java Heap Size of MirrorMaker**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of MirrorMaker parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_max_heap_size

Required

true

Suppress Parameter Validation: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_producers.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_producers.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_producers.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name`role_config_suppression_otelcol_remote_write_password`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_remote_write_url`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_remote_write_user`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Service Section****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_service`**Required**`true`**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Source Broker List**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Source Broker List parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_source.bootstrap.servers

Required

true

Suppress Parameter Validation: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_client.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_client.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client.properties_role_safety_valve

Required

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Parameter Validation: Topic Whitelist**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Topic Whitelist parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_whitelist

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

`role_health_suppression_kafka_kafka_mirror_maker_host_health`**Required**`true`**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**`false`**API Name**`role_health_suppression_kafka_kafka_mirror_maker_log_directory_free_space`**Required**`true`**Suppress Health Test: Otelcol Health****Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**`false`**API Name**`role_health_suppression_kafka_kafka_mirror_maker_otelcol_health`**Required**`true`**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**`false`**API Name**`role_health_suppression_kafka_kafka_mirror_maker_scm_health`**Required**`true`**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kafka_kafka_mirror_maker_unexpected_exits

Required

Monitoring

Enable Service Level Health Alerts

Description
When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Healthy Kafka Broker Monitoring Thresholds**Description**

The health test thresholds of the overall Kafka Broker health. The check returns "Concerning" health if the percentage of "Healthy" Kafka Brokers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Kafka Brokers falls below the critical threshold.

Related Name**Default Value**

Warning: 94.99 %, Critical: 49.99 %

API Name

KAFKA_KAFKA_BROKER_healthy_thresholds

Required

false

Healthy Kafka Connect Monitoring Thresholds**Description**

The health test thresholds of the overall Kafka Connect health. The check returns "Concerning" health if the percentage of "Healthy" Kafka Connects falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Kafka Connects falls below the critical threshold.

Related Name**Default Value**

Warning: 94.99 %, Critical: 49.99 %

API Name

KAFKA_KAFKA_CONNECT_healthy_thresholds

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific service.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.

- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

`service_triggers`

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**

`smon_derived_configs_safety_valve`

Required

false

Other**Atlas metadata namespace for Kafka Clients****Description**

Metadata Namespace used in Atlas for Kafka clients (Producers, Consumers). It may be different from the topic namespace when clients used across clusters.

Related Name

`atlas.metadata.namespace.client`

Default Value

cm

API Name

`atlas.metadata.namespace.client`

Required

false

Atlas metadata namespace for Kafka Topics

Description

Metadata Namespace used in Atlas for Kafka topics.

Related Name

atlas.metadata.namespace.topic

Default Value

cm

API Name

atlas.metadata.namespace.topic

Required

false

Topic Auto Creation

Description

Enables auto creation of topics on the server. If set to true, it attempts to produce, consume, or fetch metadata for a non-existent topic automatically create the topic with the default replication factor and number of partitions.

Related Name

auto.create.topics.enable

Default Value

true

API Name

auto.create.topics.enable

Required

false

Enable Automatic Leader Rebalancing

Description

If automatic leader rebalancing is enabled, the controller tries to balance leadership for partitions among the brokers by periodically returning leadership for each partition to the preferred replica, if that replica is available.

Related Name

auto.leader.rebalance.enable

Default Value

true

API Name

auto.leader.rebalance.enable

Required

false

Enable Controlled Shutdown

Description

Enables controlled shutdown of the broker. If enabled, the broker moves all leaders on it to other brokers before shutting itself down. This reduces the unavailability window during shutdown.

Related Name

controlled.shutdown.enable

Default Value

true

API Name

controlled.shutdown.enable

Required

false

Controlled Shutdown Maximum Attempts**Description**

Number of unsuccessful controlled shutdown attempts before executing an unclean shutdown. For example, the default value of 3 means that the system will attempt a controlled shutdown 3 times before executing an unclean shutdown.

Related Name

controlled.shutdown.max.retries

Default Value

3

API Name

controlled.shutdown.max.retries

Required

false

Default Replication Factor**Description**

The default replication factor for automatically created topics.

Related Name

default.replication.factor

Default Value

1

API Name

default.replication.factor

Required

false

Enable Delegation Tokens**Description**

Enables authentication with delegation tokens for this Kafka service. When enabled, a secure password is automatically generated and used as the "delegation.token.master.key" property for Kafka Brokers. Only allowed if Kerberos authentication is enabled.

Related Name

delegation.token.enable

Default Value

true

API Name

delegation.token.enable

Required

false

Delegation Token Expiry Time

Description

The expiry time of a delegation token. A delegation token can be renewed before its expiry time to extend its validity up to its maximum lifetime. If it is not renewed, it will expire even if it has time remaining from its maximum lifetime.

Related Name

delegation.token.expiry.time.ms

Default Value

1 day(s)

API Name

delegation.token.expiry.time.ms

Required

false

Delegation Token Maximum Lifetime

Description

The maximum amount of time that a delegation token can be valid for.

Related Name

delegation.token.max.lifetime.ms

Default Value

7 day(s)

API Name

delegation.token.max.lifetime.ms

Required

false

Enable Delete Topic

Description

Enables topic deletion using admin tools. When delete topic is disabled, deleting topics through the admin tools has no effect.

Related Name

delete.topic.enable

Default Value

true

API Name

delete.topic.enable

Required

false

Consumer Group Maximum Session Timeout

Description

The minimum allowed session timeout for registered consumers. Shorter timeouts result in quicker failure detection at the cost of more frequent consumer heartbeating, which can overwhelm broker resources.

Related Name

group.max.session.timeout.ms

Default Value

30 minute(s)

API Name

group.max.session.timeout.ms

Required

false

Consumer Group Minimum Session Timeout**Description**

The minimum allowed session timeout for registered consumers. Shorter timeouts result in quicker failure detection at the cost of more frequent consumer heartbeating, which can overwhelm broker resources.

Related Name

group.min.session.timeout.ms

Default Value

6 second(s)

API Name

group.min.session.timeout.ms

Required

false

HDFS Service**Description**

Name of the HDFS service that this Kafka service instance depends on

Related Name**Default Value****API Name**

hdfs_service

Required

false

Enable Kafka Decommission**Description**

Kafka decommission flag only takes affect when there is no Cruise Control. In other case the decommission will be always enabled.

Related Name

kafka.decommission.hook.enabled

Default Value

false

API Name

kafka.decommission.hook.enabled

Required

false

List of Metric Reporters

Description	List of metric reporter class names. HTTP reporter is included by default.
Related Name	kafka.metrics.reporters
Default Value	nl.techop.kafka.KafkaHttpMetricsReporter
API Name	kafka.metrics.reporters
Required	false

Enable Kerberos Authentication

Description	Enables Kerberos authentication for this Kafka service.
Related Name	kerberos.auth.enable
Default Value	false
API Name	kerberos.auth.enable
Required	false

LDAP URL

Description	The URL of LDAP for authenticating Kafka clients.
Related Name	ldap.auth.url
Default Value	
API Name	ldap.auth.url
Required	false

LDAP User DN Template

Description	The LDAP user DN template for authenticating Kafka clients.
Related Name	ldap.auth.user.dn.template
Default Value	
API Name	

ldap.auth.user.dn.template
Required
false

Leader Imbalance Check Interval

Description
Defines the frequency of leader imbalance checks.
Related Name
leader.imbalance.check.interval.seconds
Default Value
5 minute(s)
API Name
leader.imbalance.check.interval.seconds
Required
false

Leader Imbalance Allowed Per Broker

Description
The percentage of leader imbalance allowed per broker. The controller rebalances leadership if the leader imbalance ratio goes above the configured value per broker.
Related Name
leader.imbalance.per.broker.percentage
Default Value
10 %
API Name
leader.imbalance.per.broker.percentage
Required
false

Log Cleaner Deduplication Buffer Size

Description
The total memory used for log deduplication across all cleaner threads. This memory is statically allocated and will not cause GC problems.
Related Name
log.cleaner.dedupe.buffer.size
Default Value
128 MiB
API Name
log.cleaner.dedupe.buffer.size
Required
false

Log Compaction Delete Record Retention Time

Description

The amount of time to retain delete messages for log compacted topics. Once a consumer has seen an original message, it has to be ensured that it also sees the delete message. If the delete message is removed too quickly, this might not happen. The configurable delete retention time helps to circumvent this issue.

Related Name

log.cleaner.delete.retention.ms

Default Value

7 day(s)

API Name

log.cleaner.delete.retention.ms

Required

false

Enable Log Compaction**Description**

Enables the log cleaner to compact topics with cleanup.policy=compact on this cluster.

Related Name

log.cleaner.enable

Default Value

true

API Name

log.cleaner.enable

Required

false

Log Cleaner Clean Ratio**Description**

Controls how frequently the log cleaner will attempt to clean the log. This ratio restricts the maximum space wasted by duplicates in the log. For example, if set to 0.5, then at most 50% of the log can be populated by duplicates. A higher ratio results in fewer, more efficient cleaning processes, but more wasted space in the log.

Related Name

log.cleaner.min.cleanable.ratio

Default Value

0.5

API Name

log.cleaner.min.cleanable.ratio

Required

false

Number of Log Cleaner Threads**Description**

The number of background threads used for log cleaning.

Related Name

log.cleaner.threads

Default Value	1
API Name	log.cleaner.threads
Required	false

Log Flush Message Interval

Description	The number of messages written to a log partition before triggering an fsync on the log. Setting this property to a low value results in more frequent data to disk synchronization, but also has major impact on performance. For durability, Cloudera recommends the use of replication rather than depending on a single-server fsync. However, this setting can be used as an extra safety measure. If used in conjunction with log.flush.interval.ms, the log is flushed when either criteria is met.
Related Name	log.flush.interval.messages
Default Value	
API Name	log.flush.interval.messages
Required	false

Log Flush Time Interval

Description	The maximum time between fsync calls on the log. If used in conjunction with log.flush.interval.messages, the log is flushed when either criteria is met.
Related Name	log.flush.interval.ms
Default Value	
API Name	log.flush.interval.ms
Required	false

Log Flush Scheduler Interval

Description	The frequency, in milliseconds, with which the log flusher checks whether any log is eligible to be flushed to disk.
Related Name	log.flush.scheduler.interval.ms
Default Value	
API Name	log.flush.scheduler.interval.ms
Required	false

Maximum Message Size

Description

The maximum size of a message that the server can receive. This property has to be in sync with the maximum fetch size the consumers use. Otherwise, an unruly producer could publish messages that are too large for consumption.

Related Name

message.max.bytes

Default Value

1000000 B

API Name

message.max.bytes

Required

false

Minimum Number of Replicas in ISR

Description

The minimum number of replicas in the in-sync replica needed to satisfy a produce request where required.acks=-1 (that is, all).

Related Name

min.insync.replicas

Default Value

1

API Name

min.insync.replicas

Required

false

Enable Kafka Monitoring

Description

Enables Kafka monitoring.

Related Name

monitoring.enabled

Default Value

true

API Name

monitoring.enabled

Required

false

Default Number of Partitions

Description

The default number of partitions for automatically created topics.

Related Name

num.partitions

Default Value

1
API Name
num.partitions
Required
false

Number of Replica Fetchers

Description
Number of threads used to replicate messages from leaders. Increasing this value increases the degree of I/O parallelism in the follower broker.
Related Name
num.replica.fetchers
Default Value
4
API Name
num.replica.fetchers
Required
false

Offset Retention Time

Description
After a consumer group loses all its consumers (i.e. becomes empty) its offsets will be kept for this retention period before getting discarded. For standalone consumers (using manual assignment), offsets will be expired after the time of last commit plus this retention period.
Related Name
offsets.retention.minutes
Default Value
7 day(s)
API Name
offsets.retention.minutes
Required
false

Offset Commit Topic Number of Partitions

Description
The number of partitions for the offset commit topic. Changing this value after deployment is currently unsupported, therefore, Cloudera recommends using a higher number of partitions (for example, 100-200) for production.
Related Name
offsets.topic.num.partitions
Default Value
50
API Name
offsets.topic.num.partitions
Required

false

Offset Commit Topic Replication Factor

Description

The replication factor for the offset commit topic. A higher setting (for example, 3 or 4) is recommended in order to ensure higher availability. If the offsets topic is created when there are fewer brokers than the replication factor, then the offsets topic is created with fewer replicas.

Related Name

offsets.topic.replication.factor

Default Value

3

API Name

offsets.topic.replication.factor

Required

false

PAM Service

Description

The PAM service name for authenticating Kafka clients. This corresponds to the service name in the PAM configuration.

Related Name

pam.auth.service

Default Value

login

API Name

pam.auth.service

Required

false

Enable Producer Metrics

Description

Enables producer metrics

Related Name

producer.metrics.enable

Default Value

true

API Name

producer.metrics.enable

Required

false

Default Consumer Quota

Description

Any consumer distinguished by clientId/consumer group will get throttled if it fetches more bytes than this value per-second.

Related Name

quota.consumer.default
Default Value
API Name
quota.consumer.default
Required
false

Default Producer Quota

Description
Any producer distinguished by clientId will get throttled if it produces more bytes than this value per-second.
Related Name
quota.producer.default
Default Value
API Name
quota.producer.default
Required
false

Ranger Kafka Plugin Hdfs Audit Directory

Description
The DFS path on which Ranger audits are written.
Related Name
ranger_kafka_plugin_hdfs_audit_directory
Default Value
\$ranger_base_audit_url/kafka
API Name
ranger_kafka_plugin_hdfs_audit_directory
Required
false

'Ranger service' name for this Kafka service

Description
Name of the 'Ranger service', that is used for authorization by this Kafka service. If this parameter is set to the placeholder value '{GENERATED_RANGER_SERVICE_NAME}', a generated service name will be used, and if necessary, created. The generated service name will refer to the name of the cluster and the name of this Kafka service. The name can consist of alphanumeric and '_' characters.
Related Name
ranger.plugin.kafka.service.name
Default Value
cm_kafka
API Name
ranger_plugin_kafka_service_name
Required

false

RANGER Service

Description

Name of the RANGER service that this Kafka service instance depends on

Related Name

Default Value

API Name

ranger_service

Required

false

Replica Maximum Fetch Size

Description

The maximum number of bytes to fetch for each partition in fetch requests that replicas send to the leader. This value should be larger than message.max.bytes.

Related Name

replica.fetch.max.bytes

Default Value

1 MiB

API Name

replica.fetch.max.bytes

Required

false

Allowed Replica Time Lag

Description

If a follower has not sent any fetch requests, nor has it consumed up to the leader's log end offset during this time, the leader removes the follower from the ISR set.

Related Name

replica.lag.time.max.ms

Default Value

30 second(s)

API Name

replica.lag.time.max.ms

Required

false

SASL/PLAIN Authentication

Description

Authentication method that the SASL/PLAIN mechanism uses to authenticate clients.

Related Name

sasl.plain.auth

Default Value

none

API Name	sasl.plain.auth
Required	false

Minimum Number of Replicas in ISR for Transaction State Log

Description	Overridden min.insync.replicas config for the transaction topic.
Related Name	transaction.state.log.min.isr
Default Value	2
API Name	transaction.state.log.min.isr
Required	false

Transaction State Log Replication Factor

Description	The replication factor for the transaction topic (set higher to ensure availability). Internal topic creation will fail until the cluster size meets this replication factor requirement.
Related Name	transaction.state.log.replication.factor
Default Value	3
API Name	transaction.state.log.replication.factor
Required	false

Enable Unclean Leader Election

Description	Enables replicas not in the ISR set to be elected as leader as a last resort, even though doing so might result in data loss.
Related Name	unclean.leader.election.enable
Default Value	false
API Name	unclean.leader.election.enable
Required	false

ZooKeeper Root

Description	
--------------------	--

The znode in ZooKeeper used as a root for this Kafka cluster. **WARNING:** Do not change this property following the initial launch of the Kafka service. Only configure this property during the initial setup phase, before starting the Kafka service for the first time. Updating the root znode on a Kafka service that has already been started does not copy over the original znodes to the new root. This causes Kafka to lose its operational metadata.

Related Name

zookeeper.chroot

Default Value

/kafka

API Name

zookeeper.chroot

Required

false

Enable Secure Connection to ZooKeeper**Description**

Enables SSL/TLS for all connections to ZooKeeper. This applies only if 'Enable TLS/SSL for ZooKeeper' is enabled on the ZooKeeper service.

Related Name

zookeeper.secure.connection.enable

Default Value

true

API Name

zookeeper.secure.connection.enable

Required

false

ZooKeeper Session Timeout**Description**

If the server fails to send a heartbeat to ZooKeeper within this period of time, it is considered dead. If set to a too low value, ZooKeeper might falsely consider a server dead. If set to a too high value, ZooKeeper might take too long to recognize a dead server.

Related Name

zookeeper.session.timeout.ms

Default Value

18 second(s)

API Name

zookeeper.session.timeout.ms

Required

false

ZooKeeper Service**Description**

Name of the ZooKeeper service that this Kafka service instance depends on

Related Name

Default Value
API Name
zookeeper_service
Required
true

Security

Kerberos Principal

Description
Kerberos principal short name used by all roles of this service.
Related Name
Default Value
kafka
API Name
kerberos_princ_name
Required
true

Suppressions

Suppress Configuration Validator: Advertised Host

Description
Whether to suppress configuration warnings produced by the Advertised Host configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_advertised.host.name
Required
true

Suppress Configuration Validator: Advertised Port

Description
Whether to suppress configuration warnings produced by the Advertised Port configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_advertised.port
Required
true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for atlas-application.properties**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for atlas-application.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_atlas-application.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Destination Broker List**Description**

Whether to suppress configuration warnings produced by the Destination Broker List configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_bootstrap.servers

Required

true

Suppress Configuration Validator: Broker ID**Description**

Whether to suppress configuration warnings produced by the Broker ID configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_broker.id

Required

true

Suppress Configuration Validator: Additional Broker Java Options**Description**

Whether to suppress configuration warnings produced by the Additional Broker Java Options configuration validator.

Related Name**Default Value**

false

API Name

`role_config_suppression_broker_java_opts`**Required**`true`**Suppress Configuration Validator: Java Heap Size of Broker****Description**

Whether to suppress configuration warnings produced by the Java Heap Size of Broker configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_broker_max_heap_size`**Required**`true`**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_cdh_version_validator`**Required**`true`**Suppress Configuration Validator: Deploy Directory****Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_client_config_root_dir`**Required**`true`**Suppress Configuration Validator: Configuration Storage Topic Replication Factor****Description**

Whether to suppress configuration warnings produced by the Configuration Storage Topic Replication Factor configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_config.storage.replication.factor

Required

true

Suppress Configuration Validator: Configuration Storage Topic Name**Description**

Whether to suppress configuration warnings produced by the Configuration Storage Topic Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_config.storage.topic

Required

true

Suppress Configuration Validator: Kafka Connect Advanced Configuration Snippet (Safety Valve) for connect-distributed.properties**Description**

Whether to suppress configuration warnings produced by the Kafka Connect Advanced Configuration Snippet (Safety Valve) for connect-distributed.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_connect-distributed.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka Connect Prometheus Metrics Port**Description**

Whether to suppress configuration warnings produced by the Kafka Connect Prometheus Metrics Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_connect.prometheus.metrics.port

Required

true

Suppress Configuration Validator: MirrorMaker Consumer Rebalance Listener**Description**

Whether to suppress configuration warnings produced by the MirrorMaker Consumer Rebalance Listener configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_consumer.rebalance.listener

Required

true

Suppress Configuration Validator: MirrorMaker Consumer Rebalance Listener Arguments**Description**

Whether to suppress configuration warnings produced by the MirrorMaker Consumer Rebalance Listener Arguments configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_consumer.rebalance.listener.args

Required

true

Suppress Configuration Validator: Consumer Group ID**Description**

Whether to suppress configuration warnings produced by the Consumer Group ID configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_group.id

Required

true

Suppress Configuration Validator: Name of User with Read-Write Access to the JMX Agent**Description**

Whether to suppress configuration warnings produced by the Name of User with Read-Write Access to the JMX Agent configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx.control.user
Required
true

Suppress Configuration Validator: Password of user with read-write access to the JMX agent

Description
Whether to suppress configuration warnings produced by the Password of user with read-write access to the JMX agent configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_jmx.control.user.passwd
Required
true

Suppress Configuration Validator: Name of User with read-only access to the JMX Agent

Description
Whether to suppress configuration warnings produced by the Name of User with read-only access to the JMX Agent configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_jmx.monitor.user
Required
true

Suppress Configuration Validator: Password of User with read-only Access to the JMX agent

Description
Whether to suppress configuration warnings produced by the Password of User with read-only Access to the JMX agent configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_jmx.monitor.user.passwd
Required
true

Suppress Configuration Validator: JMX Exporter Port

Description
Whether to suppress configuration warnings produced by the JMX Exporter Port configuration validator.
Related Name

Default Value

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Configuration Validator: JMX Exporter configuration YAML**Description**

Whether to suppress configuration warnings produced by the JMX Exporter configuration YAML configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_yaml

Required

true

Suppress Configuration Validator: JMX Port**Description**

Whether to suppress configuration warnings produced by the JMX Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_port

Required

true

Suppress Configuration Validator: Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-client.conf**Description**

Whether to suppress configuration warnings produced by the Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-client.conf configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka-conf/kafka-client.conf_client_config_safety_valve

Required

true

Suppress Configuration Validator: Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-ranger-repo.properties**Description**

Whether to suppress configuration warnings produced by the Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-ranger-repo.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka-conf/kafka-ranger-repo.properties_client_config_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka-monitoring.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka Connect Configuration Directory**Description**

Whether to suppress configuration warnings produced by the Kafka Connect Configuration Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.connect.conf.directory

Required

true

Suppress Configuration Validator: Java Home Path Override**Description**

Whether to suppress configuration warnings produced by the Java Home Path Override configuration validator.

Related Name**Default Value**

false

API Name`role_config_suppression_kafka.connect.jdk.home`**Required**`true`**Suppress Configuration Validator: HTTP Metric Report Host****Description**

Whether to suppress configuration warnings produced by the HTTP Metric Report Host configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_kafka.http.metrics.host`**Required**`true`**Suppress Configuration Validator: HTTP Metric Report Password****Description**

Whether to suppress configuration warnings produced by the HTTP Metric Report Password configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_kafka.http.metrics.password`**Required**`true`**Suppress Configuration Validator: HTTP Metric Report Port****Description**

Whether to suppress configuration warnings produced by the HTTP Metric Report Port configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_kafka.http.metrics.port`**Required**`true`**Suppress Configuration Validator: HTTP Metric Report User****Description**

Whether to suppress configuration warnings produced by the HTTP Metric Report User configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.http.metrics.user

Required

true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka_broker_role_env_safety_valve

Required

true

Suppress Configuration Validator: Kafka Connect Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Kafka Connect Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kafka_connect_role_env_safety_valve

Required

true

Suppress Configuration Validator: Kafka Connect Heap Java Options

Description

Whether to suppress configuration warnings produced by the Kafka Connect Heap Java Options configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_kafka_heap_opts

Required

true

Suppress Configuration Validator: Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_kafka_mirror_maker_role_env_safety_valve

Required

true

Suppress Configuration Validator: Key Converter

Description

Whether to suppress configuration warnings produced by the Key Converter configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_key.converter

Required

true

Suppress Configuration Validator: Data Directories

Description

Whether to suppress configuration warnings produced by the Data Directories configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_log.dirs

Required

true

Suppress Configuration Validator: Segment File Size**Description**

Whether to suppress configuration warnings produced by the Segment File Size configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log.segment.bytes

Required

true

Suppress Configuration Validator: Kafka Broker Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker Log Directory**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Configuration Validator: MirrorMaker Message Handler**Description**

Whether to suppress configuration warnings produced by the MirrorMaker Message Handler configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_message.handler

Required

true

Suppress Configuration Validator: MirrorMaker Message Handler Arguments**Description**

Whether to suppress configuration warnings produced by the MirrorMaker Message Handler Arguments configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_message.handler.args

Required

true

Suppress Configuration Validator: Jetty Metrics Port**Description**

Whether to suppress configuration warnings produced by the Jetty Metrics Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_metrics.jetty.server.port

Required

true

Suppress Configuration Validator: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_consumers.properties**Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_consumers.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_consumers.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Additional MirrorMaker Java Options**Description**

Whether to suppress configuration warnings produced by the Additional MirrorMaker Java Options configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_java_opts

Required

true

Suppress Configuration Validator: Java Heap Size of MirrorMaker**Description**

Whether to suppress configuration warnings produced by the Java Heap Size of MirrorMaker configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_max_heap_size

Required

true

Suppress Configuration Validator: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_producers.properties**Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror_maker_producers.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_mirror_maker_producers.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Number of I/O Threads**Description**

Whether to suppress configuration warnings produced by the Number of I/O Threads configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_num.io.threads

Required

true

Suppress Configuration Validator: Number of Network Threads**Description**

Whether to suppress configuration warnings produced by the Number of Network Threads configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_num.network.threads

Required

true

Suppress Configuration Validator: Number of Recovery Threads per data directory**Description**

Whether to suppress configuration warnings produced by the Number of Recovery Threads per data directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_num.recovery.threads.per.data.dir

Required

true

Suppress Configuration Validator: Number of Alter Log Dir Threads**Description**

Whether to suppress configuration warnings produced by the Number of Alter Log Dir Threads configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_num.replica.alter.log.dirs.threads

Required

true

Suppress Configuration Validator: Offset Storage Topic Replication Factor**Description**

Whether to suppress configuration warnings produced by the Offset Storage Topic Replication Factor configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_offset.storage.replication.factor

Required

true

Suppress Configuration Validator: Offset Storage Topic Name**Description**

Whether to suppress configuration warnings produced by the Offset Storage Topic Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_offset.storage.topic

Required

true

Suppress Configuration Validator: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_extensions
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_processors
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_receivers
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.
Related Name

Default Value	false
API Name	role_config_suppression_otelcol_remote_write_password
Required	true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL

Description	Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_url
Required	true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username

Description	Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_user
Required	true

Suppress Configuration Validator: OpenTelemetry Collector Service Section

Description	Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_service
Required	true

Suppress Configuration Validator: Plugin Path

Description	
--------------------	--

Whether to suppress configuration warnings produced by the Plugin Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_plugin.path

Required

true

Suppress Configuration Validator: TCP Port**Description**

Whether to suppress configuration warnings produced by the TCP Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_port

Required

true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kafka-audit.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kafka-policymgr-ssl.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml

Description

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kafka-security.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ranger Kafka Plugin Conf Path

Description

Whether to suppress configuration warnings produced by the Ranger Kafka Plugin Conf Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_conf_path

Required

true

Suppress Configuration Validator: Ranger Kafka Plugin Audit Hdfs Spool Directory Path

Description

Whether to suppress configuration warnings produced by the Ranger Kafka Plugin Audit Hdfs Spool Directory Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_hdfs_audit_spool_directory

Required

true

Suppress Configuration Validator: Ranger Kafka Plugin Policy Cache Directory Path

Description

Whether to suppress configuration warnings produced by the Ranger Kafka Plugin Policy Cache Directory Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_policy_cache_directory

Required

true

Suppress Configuration Validator: Ranger Kafka Plugin Audit Solr Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the Ranger Kafka Plugin Audit Solr Spool Directory Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kafka_plugin_solr_audit_spool_directory

Required

true

Suppress Configuration Validator: Ranger Plugin Trusted Proxy IP Address**Description**

Whether to suppress configuration warnings produced by the Ranger Plugin Trusted Proxy IP Address configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_plugin_trusted_proxy_ipaddress

Required

true

Suppress Configuration Validator: Rest Extension Classes**Description**

Whether to suppress configuration warnings produced by the Rest Extension Classes configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rest.extension.classes

Required

true

Suppress Configuration Validator: Kafka Connect Rest Port**Description**

Whether to suppress configuration warnings produced by the Kafka Connect Rest Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rest.port

Required

true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Configuration Validator: Role Triggers**Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Configuration Validator: Secure Kafka Connect Rest Port**Description**

Whether to suppress configuration warnings produced by the Secure Kafka Connect Rest Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_secure.rest.port

Required

true

Suppress Configuration Validator: Source Broker List**Description**

Whether to suppress configuration warnings produced by the Source Broker List configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_source.bootstrap.servers

Required

true

Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_client.properties**Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_client.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Kafka Broker TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the Kafka Broker TLS/SSL Trust Store File configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Configuration Validator: Kafka Broker TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the Kafka Broker TLS/SSL Trust Store Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Configuration Validator: TLS/SSL Port**Description**

Whether to suppress configuration warnings produced by the TLS/SSL Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_port

Required

true

Suppress Configuration Validator: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_server.properties**Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl_server.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server.properties_role_safety_valve

Required

Required

true

Suppress Configuration Validator: Value Converter**Description**

Whether to suppress configuration warnings produced by the Value Converter configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_value.converter

Required

true

Suppress Configuration Validator: Topic Whitelist**Description**

Whether to suppress configuration warnings produced by the Topic Whitelist configuration validator.

Related Name**Default Value**

false

API Name

`role_config_suppression_whitelist`**Required**`true`**Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for zookeeper-ssl.properties****Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for zookeeper-ssl.properties configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_zookeeper-ssl.properties_role_safety_valve`**Required**`true`**Suppress Parameter Validation: Atlas metadata namespace for Kafka Clients****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Atlas metadata namespace for Kafka Clients parameter.

Related Name**Default Value**`false`**API Name**`service_config_suppression_atlas.metadata.namespace.client`**Required**`true`**Suppress Parameter Validation: Atlas metadata namespace for Kafka Topics****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Atlas metadata namespace for Kafka Topics parameter.

Related Name**Default Value**`false`**API Name**`service_config_suppression_atlas.metadata.namespace.topic`**Required**`true`**Suppress Parameter Validation: Controlled Shutdown Maximum Attempts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Controlled Shutdown Maximum Attempts parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_controlled.shutdown.max.retries

Required

true

Suppress Parameter Validation: Default Replication Factor**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Replication Factor parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_default.replication.factor

Required

true

Suppress Configuration Validator: Gateway Count Validator**Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_gateway_count_validator

Required

true

Suppress Parameter Validation: List of Metric Reporters**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the List of Metric Reporters parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_kafka.metrics.reporters

Required

true

Suppress Configuration Validator: Kafka Broker Count Validator**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_kafka_broker_count_validator

Required

true

Suppress Configuration Validator: Kafka Connect Count Validator**Description**

Whether to suppress configuration warnings produced by the Kafka Connect Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_kafka_connect_count_validator

Required

true

Suppress Configuration Validator: Kafka MirrorMaker Count Validator**Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_kafka_mirror_maker_count_validator

Required

true

Suppress Parameter Validation: Kafka Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_kafka_service_env_safety_valve

Required

true

Suppress Parameter Validation: Kerberos Principal**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_kerberos_princ_name

Required

true

Suppress Parameter Validation: LDAP URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP URL parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ldap.auth.url

Required

true

Suppress Parameter Validation: LDAP User DN Template**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP User DN Template parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ldap.auth.user.dn.template

Required

true

Suppress Parameter Validation: Leader Imbalance Check Interval**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Leader Imbalance Check Interval parameter.

Related Name

Default Value

false

API Name

service_config_suppression_leader.imbalance.check.interval.seconds

Required

true

Suppress Parameter Validation: Leader Imbalance Allowed Per Broker**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Leader Imbalance Allowed Per Broker parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_leader.imbalance.per.broker.percentage

Required

true

Suppress Parameter Validation: Maximum Message Size**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Maximum Message Size parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_message.max.bytes

Required

true

Suppress Parameter Validation: Minimum Number of Replicas in ISR**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Minimum Number of Replicas in ISR parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_min.insync.replicas

Required

true

Suppress Parameter Validation: Default Number of Partitions**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Number of Partitions parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_num.partitions

Required

true

Suppress Parameter Validation: Number of Replica Fetchers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Replica Fetchers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_num.replica.fetchers

Required

true

Suppress Parameter Validation: Offset Commit Topic Number of Partitions**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Offset Commit Topic Number of Partitions parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_offsets.topic.num.partitions

Required

true

Suppress Parameter Validation: Offset Commit Topic Replication Factor**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Offset Commit Topic Replication Factor parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_offsets.topic.replication.factor

Required

true

Suppress Parameter Validation: PAM Service

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the PAM Service parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_pam.auth.service

Required

true

Suppress Parameter Validation: System Group

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Ranger Kafka Plugin Hdfs Audit Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Hdfs Audit Directory parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_kafka_plugin_hdfs_audit_directory

Required

true

Suppress Parameter Validation: 'Ranger service' name for this Kafka service**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the 'Ranger service' name for this Kafka service parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_plugin_kafka_service_name

Required

true

Suppress Parameter Validation: Replica Maximum Fetch Size**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Replica Maximum Fetch Size parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_replica.fetch.max.bytes

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Parameter Validation: Transaction State Log Replication Factor**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Transaction State Log Replication Factor parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_transaction.state.log.replication.factor

Required

true

Suppress Parameter Validation: ZooKeeper Root**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ZooKeeper Root parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_zookeeper.chroot

Required

true

Suppress Parameter Validation: ZooKeeper Session Timeout**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ZooKeeper Session Timeout parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_zookeeper.session.timeout.ms

Required

true

Suppress Health Test: Kafka Broker Health

Description

Whether to suppress the results of the Kafka Broker Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

service_health_suppression_kafka_kafka_broker_healthy

Required

true

Suppress Health Test: Kafka Connect Health

Description

Whether to suppress the results of the Kafka Connect Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

service_health_suppression_kafka_kafka_connect_healthy

Required

true

Key Trustee Server Properties in Cloudera Runtime 7.2.18

Role groups:

Active Database

Advanced

Active Database Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name

Default Value

API Name

DB_ACTIVE_role_env_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name

Default Value

false

API Name

metric_config_auto_refresh

Required

false

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name

Default Value

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name

Default Value

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value	3
API Name	process_start_retries
Required	false

Process Start Wait Timeout

Description	The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
Related Name	
Default Value	20
API Name	process_start_secs
Required	false

Monitoring

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	db_active_fd_thresholds
Required	false

Active Database Host Health Test

Description	When computing the overall Active Database health, consider the host's health.
Related Name	
Default Value	true
API Name	db_active_host_health_enabled
Required	false

Active Database Process Health Test

Description

Enables the health test that the Active Database's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

db_active_scm_health_enabled

Required

false

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.

- **Metric Name** - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking **View as JSON**. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:

Description

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name**Default Value**

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name

Default Value
false
API Name
otelcol_should_collect
Required
true

Swap Memory Usage Rate Thresholds

Description
The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.
Related Name
Default Value
Warning: Never, Critical: Never
API Name
process_swap_memory_rate_thresholds
Required
false

Swap Memory Usage Rate Window

Description
The period to review when computing unexpected swap memory usage change of the process.
Related Name
common.process.swap_memory_rate_window
Default Value
5 minute(s)
API Name
process_swap_memory_rate_window
Required
false

Process Swap Memory Thresholds

Description
The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.
Related Name
Default Value
Warning: 200 B, Critical: Never
API Name
process_swap_memory_thresholds
Required
false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a `DataNode` fires if the `DataNode` has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Active Key Trustee Server**Advanced****Active Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name

Default Value**API Name**

KEYTRUSTEE_ACTIVE_SERVER_role_env_safety_valve

Required

false

Active Key Trustee Server XML Override**Description**

For advanced use only, replace entire XML in the logback configuration file for Active Key Trustee Server, ignoring all logging configuration.

Related Name

logback_safety_valve

Default Value**API Name**

logback_safety_valve

Required

false

Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf**Description**

For advanced use only. A string to be inserted into logging.conf for this role only.

Related Name**Default Value****API Name**

logging.conf_role_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name

Default Value

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name

Default Value

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

enable_config_alerts
Required
false

File Descriptor Monitoring Thresholds

Description

	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	keytrustee_active_server_fd_thresholds
Required	false

Active Key Trustee Server Host Health Test

Description	When computing the overall Active Key Trustee Server health, consider the host's health.
Related Name	
Default Value	true
API Name	keytrustee_active_server_host_health_enabled
Required	false

Active Key Trustee Server Process Health Test

Description	Enables the health test that the Active Key Trustee Server's process state is consistent with the role configuration
Related Name	
Default Value	true
API Name	keytrustee_active_server_scm_health_enabled
Required	false

Log Directory Free Space Monitoring Absolute Thresholds

Description	The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
Related Name	
Default Value	Warning: 10 GiB, Critical: 5 GiB
API Name	log_directory_free_space_absolute_thresholds
Required	false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Passive Database**Advanced****Passive Database Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

DB_PASSIVE_role_env_safety_valve
Required
false

Enable auto refresh for metric configurations

Description
When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.
Related Name
Default Value
false
API Name
metric_config_auto_refresh
Required
false

Automatically Restart Process

Description
When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.
Related Name
Default Value
false
API Name
process_auto_restart
Required
true

Enable Metric Collection

Description
Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.
Related Name
Default Value
true
API Name
process_should_monitor
Required
true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

Required

false

Monitoring

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name

Default Value

Warning: 50.0 %, Critical: 70.0 %

API Name

db_passive_fd_thresholds

Required

false

Passive Database Host Health Test

Description

When computing the overall Passive Database health, consider the host's health.

Related Name

Default Value

true

API Name

db_passive_host_health_enabled
Required
false

Passive Database Process Health Test

Description
Enables the health test that the Passive Database's process state is consistent with the role configuration
Related Name
Default Value
true
API Name
db_passive_scm_health_enabled
Required
false

Enable Health Alerts for this Role

Description
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name
Default Value
false
API Name
enable_config_alerts
Required
false

Metric Filter

Description
Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:
<ul style="list-style-type: none">Health Test Metric Set - Select this parameter to collect only metrics required for health tests.

- **Default Dashboard Metric Set** - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- **Include/Exclude Custom Metrics** - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- **Metric Name** - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- **Include only Health Test Metric Set:** Selected.
- **Include/Exclude Custom Metrics:** Set to Include.
- **Metric Name:** `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name

Default Value

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Database Storage Directory

Description

Directory (local file system) where the Key Trustee Server database will be stored. Changing this value after the service has been started will have no effect.

Related Name

db_root

Default Value

/var/lib/keytrustee/db

API Name

db_root

Required

false

Retry Attempts

Description

Number of times a connection attempt will be made before giving up.

Related Name

retry_attempts

Default Value

30

API Name

retry_attempts

Required

true

Retry Timeout

Description

Number of seconds to wait between retries.

Related Name

retry_timeout

Default Value

1 second(s)

API Name

retry_timeout

Required
true

Performance

Maximum Process File Descriptors

Description
If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name
Default Value
API Name
rlimit_fds
Required
false

Ports and Addresses

Key Trustee Server Database Port

Description
The Key Trustee Server database server port. Changing this value after the service has been started will have no effect.
Related Name
db_port
Default Value
11381
API Name
db_port
Required
true

Resource Management

Cgroup CPU Shares

Description
Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name
cpu.shares
Default Value
1024
API Name
rm_cpu_shares
Required
true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_db_passive_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_db_passive_file_descriptor

Required

true

Suppress Health Test: Host Health

Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_keytrustee_server_db_passive_host_health

Required

true

Suppress Health Test: Otelcol Health

Description

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_keytrustee_server_db_passive_otelcol_health

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_keytrustee_server_db_passive_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_db_passive_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_db_passive_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_keytrustee_server_db_passive_unexpected_exits

Required

true

Passive Key Trustee Server**Advanced****Passive Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

`KEYTRUSTEE_PASSIVE_SERVER_role_env_safety_valve`**Required**`false`**Passive Key Trustee Server XML Override****Description**

For advanced use only, replace entire XML in the logback configuration file for Passive Key Trustee Server, ignoring all logging configuration.

Related Name`logback_safety_valve`**Default Value****API Name**`logback_safety_valve`**Required**`false`**Passive Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf****Description**

For advanced use only. A string to be inserted into logging.conf for this role only.

Related Name**Default Value****API Name**`logging.conf_role_safety_valve`**Required**`false`**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**`false`**API Name**`metric_config_auto_refresh`**Required**`false`**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

	false
API Name	
	process_auto_restart
Required	
	true

Enable Metric Collection

Description	Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.
Related Name	
Default Value	true
API Name	process_should_monitor
Required	true

Process Start Retry Attempts

Description	Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.
Related Name	
Default Value	3
API Name	process_start_retries
Required	false

Process Start Wait Timeout

Description	The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
Related Name	
Default Value	20
API Name	process_start_secs
Required	false

Passive Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties

Description	For advanced use only. A string to be inserted into ssl.properties for this role only.
Related Name	
Default Value	
API Name	ssl.properties_role_safety_valve
Required	false

Logs

Passive Key Trustee Server Log Directory

Description	The log directory for log files of the role Passive Key Trustee Server.
Related Name	log_dir
Default Value	/var/lib/keytrustee/logs
API Name	log_dir
Required	false

Passive Key Trustee Server Logging Threshold

Description	The minimum log level for Passive Key Trustee Server logs
Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

Passive Key Trustee Server Maximum Log File Backups

Description	The maximum number of rolled log files to keep for Passive Key Trustee Server logs. Typically used by log4j or logback.
Related Name	
Default Value	10
API Name	max_log_backup_index

Required
false

Passive Key Trustee Server Max Log Size

Description
The maximum size, in megabytes, per log file for Passive Key Trustee Server logs. Typically used by log4j or logback.
Related Name
Default Value
200 MiB
API Name
max_log_size
Required
false

Monitoring

Enable Health Alerts for this Role

Description
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name
Default Value
false
API Name
enable_config_alerts
Required
false

File Descriptor Monitoring Thresholds

Description
The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name

Default Value
Warning: 50.0 %, Critical: 70.0 %
API Name
keytrustee_passive_server_fd_thresholds
Required
false

Passive Key Trustee Server Host Health Test

Description
When computing the overall Passive Key Trustee Server health, consider the host's health.
Related Name
Default Value
true
API Name
keytrustee_passive_server_host_health_enabled
Required
false

Passive Key Trustee Server Process Health Test

Description
Enables the health test that the Passive Key Trustee Server's process state is consistent with the role configuration
Related Name
Default Value
true
API Name
keytrustee_passive_server_scm_health_enabled
Required
false

Log Directory Free Space Monitoring Absolute Thresholds

Description
The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
Related Name
Default Value
Warning: 10 GiB, Critical: 5 GiB
API Name
log_directory_free_space_absolute_thresholds
Required
false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/$ROLE_NAME: endpoint:  
$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:  
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s  
max_elapsed_time: 300s
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:  
$ROLE_PARAM(otelcol_remote_write_user) password:  
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value**

API Name
otelcol_receivers
Required
false

OpenTelemetry Collector Remote Write Password

Description
Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)
Related Name
Default Value

API Name
otelcol_remote_write_password
Required
false

OpenTelemetry Collector Remote Write URL

Description
Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.
Related Name
Default Value
\$INFRA(cdp_request_signer_url)
API Name
otelcol_remote_write_url
Required
false

OpenTelemetry Collector Remote Write Username

Description
Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.
Related Name
Default Value
\$INFRA(cdp_request_signer_username)
API Name
otelcol_remote_write_user

Required
false

OpenTelemetry Collector Service Section

Description
Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.
Related Name
Default Value
API Name
otelcol_service
Required
false

Enable OpenTelemetry Collector (beta)

Description
OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.
Related Name
Default Value
false
API Name
otelcol_should_collect
Required
true

Swap Memory Usage Rate Thresholds

Description
The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.
Related Name
Default Value
Warning: Never, Critical: Never
API Name
process_swap_memory_rate_thresholds
Required
false

Swap Memory Usage Rate Window

Description
The period to review when computing unexpected swap memory usage change of the process.
Related Name
common.process.swap_memory_rate_window
Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds

Description	The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.
Related Name	
Default Value	Warning: Never, Critical: Any
API Name	unexpected_exits_thresholds
Required	false

Unexpected Exits Monitoring Period

Description	The period to review when computing unexpected exits.
Related Name	
Default Value	5 minute(s)
API Name	unexpected_exits_window
Required	false

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	rlimit_fds
Required	false

Ports and Addresses

Key Trustee Server Port

Description	The Key Trustee Server port number.
Related Name	keytrustee_port
Default Value	11371

API Name	keytrustee_port
Required	true

Resource Management

Cgroup CPU Shares

Description	Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name	cpu.shares
Default Value	1024
API Name	rm_cpu_shares
Required	true

Custom Control Group Resources (overrides Cgroup settings)

Description	Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***
Related Name	custom.cgroups
Default Value	
API Name	rm_custom_resources
Required	false

Cgroup I/O Weight

Description	Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.
Related Name	blkio.weight
Default Value	500
API Name	

rm_io_weight
Required
true

Cgroup Memory Hard Limit

Description
Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'
Related Name
memory.limit_in_bytes
Default Value
-1 MiB
API Name
rm_memory_hard_limit
Required
true

Cgroup Memory Soft Limit

Description
Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'
Related Name
memory.soft_limit_in_bytes
Default Value
-1 MiB
API Name
rm_memory_soft_limit
Required
true

Security

Passive Key Trustee Server TLS/SSL Server CA Certificate (PEM Format)

Description
The path to the TLS/SSL file containing the certificate of the certificate authority (CA) and any intermediate certificates used to sign the server certificate. Used when Passive Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format, and is usually created by concatenating all of the appropriate root and intermediate certificates.
Related Name
ssl.cacert.location

Default Value**API Name**

ssl_server_ca_certificate_location

Required

false

Passive Key Trustee Server TLS/SSL Server Certificate File (PEM Format)**Description**

The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Passive Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

Related Name

ssl.cert.location

Default Value

/var/lib/keytrustee/.keytrustee/.ssl/ssl-cert-keytrustee.pem

API Name

ssl_server_certificate_location

Required

false

Passive Key Trustee Server TLS/SSL Server Private Key File (PEM Format)**Description**

The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Passive Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

Related Name

ssl.privatekey.location

Default Value

/var/lib/keytrustee/.keytrustee/.ssl/ssl-cert-keytrustee-pk.pem

API Name

ssl_server_privatekey_location

Required

false

Passive Key Trustee Server TLS/SSL Private Key Password**Description**

The password for the private key in the Passive Key Trustee Server TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.

Related Name

ssl.privatekey.password

Default Value**API Name**

ssl_server_privatekey_password

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Parameter Validation: Passive Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_keytrustee_passive_server_role_env_safety_valve
Required	true

Suppress Parameter Validation: Key Trustee Server Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_keytrustee_port
Required	true

Suppress Parameter Validation: Passive Key Trustee Server Log Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server Log Directory parameter.
Related Name	

Default Value

false

API Name

role_config_suppression_log_dir

Required

Key Trustee Server Service Advanced Configuration Snippet (Safety Valve) for ssl.properties

Description

For advanced use only, a string to be inserted into ssl.properties. Applies to configurations of all roles in this service except client configuration.

Related Name

Default Value

API Name

ssl.properties_service_safety_valve

Required

false

Monitoring

Enable Service Level Health Alerts

Description

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name

Default Value

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific service.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name	
Default Value	
API Name	
	smon_derived_configs_safety_valve
Required	
	false

Other

Supported Cipher Configuration for SSL

Description	A list of allowed and disallowed ciphers, colon-separated (':'). Using a exclamation mark (!) in front of the cipher name will disallow the respective cipher. For cipher options check OpenSSL cipher list . If blank then default ciphers are set.
Related Name	ciphers
Default Value	
API Name	ciphers
Required	false

Key Trustee Home

Description	Home directory of Key Trustee.
Related Name	keytrustee.home
Default Value	/var/lib/keytrustee/.keytrustee
API Name	keytrustee.home
Required	false

Minimum TLS Support

Description	Minimum TLS protocol supported.
Related Name	tls.min.protocols
Default Value	TLSv1
API Name	tls.min.protocols
Required	

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Configuration Validator: Active Database Environment Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the Active Database Environment Advanced Configuration Snippet (Safety Valve) configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_db_active_role_env_safety_valve
Required	true

Key-Value Store Indexer Properties in Cloudera Runtime 7.2.18

Role groups:

Lily HBase Indexer

Advanced

Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for hbase-indexer-site.xml

Description	For advanced use only. A string to be inserted into hbase-indexer-site.xml for this role only.
Related Name	
Default Value	
API Name	hbase_indexer_config_safety_valve
Required	false

Java Configuration Options for Lily HBase Indexer

Description	These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here. Note: When CM version is 6.3.0 or greater, {{JAVA_GC_ARGS}} will be replaced by JVM Garbage Collection arguments based on the runtime Java JVM version.
Related Name	
Default Value	JAVA_GC_ARGS
API Name	hbase_indexer_java_opts
Required	false

System Group

Description	The group that the HBase Indexer process should run as.
Related Name	
Default Value	hbase
API Name	hbase_indexer_process_groupname
Required	true

System User

Description	
-------------	--

The user that the HBase Indexer process should run as.

Related Name**Default Value**

hbase

API Name

hbase_indexer_process_username

Required

true

Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

HBASE_INDEXER_role_env_safety_valve

Required

false

HBase Indexer ZooKeeper Session Timeout**Description**

ZooKeeper session timeout. Controls the amount of time the HBase Indexer will attempt to connect to ZooKeeper before timing out.

Related Name

hbaseindexer.zookeeper.session.timeout

Default Value

1 minute(s)

API Name

hbase_indexer_zk_session_timeout

Required

false

Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name

Default Value

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

Required

false

Logs

HBase Indexer Log Directory

Description

Directory where HBase Indexer will place its log files.

Related Name

Default Value

/var/log/hbase-solr

API Name

hbase_indexer_log_dir

Required

true

Lily HBase Indexer Logging Threshold

Description

The minimum log level for Lily HBase Indexer logs

Related Name

Default Value

INFO

API Name

log_threshold

Required

false

Lily HBase Indexer Maximum Log File Backups

Description

The maximum number of rolled log files to keep for Lily HBase Indexer logs. Typically used by log4j or logback.

Related Name

Default Value

10

API Name

max_log_backup_index
Required
false

Lily HBase Indexer Max Log Size

Description
The maximum size, in megabytes, per log file for Lily HBase Indexer logs. Typically used by log4j or logback.
Related Name
Default Value
200 MiB
API Name
max_log_size
Required
false

Monitoring

Enable Health Alerts for this Role

Description
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name
Default Value
false
API Name
enable_config_alerts
Required
false

File Descriptor Monitoring Thresholds

Description
The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name
Default Value
Warning: 50.0 %, Critical: 70.0 %
API Name
hbase_indexer_fd_thresholds
Required
false

Lily HBase Indexer Host Health Test

Description
When computing the overall Lily HBase Indexer health, consider the host's health.
Related Name
Default Value
true
API Name
hbase_indexer_host_health_enabled
Required
false

Lily HBase Indexer Process Health Test

Description
Enables the health test that the Lily HBase Indexer's process state is consistent with the role configuration
Related Name
Default Value
true
API Name
hbase_indexer_scm_health_enabled
Required
false

Heap Dump Directory Free Space Monitoring Absolute Thresholds

Description
The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory.
Related Name
Default Value
Warning: 10 GiB, Critical: 5 GiB
API Name
heap_dump_directory_free_space_absolute_thresholds
Required
false

Heap Dump Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Heap Dump Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

heap_dump_directory_free_space_percentage_thresholds

Required

false

Enable JMX Exporter (beta)

Description

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name**Default Value**

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port

Description

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name**Default Value****API Name**

jmx_exporter_port

Required

false

JMX Exporter configuration YAML

Description

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name**Default Value****API Name**

jmx_exporter_yaml

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

API Name

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name**Default Value**

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url
Required
false

OpenTelemetry Collector Remote Write Username

Description
Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.
Related Name
Default Value
\$INFRA(cdp_request_signer_username)
API Name
otelcol_remote_write_user
Required
false

OpenTelemetry Collector Service Section

Description
Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.
Related Name
Default Value
API Name
otelcol_service
Required
false

Enable OpenTelemetry Collector (beta)

Description
OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.
Related Name
Default Value
false
API Name
otelcol_should_collect
Required
true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.

- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name
Default Value
API Name
rlimit_fds
Required
false

Ports and Addresses

HBase Indexer HTTP Port

Description
HTTP port used by HBase Indexer.
Related Name
hbaseindexer.http.port
Default Value
11060
API Name
hbase_indexer_http_port
Required
true

Resource Management

Java Heap Size of Lily HBase Indexer in Bytes

Description
Maximum size in bytes for the Java Process heap memory. Passed to Java -Xmx.
Related Name
Default Value
1 GiB
API Name
hbase_indexer_java_heapsize
Required
false

Cgroup CPU Shares

Description
Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name
cpu.shares
Default Value
1024
API Name
rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Role-Specific Kerberos Principal

Description

Kerberos principal used by the Lily HBase Indexer roles.

Related Name

Default Value

hbase

API Name

kerberos_role_princ_name

Required

true

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value	jstack
API Name	stacks_collection_method
Required	false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Parameter Validation: Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for hbase-indexer-site.xml

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for hbase-indexer-site.xml parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hbase_indexer_config_safety_valve
Required	true

Suppress Parameter Validation: HBase Indexer HTTP Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the HBase Indexer HTTP Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hbase_indexer_http_port
Required	

true

Suppress Parameter Validation: Java Configuration Options for Lily HBase Indexer

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Configuration Options for Lily HBase Indexer parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hbase_indexer_java_opts

Required

true

Suppress Parameter Validation: HBase Indexer Log Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the HBase Indexer Log Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hbase_indexer_log_dir

Required

true

Suppress Parameter Validation: System Group

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hbase_indexer_process_groupname

Required

true

Suppress Parameter Validation: System User

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hbase_indexer_process_username

Required

true

Suppress Parameter Validation: Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hbase_indexer_role_env_safety_valve

Required

true

Suppress Parameter Validation: JMX Exporter Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Parameter Validation: JMX Exporter configuration YAML**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_yaml

Required

true

Suppress Parameter Validation: Role-Specific Kerberos Principal**Description**

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Role-Specific Kerberos Principal parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_kerberos_role_princ_name
Required	true

Suppress Parameter Validation: Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_log4j_safety_valve
Required	true

Suppress Parameter Validation: Heap Dump Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oom_heap_dump_dir
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

	false
API Name	role_config_suppression_otelcol_remote_write_password
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_url
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_user
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_service
Required	true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description	
-------------	--

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_file_descriptor

Required

true

Suppress Health Test: Heap Dump Directory Free Space**Description**

Whether to suppress the results of the Heap Dump Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_heap_dump_directory_free_space

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_log_directory_free_space

Required

true

Suppress Health Test: Otelcol Health**Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_otelcol_health

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_hbase_indexer_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name	role_health_suppression_hbase_indexer_swap_memory_usage
Required	true

Suppress Health Test: Swap Memory Usage Rate Beta

Description	Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_hbase_indexer_swap_memory_usage_rate
Required	true

Suppress Health Test: Unexpected Exits

Description	Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_hbase_indexer_unexpected_exits
Required	true

Service-Wide

Advanced

Key-Value Store Indexer Service Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	ks_indexer_env_safety_valve
Required	false

Monitoring

Enable Service Level Health Alerts

Description	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts
Required	false

Healthy Lily HBase Indexer Monitoring Thresholds

Description	The health test thresholds of the overall Lily HBase Indexer health. The check returns "Concerning" health if the percentage of "Healthy" Lily HBase Indexers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Lily HBase Indexers falls below the critical threshold.
Related Name	
Default Value	Warning: 95.0 %, Critical: 90.0 %
API Name	ks_indexer_indexers_healthy_thresholds
Required	false

Service Triggers

Description	The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:
-------------	---

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

`service_triggers`

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**

`smon_derived_configs_safety_valve`

Required

false

Morphlines**Custom Mime-types File****Description**

Text that goes verbatim into custom-mimetypes.xml file used by HBase Indexers.

API Name

grok_dictionary_conf_file

Required

false

Morphlines File**Description**

Text that goes into morphlines.conf file used by HBase Indexers. The text goes verbatim into the config file except that \$ZK_HOST is replaced by the ZooKeeper quorum of the Solr service.

Related Name**Default Value**

```
SOLR_LOCATOR : # Name of solr collection collection : collection # ZooKeeper ensemble
zkHost : $ZK_HOST morphlines : [ id : morphline importCommands : [org.kitesdk.**
com.ngdata.**] commands : [ extractHBaseCells mappings : [ inputColumn : data:* outputField :
data type : string source : value ] logDebug format : output record: , args : [ @ ] ] ]
```

API Name

morphlines_conf_file

Required

false

Other**HBase Service****Description**

Name of the HBase service that this Key-Value Store Indexer service instance depends on

Related Name**Default Value****API Name**

hbase_service

Required

true

Solr Service

Description	Name of the Solr service that this Key-Value Store Indexer service instance depends on
Related Name	
Default Value	
API Name	solr_service
Required	true

Security

HBase Indexer Secure Authentication

Description	Authentication mechanism used by HBase Indexer.
Related Name	hbaseindexer.authentication.type
Default Value	simple
API Name	hbase_indexer_security_authentication
Required	false

HBase Indexer TLS/SSL Trust Store File

Description	The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that HBase Indexer might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.
Related Name	
Default Value	
API Name	keystore_indexer_truststore_file
Required	false

HBase Indexer TLS/SSL Trust Store Password

Description	The password for the HBase Indexer TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name	
Default Value	
API Name	

keystore_indexer_truststore_password
Required
false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description
Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_cdh_version_validator
Required
true

Suppress Configuration Validator: Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for hbase-indexer-site.xml

Description
Whether to suppress configuration warnings produced by the Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for hbase-indexer-site.xml configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_hbase_indexer_config_safety_valve
Required
true

Suppress Configuration Validator: HBase Indexer HTTP Port

Description
Whether to suppress configuration warnings produced by the HBase Indexer HTTP Port configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_hbase_indexer_http_port
Required
true

Suppress Configuration Validator: Java Configuration Options for Lily HBase Indexer

Description

	Whether to suppress configuration warnings produced by the Java Configuration Options for Lily HBase Indexer configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_hbase_indexer_java_opts
Required	true

Suppress Configuration Validator: HBase Indexer Log Directory

Description	Whether to suppress configuration warnings produced by the HBase Indexer Log Directory configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_hbase_indexer_log_dir
Required	true

Suppress Configuration Validator: System Group

Description	Whether to suppress configuration warnings produced by the System Group configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_hbase_indexer_process_groupname
Required	true

Suppress Configuration Validator: System User

Description	Whether to suppress configuration warnings produced by the System User configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_hbase_indexer_process_username
Required	true

Suppress Configuration Validator: Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hbase_indexer_role_env_safety_valve

Required

true

Suppress Configuration Validator: JMX Exporter Port**Description**

Whether to suppress configuration warnings produced by the JMX Exporter Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Configuration Validator: JMX Exporter configuration YAML**Description**

Whether to suppress configuration warnings produced by the JMX Exporter configuration YAML configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_yaml

Required

true

Suppress Configuration Validator: Role-Specific Kerberos Principal**Description**

Whether to suppress configuration warnings produced by the Role-Specific Kerberos Principal configuration validator.

Related Name**Default Value**

false

API Name

`role_config_suppression_kerberos_role_princ_name`**Required**`true`**Suppress Configuration Validator: Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_log4j_safety_valve`**Required**`true`**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_oom_heap_dump_dir`**Required**`true`**Suppress Configuration Validator: OpenTelemetry Collector Exporters Section****Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_exporters`**Required**`true`**Suppress Configuration Validator: OpenTelemetry Collector Extensions Section****Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources
Required
true

Suppress Configuration Validator: Role Triggers

Description
Whether to suppress configuration warnings produced by the Role Triggers configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_role_triggers
Required
true

Suppress Configuration Validator: Stacks Collection Directory

Description
Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_stacks_collection_directory
Required
true

Suppress Parameter Validation: Custom Mime-types File

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Mime-types File parameter.
Related Name
Default Value
false
API Name
service_config_suppression_custom_mimetypes_file
Required
true

Suppress Parameter Validation: Grok Dictionary File

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Grok Dictionary File parameter.
Related Name

Default Value

false

API Name

service_config_suppression_grok_dictionary_conf_file

Required

true

Suppress Configuration Validator: Lily HBase Indexer Count Validator**Description**

Whether to suppress configuration warnings produced by the Lily HBase Indexer Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_hbase_indexer_count_validator

Required

true

Suppress Parameter Validation: HBase Indexer TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HBase Indexer TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_keystore_indexer_truststore_file

Required

true

Suppress Parameter Validation: HBase Indexer TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HBase Indexer TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_keystore_indexer_truststore_password

Required

true

Suppress Parameter Validation: Key-Value Store Indexer Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key-Value Store Indexer Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ks_indexer_env_safety_valve

Required

true

Suppress Parameter Validation: Morphlines File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Morphlines File parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_morphlines_conf_file

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

	false
API Name	
	service_config_suppression_smon_derived_configs_safety_valve
Required	
	true

Suppress Health Test: Lily HBase Indexer Health

Description	Whether to suppress the results of the Lily HBase Indexer Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	
	service_health_suppression_ks_indexer_hbase_indexers_healthy
Required	
	true

Knox Properties in Cloudera Runtime 7.2.18

Role groups:

Gateway

Advanced

Deploy Directory

Description	The directory where the client configs will be deployed
Related Name	
Default Value	/etc/knox
API Name	
	client_config_root_dir
Required	
	true

Monitoring

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	

	false
API Name	
	enable_config_alerts
Required	
	false

Other

Alternatives Priority

Description	The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.
Related Name	
Default Value	50
API Name	client_config_priority
Required	true

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Parameter Validation: Deploy Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_client_config_root_dir
Required	true

Knox Gateway

Advanced

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties

Description

For advanced use only. A string to be inserted into conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties for this role only.

Related Name**Default Value****API Name**

conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties_role_safety_valve

Required

false

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy.properties

Description

For advanced use only. A string to be inserted into conf/auto-discovery-advanced-configuration-cdp-proxy.properties for this role only.

Related Name**Default Value****API Name**

conf/auto-discovery-advanced-configuration-cdp-proxy.properties_role_safety_valve

Required

false

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/cdp-resources.xml

Description

For advanced use only. A string to be inserted into conf/cdp-resources.xml for this role only.

Related Name**Default Value****API Name**

conf/cdp-resources.xml_role_safety_valve

Required

false

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml

Description

For advanced use only. A string to be inserted into conf/gateway-site.xml for this role only.

Related Name**Default Value****API Name**

conf/gateway-site.xml_role_safety_valve
Required
false

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-audit.xml

Description
For advanced use only. A string to be inserted into conf/ranger-knox-audit.xml for this role only.
Related Name
Default Value
API Name
conf/ranger-knox-audit.xml_role_safety_valve
Required
false

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-policymgr-ssl.xml

Description
For advanced use only. A string to be inserted into conf/ranger-knox-policymgr-ssl.xml for this role only.
Related Name
Default Value
API Name
conf/ranger-knox-policymgr-ssl.xml_role_safety_valve
Required
false

Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-security.xml

Description
For advanced use only. A string to be inserted into conf/ranger-knox-security.xml for this role only.
Related Name
Default Value
API Name
conf/ranger-knox-security.xml_role_safety_valve
Required
false

Knox Gateway Environment Advanced Configuration Snippet (Safety Valve)

Description
For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
Related Name
Default Value
API Name

`KNOX_GATEWAY_role_env_safety_valve`**Required**`false`**Knox Gateway Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into `log4j.properties` for this role only.

Related Name**Default Value****API Name**`log4j_safety_valve`**Required**`false`**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**`false`**API Name**`metric_config_auto_refresh`**Required**`false`**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when `java.lang.OutOfMemoryError` error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name`oom_heap_dump_dir`**Default Value**`/tmp`**API Name**`oom_heap_dump_dir`**Required**`false`**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required
true

Process Start Retry Attempts

Description
Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.
Related Name
Default Value
3
API Name
process_start_retries
Required
false

Process Start Wait Timeout

Description
The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
Related Name
Default Value
20
API Name
process_start_secs
Required
false

Logs

Knox Gateway Log Directory

Description
The log directory for log files of the role Knox Gateway.
Related Name
log_dir
Default Value
/var/log/knox/gateway
API Name
log_dir
Required
false

Knox Gateway Logging Threshold

Description
The minimum log level for Knox Gateway logs

Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

Knox Gateway Maximum Log File Backups

Description	The maximum number of rolled log files to keep for Knox Gateway logs. Typically used by log4j or logback.
Related Name	
Default Value	10
API Name	max_log_backup_index
Required	false

Knox Gateway Max Log Size

Description	The maximum size, in megabytes, per log file for Knox Gateway logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB
API Name	max_log_size
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name

Default Value

false

API Name

enable_config_alerts

Required

false

Enable JMX Exporter (beta)

Description

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name

Default Value

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port

Description

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name

Default Value

API Name

jmx_exporter_port

Required

false

JMX Exporter configuration YAML

Description

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name

Default Value

API Name

jmx_exporter_yaml

Required

false

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name

Default Value

Warning: 50.0 %, Critical: 70.0 %

API Name

knox_gateway_fd_thresholds

Required

false

Knox Gateway Host Health Test

Description

When computing the overall Knox Gateway health, consider the host's health.

Related Name

Default Value

true

API Name

knox_gateway_host_health_enabled

Required

false

Knox Gateway Process Health Test

Description

Enables the health test that the Knox Gateway's process state is consistent with the role configuration

Related Name

Default Value

true

API Name

knox_gateway_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name

Default Value

Warning: 10 GiB, Critical: 5 GiB

API Name`log_directory_free_space_absolute_thresholds`**Required**`false`**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**`Warning: Never, Critical: Never`**API Name**`log_directory_free_space_percentage_thresholds`**Required**`false`**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**`monitoring_metric_filter`**Required**`false`

OpenTelemetry Collector Exporters Section

Description

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/$ROLE_NAME: endpoint:
$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section

Description

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section

Description

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE,

`$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression. Specify `$INFRA(cdp_request_signer_password)` when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name**Default Value**

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression. Specify `$INFRA(cdp_request_signer_url)` when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

`$INFRA(cdp_request_signer_url)`

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_user)` expression. Specify `$INFRA(cdp_request_signer_username)` when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

	[]
API Name	role_triggers
Required	true

Unexpected Exits Thresholds

Description	The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.
Related Name	
Default Value	Warning: Never, Critical: Any
API Name	unexpected_exits_thresholds
Required	false

Unexpected Exits Monitoring Period

Description	The period to review when computing unexpected exits.
Related Name	
Default Value	5 minute(s)
API Name	unexpected_exits_window
Required	false

Other

Knox Gateway Diagnostics Collection Timeout

Description	The timeout in milliseconds to wait for diagnostics collection to complete.
Related Name	
Default Value	5 minute(s)
API Name	csd_role_diagnostics_timeout
Required	false

Knox Simplified Topology Management - API Authentication Provider

Description	
-------------	--

Authentication provider declaration used by pre-deinfed topologies such as admin, metadata or cdp-proxy-api.

Related Name

gateway_api_authentication_provider

Default Value

role=authentication authentication.name=ShiroProvider authentication.param.sessionTimeout=30
authentication.param.main.pamRealm=org.apache.knox.gateway.shirorealm.KnoxPamRealm
authentication.param.main.pamRealm.service=login authentication.param.urls./**=authcBasic

API Name

gateway_api_authentication_provider

Required

false

Auto Discovery - Advanced Configuration Monitoring Interval**Description**

Defines the frequency of Knox's service auto-discovery advanced configuration files (auto-discovery-advanced-configuration-[cdp-proxy|cdp-proxy-api].properties) monitoring.

Related Name

gateway.cloudera.manager.advanced.service.discovery.config.monitor.interval

Default Value

10 second(s)

API Name

gateway_auto_discovery_advanced_configuration_monitor_interval

Required

false

Enable Auto Discovery (cdp-proxy-api) - Atlas API**Description**

Enables Knox auto-discovery for the Atlas API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.atlas-api

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_atlas

Required

false

Enable Auto Discovery (cdp-proxy-api) - Phoenix/Avatica**Description**

Enables Knox auto-discovery for the Phoenix/Avatica API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.avatica

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_avatica

Required

false

Enable Auto Discovery (cdp-proxy-api) - Cloudera Manager API**Description**

Enables Knox auto-discovery for the Cloudera Manager API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.cm-api

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_cm_api

Required

false

Enable Auto Discovery (cdp-proxy-api) - Cruise Control API**Description**

Enables Knox auto-discovery for the Cruise Control API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.cruise-control-api

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_cruise_control

Required

false

Enable Auto Discovery (cdp-proxy-api) - Hive Server**Description**

Enables Knox auto-discovery for the Hive Server in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.hive

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_hive

Required

false

Enable Auto Discovery (cdp-proxy-api) - Impala Catalog Server**Description**

Enables Knox auto-discovery for the Impala Catalog Server in the cdp-proxy-api topology.

Related Name

`gateway.auto.discovery.cdp-proxy-api.enabled.impala`**Default Value**`true`**API Name**`gateway_auto_discovery_cdp_proxy_api_enabled_impala`**Required**`false`**Enable Auto Discovery (cdp-proxy-api) - Livy Server For Spark3 API****Description**

Enables Knox auto-discovery for the Livy Server For Spark3 API in the cdp-proxy-api topology.

Related Name`gateway.auto.discovery.cdp-proxy-api.enabled.livy_for_spark3`**Default Value**`true`**API Name**`gateway_auto_discovery_cdp_proxy_api_enabled_livy_for_spark3`**Required**`false`**Enable Auto Discovery (cdp-proxy-api) - Livy Server API****Description**

Enables Knox auto-discovery for the Livy Server API in the cdp-proxy-api topology.

Related Name`gateway.auto.discovery.cdp-proxy-api.enabled.livyserver`**Default Value**`true`**API Name**`gateway_auto_discovery_cdp_proxy_api_enabled_livyserver`**Required**`false`**Enable Auto Discovery (cdp-proxy-api) - NameNode****Description**

Enables Knox auto-discovery for the NameNode in the cdp-proxy-api topology.

Related Name`gateway.auto.discovery.cdp-proxy-api.enabled.namenode`**Default Value**`true`**API Name**`gateway_auto_discovery_cdp_proxy_api_enabled_namenode`**Required**`false`

Enable Auto Discovery (cdp-proxy-api) - NiFi**Description**

Enables Knox auto-discovery for the NiFi in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.nifi

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_nifi

Required

false

Enable Auto Discovery (cdp-proxy-api) - NiFi Registry**Description**

Enables Knox auto-discovery for the NiFi Registry in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.nifi-registry

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_nifi_registry

Required

false

Enable Auto Discovery (cdp-proxy-api) - Oozie Server**Description**

Enables Knox auto-discovery for the Oozie Server in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.oozie

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_oozie

Required

false

Enable Auto Discovery (cdp-proxy-api) - Profiler Admin API**Description**

Enables Knox auto-discovery for the Profiler Admin API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.profiler-admin-api

Default Value

true

API Name

`gateway_auto_discovery_cdp_proxy_api_enabled_profiler_admin_api`**Required**`false`**Enable Auto Discovery (cdp-proxy-api) - Profiler Metrics API****Description**

Enables Knox auto-discovery for the Profiler Metrics API in the cdp-proxy-api topology.

Related Name`gateway.auto.discovery.cdp-proxy-api.enabled.profiler-metrics-api`**Default Value**`true`**API Name**`gateway_auto_discovery_cdp_proxy_api_enabled_profiler_metrics_api`**Required**`false`**Enable Auto Discovery (cdp-proxy-api) - Profiler Scheduler API****Description**

Enables Knox auto-discovery for the Profiler Scheduler API in the cdp-proxy-api topology.

Related Name`gateway.auto.discovery.cdp-proxy-api.enabled.profiler-scheduler-api`**Default Value**`true`**API Name**`gateway_auto_discovery_cdp_proxy_api_enabled_profiler_scheduler_api`**Required**`false`**Enable Auto Discovery (cdp-proxy-api) - Ranger Admin****Description**

Enables Knox auto-discovery for the Ranger Admin in the cdp-proxy-api topology.

Related Name`gateway.auto.discovery.cdp-proxy-api.enabled.ranger`**Default Value**`true`**API Name**`gateway_auto_discovery_cdp_proxy_api_enabled_ranger`**Required**`false`**Enable Auto Discovery (cdp-proxy-api) - ResourceManager****Description**

Enables Knox auto-discovery for the ResourceManager in the cdp-proxy-api topology.

Related Name`gateway.auto.discovery.cdp-proxy-api.enabled.resourcemanager`

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_resourcemanager

Required

false

Enable Auto Discovery (cdp-proxy-api) - ResourceManager API**Description**

Enables Knox auto-discovery for the ResourceManager API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.resourcemanagerapi

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_resourcemanager_api

Required

false

Enable Auto Discovery (cdp-proxy-api) - Schema Registry**Description**

Enables Knox auto-discovery for the Schema Registry in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.schema-registry

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_schema_registry

Required

false

Enable Auto Discovery (cdp-proxy-api) - Stream Messaging Manager API**Description**

Enables Knox auto-discovery for the Stream Messaging Manager API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.smm-api

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_smm

Required

false

Enable Auto Discovery (cdp-proxy-api) - Solr Server**Description**

Enables Knox auto-discovery for the Solr Server in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.solr

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_solr

Required

false

Enable Auto Discovery (cdp-proxy-api) - HBase Master API**Description**

Enables Knox auto-discovery for the HBase Master API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.webhbase

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_webhbase

Required

false

Enable Auto Discovery (cdp-proxy-api) - WebHDFS API**Description**

Enables Knox auto-discovery for the WebHDFS API in the cdp-proxy-api topology.

Related Name

gateway.auto.discovery.cdp-proxy-api.enabled.webhdfs

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_api_enabled_webhdfs

Required

false

Enable Auto Discovery (cdp-proxy) - Atlas API**Description**

Enables Knox auto-discovery for the Atlas API in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.atlas-api

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_atlas
Required
false

Enable Auto Discovery (cdp-proxy) - Atlas Web UI

Description
Enables Knox auto-discovery for the Atlas Web UI in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.atlas
Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_atlas_ui
Required
false

Enable Auto Discovery (cdp-proxy) - Cloudera Manager API

Description
Enables Knox auto-discovery for the Cloudera Manager API in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.cm-api
Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_cm_api
Required
false

Enable Auto Discovery (cdp-proxy) - Cloudera Manager Admin Console

Description
Enables Knox auto-discovery for the Cloudera Manager Admin Console in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.cm-ui
Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_cm_ui
Required
false

Enable Auto Discovery (cdp-proxy) - Data Analytics Studio

Description
Enables Knox auto-discovery for the Data Analytics Studio in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.das

Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_das
Required
false

Enable Auto Discovery (cdp-proxy) - Flink Dashboard

Description
Enables Knox auto-discovery for the Flink Dashboard in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.flink-dashboard
Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_flink_dashboard
Required
false

Enable Auto Discovery (cdp-proxy) - HBase Web UI

Description
Enables Knox auto-discovery for the HBase Web UI in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.hbaseui
Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_hbase_ui
Required
false

Enable Auto Discovery (cdp-proxy) - Namenode Web UI

Description
Enables Knox auto-discovery for the Namenode Web UI in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.hdfsui
Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_hdfs_ui
Required
false

Enable Auto Discovery (cdp-proxy) - Hue Server

Description

Enables Knox auto-discovery for the Hue Server in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.hue

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_hue

Required

false

Enable Auto Discovery (cdp-proxy) - Impala Catalog Server Web UI**Description**

Enables Knox auto-discovery for the Impala Catalog Server Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.impalaui

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_impala_ui

Required

false

Enable Auto Discovery (cdp-proxy) - HistoryServer Web UI**Description**

Enables Knox auto-discovery for the HistoryServer Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.jobhistoryui

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_jobhistory_ui

Required

false

Enable Auto Discovery (cdp-proxy) - Kudu Master Web UI**Description**

Enables Knox auto-discovery for the Kudu Master Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.kuduui

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_kudu_ui

Required

false

Enable Auto Discovery (cdp-proxy) - Livy Server For Spark3 Web UI

Description

Enables Knox auto-discovery for the Livy Server For Spark3 Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.livy_for_spark3

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_livy_for_spark3

Required

false

Enable Auto Discovery (cdp-proxy) - Livy Server Web UI

Description

Enables Knox auto-discovery for the Livy Server Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.livyserver

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_livyserver

Required

false

Enable Auto Discovery (cdp-proxy) - NameNode

Description

Enables Knox auto-discovery for the NameNode in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.namenode

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_namenode

Required

false

Enable Auto Discovery (cdp-proxy) - NiFi

Description

Enables Knox auto-discovery for the NiFi in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.nifi

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_nifi

Required

false

Enable Auto Discovery (cdp-proxy) - NiFi Registry**Description**

Enables Knox auto-discovery for the NiFi Registry in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.nifi-registry

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_nifi_registry

Required

false

Enable Auto Discovery (cdp-proxy) - Oozie Server**Description**

Enables Knox auto-discovery for the Oozie Server in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.oozie

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_oozie

Required

false

Enable Auto Discovery (cdp-proxy) - Oozie Web UI**Description**

Enables Knox auto-discovery for the Oozie Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.oozieui

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_oozie_ui

Required

false

Enable Auto Discovery (cdp-proxy) - Ranger Admin**Description**

Enables Knox auto-discovery for the Ranger Admin in the cdp-proxy topology.

Related Name

`gateway.auto.discovery.cdp-proxy.enabled.ranger`**Default Value**`true`**API Name**`gateway_auto_discovery_cdp_proxy_enabled_ranger`**Required**`false`**Enable Auto Discovery (cdp-proxy) - Ranger Admin Web UI****Description**

Enables Knox auto-discovery for the Ranger Admin Web UI in the cdp-proxy topology.

Related Name`gateway.auto.discovery.cdp-proxy.enabled.rangerui`**Default Value**`true`**API Name**`gateway_auto_discovery_cdp_proxy_enabled_ranger_ui`**Required**`false`**Enable Auto Discovery (cdp-proxy) - ResourceManager****Description**

Enables Knox auto-discovery for the ResourceManager in the cdp-proxy topology.

Related Name`gateway.auto.discovery.cdp-proxy.enabled.resourcemanager`**Default Value**`true`**API Name**`gateway_auto_discovery_cdp_proxy_enabled_resourcemanager`**Required**`false`**Enable Auto Discovery (cdp-proxy) - Schema Registry****Description**

Enables Knox auto-discovery for the Schema Registry in the cdp-proxy topology.

Related Name`gateway.auto.discovery.cdp-proxy.enabled.schema-registry`**Default Value**`true`**API Name**`gateway_auto_discovery_cdp_proxy_enabled_schema_registry`**Required**`false`

Enable Auto Discovery (cdp-proxy) - Stream Messaging Manager API**Description**

Enables Knox auto-discovery for the Stream Messaging Manager API in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.smm-api

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_smm

Required

false

Enable Auto Discovery (cdp-proxy) - Stream Messaging Manager Web UI**Description**

Enables Knox auto-discovery for the Stream Messaging Manager Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.smm-ui

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_smm_ui

Required

false

Enable Auto Discovery (cdp-proxy) - Solr Server**Description**

Enables Knox auto-discovery for the Solr Server in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.solr

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_solr

Required

false

Enable Auto Discovery (cdp-proxy) - Spark 3 History Server Web UI**Description**

Enables Knox auto-discovery for the Spark 3 History Server Web UI in the cdp-proxy topology.

Related Name

gateway.auto.discovery.cdp-proxy.enabled.spark3historyui

Default Value

true

API Name

gateway_auto_discovery_cdp_proxy_enabled_spark3history_ui
Required
false

Enable Auto Discovery (cdp-proxy) - Spark History Server Web UI

Description
Enables Knox auto-discovery for the Spark History Server Web UI in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.sparkhistoryui
Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_sparkhistory_ui
Required
false

Enable Auto Discovery (cdp-proxy) - WebHDFS API

Description
Enables Knox auto-discovery for the WebHDFS API in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.webhdfs
Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_webhdfs
Required
false

Enable Auto Discovery (cdp-proxy) - ResourceManager Web UI

Description
Enables Knox auto-discovery for the ResourceManager Web UI in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.yarnui
Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_yarn_ui
Required
false

Enable Auto Discovery (cdp-proxy) - ResourceManager Web UI V2

Description
Enables Knox auto-discovery for the ResourceManager Web UI V2 in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.yarnuiv2

Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_yarn_ui_v2
Required
false

Enable Auto Discovery (cdp-proxy) - Zeppelin Server Web UI

Description
Enables Knox auto-discovery for the Zeppelin Server Web UI in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.zeppelinui
Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_zeppelin_ui
Required
false

Enable Auto Discovery (cdp-proxy) - Zeppelin Server

Description
Enables Knox auto-discovery for the Zeppelin Server in the cdp-proxy topology.
Related Name
gateway.auto.discovery.cdp-proxy.enabled.zeppelinws
Default Value
true
API Name
gateway_auto_discovery_cdp_proxy_enabled_zeppelin_ws
Required
false

Enable/Disable Service Auto-Discovery

Description
Whether Knox's service auto-discovery feature is enabled
Related Name
gateway.auto.discovery.enabled
Default Value
true
API Name
gateway_auto_discovery_enabled
Required
false

Knox Simplified Topology Management - Monitoring Interval

Description

Defines the frequency of Cloudera Manager resources (descriptors and shared providers) file (cdp-resources.xml) monitoring.

Related Name

gateway.cloudera.manager.descriptors.monitor.interval

Default Value

10 second(s)

API Name

gateway_cloudera_manager_descriptors_monitor_interval

Required

false

Auto Discovery - Cluster Configuration Monitoring Interval**Description**

Defines the frequency of cluster configuration monitoring.

Related Name

gateway.cluster.config.monitor.cm.interval

Default Value

1 minute(s)

API Name

gateway_cluster_configuration_monitor_interval

Required

false

Knox Gateway Configuration Directory**Description**

Contains configuration files that apply to the gateway globally (i.e. not cluster specific).

Related Name

gateway_conf_dir

Default Value

/var/lib/knox/gateway/conf

API Name

gateway_conf_dir

Required

false

Knox Gateway Data Directory**Description**

Contains security and topology specific artifacts as well as important applications for admin-ui

Related Name

gateway_data_dir

Default Value

/var/lib/knox/gateway/data

API Name

gateway_data_dir

Required

false

Gateway - Default App Topology Name**Description**

When a topology file is deployed with a file name that matches the configured default topology name, a specialized mapping for URLs is installed for that particular topology. This allows the URLs that are expected by the existing Hadoop CLIs for WebHDFS to be used in interacting with the specific Hadoop cluster that is represented by the default topology file.

Related Name

default.app.topology.name

Default Value

cdp-proxy

API Name

gateway_default_topology_name

Required

false

Knox Simplified Topology Management - cdp-proxy**Description**

Knox descriptor block for 'cdp-proxy' topology. 'providerConfigRef' indicates the name of shared-provider the given descriptor would like to use. The rest of the entries hold service information. The structure of an service information entry is: \$SERVICE_NAME[: \$PARAMETER_NAME=\$PARAMETER_VALUE]. The 'url' and 'version' parameter names are preserved keywords to set the given service's URL and version. For instance: HIVE:url=http://localhost:123, HIVE:version:3.0.0, HIVE:httpClient.socketTimeout=5m, HIVE:test.pramameter.name=test.parameter.value

Related Name

cdp-proxy

Default Value

providerConfigRef=sso

API Name

gateway_descriptor_cdp_proxy

Required

false

Knox Simplified Topology Management - cdp-proxy-api**Description**

Knox descriptor block for 'cdp-proxy-api' topology. 'providerConfigRef' indicates the name of shared-provider the given descriptor would like to use. The rest of the entries hold service information. The structure of an service information entry is: \$SERVICE_NAME[: \$PARAMETER_NAME=\$PARAMETER_VALUE]. The 'url' and 'version' parameter names are preserved keywords to set the given service's URL and version. For instance: NIFI, HIVE:url=http://localhost:123, HIVE:version:3.0.0, HIVE:httpClient.socketTimeout=5m, HIVE:test.pramameter.name=test.parameter.value

Related Name

cdp-proxy-api

Default Value

providerConfigRef=pam

API Name

gateway_descriptor_cdp_proxy_api

Required

false

Knox Gateway Dispatch Whitelist**Description**

The whitelist to be applied for dispatches associated with the service roles specified by gateway.dispatch.whitelist.services. By default this is replaced with DEFAULT or HTTPS_ONLY based on if TLS is enabled.

Related Name

gateway.dispatch.whitelist

Default Value

WHITELIST_CONFIG_REPLACEME

API Name

gateway_dispatch_whitelist

Required

false

Knox Gateway Dispatch Whitelist Services**Description**

The comma-delimited list of service roles for which the 'gateway.dispatch.whitelist' should be applied

Related Name

gateway.dispatch.whitelist.services

Default Value

DATANODE, HBASEUI, HDFSUI, IMPALAUUI, JOBHISTORYUI, KUDUUI, NODEUI, YARNUI, YARNUIV2, knoxauth

API Name

gateway_dispatch_whitelist_services

Required

false

Gateway Config Directory**Description**

The directory within 'gateway_data_dir' that contains gateway topology files and deployments.

Related Name

gateway.gateway.conf.dir

Default Value

deployments

API Name

gateway_gateway_conf_dir

Required

false

Knox Gateway Initial/Max Heapsize

Description	Initial/Maximum size for the Java Process heap. Passed to Java -Xmx/-Xms. Measured in megabytes.
Related Name	gateway_heap_size
Default Value	1 GiB
API Name	gateway_heap_size
Required	true

Additional Gateway Java Options

Description	These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here. -Xmx/-Xms should not be specified here: to set the heapsize use the 'Knox Gateway Initial/Max Heapsize' parameter
Related Name	gateway_java_opts
Default Value	
API Name	gateway_java_opts
Required	false

Admin Groups

Description	Admin groups for Knox
Related Name	gateway.knox.admin.groups
Default Value	
API Name	gateway_knox_admin_groups
Required	false

Knox Master Secret

Description	The master secret is used to access secured artifacts by the gateway instance. Keystore, trust stores and credential stores are all protected with the master secret. NOTE: changing the master secret will require you to change passwords protecting the keystores for the gateway, identity keystores and all credential stores
Related Name	gateway_master_secret

Default Value
API Name
gateway_master_secret
Required
true

Gateway Path

Description
The default context path for the gateway.
Related Name
gateway.path
Default Value
gateway
API Name
gateway_path
Required
true

Ranger Knox Plugin Conf Path

Description
Staging directory for Ranger Knox Plugin Configuration. This should generally not be changed.
Related Name
gateway_ranger_knox_plugin_conf_path
Default Value
/var/lib/knox/ranger-knox-plugin
API Name
gateway_ranger_knox_plugin_conf_path
Required
true

Ranger Knox Plugin Audit Hdfs Spool Directory Path

Description
Spool directory for Ranger audits being written to DFS.
Related Name
xasecure.audit.destination.hdfs.batch.filespool.dir
Default Value
/var/log/knox/gateway/audit/hdfs/spool
API Name
gateway_ranger_knox_plugin_hdfs_audit_spool_directory
Required
true

Ranger Knox Plugin Policy Cache Directory Path

Description

The directory where Ranger security policies are cached locally.

Related Name

ranger.plugin.knox.policy.cache.dir

Default Value

/var/lib/ranger/knox/gateway/policy-cache

API Name

gateway_ranger_knox_plugin_policy_cache_directory

Required

true

Ranger Knox Plugin Audit Solr Spool Directory Path**Description**

Spool directory for Ranger audits being written to Solr.

Related Name

xasecure.audit.destination.solr.batch.filespool.dir

Default Value

/var/log/knox/gateway/audit/solr/spool

API Name

gateway_ranger_knox_plugin_solr_audit_spool_directory

Required

true

Ranger Plugin Trusted Proxy IP Address**Description**

Accepts a list of IP addresses of proxy servers for trusting.

Related Name

ranger.plugin.knox.trusted.proxy.ipaddress

Default Value**API Name**

gateway_ranger_plugin_trusted_proxy_ipaddress

Required

false

Ranger Plugin Use X-Forwarded For IP Address**Description**

The parameter is used for identifying the originating IP address of a user connecting to a component through proxy for audit logs.

Related Name

ranger.plugin.knox.use.x-forwarded-for.ipaddress

Default Value

false

API Name

gateway_ranger_plugin_use_x_forwarded_for_ipaddress

Required

false

Cookie Scoping Enabled

Description

Enable/Disable cookie scoping feature.

Related Name

gateway.scope.cookies.feature.enabled

Default Value

false

API Name

gateway_scope_cookies_feature_enabled

Required

false

Security - Signing Key Alias

Description

The alias for the signing keypair within the keystore specified via gateway_signing_keystore_name

Related Name

gateway.signing.key.alias

Default Value

API Name

gateway_signing_key_alias

Required

false

Security - Signing Keystore Name

Description

The filename of keystore file that contains the signing keypair

Related Name

gateway.signing.keystore.name

Default Value

API Name

gateway_signing_keystore_name

Required

false

Security - Signing Keystore Type

Description

The type of the keystore file where the signing keypair is stored. See gateway_signing_keystore_name

Related Name

gateway.signing.keystore.type

Default Value

API Name

gateway_signing_keystore_type
Required
false

Knox Simplified Topology Management - SSO Authentication Provider

Description
Authentication provider declaration used by the UIs using the Knox SSO capabilities such as the Admin and Home Page UIs.
Related Name
gateway_sso_authentication_provider
Default Value
role=authentication authentication.name=ShiroProvider authentication.param.sessionTimeout=30 authentication.param.redirectToUrl=/\$GATEWAY_PATH/knoxssso/knoxauth/login.html authentication.param.restrictedCookies=rememberme, WWW-Authenticate authentication.param.main.pamRealm=org.apache.knox.gateway.shirorealm.KnoxPamRealm authentication.param.main.pamRealm.service=login authentication.param.urls./**=authcBasic
API Name
gateway_sso_authentication_provider
Required
false

Security - TLS Certificate Alias (Optional)

Description
The alias for the Gateway’s TLS certificate and keypair within the default keystore or the keystore specified via gateway.tls.keystore.path
Related Name
gateway_tls_certificate_alias
Default Value
API Name
gateway_tls_certificate_alias
Required
false

Security - Use FQDN as TLS Certificate Alias

Description
If enabled, the FQDN will be used as gateway.tls.key.alias in gateway-site.xml; otherwise the UQDN is used. This behavior is overwritten if gateway_tls_certificate_alias is set. In this case the value in gateway_tls_certificate_alias is used as alias.
Related Name
gateway_tls_certificate_alias_use_fqdn
Default Value
true
API Name
gateway_tls_certificate_alias_use_fqdn
Required
false

Security - TLS Certificate Path (Optional)**Description**

The path for the TLS certificate which Knox will import in the CM generated/distributed keystore in case SSL is enabled (if any).

Related Name

gateway_tls_certificate_path

Default Value**API Name**

gateway_tls_certificate_path

Required

false

Websockets Enabled**Description**

Enable/Disable websocket feature.

Related Name

gateway.websocket.feature.enabled

Default Value

true

API Name

gateway_websocket_feature_enabled

Required

false

X-Forwarded Header Context Service Name**Description**

The service name to be added in x-forward-context header.

Related Name

gateway.xforwarded.header.context.append.servicename

Default Value

LIVYSERVER, LIVY_FOR_SPARK3

API Name

gateway_xforwarded_header_context_append_servicename

Required

false

Admin Group Mapping - Class Name**Description**

The class name used for Hadoop admin group mapping

Related Name

gateway.group.config.hadoop.security.group.mapping

Default Value

org.apache.hadoop.security.ShellBasedUnixGroupsMapping

API Name

hadoop_security_group_mapping_class
Required
false

Hadoop Group Mapping - Negative Cache Expiration

Description
The Hadoop group mapping negative cache expiration in seconds
Related Name
gateway.group.config.hadoop.security.groups.negative-cache.secs
Default Value
5 second(s)
API Name
hadoop_security_group_negative_cache_expiration_seconds
Required
false

Hadoop Group Mapping - Positive Cache Expiration

Description
The Hadoop group mapping positive cache expiration in seconds
Related Name
gateway.group.config.hadoop.security.groups.cache.secs
Default Value
10 second(s)
API Name
hadoop_security_group_positive_cache_expiration_seconds
Required
false

krb5.conf Location

Description
Absolute path to krb5.conf file
Related Name
java.security.krb5.conf
Default Value
/etc/krb5.conf
API Name
java_security_krb5_conf
Required
false

KRB5 Debug

Description
Boolean flag indicating whether to enable debug messages for krb5 authentication
Related Name
sun.security.krb5.debug

Default Value	false
API Name	sun_security_krb5_debug
Required	false

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	rlimit_fds
Required	false

Ports and Addresses

Gateway HTTP Port

Description	The HTTP port for the Gateway.
Related Name	gateway.port
Default Value	8443
API Name	gateway_port
Required	true

Resource Management

Cgroup CPU Shares

Description	Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name	cpu.shares
Default Value	1024
API Name	

`rm_cpu_shares`**Required**`true`**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the `cgexec` command: `resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`
These settings override other cgroup settings.

Related Name`custom.cgroups`**Default Value****API Name**`rm_custom_resources`**Required**`false`**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name`blkio.weight`**Default Value**`500`**API Name**`rm_io_weight`**Required**`true`**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name`memory.limit_in_bytes`**Default Value**`-1 MiB`**API Name**`rm_memory_hard_limit`

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Knox Gateway TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Knox Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

gateway.httpclient.truststore.path

Default Value**API Name**

ssl_client_truststore_location

Required

false

Knox Gateway TLS/SSL Trust Store Password**Description**

The password for the Knox Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name**Default Value****API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Knox Gateway

Description

Encrypt communication between clients and Knox Gateway using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

knox.enableTLS

Default Value

false

API Name

ssl_enabled

Required

false

Knox Gateway TLS/SSL Server Keystore File Location

Description

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Knox Gateway is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

gateway.tls.keystore.path

Default Value

API Name

ssl_server_keystore_location

Required

false

Knox Gateway TLS/SSL Server Keystore File Password

Description

The password for the Knox Gateway keystore file.

Related Name

Default Value

API Name

ssl_server_keystore_password

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value	100 MiB
API Name	stacks_collection_data_retention
Required	false

Stacks Collection Directory

Description	The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name	stacks_collection_directory
Default Value	
API Name	stacks_collection_directory
Required	false

Stacks Collection Enabled

Description	Whether or not periodic stacks collection is enabled.
Related Name	stacks_collection_enabled
Default Value	false
API Name	stacks_collection_enabled
Required	true

Stacks Collection Frequency

Description	The frequency with which stacks are collected.
Related Name	stacks_collection_frequency
Default Value	5.0 second(s)
API Name	stacks_collection_frequency
Required	false

Stacks Collection Method

Description	The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name	stacks_collection_method
Default Value	jstack
API Name	stacks_collection_method
Required	false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties_role_safety_valve
Required	true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy.properties

Description	
-------------	--

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/auto-discovery-advanced-configuration-cdp-proxy.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/cdp-resources.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/cdp-resources.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/cdp-resources.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/gateway-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-audit.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-audit.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/ranger-knox-audit.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-policymgr-ssl.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-policymgr-ssl.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/ranger-knox-policymgr-ssl.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-security.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-security.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/ranger-knox-security.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Knox Simplified Topology Management - API Authentication Provider**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Simplified Topology Management - API Authentication Provider parameter.

Related Name**Default Value**

false

API Name

`role_config_suppression_gateway_api_authentication_provider`**Required**`true`**Suppress Parameter Validation: Knox Gateway Configuration Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Configuration Directory parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_gateway_conf_dir`**Required**`true`**Suppress Parameter Validation: Knox Gateway Data Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Data Directory parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_gateway_data_dir`**Required**`true`**Suppress Parameter Validation: Gateway - Default App Topology Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway - Default App Topology Name parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_gateway_default_topology_name`**Required**`true`**Suppress Parameter Validation: Knox Simplified Topology Management - cdp-proxy****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Simplified Topology Management - cdp-proxy parameter.

Related Name

Default Value

false

API Name

role_config_suppression_gateway_descriptor_cdp_proxy

Required

true

Suppress Parameter Validation: Knox Simplified Topology Management - cdp-proxy-api**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Simplified Topology Management - cdp-proxy-api parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_descriptor_cdp_proxy_api

Required

true

Suppress Parameter Validation: Knox Gateway Dispatch Whitelist**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Dispatch Whitelist parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_dispatch_whitelist

Required

true

Suppress Parameter Validation: Knox Gateway Dispatch Whitelist Services**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Dispatch Whitelist Services parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_dispatch_whitelist_services

Required

true

Suppress Parameter Validation: Gateway Config Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Config Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_gateway_conf_dir

Required

true

Suppress Parameter Validation: Knox Gateway Initial/Max Heapsize**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Initial/Max Heapsize parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_heap_size

Required

true

Suppress Parameter Validation: Additional Gateway Java Options**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional Gateway Java Options parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_java_opts

Required

true

Suppress Parameter Validation: Admin Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_knox_admin_groups

Required

true

Suppress Parameter Validation: Knox Master Secret

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Master Secret parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_master_secret

Required

true

Suppress Parameter Validation: Gateway Path

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_path

Required

true

Suppress Parameter Validation: Gateway HTTP Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway HTTP Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_port

Required

true

Suppress Parameter Validation: Ranger Knox Plugin Conf Path

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Conf Path parameter.

Related Name**Default Value**

false

API Name`role_config_suppression_gateway_ranger_knox_plugin_conf_path`**Required**`true`**Suppress Parameter Validation: Ranger Knox Plugin Audit Hdfs Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Audit Hdfs Spool Directory Path parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_gateway_ranger_knox_plugin_hdfs_audit_spool_directory`**Required**`true`**Suppress Parameter Validation: Ranger Knox Plugin Policy Cache Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Policy Cache Directory Path parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_gateway_ranger_knox_plugin_policy_cache_directory`**Required**`true`**Suppress Parameter Validation: Ranger Knox Plugin Audit Solr Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Audit Solr Spool Directory Path parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_gateway_ranger_knox_plugin_solr_audit_spool_directory`**Required**`true`**Suppress Parameter Validation: Ranger Plugin Trusted Proxy IP Address****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Plugin Trusted Proxy IP Address parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_ranger_plugin_trusted_proxy_ipaddress

Required

true

Suppress Parameter Validation: Security - Signing Key Alias**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Key Alias parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_signing_key_alias

Required

true

Suppress Parameter Validation: Security - Signing Keystore Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Keystore Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_signing_keystore_name

Required

true

Suppress Parameter Validation: Security - Signing Keystore Type**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Keystore Type parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_signing_keystore_type

Required

true

Suppress Parameter Validation: Knox Simplified Topology Management - SSO Authentication Provider**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Simplified Topology Management - SSO Authentication Provider parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_sso_authentication_provider

Required

true

Suppress Parameter Validation: Security - TLS Certificate Alias (Optional)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - TLS Certificate Alias (Optional) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_tls_certificate_alias

Required

true

Suppress Parameter Validation: Security - TLS Certificate Path (Optional)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - TLS Certificate Path (Optional) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gateway_tls_certificate_path

Required

true

Suppress Parameter Validation: X-Forwarded Header Context Service Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the X-Forwarded Header Context Service Name parameter.

Related Name**Default Value**

false

API Name

`role_config_suppression_gateway_xforwarded_header_context_append_servicename`**Required**`true`**Suppress Parameter Validation: Admin Group Mapping - Class Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Group Mapping - Class Name parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_hadoop_security_group_mapping_class`**Required**`true`**Suppress Parameter Validation: krb5.conf Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the krb5.conf Location parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_java_security_krb5_conf`**Required**`true`**Suppress Parameter Validation: JMX Exporter Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_jmx_exporter_port`**Required**`true`**Suppress Parameter Validation: JMX Exporter configuration YAML****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.

Related Name

Default Value

false

API Name

role_config_suppression_jmx_exporter_yaml

Required

true

Suppress Parameter Validation: Knox Gateway Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_knox_gateway_role_env_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Knox Gateway Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

`role_config_suppression_otelcol_processors`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Receivers Section****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_receivers`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_remote_write_password`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_otelcol_remote_write_url`**Required**`true`**Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Knox Gateway TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Knox Gateway TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Knox Gateway TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Knox Gateway TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test

Description

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_knox_knox_gateway_audit_health

Required

true

Suppress Health Test: File Descriptors

Description

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_knox_knox_gateway_file_descriptor

Required

true

Suppress Health Test: Host Health

Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_knox_knox_gateway_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_knox_gateway_log_directory_free_space

Required

true

Suppress Health Test: Otelcol Health**Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_knox_gateway_otelcol_health

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_knox_gateway_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_knox_gateway_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_knox_gateway_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_knox_gateway_unexpected_exits

Required

true

Knox IDBroker

Advanced

Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-reloadable.xml

Description

For advanced use only. A string to be inserted into conf/gateway-reloadable.xml for this role only.

Related Name**Default Value****API Name**`conf/gateway-reloadable.xml_role_safety_valve`**Required**`false`**Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml****Description**

For advanced use only. A string to be inserted into `conf/gateway-site.xml` for this role only.

Related Name**Default Value****API Name**`conf/gateway-site.xml_role_safety_valve`**Required**`false`**Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**`IDBROKER_role_env_safety_valve`**Required**`false`**Knox IDBroker Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into `log4j.properties` for this role only.

Related Name**Default Value****API Name**`log4j_safety_valve`**Required**`false`**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name

Default Value

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name

Default Value

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name

Default Value

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/ crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name
Default Value
20
API Name
process_start_secs
Required
false

Logs

Knox IDBroker Log Directory

Description
The log directory for log files of the role Knox IDBroker.
Related Name
log_dir
Default Value
/var/log/knox/idbroker
API Name
log_dir
Required
false

Knox IDBroker Logging Threshold

Description
The minimum log level for Knox IDBroker logs
Related Name
Default Value
INFO
API Name
log_threshold
Required
false

Knox IDBroker Maximum Log File Backups

Description
The maximum number of rolled log files to keep for Knox IDBroker logs. Typically used by log4j or logback.
Related Name
Default Value
10
API Name
max_log_backup_index
Required
false

Knox IDBroker Max Log Size

Description	The maximum size, in megabytes, per log file for Knox IDBroker logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB
API Name	max_log_size
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts
Required	false

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	

idbroker_fd_thresholds
Required
false

Knox IDBroker Host Health Test

Description
When computing the overall Knox IDBroker health, consider the host's health.
Related Name
Default Value
true
API Name
idbroker_host_health_enabled
Required
false

Knox IDBroker Process Health Test

Description
Enables the health test that the Knox IDBroker's process state is consistent with the role configuration
Related Name
Default Value
true
API Name
idbroker_scm_health_enabled
Required
false

Enable JMX Exporter (beta)

Description
JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. See the JMX Exporter documentation.
Related Name
Default Value
false
API Name
jmx_exporter_enabled
Required
true

JMX Exporter Port

Description
JMX Exporter needs a port to implement a Prometheus exporter.
Related Name

Default Value
API Name
jmx_exporter_port
Required
false

JMX Exporter configuration YAML

Description
This configuration is passed to JMX Exporter as it is. See the JMX Exporter documentation.
Related Name
Default Value
API Name
jmx_exporter_yaml
Required
false

Log Directory Free Space Monitoring Absolute Thresholds

Description
The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
Related Name
Default Value
Warning: 10 GiB, Critical: 5 GiB
API Name
log_directory_free_space_absolute_thresholds
Required
false

Log Directory Free Space Monitoring Percentage Thresholds

Description
The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.
Related Name
Default Value
Warning: Never, Critical: Never
API Name
log_directory_free_space_percentage_thresholds
Required
false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

`exporters: prometheusremotewrite/$ROLE_NAME: endpoint:
$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s`

API Name

`otelcol_exporters`

Required

`false`

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

extensions: basicauth/common: client_auth: username:
\$ROLE_PARAM(otelcol_remote_write_user) password:
'\$ROLE_PARAM(otelcol_remote_write_password)'

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name**Default Value**

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name

Default Value

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name

Default Value

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Knox IDBroker Diagnostics Collection Timeout

Description

The timeout in milliseconds to wait for diagnostics collection to complete.

Related Name

Default Value

5 minute(s)

API Name

csd_role_diagnostics_timeout

Required

false

Knox IDBroker AWS Credentials Key

Description

The AWS credentials key

Related Name

idbroker_aws_credentials_key

idbroker_aws_credentials_secret

Required

false

Knox IDBroker AWS Group Mapping**Description**

The list of AWS group-role mappings in 'group=role[:group=role]...[:group=role]' format. A 'group=role' declaration indicates that all authenticated users that are member of the specified group should be able to assume the specified role. For instance: admin=arn:aws:iam:XYZ:role/s3full;audit=arn:aws:iam:XYZ:role/s3Read

Related Name

idbroker.aws.group.role.mapping

Default Value**API Name**

idbroker_aws_group_mapping

Required

false

Knox IDBroker AWS User Default Group Mapping**Description**

The list of AWS user default group mappings in 'user=group[:user=group;...;user=group]' format. A 'user=group' declaration allows the given user to get its credentials indicated by the given group (in case the user belongs to different mapped groups)

Related Name

idbroker.aws.user.default.group.mapping

Default Value**API Name**

idbroker_aws_user_default_group_mapping

Required

false

Knox IDBroker AWS User Mapping**Description**

The list of AWS user-role mappings in 'user=role[:user=role]...[:user=role]' format. A 'user=role' declaration indicates that this is a mapping of the authenticated user's primary principal to the specified role. For instance: admin=arn:aws:iam:XYZ:role/s3full;guest=arn:aws:iam:XYZ:role/s3Read

Related Name

idbroker.aws.user.role.mapping

Default Value**API Name**

idbroker_aws_user_mapping

Required

false

Knox IDBroker AZURE ADLS2 Tenant Name**Description**

The name of the AZURE AD tenant. A tenant is a representation of an organization. It's a dedicated instance of Azure AD that an organization or application developer receives when the organization or application developer creates a relationship with Microsoft

Related Name

idbroker_azure_adls2_tenant_name

Default Value**API Name**

idbroker_azure_adls2_tenant_name

Required

false

Required

false

Knox IDBroker AZURE VM Assumer Identity

Description

A user assigned managed identity that has Virtual Machine Contributor and Managed Identity Operator roles scoped at the resource group where IDBroker Virtual Machine is running.

Related Name

idbroker_azure_vm_assumer_identity

Default Value

API Name

idbroker_azure_vm_assumer_identity

Required

false

Knox IDBroker Configuration Directory

Description

Contains configuration files that apply to the gateway globally (i.e. not cluster specific).

Related Name

idbroker_conf_dir

Default Value

/var/lib/knox/idbroker/conf

API Name

idbroker_conf_dir

Required

false

Knox IDBroker Data Directory

Description

Contains security and topology specific artifacts as well as important applications for admin-ui

Related Name

idbroker_data_dir

Default Value

/var/lib/knox/idbroker/data

API Name

idbroker_data_dir

Required

false

Gateway - Default App Topology Name

Description

When a topology file is deployed with a file name that matches the configured default topology name, a specialized mapping for URLs is installed for that particular topology. This allows the URLs that are expected by the existing Hadoop CLIs for WebHDFS to be used in interacting with the specific Hadoop cluster that is represented by the default topology file.

Related Name

default.app.topology.name
Default Value
API Name
idbroker_default_topology_name
Required
false

Gateway Config Directory

Description
The directory within 'idbroker_data_dir' that contains gateway topology files and deployments.
Related Name
gateway.gateway.conf.dir
Default Value
deployments
API Name
idbroker_gateway_gateway_conf_dir
Required
false

Admin Groups

Description
Admin groups for Knox
Related Name
gateway.knox.admin.groups
Default Value
API Name
idbroker_gateway_knox_admin_groups
Required
false

Gateway Path

Description
The default context path for the gateway.
Related Name
gateway.path
Default Value
gateway
API Name
idbroker_gateway_path
Required
true

Cookie Scoping Enabled

Description

	Enable/Disable cookie scoping feature.
Related Name	gateway.scope.cookies.feature.enabled
Default Value	false
API Name	idbroker_gateway_scope_cookies_feature_enabled
Required	false

Security - Signing Key Alias

Description	The alias for the signing keypair within the keystore specified via idbroker_gateway_signing_keystore_name
Related Name	gateway.signing.key.alias
Default Value	
API Name	idbroker_gateway_signing_key_alias
Required	false

Security - Signing Keystore Name

Description	The filename of keystore file that contains the signing keypair
Related Name	gateway.signing.keystore.name
Default Value	
API Name	idbroker_gateway_signing_keystore_name
Required	false

Security - Signing Keystore Type

Description	The type of the keystore file where the signing keypair is stored. See idbroker_gateway_signing_keystore_name
Related Name	gateway.signing.keystore.type
Default Value	
API Name	idbroker_gateway_signing_keystore_type
Required	false

Knox IDBroker GCP Credential Key**Description**

The GCP Credential Key

Related Name

idbroker_gcp_credential_key

Default Value**API Name**

idbroker_gcp_credential_key

Required

false

Knox IDBroker GCP Credential Secret**Description**

The GCP Credential Secret

Related Name

Kerberos Proxyuser Block

Description

Proxyuser configuration used in Knox's 'dt' topology in case Kerberos is enabled. Must conform a valid JSON key-value format!

Related Name

idbroker_kerberos_dt_proxyuser_block

Default Value

hadoop.proxyuser.livy.hosts: * hadoop.proxyuser.livy.groups: * hadoop.proxyuser.hive.hosts: *
hadoop.proxyuser.hive.groups: * hadoop.proxyuser.httpfs.hosts: * hadoop.proxyuser.httpfs.groups:
* hadoop.proxyuser.hue.hosts: * hadoop.proxyuser.hue.groups: * hadoop.proxyuser.oozie.hosts:
* hadoop.proxyuser.oozie.groups: * hadoop.proxyuser.impala.hosts: *
hadoop.proxyuser.impala.groups: *

API Name

idbroker_kerberos_dt_proxyuser_block

Required

false

IDBroker Knox Token Eviction Grace Period

Description

Defines the grace period for which an expired token's state will avoid eviction. Setting this to zero means there is no grace period, and token state is evicted based on expiration only. See idbroker_knox_token_eviction_interval for more information.

Related Name

gateway.knox.token.eviction.grace.period
Default Value
1 day(s)
API Name
idbroker_knox_token_eviction_grace_period
Required
false

IDBroker Knox Token Eviction Interval

Description
Defines the interval on which Knox will check for expired token state which should be evicted. If the value is equal to zero, Knox will not perform this check.
Related Name
gateway.knox.token.eviction.interval
Default Value
1 minute(s)
API Name
idbroker_knox_token_eviction_interval
Required
false

IDBroker Knox Token Permissive Validation

Description
When enabled, Knox will verify tokens for which there is no server-managed state based only on the contents of the tokens themselves, rather than throwing UnknownToken exceptions.
Related Name
gateway.knox.token.permissive.validation
Default Value
false
API Name
idbroker_knox_token_permissive_validation
Required
false

Enable IDBroker Knox Token State Server

Description
Whether the Knox token state server is enabled for IDBroker
Related Name
idbroker_knox_token_state_enabled
Default Value
false
API Name
idbroker_knox_token_state_enabled
Required
false

IDBroker Knox Token TTL**Description**

This indicates the lifespan of the token. Once it expires a new token must be acquired from KnoxToken service. This is in milliseconds.

Related Name

idbroker_knox_token_ttl_ms

Default Value

7 day(s)

API Name

idbroker_knox_token_ttl_ms

Required

false

IDBroker Master Secret**Description**

The master secret is used to access secured artifacts by the gateway instance. Keystore, trust stores and credential stores are all protected with the master secret. NOTE: changing the master secret will require you to change passwords protecting the keystores for the gateway, identity keystores and all credential stores

Related Name

idbroker_master_secret

Default Value**API Name**

idbroker_master_secret

Required

true

Gateway Config Refresh Interval**Description**

Defines the frequency of gateway configuration refresh.

Related Name

gateway.config.refresh.interval

Default Value

10 second(s)

API Name

idbroker_relaodable_refresh_interval_ms

Required

false

KRB5 Debug**Description**

Boolean flag indicating whether to enable debug messages for krb5 authentication

Related Name

sun.security.krb5.debug

Default Value

	false
API Name	
	idbroker_sun_security_krb5_debug
Required	
	false

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	rlimit_fds
Required	false

Ports and Addresses

Gateway HTTP Port

Description	The HTTP port for the Gateway.
Related Name	gateway.port
Default Value	8444
API Name	idbroker_gateway_port
Required	true

Resource Management

Cgroup CPU Shares

Description	Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name	cpu.shares
Default Value	1024
API Name	rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Knox IDBroker TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Knox IDBroker might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

gateway.httpclient.truststore.path

Default Value

API Name

ssl_client_truststore_location

Required

false

Knox IDBroker TLS/SSL Trust Store Password

Description

The password for the Knox IDBroker TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

Default Value

API Name

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Knox IDBroker

Description	Encrypt communication between clients and Knox IDBroker using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).
Related Name	knox.enableTLS
Default Value	false
API Name	ssl_enabled
Required	false

Knox IDBroker TLS/SSL Server Keystore File Location

Description	The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Knox IDBroker is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.
Related Name	gateway.tls.keystore.path
Default Value	
API Name	ssl_server_keystore_location
Required	false

Knox IDBroker TLS/SSL Server Keystore File Password

Description	The password for the Knox IDBroker keystore file.
Related Name	
Default Value	
API Name	ssl_server_keystore_password
Required	false

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	

100 MiB
API Name
stacks_collection_data_retention
Required
false

Stacks Collection Directory

Description
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name
stacks_collection_directory
Default Value
API Name
stacks_collection_directory
Required
false

Stacks Collection Enabled

Description
Whether or not periodic stacks collection is enabled.
Related Name
stacks_collection_enabled
Default Value
false
API Name
stacks_collection_enabled
Required
true

Stacks Collection Frequency

Description
The frequency with which stacks are collected.
Related Name
stacks_collection_frequency
Default Value
5.0 second(s)
API Name
stacks_collection_frequency
Required
false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-reloadable.xml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-reloadable.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/gateway-reloadable.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/gateway-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Knox IDBroker AWS Credentials Key**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS Credentials Key parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_credentials_key

Required

true

Suppress Parameter Validation: Knox IDBroker AWS Credentials Secret**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS Credentials Secret parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_credentials_secret

Required

true

Suppress Parameter Validation: Knox IDBroker AWS Group Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS Group Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_group_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker AWS User Default Group Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS User Default Group Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_user_default_group_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker AWS User Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS User Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_aws_user_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE ADLS2 Tenant Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE ADLS2 Tenant Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_adls2_tenant_name

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE 'blob-contributor' ClientID**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE 'blob-contributor' ClientID parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_blob_contributor_clientid

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE 'blob-contributor' Secret**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE 'blob-contributor' Secret parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_blob_contributor_secret

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE 'blob-reader' ClientID**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE 'blob-reader' ClientID parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_blob_reader_clientid

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE 'blob-reader' Secret**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE 'blob-reader' Secret parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_blob_reader_secret

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE Group Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE Group Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_group_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE User Default Group Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE User Default Group Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_user_default_group_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE User Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE User Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_user_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker AZURE VM Assumer Identity**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE VM Assumer Identity parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_azure_vm_assumer_identity

Required

true

Suppress Parameter Validation: Knox IDBroker Configuration Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Configuration Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_idbroker_conf_dir

Required

true

Suppress Parameter Validation: Knox IDBroker Data Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Data Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_idbroker_data_dir

Required

true

Suppress Parameter Validation: Gateway - Default App Topology Name

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway - Default App Topology Name parameter.

Related Name

Default Value

false

API Name

role_config_suppression_idbroker_default_topology_name

Required

true

Suppress Parameter Validation: Gateway Config Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Config Directory parameter.

Related Name

Default Value

false

API Name`role_config_suppression_idbroker_gateway_gateway_conf_dir`**Required**`true`**Suppress Parameter Validation: Admin Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Groups parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_idbroker_gateway_knox_admin_groups`**Required**`true`**Suppress Parameter Validation: Gateway Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Path parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_idbroker_gateway_path`**Required**`true`**Suppress Parameter Validation: Gateway HTTP Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway HTTP Port parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_idbroker_gateway_port`**Required**`true`**Suppress Parameter Validation: Security - Signing Key Alias****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Key Alias parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_signing_key_alias

Required

true

Suppress Parameter Validation: Security - Signing Keystore Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Keystore Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_signing_keystore_name

Required

true

Suppress Parameter Validation: Security - Signing Keystore Type**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Keystore Type parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gateway_signing_keystore_type

Required

true

Suppress Parameter Validation: Knox IDBroker GCP Credential Key**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP Credential Key parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_credential_key

Required

true

Suppress Parameter Validation: Knox IDBroker GCP Credential Secret**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP Credential Secret parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_credential_secret

Required

true

Suppress Parameter Validation: Knox IDBroker GCP Group Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP Group Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_group_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker GCP User Default Group Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP User Default Group Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_user_default_group_mapping

Required

true

Suppress Parameter Validation: Knox IDBroker GCP User Mapping**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP User Mapping parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_gcp_user_mapping
Required
true

Suppress Parameter Validation: Admin Group Mapping - Class Name

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Group Mapping - Class Name parameter.
Related Name
Default Value
false
API Name
role_config_suppression_idbroker_hadoop_security_group_mapping_class
Required
true

Suppress Parameter Validation: IDBroker Initial/Max Heapsize

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the IDBroker Initial/Max Heapsize parameter.
Related Name
Default Value
false
API Name
role_config_suppression_idbroker_heap_size
Required
true

Suppress Parameter Validation: Additional IDBroker Java Options

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional IDBroker Java Options parameter.
Related Name
Default Value
false
API Name
role_config_suppression_idbroker_java_opts
Required
true

Suppress Parameter Validation: krb5.conf Location

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the krb5.conf Location parameter.
Related Name

Default Value

false

API Name

role_config_suppression_idbroker_java_security_krb5_conf

Required

true

Suppress Parameter Validation: Kerberos Proxyuser Block**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Proxyuser Block parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_kerberos_dt_proxyuser_block

Required

true

Suppress Parameter Validation: IDBroker Master Secret**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the IDBroker Master Secret parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_master_secret

Required

true

Suppress Parameter Validation: Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_idbroker_role_env_safety_valve

Required

true

Suppress Parameter Validation: JMX Exporter Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Parameter Validation: JMX Exporter configuration YAML**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_yaml

Required

true

Suppress Parameter Validation: Knox IDBroker Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Knox IDBroker Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir
Required
true

Suppress Parameter Validation: Heap Dump Directory

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.
Related Name
Default Value
false
API Name
role_config_suppression_oom_heap_dump_dir
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_exporters
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_extensions
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.
Related Name

Default Value

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_user
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_service
Required	true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_rm_custom_resources
Required	true

Suppress Parameter Validation: Role Triggers

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_role_triggers
Required	

true

Suppress Parameter Validation: Knox IDBroker TLS/SSL Trust Store File

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker TLS/SSL Trust Store File parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Knox IDBroker TLS/SSL Trust Store Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker TLS/SSL Trust Store Password parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Knox IDBroker TLS/SSL Server Keystore File Location

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker TLS/SSL Server Keystore File Location parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Knox IDBroker TLS/SSL Server Keystore File Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker TLS/SSL Server Keystore File Password parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_log_directory_free_space

Required

true

Suppress Health Test: Otelcol Health**Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_otelcol_health

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_knox_idbroker_unexpected_exits

Required

true

Service-Wide

Advanced

Knox Service Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml

Description	For advanced use only, a string to be inserted into conf/gateway-site.xml. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	conf/gateway-site.xml_service_safety_valve
Required	false

Knox Service Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	KNOX_service_env_safety_valve
Required	false

System Group

Description	The group that this service's processes should run as.
Related Name	
Default Value	knox
API Name	process_groupname
Required	true

System User

Description	The user that this service's processes should run as.
Related Name	
Default Value	knox
API Name	

process_username
Required
true

Monitoring

Enable Service Level Health Alerts

Description
When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name
Default Value
false
API Name
enable_config_alerts
Required
false

Healthy Knox IDBroker Monitoring Thresholds

Description
The health test thresholds of the overall Knox IDBroker health. The check returns "Concerning" health if the percentage of "Healthy" Knox IDBrokers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Knox IDBrokers falls below the critical threshold.
Related Name
Default Value
Warning: 99.0 %, Critical: 49.0 %
API Name
KNOX_IDBROKER_healthy_thresholds
Required
false

Healthy Knox Gateway Monitoring Thresholds

Description

The health test thresholds of the overall Knox Gateway health. The check returns "Concerning" health if the percentage of "Healthy" Knox Gateways falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Knox Gateways falls below the critical threshold.

Related Name**Default Value**

Warning: 99.0 %, Critical: 49.0 %

API Name

KNOX_KNOX_GATEWAY_healthy_thresholds

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific service.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

[]

API Name

service_triggers

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value**

API Name	smon_derived_configs_safety_valve
Required	false

Other

Automatic Restart on Stop

Description	Automatically restart the service when a stop is issued.
Related Name	autorestart_on_stop
Default Value	false
API Name	autorestart_on_stop
Required	false

HDFS Service

Description	Name of the HDFS service that this Knox service instance depends on
Related Name	
Default Value	
API Name	hdfs_service
Required	false

Enable Kerberos Authentication

Description	Boolean flag indicating whether the Hadoop cluster protected by Gateway is secured with Kerberos
Related Name	gateway.hadoop.kerberos.secured
Default Value	false
API Name	kerberos.auth.enabled
Required	false

Knox Home Page - Hidden Topologies

Description	A comma-separated list of topology names that should not be listed in the Topologies section on the Knox Home page.
--------------------	---

Related Name

knox.homepage.hidden.topologies

Default Value

admin manager knoxsso metadata homepage

API Name

knox_homepage_hidden_topologies

Required

false

Knox Home Page - Enable Logout**Description**

Whether logout from the Knox Home page is enabled or not.

Related Name

knox.homepage.logout.enabled

Default Value

true

API Name

knox_homepage_logout_enabled

Required

false

Knox Home Page - Pinned Topologies**Description**

A comma-separated list of topology names that should be auto-expanded on the Knox Home page.

Related Name

knox.homepage.pinned.topologies

Default Value

cdp-proxy

API Name

knox_homepage_pinned_topologies

Required

false

Knox PAM Realm - Service Name**Description**

Using KnoxPamRealm requires a PAM service name. This is the name of the file under '/etc/pam.d' that is used to initialize and configure the PAM subsystem. Normally, this file reflects the application using it. For example 'login', 'sshd', 'su', etc...

Related Name

knox_pam_realm_service

Default Value

login

API Name

knox_pam_realm_service

Required

false

Ranger Knox Plugin Hdfs Audit Directory

Description

The HDFS path on which Ranger audits are written.

Related Name

ranger_knox_plugin_hdfs_audit_directory

Default Value

\$ranger_base_audit_url/knox

API Name

ranger_knox_plugin_hdfs_audit_directory

Required

false

RANGER Service

Description

Name of the RANGER service that this Knox service instance depends on

Related Name

Default Value

API Name

ranger_service

Required

false

Save Alias Command Input

Description

This parameter serves as the input for the 'Save Alias' command. The input must follow the following format:
topology_name_1[:topology_name_2:...:topology_name_N].alias_name=password

Related Name

save_alias_command_input_password

Default Value

API Name

save_alias_command_input_password

Required

false

Security

Kerberos Principal

Description

Kerberos principal short name used by all roles of this service.

Related Name

Default Value

knox

API Name	kerberos_princ_name
Required	true

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Configuration Validator: Deploy Directory

Description	Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_client_config_root_dir
Required	true

true

Suppress Configuration Validator: Knox Gateway Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Knox Gateway Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Configuration Validator: Knox Gateway Log Directory**Description**

Whether to suppress configuration warnings produced by the Knox Gateway Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Configuration Validator: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_receivers
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_remote_write_password
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_remote_write_url
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.
Related Name

Default Value
false
API Name
role_config_suppression_otelcol_remote_write_user
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Service Section

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_service
Required
true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)

Description
Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_rm_custom_resources
Required
true

Suppress Configuration Validator: Role Triggers

Description
Whether to suppress configuration warnings produced by the Role Triggers configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_role_triggers
Required
true

Suppress Configuration Validator: Knox Gateway TLS/SSL Trust Store File

Description

Whether to suppress configuration warnings produced by the Knox Gateway TLS/SSL Trust Store File configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Configuration Validator: Knox Gateway TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the Knox Gateway TLS/SSL Trust Store Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Configuration Validator: Knox Gateway TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the Knox Gateway TLS/SSL Server Keystore File Location configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Configuration Validator: Knox Gateway TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the Knox Gateway TLS/SSL Server Keystore File Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Configuration Validator: Stacks Collection Directory

Description

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Parameter Validation: Knox Service Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Service Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_conf/gateway-site.xml_service_safety_valve

Required

true

Suppress Configuration Validator: Gateway Count Validator

Description

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_gateway_count_validator

Required

true

Suppress Configuration Validator: Knox IDBroker Count Validator

Description

Whether to suppress configuration warnings produced by the Knox IDBroker Count Validator configuration validator.

Related Name**Default Value**

	false
API Name	
	service_config_suppression_idbroker_count_validator
Required	
	true

Suppress Parameter Validation: Kerberos Principal

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.
Related Name	
Default Value	
	false
API Name	
	service_config_suppression_kerberos_princ_name
Required	
	true

Suppress Configuration Validator: Knox Gateway Count Validator

Description	Whether to suppress configuration warnings produced by the Knox Gateway Count Validator configuration validator.
Related Name	
Default Value	
	false
API Name	
	service_config_suppression_knox_gateway_count_validator
Required	
	true

Suppress Parameter Validation: Knox Home Page - Hidden Topologies

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Home Page - Hidden Topologies parameter.
Related Name	
Default Value	
	false
API Name	
	service_config_suppression_knox_homepage_hidden_topologies
Required	
	true

Suppress Parameter Validation: Knox Home Page - Pinned Topologies

Description	
-------------	--

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Home Page - Pinned Topologies parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_knox_homepage_pinned_topologies
Required	true

Suppress Parameter Validation: Knox PAM Realm - Service Name

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox PAM Realm - Service Name parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_knox_pam_realm_service
Required	true

Suppress Parameter Validation: Knox Service Environment Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Service Environment Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_knox_service_env_safety_valve
Required	true

Suppress Parameter Validation: System Group

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Ranger Knox Plugin Hdfs Audit Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Hdfs Audit Directory parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_knox_plugin_hdfs_audit_directory

Required

true

Suppress Parameter Validation: Save Alias Command Input**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Save Alias Command Input parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_save_alias_command_input_password

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

	false
API Name	
	service_config_suppression_service_triggers
Required	
	true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	
	service_config_suppression_smon_derived_configs_safety_valve
Required	
	true

Suppress Health Test: Knox IDBroker Health

Description	Whether to suppress the results of the Knox IDBroker Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	
	service_health_suppression_knox_idbroker_healthy
Required	
	true

Suppress Health Test: Knox Gateway Health

Description	Whether to suppress the results of the Knox Gateway Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	
	service_health_suppression_knox_knox_gateway_healthy
Required	
	true

Kudu Properties in Cloudera Runtime 7.2.18

Role groups:

Master

Advanced

Master Advanced Configuration Snippet (Safety Valve) for gflagfile

Description	For advanced use only. A string to be inserted into gflagfile for this role only.
Related Name	
Default Value	
API Name	gflagfile_role_safety_valve
Required	false

Master Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties

Description	For advanced use only. A string to be inserted into kudu-monitoring.properties for this role only.
Related Name	
Default Value	
API Name	kudu-monitoring.properties_role_safety_valve
Required	false

Master Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
Related Name	
Default Value	
API Name	KUDU_MASTER_role_env_safety_valve
Required	false

Enable auto refresh for metric configurations

Description	When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.
Related Name	

Default Value

false

API Name

metric_config_auto_refresh

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Master Advanced Configuration Snippet (Safety Valve) for ranger-kudu-audit.xml**Description**

For advanced use only. A string to be inserted into ranger-kudu-audit.xml for this role only.

Related Name**Default Value****API Name**

ranger-kudu-audit.xml_role_safety_valve

Required

false

Master Advanced Configuration Snippet (Safety Valve) for ranger-kudu-policymgr-ssl.xml**Description**

For advanced use only. A string to be inserted into ranger-kudu-policymgr-ssl.xml for this role only.

Related Name**Default Value****API Name**

ranger-kudu-policymgr-ssl.xml_role_safety_valve

Required

false

Master Advanced Configuration Snippet (Safety Valve) for ranger-kudu-security.xml**Description**

For advanced use only. A string to be inserted into ranger-kudu-security.xml for this role only.

Related Name**Default Value****API Name**

ranger-kudu-security.xml_role_safety_valve

Required

false

Logs

Master Maximum Log Level to Buffer

Description	Log messages logged at this level or lower are buffered in memory.
Related Name	logbuflevel
Default Value	0
API Name	glog_logbuflevel
Required	false

Master Maximum Log Size

Description	Approximate maximum log file size in megabytes before rolling to a new log file.
Related Name	max_log_size
Default Value	1800 MiB
API Name	glog_maxlogsize
Required	false

Master Minimum Log Level

Description	Messages logged via LOG() at a lower level than this are not logged anywhere.
Related Name	minloglevel
Default Value	0
API Name	glog_minloglevel
Required	false

Master Minimum Log Verbosity

Description	Messages logged via VLOG() at a lower verbosity than this are not logged anywhere.
Related Name	v
Default Value	0

API Name
glog_verbose
Required
false

Master Log Directory

Description
The log directory for log files of the role Master.
Related Name
log_dir
Default Value
/var/log/kudu
API Name
log_dir
Required
false

Monitoring

Enable Health Alerts for this Role

Description
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name
Default Value
false
API Name
enable_config_alerts
Required
false

Enable Failed Data Directories

Description

	Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.
Related Name	
Default Value	true
API Name	KUDU-KUDU_MASTER-7.2.0-FAILED_DATA_DIRS_test_enable
Required	false

Enable Full Data Directories

Description	Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.
Related Name	
Default Value	true
API Name	KUDU-KUDU_MASTER-7.2.0-FULL_DATA_DIRS_test_enable
Required	false

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	kudu_master_fd_thresholds
Required	false

Master Host Health Test

Description	When computing the overall Master health, consider the host's health.
Related Name	
Default Value	true
API Name	kudu_master_host_health_enabled
Required	false

Master Process Health Test

Description

Enables the health test that the Master's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

kudu_master_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.

- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**`monitoring_metric_filter`**Required**`false`**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**`Warning: Never, Critical: Never`**API Name**`process_swap_memory_rate_thresholds`**Required**`false`**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name`common.process.swap_memory_rate_window`**Default Value**`5 minute(s)`**API Name**`process_swap_memory_rate_window`**Required**`false`

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name

Default Value

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds

Description

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name

Default Value

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name

Default Value

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Master Diagnostics Collection Timeout

Description

The timeout in milliseconds to wait for diagnostics collection to complete.

Related Name

Default Value

1 minute(s)

API Name

csd_role_diagnostics_timeout

Required

false

Default Number of Replicas

Description

Default number of replicas for each tablet.

Related Name

default_num_replicas

Default Value

3

API Name

default_num_replicas

Required

true

Kudu Master Data Directories

Description

Directories where Kudu masters will store data blocks.

Related Name

fs_data_dirs

Default Value

API Name

fs_data_dirs

Required

true

Kudu Master WAL Directory

Description

Directory where Kudu masters will store write-ahead logs. It can be the same as one of the data directories, but not a sub-directory of a data directory. Master and tablet servers must use different directories when co-located on the same machine.

Related Name

fs_wal_dir

Default Value

API Name

fs_wal_dir

Required

true

Kudu Master WAL Fsyncs All Entries

Description

If true, the Master will use the fsync system call to ensure that all modifications to the catalog table are durably written to disk. **WARNING:** In this release, enabling this option can cause serious issues.

Related Name

log_force_fsync_all

Default Value

false

API Name

log_force_fsync_all

Required

true

Master Address

Description

Configuration that's automatically set by Cloudera Manager to propagate the Master's address to the Tablet Servers.

Related Name

server.address

Default Value

API Name

master_address

Required

false

Kudu Master Core Dump Directory

Description

If Enable Core Dump is set, Kudu masters will dump cores to this location.

Related Name

master_core_dump_directory

Default Value

/var/log/kudu

API Name

master_core_dump_directory

Required

true

Kudu Metrics URL Parameters

Description

The URL query parameters to append to the `/metrics` URL when collecting Kudu metrics.

Related Name

metrics_url_parameters

Default Value

compact=1&level=info

API Name

metrics_url_parameters

Required

true

Ranger Kudu Plugin Audit HDFS Spool Directory Path

Description

Spool directory for Ranger audits being written to DFS.

Related Name

xasecure.audit.destination.hdfs.batch.filespool.dir

Default Value

/var/log/kudu/audit/hdfs/spool

API Name

ranger_kudu_plugin_hdfs_audit_spool_directory

Required

true

Ranger Kudu Plugin Policy Cache Directory Path

Description

The directory where Ranger security policies are cached locally.

Related Name

ranger.plugin.kudu.policy.cache.dir

Default Value

/var/lib/ranger/kudu/policy-cache

API Name	ranger_kudu_plugin_policy_cache_directory
Required	true

Ranger service name for this Kudu service

Description	Name of the Kudu Ranger service, that is used for authorization by this Kudu service. If this parameter is set to the placeholder value '{{GENERATED_RANGER_SERVICE_NAME}}', a generated service name will be used, and if necessary, created. The generated service name will refer to the name of the cluster and the name of this Kudu service. The name can consist of alphanumeric and '_' characters.
Related Name	ranger.plugin.kudu.service.name
Default Value	cm_kudu
API Name	ranger_kudu_plugin_service_name
Required	false

Ranger Kudu Plugin Audit Solr Spool Directory Path

Description	Spool directory for Ranger audits being written to Solr.
Related Name	xasecure.audit.destination.solr.batch.filespool.dir
Default Value	/var/log/kudu/audit/solr/spool
API Name	ranger_kudu_plugin_solr_audit_spool_directory
Required	true

Ranger Plugin Trusted Proxy IP Address

Description	Accepts a list of IP addresses of proxy servers for trusting.
Related Name	ranger.plugin.kudu.trusted.proxy.ipaddress
Default Value	
API Name	ranger_kudu_plugin_trusted_proxy_ipaddress
Required	false

Ranger Plugin Use X-Forwarded For IP Address

Description

The parameter is used for identifying the originating IP address of a user connecting to a component through proxy for audit logs.

Related Name

ranger.plugin.kudu.use.x-forwarded-for.ipaddress

Default Value

false

API Name

ranger_kudu_plugin_use_x_forwarded_for_ipaddress

Required

false

Kudu Master Web UI Interface

Description

The interface of the Kudu Master Web UI. If blank, binds to 0.0.0.0.

Related Name

webserver_interface

Default Value**API Name**

webserver_interface

Required

false

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses

Kudu Master Web UI Port

Description

The port of the Kudu Master Web UI.

Related Name

webserver_port

Default Value

8051
API Name
webserver_port
Required
true

Resource Management

Cgroup CPU Shares

Description
Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name
cpu.shares
Default Value
1024
API Name
rm_cpu_shares
Required
true

Custom Control Group Resources (overrides Cgroup settings)

Description
Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***
Related Name
custom.cgroups
Default Value
API Name
rm_custom_resources
Required
false

Cgroup I/O Weight

Description
Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.
Related Name
blkio.weight
Default Value
500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Master TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Master might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

kudu.ssl.truststore.location
Default Value
API Name
ssl_client_truststore_location
Required
false

Master TLS/SSL Trust Store Password

Description
The password for the Master TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name
kudu.ssl.truststore.password
Default Value
API Name
ssl_client_truststore_password
Required
false

Enable TLS/SSL for Master

Description
Encrypt communication between clients and Master using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).
Related Name
ssl_enabled
Default Value
false
API Name
ssl_enabled
Required
false

Master TLS/SSL Server CA Certificate (PEM Format)

Description
The path to the TLS/SSL file containing the certificate of the certificate authority (CA) and any intermediate certificates used to sign the server certificate. Used when Master is acting as a TLS/SSL server. The certificate file must be in PEM format, and is usually created by concatenating all of the appropriate root and intermediate certificates.
Related Name
Default Value
API Name
ssl_server_ca_certificate_location
Required
false

Master TLS/SSL Server Certificate File (PEM Format)

Description	The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Master is acting as a TLS/SSL server. The certificate file must be in PEM format.
Related Name	webserver_certificate_file
Default Value	
API Name	ssl_server_certificate_location
Required	false

Master TLS/SSL Server Private Key File (PEM Format)

Description	The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Master is acting as a TLS/SSL server. The certificate file must be in PEM format.
Related Name	webserver_private_key_file
Default Value	
API Name	ssl_server_privatekey_location
Required	false

Master TLS/SSL Private Key Password

Description	The password for the private key in the Master TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.
Related Name	webserver_private_key_password_cmd
Default Value	
API Name	ssl_server_privatekey_password
Required	false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Default Number of Replicas**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Number of Replicas parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_default_num_replicas

Required

true

Suppress Parameter Validation: Kudu Master Data Directories**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Master Data Directories parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_fs_data_dirs

Required

true

Suppress Parameter Validation: Kudu Master WAL Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Master WAL Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_fs_wal_dir

Required

true

Suppress Parameter Validation: Master Advanced Configuration Snippet (Safety Valve) for gflagfile**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master Advanced Configuration Snippet (Safety Valve) for gflagfile parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_gflagfile_role_safety_valve

Required

true

Suppress Parameter Validation: Master Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_kudu-monitoring.properties_role_safety_valve

true

Suppress Parameter Validation: Master Advanced Configuration Snippet (Safety Valve) for ranger-kudu-security.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master Advanced Configuration Snippet (Safety Valve) for ranger-kudu-security.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger-kudu-security.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ranger Kudu Plugin Audit HDFS Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kudu Plugin Audit HDFS Spool Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kudu_plugin_hdfs_audit_spool_directory

Required

true

Suppress Parameter Validation: Ranger Kudu Plugin Policy Cache Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kudu Plugin Policy Cache Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kudu_plugin_policy_cache_directory

Required

true

Suppress Parameter Validation: Ranger service name for this Kudu service**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger service name for this Kudu service parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kudu_plugin_service_name

Required

true

Suppress Parameter Validation: Ranger Kudu Plugin Audit Solr Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kudu Plugin Audit Solr Spool Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kudu_plugin_solr_audit_spool_directory

Required

true

Suppress Parameter Validation: Ranger Plugin Trusted Proxy IP Address**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Plugin Trusted Proxy IP Address parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kudu_plugin_trusted_proxy_ipaddress
Required
true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.
Related Name
Default Value
false
API Name
role_config_suppression_rm_custom_resources
Required
true

Suppress Parameter Validation: Role Triggers

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.
Related Name
Default Value
false
API Name
role_config_suppression_role_triggers
Required
true

Suppress Parameter Validation: Master TLS/SSL Trust Store File

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Master TLS/SSL Trust Store File parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ssl_client_truststore_location
Required
true

Suppress Parameter Validation: Master TLS/SSL Trust Store Password

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Master TLS/SSL Trust Store Password parameter.
Related Name

Default Value

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Master TLS/SSL Server CA Certificate (PEM Format)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master TLS/SSL Server CA Certificate (PEM Format) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_ca_certificate_location

Required

true

Suppress Parameter Validation: Master TLS/SSL Server Certificate File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master TLS/SSL Server Certificate File (PEM Format) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_certificate_location

Required

true

Suppress Parameter Validation: Master TLS/SSL Server Private Key File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master TLS/SSL Server Private Key File (PEM Format) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_privatekey_location

Required

true

Suppress Parameter Validation: Master TLS/SSL Private Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master TLS/SSL Private Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_privatekey_password

Required

true

Suppress Parameter Validation: Kudu Master Web UI Interface**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Master Web UI Interface parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_interface

Required

true

Suppress Parameter Validation: Kudu Master Web UI Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Master Web UI Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_port

Required

true

Suppress Health Test: Failed Data Directories**Description**

Whether to suppress the results of the Failed Data Directories health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kudu-kudu_master-7.2.0-failed_data_dirs

Required

true

Suppress Health Test: Full Data Directories**Description**

Whether to suppress the results of the Full Data Directories health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kudu-kudu_master-7.2.0-full_data_dirs

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kudu_kudu_master_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kudu_kudu_master_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kudu_kudu_master_host_health

Required

true

Suppress Health Test: Log Directory Free Space

Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kudu_kudu_master_log_directory_free_space

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kudu_kudu_master_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name	role_health_suppression_kudu_kudu_master_swap_memory_usage
Required	true

Suppress Health Test: Swap Memory Usage Rate Beta

Description	Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_kudu_kudu_master_swap_memory_usage_rate
Required	true

Suppress Health Test: Unexpected Exits

Description	Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_kudu_kudu_master_unexpected_exits
Required	true

Service-Wide

Advanced

Kudu Service Advanced Configuration Snippet (Safety Valve) for gflagfile

Description	For advanced use only, a string to be inserted into gflagfile. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	gflagfile_service_safety_valve
Required	false

Kudu Service Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties**Description**

For advanced use only, a string to be inserted into kudu-monitoring.properties. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

kudu-monitoring.properties_service_safety_valve

Required

false

Kudu Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

KUDU_service_env_safety_valve

Required

false

System Group**Description**

The group that this service's processes should run as.

Related Name**Default Value**

kudu

API Name

process_groupname

Required

true

System User**Description**

The user that this service's processes should run as.

Related Name**Default Value**

kudu

API Name

process_username

Required

true

Monitoring

Enable Service Level Health Alerts

Description	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts
Required	false

Healthy Master Monitoring Thresholds

Description	The health test thresholds of the overall Master health. The check returns "Concerning" health if the percentage of "Healthy" Masters falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Masters falls below the critical threshold.
Related Name	
Default Value	Warning: 80.1 %, Critical: 60.0 %
API Name	KUDU_KUDU_MASTER_healthy_thresholds
Required	false

Healthy Tablet Server Monitoring Thresholds

Description	The health test thresholds of the overall Tablet Server health. The check returns "Concerning" health if the percentage of "Healthy" Tablet Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Tablet Servers falls below the critical threshold.
Related Name	

Default Value

Warning: 75.0 %, Critical: 50.0 %

API Name

KUDU_KUDU_TSERVER_healthy_thresholds

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific service.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

API Name

service_triggers

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name**Default Value****API Name**

smon_derived_configs_safety_valve

Required

false

Other

Time Servers for Built-In NTP Client

Description	Comma-separated list of NTP servers to use for the built-in NTP client, in format [FQDN IPv4][:PORT]. These are only used if the 'builtin' Time Source is selected.
Related Name	builtin_ntp_servers
Default Value	0.pool.ntp.org, 1.pool.ntp.org, 2.pool.ntp.org, 3.pool.ntp.org
API Name	builtin_ntp_servers
Required	false

Enable Core Dump

Description	Used to generate a core dump to get more information about a Kudu crash. Unless otherwise configured systemwide using /proc/sys/kernel/core_pattern, the dump is generated in the configured core dump directory. The core file can be very large.
Related Name	enable_core_dump
Default Value	false
API Name	enable_core_dump
Required	true

Enable Secure Authentication, Encryption, And Web UI

Description	Enable secure authentication and encryption between all Kudu clients and servers as well as between individual servers. Also enables secure authentication in every Kudu server's web UI. Kerberos must be configured.
Related Name	enable_security
Default Value	false
API Name	enable_security
Required	true

HDFS Service

Description	Name of the HDFS service that this Kudu service instance depends on
-------------	---

Related Name
Default Value
API Name
hdfs_service
Required
false

HMS Service

Description
Name of the HMS service that this Kudu service instance depends on
Related Name
Default Value
API Name
hms_service
Required
false

Ranger Kudu Plugin Hdfs Audit Directory

Description
The HDFS path on which Ranger audits are written.
Related Name
ranger_kudu_plugin_hdfs_audit_directory
Default Value
\$ranger_base_audit_url/kudu
API Name
ranger_kudu_plugin_hdfs_audit_directory
Required
false

RANGER Service

Description
Name of the RANGER service that this Kudu service instance depends on
Related Name
Default Value
API Name
ranger_service
Required
false

Maximum Number of Per-tablet-server Replica Moves

Description
Maximum number of replica moves to perform concurrently on one tablet server: moves of replicas to the server and moves of replicas off of the server count against this limit.

Related Name

rb_max_moves_per_server

Default Value

5

API Name

rb_max_moves_per_server

Required

false

Maximum Allowed Runtime of the Rebalancing Tool**Description**

Maximum time to run the rebalancing, in seconds. Specifying 0 means not imposing any limit on the rebalancing run time.

Related Name

rb_max_run_time_sec

Default Value

0

API Name

rb_max_run_time_sec

Required

false

Maximum Allowed Duration Without Rebalancer Progress**Description**

Maximum duration of the 'staleness' interval where the rebalance can not make progress. If this period elapses without the rebalancer making progress, it will exit indicating failure. This may happen in case of a persistent problem with the cluster or when some unexpected concurrent activity is present (such as automatic recovery of failed replicas, etc.)

Related Name

rb_max_staleness_interval_sec

Default Value

300

API Name

rb_max_staleness_interval_sec

Required

false

Maximum Allowed Runtime to Rolling Restart a Batch of Servers**Description**

Maximum time to allow for the restart of a batch of servers during a rolling restart. If this period elapses without the cluster becoming healthy, the rolling restart will exit indicating failure. This may happen if there is a persistent problem with the cluster.

Related Name

rr_batch_time_limit_sec

Default Value

1800

API Name	rr_batch_time_limit_sec
Required	false

Rolling Restart Health Check Interval

Description	Interval in seconds with which to check the health of a cluster in waiting for a server or batch of servers to come back online, before moving onto the next server or batch of servers during a rolling restart.
Related Name	rr_health_check_interval_sec
Default Value	60
API Name	rr_health_check_interval_sec
Required	false

Sentry Service

Description	Name of the Sentry service that this Kudu service instance depends on
Related Name	
Default Value	
API Name	sentry_service
Required	false

Superuser Access Control List

Description	The list of usernames to allow as super users, comma-separated. A '*' entry indicates that all authenticated users are allowed. If this is left unset or blank, the default behavior is that the identity of the daemon itself determines the superuser. If the daemon is logged in from a Keytab, then the local username from the Kerberos principal is used; otherwise, the local Unix username is used.
Related Name	superuser_acl
Default Value	
API Name	superuser_acl
Required	false

Time Source

Description	
--------------------	--

Time source for HybridClock timestamps. If set to 'auto', Kudu selects the best available time source for the environment: for particular public cloud types, Kudu uses the dedicated NTP server available from within a public cloud instance, otherwise, Kudu relies on the local system clock to be synchronized by NTP. If set to 'builtin', Kudu masters and tablet servers use the built-in NTP client, where the set of servers is configured as specified by the 'Servers for Built-in NTP Client' configuration property (--builtin_ntp_servers flag). If set to 'system', Kudu relies on the local system clock to be synchronized by NTP, where the synchronization by NTP is a requirement.

Related Name

time_source

Default Value

system

API Name

time_source

Required

true

User Access Control List

Description

The list of usernames who may access the cluster, comma-separated. A '*' entry indicates that all authenticated users are allowed.

Related Name

user_acl

Default Value

*

API Name

user_acl

Required

Required	true

Suppress Configuration Validator: Ranger service name for this Kudu service

Description	Whether to suppress configuration warnings produced by the Ranger service name for this Kudu service configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_ranger_kudu_plugin_service_name
Required	true

Suppress Configuration Validator: Ranger Kudu Plugin Audit Solr Spool Directory Path

Description	Whether to suppress configuration warnings produced by the Ranger Kudu Plugin Audit Solr Spool Directory Path configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_ranger_kudu_plugin_solr_audit_spool_directory
Required	

true

Suppress Configuration Validator: Ranger Plugin Trusted Proxy IP Address

Description

Whether to suppress configuration warnings produced by the Ranger Plugin Trusted Proxy IP Address configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ranger_kudu_plugin_trusted_proxy_ipaddress

Required

true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)

Description

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Configuration Validator: Role Triggers

Description

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Configuration Validator: Master TLS/SSL Trust Store File

Description

Whether to suppress configuration warnings produced by the Master TLS/SSL Trust Store File configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Configuration Validator: Master TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the Master TLS/SSL Trust Store Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Configuration Validator: Master TLS/SSL Server CA Certificate (PEM Format)**Description**

Whether to suppress configuration warnings produced by the Master TLS/SSL Server CA Certificate (PEM Format) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_ca_certificate_location

Required

true

Suppress Configuration Validator: Master TLS/SSL Server Certificate File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the Master TLS/SSL Server Certificate File (PEM Format) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_certificate_location

Required

true

Suppress Configuration Validator: Master TLS/SSL Server Private Key File (PEM Format)**Description**

Whether to suppress configuration warnings produced by the Master TLS/SSL Server Private Key File (PEM Format) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_privatekey_location

Required

true

Suppress Configuration Validator: Master TLS/SSL Private Key Password**Description**

Whether to suppress configuration warnings produced by the Master TLS/SSL Private Key Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_privatekey_password

Required

true

Suppress Configuration Validator: Kudu Tablet Server Core Dump Directory**Description**

Whether to suppress configuration warnings produced by the Kudu Tablet Server Core Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_tserver_core_dump_directory

Required

true

Suppress Configuration Validator: Kudu Master Web UI Interface**Description**

Whether to suppress configuration warnings produced by the Kudu Master Web UI Interface configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_webserver_interface

Required

true

Suppress Configuration Validator: Kudu Master Web UI Port

Description	Whether to suppress configuration warnings produced by the Kudu Master Web UI Port configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_webserver_port
Required	true

Suppress Parameter Validation: Time Servers for Built-In NTP Client

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Time Servers for Built-In NTP Client parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_builtin_ntp_servers
Required	true

Suppress Parameter Validation: Kudu Service Advanced Configuration Snippet (Safety Valve) for gflagfile

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Service Advanced Configuration Snippet (Safety Valve) for gflagfile parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_gflagfile_service_safety_valve
Required	true

Suppress Parameter Validation: Kerberos Principal

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.
Related Name	
Default Value	false
API Name	

service_config_suppression_kerberos_princ_name
Required
true

Suppress Parameter Validation: Kudu Service Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Service Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties parameter.
Related Name
Default Value
false
API Name
service_config_suppression_kudu-monitoring.properties_service_safety_valve
Required
true

Suppress Configuration Validator: Master Count Validator

Description
Whether to suppress configuration warnings produced by the Master Count Validator configuration validator.
Related Name
Default Value
false
API Name
service_config_suppression_kudu_master_count_validator
Required
true

Suppress Parameter Validation: Kudu Service Environment Advanced Configuration Snippet (Safety Valve)

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Service Environment Advanced Configuration Snippet (Safety Valve) parameter.
Related Name
Default Value
false
API Name
service_config_suppression_kudu_service_env_safety_valve
Required
true

Suppress Configuration Validator: Tablet Server Count Validator

Description

	Whether to suppress configuration warnings produced by the Tablet Server Count Validator configuration validator.
Related Name	
Default Value	false
API Name	service_config_suppression_kudu_tserver_count_validator
Required	true

Suppress Parameter Validation: System Group

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_process_groupname
Required	true

Suppress Parameter Validation: System User

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_process_username
Required	true

Suppress Parameter Validation: Ranger Kudu Plugin Hdfs Audit Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kudu Plugin Hdfs Audit Directory parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_ranger_kudu_plugin_hdfs_audit_directory
Required	

true

Suppress Parameter Validation: Service Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Parameter Validation: Superuser Access Control List

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Superuser Access Control List parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_superuser_acl

Required

true

Suppress Parameter Validation: User Access Control List

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the User Access Control List parameter.

Related Name**Default Value**

	false
API Name	
	service_config_suppression_user_acl
Required	
	true

Suppress Health Test: Master Health

Description	Whether to suppress the results of the Master Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	
	false
API Name	
	service_health_suppression_kudu_kudu_master_healthy
Required	
	true

Suppress Health Test: Tablet Server Health

Description	Whether to suppress the results of the Tablet Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	
	false
API Name	
	service_health_suppression_kudu_kudu_tserver_healthy
Required	
	true

Tablet Server

Advanced

Tablet Server Advanced Configuration Snippet (Safety Valve) for gflagfile

Description	For advanced use only. A string to be inserted into gflagfile for this role only.
Related Name	
Default Value	
API Name	
	gflagfile_role_safety_valve
Required	
	false

Tablet Server Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties**Description**

For advanced use only. A string to be inserted into kudu-monitoring.properties for this role only.

Related Name**Default Value****API Name**

kudu-monitoring.properties_role_safety_valve

Required

false

Tablet Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

KUDU_TSERVER_role_env_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Logs

Tablet Server Maximum Log Level to Buffer

Description

Log messages logged at this level or lower are buffered in memory.

Related Name

logbuflevel
Default Value
0
API Name
glog_logbuflevel
Required
false

Tablet Server Maximum Log Size

Description
Approximate maximum log file size in megabytes before rolling to a new log file.
Related Name
max_log_size
Default Value
1800 MiB
API Name
glog_maxlogsize
Required
false

Tablet Server Minimum Log Level

Description
Messages logged via LOG() at a lower level than this are not logged anywhere.
Related Name
minloglevel
Default Value
0
API Name
glog_minloglevel
Required
false

Tablet Server Minimum Log Verbosity

Description
Messages logged via VLOG() at a lower verbosity than this are not logged anywhere.
Related Name
v
Default Value
0
API Name
glog_verbose
Required
false

Tablet Server Log Directory

Description	The log directory for log files of the role Tablet Server.
Related Name	log_dir
Default Value	/var/log/kudu
API Name	log_dir
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts
Required	false

Enable Failed Data Directories

Description	Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.
Related Name	
Default Value	true
API Name	

KUDU-KUDU_TSERVER-7.2.0-FAILED_DATA_DIRS_test_enable

Required
false

Enable Full Data Directories

Description
Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

Related Name

Default Value
true

API Name
KUDU-KUDU_TSERVER-7.2.0-FULL_DATA_DIRS_test_enable

Required
false

File Descriptor Monitoring Thresholds

Description
The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name

Default Value
Warning: 50.0 %, Critical: 70.0 %

API Name
kudu_tserver_fd_thresholds

Required
false

Tablet Server Host Health Test

Description
When computing the overall Tablet Server health, consider the host's health.

Related Name

Default Value
true

API Name
kudu_tserver_host_health_enabled

Required
false

Tablet Server Process Health Test

Description
Enables the health test that the Tablet Server's process state is consistent with the role configuration

Related Name

Default Value

true

API Name

kudu_tserver_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description	The period to review when computing unexpected exits.
Related Name	
Default Value	5 minute(s)
API Name	unexpected_exits_window
Required	false

Other

Kudu Tablet Server Block Cache Capacity

Description	Maximum amount of memory allocated to the Kudu Tablet Server's block cache.
Related Name	block_cache_capacity_mb
Default Value	512 MiB
API Name	block_cache_capacity_mb
Required	true

Tablet Server Diagnostics Collection Timeout

Description	The timeout in milliseconds to wait for diagnostics collection to complete.
Related Name	
Default Value	1 minute(s)
API Name	csd_role_diagnostics_timeout
Required	false

Kudu Tablet Server Data Directories

Description	Directories where Kudu tablet servers will store data blocks.
Related Name	fs_data_dirs
Default Value	
API Name	fs_data_dirs

Required

true

Kudu Tablet Server WAL Directory**Description**

Directory where Kudu tablet servers will store write-ahead logs. It can be the same as one of the data directories, but not a sub-directory of a data directory. Master and tablet servers must use different directories when co-located on the same machine.

Related Name

fs_wal_dir

Default Value**API Name**

fs_wal_dir

Required

true

Kudu Tablet Server WAL Fsyncs All Entries**Description**

If true, the Tablet Server will use the fsync system call to ensure that all writes are durably written to the write-ahead log (WAL) before responding. If false, edits will be written to the Linux buffer cache on a majority of replicas before responding.

Related Name

log_force_fsync_all

Default Value

false

API Name

log_force_fsync_all

Required

true

Kudu Tablet Server Maintenance Threads**Description**

The number of threads devoted to background maintenance operations such as flushes and compactions. If the tablet server appears to be falling behind on write operations (inserts, updates, and deletes) but CPU and disk resources are not saturated, increasing this thread count will devote more resources to these background operations.

Related Name

maintenance_manager_num_threads

Default Value

1

API Name

maintenance_manager_num_threads

Required

true

Kudu Tablet Server Hard Memory Limit

Description	Maximum amount of memory that the Kudu Tablet Server will use before it starts rejecting all incoming writes.
Related Name	memory_limit_hard_bytes
Default Value	4 GiB
API Name	memory_limit_hard_bytes
Required	true

Kudu Metrics URL Parameters

Description	The URL query parameters to append to the `/metrics` URL when collecting Kudu metrics.
Related Name	metrics_url_parameters
Default Value	compact=1&level=info
API Name	metrics_url_parameters
Required	true

Tablet History Max Age

Description	The maximum amount of time, in seconds, to preserve tablet data history, including history required to perform diff scans and incremental backups. The duration defined by this parameter is also the maximum amount of time it is possible to wait after a full or incremental backup before performing the next incremental backup. Setting the value to -1 disables history removal.
Related Name	tablet_history_max_age_sec
Default Value	7 day(s)
API Name	tablet_history_max_age_sec
Required	true

Tablet Server Quiescing Interval

Description	Interval in seconds with which to check whether a Tablet Server has fully quiesced
Related Name	ts_quiescing_retry_interval_sec

Default Value	30
API Name	ts_quiescing_retry_interval_sec
Required	false

Maximum Allowed Runtime to Quiesce a Tablet Server

Description	Maximum time to wait for a Tablet Server to fully quiesce, relinquishing leadership of all Tablets and completion of all active scans.
Related Name	ts_quiescing_time_limit_sec
Default Value	1800
API Name	ts_quiescing_time_limit_sec
Required	false

Kudu Tablet Server Core Dump Directory

Description	If Enable Core Dump is set, Kudu Tablet Servers will dump cores to this location.
Related Name	tserver_core_dump_directory
Default Value	/var/log/kudu
API Name	tserver_core_dump_directory
Required	true

Kudu Tablet Server Web UI Interface

Description	The interface of the Kudu Tablet Server Web UI. If blank, binds to 0.0.0.0.
Related Name	webserver_interface
Default Value	
API Name	webserver_interface
Required	false

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	rlimit_fds
Required	false

Ports and Addresses

Kudu Tablet Server Web UI Port

Description	The port of the Kudu Tablet Server Web UI.
Related Name	webserver_port
Default Value	8050
API Name	webserver_port
Required	true

Resource Management

Cgroup CPU Shares

Description	Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name	cpu.shares
Default Value	1024
API Name	rm_cpu_shares
Required	true

Custom Control Group Resources (overrides Cgroup settings)

Description	
-------------	--

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the `cgexec` command: `resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`
These settings override other cgroup settings.

Related Name

`custom.cgroups`

Default Value**API Name**

`rm_custom_resources`

Required

`false`

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

`blkio.weight`

Default Value

`500`

API Name

`rm_io_weight`

Required

`true`

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

`memory.limit_in_bytes`

Default Value

`-1 MiB`

API Name

`rm_memory_hard_limit`

Required

`true`

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security**Enable TLS/SSL for Tablet Server****Description**

Encrypt communication between clients and Tablet Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ssl_enabled

Default Value

false

API Name

ssl_enabled

Required

false

Tablet Server TLS/SSL Server CA Certificate (PEM Format)**Description**

The path to the TLS/SSL file containing the certificate of the certificate authority (CA) and any intermediate certificates used to sign the server certificate. Used when Tablet Server is acting as a TLS/SSL server. The certificate file must be in PEM format, and is usually created by concatenating all of the appropriate root and intermediate certificates.

Related Name**Default Value****API Name**

ssl_server_ca_certificate_location

Required

false

Tablet Server TLS/SSL Server Certificate File (PEM Format)**Description**

The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Tablet Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

Related Name
webserver_certificate_file
Default Value
API Name
ssl_server_certificate_location
Required
false

Tablet Server TLS/SSL Server Private Key File (PEM Format)

Description
The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Tablet Server is acting as a TLS/SSL server. The certificate file must be in PEM format.
Related Name
webserver_private_key_file
Default Value
API Name
ssl_server_privatekey_location
Required
false

Tablet Server TLS/SSL Private Key Password

Description
The password for the private key in the Tablet Server TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.
Related Name
webserver_private_key_password_cmd
Default Value
API Name
ssl_server_privatekey_password
Required
false

Suppressions

Suppress Parameter Validation: Kudu Tablet Server Block Cache Capacity

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Block Cache Capacity parameter.
Related Name
Default Value
false
API Name
role_config_suppression_block_cache_capacity_mb
Required

true

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Parameter Validation: Kudu Tablet Server Data Directories

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Data Directories parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_fs_data_dirs
Required	true

Suppress Parameter Validation: Kudu Tablet Server WAL Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server WAL Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_fs_wal_dir
Required	true

Suppress Parameter Validation: Tablet Server Advanced Configuration Snippet (Safety Valve) for gflagfile

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server Advanced Configuration Snippet (Safety Valve) for gflagfile parameter.
Related Name	
Default Value	

	false
API Name	
	role_config_suppression_gflagfile_role_safety_valve
Required	
	true

Suppress Parameter Validation: Tablet Server Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_kudu-monitoring.properties_role_safety_valve
Required	
	true

Suppress Parameter Validation: Tablet Server Environment Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server Environment Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	
	false
API Name

Required	
	true

Suppress Parameter Validation: Tablet Server Log Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server Log Directory parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_log_dir
Required	
	true

Suppress Parameter Validation: Kudu Tablet Server Maintenance Threads**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Maintenance Threads parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_maintenance_manager_num_threads

Required

true

Suppress Parameter Validation: Kudu Tablet Server Hard Memory Limit**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Hard Memory Limit parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_memory_limit_hard_bytes

Required

true

Suppress Parameter Validation: Kudu Metrics URL Parameters**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Metrics URL Parameters parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_metrics_url_parameters

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources
Required
true

Suppress Parameter Validation: Role Triggers

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.
Related Name
Default Value
false
API Name
role_config_suppression_role_triggers
Required
true

Suppress Parameter Validation: Tablet Server TLS/SSL Server CA Certificate (PEM Format)

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server TLS/SSL Server CA Certificate (PEM Format) parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ssl_server_ca_certificate_location
Required
true

Suppress Parameter Validation: Tablet Server TLS/SSL Server Certificate File (PEM Format)

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server TLS/SSL Server Certificate File (PEM Format) parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ssl_server_certificate_location
Required
true

Suppress Parameter Validation: Tablet Server TLS/SSL Server Private Key File (PEM Format)

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server TLS/SSL Server Private Key File (PEM Format) parameter.
Related Name

Default Value
false
API Name
role_config_suppression_ssl_server_privatekey_location
Required
true

Suppress Parameter Validation: Tablet Server TLS/SSL Private Key Password

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server TLS/SSL Private Key Password parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ssl_server_privatekey_password
Required
true

Suppress Parameter Validation: Kudu Tablet Server Core Dump Directory

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Core Dump Directory parameter.
Related Name
Default Value
false
API Name
role_config_suppression_tserver_core_dump_directory
Required
true

Suppress Parameter Validation: Kudu Tablet Server Web UI Interface

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Web UI Interface parameter.
Related Name
Default Value
false
API Name
role_config_suppression_webserver_interface
Required
true

Suppress Parameter Validation: Kudu Tablet Server Web UI Port

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Web UI Port parameter.

Related Name

Default Value

false

API Name

role_config_suppression_webserver_port

Required

true

Suppress Health Test: Failed Data Directories

Description

Whether to suppress the results of the Failed Data Directories health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kudu-kudu_tserver-7.2.0-failed_data_dirs

Required

true

Suppress Health Test: Full Data Directories

Description

Whether to suppress the results of the Full Data Directories health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kudu-kudu_tserver-7.2.0-full_data_dirs

Required

true

Suppress Health Test: Audit Pipeline Test

Description

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_kudu_kudu_tserver_audit_health
Required
true

Suppress Health Test: File Descriptors

Description
Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name
Default Value
false
API Name
role_health_suppression_kudu_kudu_tserver_file_descriptor
Required
true

Suppress Health Test: Host Health

Description
Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name
Default Value
false
API Name
role_health_suppression_kudu_kudu_tserver_host_health
Required
true

Suppress Health Test: Log Directory Free Space

Description
Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name
Default Value
false
API Name
role_health_suppression_kudu_kudu_tserver_log_directory_free_space
Required
true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kudu_kudu_tserver_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kudu_kudu_tserver_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_kudu_kudu_tserver_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name	role_health_suppression_kudu_kudu_tserver_unexpected_exits
Required	true

Livy Properties in Cloudera Runtime 7.2.18

Role groups:

Gateway

Advanced

Deploy Directory

Description	The directory where the client configs will be deployed
Related Name	
Default Value	/etc/livy
API Name	client_config_root_dir
Required	true

Livy Client Advanced Configuration Snippet (Safety Valve) for livy-conf/livy-client.conf

Description	For advanced use only, a string to be inserted into the client configuration for livy-conf/livy-client.conf.
Related Name	
Default Value	
API Name	livy-conf/livy-client.conf_client_config_safety_valve
Required	false

Monitoring

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts

Required
false

Other

Alternatives Priority

Description
The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.
Related Name
Default Value
50
API Name
client_config_priority
Required
true

Security

Gateway TLS/SSL Trust Store File

Description
The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.
Related Name
livy.truststore
Default Value
API Name
ssl_client_truststore_location
Required
false

Gateway TLS/SSL Trust Store Password

Description
The password for the Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name
livy.truststore.password
Default Value
API Name
ssl_client_truststore_password
Required
false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Parameter Validation: Deploy Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_client_config_root_dir
Required	true

Suppress Parameter Validation: Livy Client Advanced Configuration Snippet (Safety Valve) for livy-conf/livy-client.conf

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Client Advanced Configuration Snippet (Safety Valve) for livy-conf/livy-client.conf parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_livy-conf/livy-client.conf_client_config_safety_valve
Required	true

Suppress Parameter Validation: Gateway TLS/SSL Trust Store File

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store File parameter.
Related Name	

Default Value	false
API Name	role_config_suppression_ssl_client_truststore_location
Required	true

Suppress Parameter Validation: Gateway TLS/SSL Trust Store Password

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store Password parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ssl_client_truststore_password
Required	true

Livy Server

Advanced

Livy Server Advanced Configuration Snippet (Safety Valve) for livy-conf/livy.conf

Description	For advanced use only. A string to be inserted into livy-conf/livy.conf for this role only.
Related Name	
Default Value	
API Name	livy-conf/livy.conf_role_safety_valve
Required	false

Livy Server Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
Related Name	
Default Value	
API Name	LIVY_SERVER_role_env_safety_valve
Required	false

Livy Server Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name	oom_heap_dump_enabled
Required	true

Kill When Out of Memory

Description	When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.
Related Name	
Default Value	true
API Name	oom_sigkill_enabled
Required	true

Automatically Restart Process

Description	When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.
Related Name	
Default Value	false
API Name	process_auto_restart
Required	true

Enable Metric Collection

Description	Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.
Related Name	
Default Value	true
API Name	process_should_monitor
Required	true

Process Start Retry Attempts

Description	
--------------------	--

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

Required

false

Logs

Livy Server Log Directory

Description

The log directory for log files of the role Livy Server.

Related Name

log_dir

Default Value

/var/log/livy

API Name

log_dir

Required

false

Livy Server Logging Threshold

Description

The minimum log level for Livy Server logs

Related Name

Default Value

INFO

API Name

log_threshold
Required
false

Livy Server Maximum Log File Backups

Description
The maximum number of rolled log files to keep for Livy Server logs. Typically used by log4j or logback.
Related Name
Default Value
10
API Name
max_log_backup_index
Required
false

Livy Server Max Log Size

Description
The maximum size, in megabytes, per log file for Livy Server logs. Typically used by log4j or logback.
Related Name
Default Value
200 MiB
API Name
max_log_size
Required
false

Monitoring

Enable Health Alerts for this Role

Description
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name
Default Value
false
API Name
enable_config_alerts
Required
false

Enable JMX Exporter (beta)

Description
JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. See the JMX Exporter documentation.
Related Name
Default Value
false
API Name
jmx_exporter_enabled
Required
true

JMX Exporter Port

Description
JMX Exporter needs a port to implement a Prometheus exporter.
Related Name
Default Value
API Name
jmx_exporter_port
Required
false

JMX Exporter configuration YAML

Description
This configuration is passed to JMX Exporter as it is. See the JMX Exporter documentation.
Related Name
Default Value
API Name
jmx_exporter_yaml
Required
false

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name

Default Value

Warning: 50.0 %, Critical: 70.0 %

API Name

livy_server_fd_thresholds

Required

false

Livy Server Host Health Test

Description

When computing the overall Livy Server health, consider the host's health.

Related Name

Default Value

true

API Name

livy_server_host_health_enabled

Required

false

Livy Server Process Health Test

Description

Enables the health test that the Livy Server's process state is consistent with the role configuration

Related Name

Default Value

true

API Name

livy_server_scm_health_enabled

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name

Default Value

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name

Default Value

API Name

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section

Description

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

extensions: basicauth/common: client_auth: username:
\$ROLE_PARAM(otelcol_remote_write_user) password:
'\$ROLE_PARAM(otelcol_remote_write_password)'

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name

Default Value

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required
true

Unexpected Exits Thresholds

Description
The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.
Related Name
Default Value
Warning: Never, Critical: Any
API Name
unexpected_exits_thresholds
Required
false

Unexpected Exits Monitoring Period

Description
The period to review when computing unexpected exits.
Related Name
Default Value
5 minute(s)
API Name
unexpected_exits_window
Required
false

Other

Enable Access Control

Description
Perform access control when processing user requests.
Related Name
livy.server.access-control.enabled
Default Value
true
API Name
livy_access_control_enabled
Required
false

Admin Users

Description
List of users with admin permissions (can view and modify any session).
Related Name
livy.superusers

Default Value	knox zeppelin
API Name	livy_admin_users
Required	false

Extra JVM Options

Description	Command line options to add to the Livy Server JVM. May be used also to override options automatically added by CM.
Related Name	livy_extra_java_opts
Default Value	
API Name	livy_extra_java_opts
Required	false

Enable User Impersonation

Description	Start applications as the requesting user, instead of using the Livy account.
Related Name	livy.impersonation.enabled
Default Value	true
API Name	livy_impersonation_enabled
Required	false

Max Header Size

Description	Maximum size of a header field accepted by the Livy server. May need to be increased in certain environments where SPNEGO is enabled.
Related Name	livy.server.request-header.size
Default Value	128 KiB
API Name	livy_max_header_size
Required	false

Java Heap Size of Livy Server

Description

Maximum size for the Java process heap memory.

Related Name

livy_max_heapsize

Default Value

512 MiB

API Name

livy_max_heapsize

Required

false

Enable RPC Encryption

Description

Enable encryption of communication between the Livy session and managed Spark sessions.

Related Name

livy_rpc_encryption_enabled

Default Value

true

API Name

livy_rpc_encryption_enabled

Required

false

Enable Livy Thrift Server

Description

Enables the Livy Thrift server

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups
Default Value
API Name
rm_custom_resources
Required
false

Cgroup I/O Weight

Description
Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.
Related Name
blkio.weight
Default Value
500
API Name
rm_io_weight
Required
true

Cgroup Memory Hard Limit

Description
Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'
Related Name
memory.limit_in_bytes
Default Value
-1 MiB
API Name
rm_memory_hard_limit
Required
true

Cgroup Memory Soft Limit

Description
Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'
Related Name

memory.soft_limit_in_bytes
Default Value
-1 MiB
API Name
rm_memory_soft_limit
Required
true

Security

Enable TLS/SSL for Livy Server

Description
Encrypt communication between clients and Livy Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).
Related Name
livy.tls.enabled
Default Value
false
API Name
ssl_enabled
Required
false

Livy Server TLS/SSL Server Keystore File Location

Description
The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Livy Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.
Related Name
livy.keystore
Default Value
API Name
ssl_server_keystore_location
Required
false

Livy Server TLS/SSL Server Keystore File Password

Description
The password for the Livy Server keystore file.
Related Name
livy.keystore.password
Default Value
API Name
ssl_server_keystore_password
Required

false

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	100 MiB
API Name	stacks_collection_data_retention
Required	false

Stacks Collection Directory

Description	The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name	stacks_collection_directory
Default Value	
API Name	stacks_collection_directory
Required	false

Stacks Collection Enabled

Description	Whether or not periodic stacks collection is enabled.
Related Name	stacks_collection_enabled
Default Value	false
API Name	stacks_collection_enabled
Required	true

Stacks Collection Frequency

Description	The frequency with which stacks are collected.
-------------	--

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: JMX Exporter Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.

Related Name**Default Value**

false

API Name`role_config_suppression_jmx_exporter_port`**Required**`true`**Suppress Parameter Validation: JMX Exporter configuration YAML****Description**

Service-Wide

Advanced

Livy Service Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	LIVY_service_env_safety_valve
Required	false

System Group

Description	The group that this service's processes should run as.
Related Name	
Default Value	livy
API Name	process_groupname
Required	true

System User

Description	The user that this service's processes should run as.
Related Name	
Default Value	livy
API Name	process_username
Required	true

Monitoring

Enable Service Level Health Alerts

Description	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	

	true
API Name	
	enable_alerts
Required	
	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	
	enable_config_alerts
Required	
	false

Livy Server Role Health Test

Description	When computing the overall LIVY health, consider Livy Server's health
Related Name	
Default Value	true
API Name	
	LIVY_LIVY_SERVER_health_enabled
Required	
	false

Service Triggers

Description	<p>The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:</p> <ul style="list-style-type: none">triggerName (mandatory) - The name of the trigger. This value must be unique for the specific service.triggerExpression (mandatory) - A tsquery expression representing the trigger.streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies. <p>For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "</p>
-------------	---

streamThreshold": 10, "enabled": "true"}}See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Required	true

Suppress Health Test: Livy Server Health

Description	Whether to suppress the results of the Livy Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	service_health_suppression_livy_livy_livy_server_health
Required	true

Oozie Properties in Cloudera Runtime 7.2.18

Role groups:

Oozie Server

Advanced

Oozie Server Logging Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, a string to be inserted into log4j.properties for this role only.
Related Name	
Default Value	
API Name	log4j_safety_valve
Required	false

Enable auto refresh for metric configurations

Description	When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.
Related Name	
Default Value	false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml**Description**

For advanced use only. A string to be inserted into action-conf/default.xml for this role only.

Related Name**Default Value****API Name**

oozie_action_config_default_safety_valve

Required

false

Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml**Description**

For advanced use only. A string to be inserted into oozie-site.xml for this role only.

Related Name**Default Value****API Name**

oozie_config_safety_valve

Required

false

Oozie ActionService Executor Extension Classes**Description**

Comma-separated list of ActionService executor extension classes. Only action types with associated executors can be used in workflows. For CDH 5.4 and higher, this parameter is used only to specify additional classes for workflows. All executor extension classes included in that release will be added automatically and do not need to be specified.

Related Name

oozie.service.ActionService.executor.ext.classes

Default Value**API Name**

oozie_executor_extension_classes

Required

false

Java Configuration Options for Oozie Server**Description**

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here. Note: When CM version is 6.3.0 or greater, {{JAVA_GC_ARGS}} will be replaced by JVM Garbage Collection arguments based on the runtime Java JVM version.

Related Name**Default Value**

-XX:+UseG1GC -XX:MaxGCPauseMillis=20 -XX:InitiatingHeapOccupancyPercent=35 -XX:G1HeapRegionSize=16M -XX:MinMetaspaceFreeRatio=50 -XX:MaxMetaspaceFreeRatio=80 -XX:+DisableExplicitGC

API Name	oozie_java_opts
Required	false

Directory For JSP Temp Files

Description	Directory to use to for temporary JSP file storage.
Related Name	oozie.jsp.tmp.dir
Default Value	/tmp
API Name	oozie_jsp_tmp_dir
Required	false

Default Launcher Max Attempts

Description	The default YARN maximal attempt count of the Launcher ApplicationMaster.
Related Name	oozie.launcher.default.max.attempts
Default Value	2
API Name	oozie_launcher_default_max_attempts
Required	false

Default Launcher Memory

Description	The default amount of memory in MiB that is allocated for the Launcher ApplicationMasters.
Related Name	oozie.launcher.default.memory.mb
Default Value	2 GiB
API Name	oozie_launcher_default_memory
Required	false

Default Launcher Queue

Description	The default YARN pool where the Launcher ApplicationMaster is placed.
Related Name	

oozie.launcher.default.queue
Default Value
default
API Name
oozie_launcher_default_queue
Required
false

Oozie Server Environment Advanced Configuration Snippet (Safety Valve)

Description
For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
Related Name
Default Value
API Name
OOZIE_SERVER_role_env_safety_valve
Required
false

Oozie HTTP Request Header Size

Description
Controls the size of the HTTP request header.
Related Name
oozie.http.request.header.size
Default Value
64 KiB
API Name
oozie_service_http_request_header_size
Required
false

Oozie HTTP Response Header Size

Description
Controls the size of the HTTP response header.
Related Name
oozie.http.response.header.size
Default Value
64 KiB
API Name
oozie_service_http_response_header_size
Required
false

Oozie SchemaService Workflow Extension Schemas

Description

Comma-separated list of SchemaService workflow extension schemas for additional action types. From CDH 5.4 and higher, this parameter is used only to specify additional schemas for workflows. All schemas included in that release will be added automatically and do not need to be specified.

Related Name

oozie.service.SchemaService.wf.ext.schemas

Default Value**API Name**

oozie_workflow_extension_schemas

Required

false

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value	3
API Name	process_start_retries
Required	false

Process Start Wait Timeout

Description	The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
Related Name	
Default Value	20
API Name	process_start_secs
Required	false

Database

Oozie Server Data Directory

Description	Directory where the Oozie Server places its data. Only applicable when using Derby as the database type.
Related Name	
Default Value	/var/lib/oozie/data
API Name	oozie_data_dir
Required	false

Oozie Database Connection Properties

Description	Properties to set on the database connection directly. See oozie_datasource_properties for setting properties on the Datasource object.
Related Name	
Default Value	
API Name	oozie_database_connection_properties
Required	false

Oozie Server Database Host**Description**

Hostname of the database used by Oozie Server. If the port is non-default for your database type, use host:port notation. Does not apply if you are using Derby as the database type.

Related Name**Default Value**

localhost

API Name

oozie_database_host

Required

false

Oozie Server Database Is Secure**Description**

Whether Oozie should connect to its database through a secure connection or not

Related Name**Default Value**

false

API Name

oozie_database_is_secure

Required

false

Oozie Server Database Name**Description**

Name of the database used by Oozie Server.

Related Name**Default Value**

oozie

API Name

oozie_database_name

Required

false

Oozie Server Database Password**Description**

Password for connecting to the database used by Oozie Server. Does not apply if you are using Derby as the database type.

Related Name

oozie.service.JPAService.jdbc.password

Default Value**API Name**

oozie_database_password

Required

false

Oozie Server Database Type

Description

Type of the database used by Oozie Server.

Related Name

Default Value

derby

API Name

oozie_database_type

Required

false

Oozie Server Database User

Description

Username for connecting to the database used by Oozie Server. Does not apply if you are using Derby as the database type.

Related Name

oozie.service.JPAService.jdbc.username

Default Value

sa

API Name

oozie_database_user

Required

false

Oozie Datasource Properties

Description

Properties to set on the Datasource object (e.g.: lock timeout). NOTE: This will not be set on the database connection, but on the Datasource object wrapping the connection. See also: oozie_database_connection_properties.

Related Name

Default Value

API Name

oozie_datasource_properties

Required

Logs

Oozie Server Logging Threshold

Description

The minimum log level for Oozie Server logs

Related Name

Default Value

INFO
API Name
log_threshold
Required
false

Oozie Server Maximum Log File Backups

Description
The maximum number of rolled log files to keep for Oozie Server logs. Typically used by log4j or logback.
Related Name
Default Value
720
API Name
max_log_backup_index
Required
false

Oozie Server Log Directory

Description
Directory where Oozie Server will place its log files.
Related Name
Default Value
/var/log/oozie
API Name
oozie_log_dir
Required
false

Monitoring

Enable Health Alerts for this Role

Description
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name

Default Value

false

API Name

enable_config_alerts

Required

false

Heap Dump Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory.

Related Name

Default Value

Warning: 10 GiB, Critical: 5 GiB

API Name

heap_dump_directory_free_space_absolute_thresholds

Required

false

Heap Dump Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Heap Dump Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

heap_dump_directory_free_space_percentage_thresholds

Required

false

Enable JMX Exporter (beta)

Description

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name

Default Value

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port**Description**

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name**Default Value****API Name**

jmx_exporter_port

Required

false

JMX Exporter configuration YAML**Description**

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name**Default Value****API Name**

jmx_exporter_yaml

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

Workflow Status Metrics Collection Interval**Description**

Workflow Status metrics collection interval.

Related Name

oozie.service.DBLiteWorkflowStoreService.status.metrics.collection.interval

Default Value

1 minute(s)

API Name

oozie_job_metric_collection_interval

Required

false

Oozie Server Callable Queue Monitoring Threshold

Description	The health test thresholds of the weighted average size of the Oozie Server callable queue over a recent period. See also Oozie Server Callable Queue Monitoring Period.
Related Name	
Default Value	Warning: 80.0 %, Critical: 95.0 %
API Name	oozie_server_callable_queue_threshold
Required	false

Oozie Server Callable Queue Monitoring Period

Description	The period over which to compute the moving average of the callable queue size.
Related Name	
Default Value	5 minute(s)
API Name	oozie_server_callable_queue_window
Required	false

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	oozie_server_fd_thresholds
Required	false

Oozie Server Host Health Test

Description	When computing the overall Oozie Server health, consider the host's health.
Related Name	
Default Value	true
API Name	oozie_server_host_health_enabled
Required	

false

Pause Duration Thresholds

Description

The health test thresholds for the weighted average extra time the pause monitor spent paused. Specified as a percentage of elapsed wall clock time.

Related Name

Default Value

Warning: 30.0, Critical: 60.0

API Name

oozie_server_pause_duration_thresholds

Required

false

Pause Duration Monitoring Period

Description

The period to review when computing the moving average of extra time the pause monitor spent paused.

Related Name

Default Value

5 minute(s)

API Name

oozie_server_pause_duration_window

Required

false

Oozie Server Process Health Test

Description

Enables the health test that the Oozie Server's process state is consistent with the role configuration

Related Name

Default Value

true

API Name

oozie_server_scm_health_enabled

Required

false

Enable Oozie Server Shared Libraries Version Check

Description

If true, enables version check for Oozie Server and installed shared libraries.

Related Name

Default Value

true

API Name

oozie_server_shared_lib_version_check_enabled

Required

false

Web Metric Collection

Description

Enables the health test that the Cloudera Manager Agent can successfully contact and gather metrics from the web server.

Related Name

Default Value

true

API Name

oozie_server_web_metric_collection_enabled

Required

false

Web Metric Collection Duration

Description

The health test thresholds on the duration of the metrics request to the web server.

Related Name

Default Value

Warning: 10 second(s), Critical: Never

API Name

oozie_server_web_metric_collection_thresholds

Required

false

OpenTelemetry Collector Exporters Section

Description

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name**Default Value**

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required
false

Enable OpenTelemetry Collector (beta)

Description
OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.
Related Name
Default Value
false
API Name
otelcol_should_collect
Required
true

Swap Memory Usage Rate Thresholds

Description
The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.
Related Name
Default Value
Warning: Never, Critical: Never
API Name
process_swap_memory_rate_thresholds
Required
false

Swap Memory Usage Rate Window

Description
The period to review when computing unexpected swap memory usage change of the process.
Related Name
common.process.swap_memory_rate_window
Default Value
5 minute(s)
API Name
process_swap_memory_rate_window
Required
false

Process Swap Memory Thresholds

Description
The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.
Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description	The period to review when computing unexpected exits.
Related Name	
Default Value	5 minute(s)
API Name	unexpected_exits_window

Required

false

Resource Management**Java Heap Size of Oozie Server in Bytes****Description**

Maximum size in bytes for the Java Process heap memory. Passed to Java -Xmx.

Related Name**Default Value**

1 GiB

API Name

oozie_java_heapsize

Required

false

Cgroup CPU Shares**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Excluded Cipher Suites

Description	List of cipher suite names that should be excluded.
Related Name	oozie.https.exclude.cipher.suites
Default Value	TLS_ECDHE_RSA_WITH_RC4_128_SHA SSL_DHE_RSA_EXPORT_WITH_DES40_CBC_SHA SSL_RSA_WITH_DES_CBC_SHA SSL_DHE_RSA_WITH_DES_CBC_SHA SSL_RSA_EXPORT_WITH_RC4_40_MD5 SSL_RSA_EXPORT_WITH_DES40_CBC_SHA SSL_RSA_WITH_RC4_128_MD5
API Name	oozie_https_exclude_cipher_suites
Required	false

Enabled TLS Protocols

Description	TLS protocols accepted by the Oozie Server.
Related Name	oozie.https.include.protocols
Default Value	SSLv2Hello, TLSv1, TLSv1.1, TLSv1.2
API Name	oozie_https_include_protocols
Required	false

Oozie TLS/SSL Server Keystore File Location

Description	The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Oozie is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.
Related Name	oozie.https.keystore.file
Default Value	/var/lib/oozie/.keystore
API Name	oozie_https_keystore_file
Required	false

Oozie TLS/SSL Server Keystore File Password

Description	The password for the Oozie keystore file.
-------------	---

Related Name	oozie.https.keystore.pass
Default Value	
API Name	oozie_https_keystore_password
Required	false

Oozie TLS/SSL Trust Store File

Description	The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Oozie might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.
Related Name	oozie.https.truststore.file
Default Value	
API Name	oozie_https_truststore_file
Required	false

Oozie TLS/SSL Trust Store Password

Description	The password for the Oozie TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name	oozie.https.truststore.pass
Default Value	
API Name	oozie_https_truststore_password
Required	false

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	100 MiB

API Name	stacks_collection_data_retention
Required	false

Stacks Collection Directory

Description	The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name	stacks_collection_directory
Default Value	
API Name	stacks_collection_directory
Required	false

Stacks Collection Enabled

Description	Whether or not periodic stacks collection is enabled.
Related Name	stacks_collection_enabled
Default Value	false
API Name	stacks_collection_enabled
Required	true

Stacks Collection Frequency

Description	The frequency with which stacks are collected.
Related Name	stacks_collection_frequency
Default Value	5.0 second(s)
API Name	stacks_collection_frequency
Required	false

Stacks Collection Method

Description	
--------------------	--

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: JMX Exporter Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Parameter Validation: JMX Exporter configuration YAML**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.

Related Name**Default Value**

	false
API Name	
	role_config_suppression_jmx_exporter_yaml
Required	
	true

Suppress Parameter Validation: Oozie Server Logging Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Logging Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_log4j_safety_valve
Required	
	true

Suppress Parameter Validation: Heap Dump Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_oom_heap_dump_dir
Required	
	true

Suppress Parameter Validation: Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_oozie_action_config_default_safety_valve
Required	
	true

Suppress Parameter Validation: Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_config_safety_valve
Required	true

Suppress Parameter Validation: Oozie Server Data Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Data Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_data_dir
Required	true

Suppress Parameter Validation: Oozie Database Connection Properties

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Database Connection Properties parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_database_connection_properties
Required	true

Suppress Parameter Validation: Oozie Server Database Host

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Database Host parameter.
Related Name	
Default Value	false
API Name	

role_config_suppression_oozie_database_host
Required
true

Suppress Parameter Validation: Oozie Server Database Name

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Database Name parameter.
Related Name
Default Value
false
API Name
role_config_suppression_oozie_database_name
Required
true

Suppress Parameter Validation: Oozie Server Database Password

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Database Password parameter.
Related Name
Default Value
false
API Name
role_config_suppression_oozie_database_password
Required
true

Suppress Parameter Validation: Oozie Server Database User

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Database User parameter.
Related Name
Default Value
false
API Name
role_config_suppression_oozie_database_user
Required
true

Suppress Parameter Validation: Oozie Datasource Properties

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Datasource Properties parameter.
Related Name

Default Value

false

API Name

role_config_suppression_oozie_datasource_properties

Required

true

Suppress Parameter Validation: Oozie Email Action From Address**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action From Address parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_from_address

Required

true

Suppress Parameter Validation: Oozie Email Action SMTP Host**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action SMTP Host parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_smtp_host

Required

true

Suppress Parameter Validation: Oozie Email Action SMTP Authentication Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action SMTP Authentication Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_smtp_password

Required

true

Suppress Parameter Validation: Oozie Email Action SMTP Port**Description**

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action SMTP Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_email_smtp_prt
Required	true

Suppress Parameter Validation: Oozie Email Action SMTP Authentication Username

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action SMTP Authentication Username parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_email_smtp_username
Required	true

Suppress Parameter Validation: Oozie ActionService Executor Extension Classes

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie ActionService Executor Extension Classes parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_executor_extension_classes
Required	true

Suppress Parameter Validation: Oozie HTTP Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie HTTP Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_http_port
Required	

true

Suppress Parameter Validation: Excluded Cipher Suites

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Excluded Cipher Suites parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_https_exclude_cipher_suites
Required	true

Suppress Parameter Validation: Oozie TLS/SSL Server Keystore File Location

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie TLS/SSL Server Keystore File Location parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_https_keystore_file
Required	true

Suppress Parameter Validation: Oozie TLS/SSL Server Keystore File Password

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie TLS/SSL Server Keystore File Password parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_https_keystore_password
Required	true

Suppress Parameter Validation: Oozie HTTPS Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie HTTPS Port parameter.
Related Name	
Default Value	false

API Name

role_config_suppression_oozie_https_port

Required

true

Suppress Parameter Validation: Oozie TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_https_truststore_file

Required

true

Suppress Parameter Validation: Oozie TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_https_truststore_password

Required

true

Suppress Parameter Validation: Java Configuration Options for Oozie Server**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Configuration Options for Oozie Server parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_java_opts

Required

true

Suppress Parameter Validation: Directory For JSP Temp Files**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Directory For JSP Temp Files parameter.

Related Name
Default Value
false
API Name
role_config_suppression_oozie_jsp_tmp_dir
Required
true

Suppress Parameter Validation: Default Launcher Queue

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Launcher Queue parameter.
Related Name
Default Value
false
API Name
role_config_suppression_oozie_launcher_default_queue
Required
true

Suppress Parameter Validation: Oozie Server Log Directory

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Log Directory parameter.
Related Name
Default Value
false
API Name
role_config_suppression_oozie_log_dir
Required
true

Suppress Parameter Validation: Oozie Server Plugins

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Plugins parameter.
Related Name
Default Value
false
API Name
role_config_suppression_oozie_plugins_list
Required
true

Suppress Parameter Validation: Oozie Server Environment Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Environment Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_server_role_env_safety_valve
Required	true

Suppress Parameter Validation: Oozie SchemaService Workflow Extension Schemas

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie SchemaService Workflow Extension Schemas parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_workflow_extension_schemas
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_exporters
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.
Related Name	
Default Value	false
API Name	

role_config_suppression_otelcol_extensions
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_processors
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_receivers
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_remote_write_password
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.
Related Name

Default Value	false
API Name	role_config_suppression_otelcol_remote_write_url
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_user
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_service
Required	true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_rm_custom_resources
Required	true

Suppress Parameter Validation: Role Triggers

Description	
--------------------	--

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_role_triggers
Required	true

Suppress Parameter Validation: Stacks Collection Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_stacks_collection_directory
Required	true

Suppress Health Test: Audit Pipeline Test

Description	Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_oozie_server_audit_health
Required	true

Suppress Health Test: Callable Queue Size

Description	Whether to suppress the results of the Callable Queue Size health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_oozie_server_callablequeue_size_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_oozie_server_file_descriptor

Required

true

Suppress Health Test: Heap Dump Directory Free Space**Description**

Whether to suppress the results of the Heap Dump Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_oozie_server_heap_dump_directory_free_space

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_oozie_server_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_oozie_server_log_directory_free_space

Required

true

Suppress Health Test: Otelcol Health

Description

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_oozie_server_otelcol_health

Required

true

Suppress Health Test: Pause Duration

Description

Whether to suppress the results of the Pause Duration health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_oozie_server_pause_duration

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_oozie_server_scm_health

true

Suppress Health Test: Oozie Server Shared Library Check**Description**

Whether to suppress the results of the Oozie Server Shared Library Check health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_oozie_server_shared_lib_version_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_oozie_server_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_oozie_server_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_oozie_server_unexpected_exits

Required

true

Suppress Health Test: Web Server Status

Description

Whether to suppress the results of the Web Server Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_oozie_server_web_metric_collection

Required

true

Service-Wide

Advanced

Oozie Service Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name

Default Value

API Name

oozie_env_safety_valve

Required

false

System Group

Description

The group that this service's processes should run as.

Related Name

Default Value	oozie
API Name	process_groupname
Required	true

System User

Description	The user that this service's processes should run as.
Related Name	
Default Value	oozie
API Name	process_username
Required	true

Database

Database Dump File

Description	File where the database gets dumped to or loaded from.
Related Name	
Default Value	/tmp/oozie_database_dump.zip
API Name	database_dump_file
Required	false

Monitoring

Enable Service Level Health Alerts

Description	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Healthy Oozie Server Monitoring Thresholds

Description

The health test thresholds of the overall Oozie Server health. The check returns "Concerning" health if the percentage of "Healthy" Oozie Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Oozie Servers falls below the critical threshold.

Related Name**Default Value**

Warning: 99.0 %, Critical: 51.0 %

API Name

oozie_servers_healthy_thresholds

Required

false

Service Triggers

Description

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific service.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.
- streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name

Default Value	<code>[]</code>
API Name	<code>service_triggers</code>
Required	<code>true</code>

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.
Related Name	
Default Value	
API Name	<code>smon_derived_configs_safety_valve</code>
Required	<code>false</code>

Other

Hive Service

Description	Name of the Hive service that this Oozie service instance depends on. This is used to configure Oozie HCat integration.
Related Name	
Default Value	
API Name	<code>hive_service</code>
Required	<code>false</code>

MapReduce Service

Description	Service to run MapReduce jobs against
Related Name	
Default Value	
API Name	<code>mapreduce_yarn_service</code>
Required	<code>true</code>

Oozie Event Listeners

Description	List of event listeners used by the Oozie service. Listeners needed for JMS or SLA integration are automatically emitted if they are enabled.
--------------------	---

Related Name	oozie.service.EventHandlerService.event.listeners
Default Value	
API Name	oozie_event_listeners
Required	false

JMS Broker

Description	URL of the JMS Broker used by the Oozie service in JMS integration is enabled.
Related Name	oozie.jms.producer.connection.properties
Default Value	tcp://localhost:61616
API Name	oozie_jms_broker
Required	false

Oozie Load Balancer Hostname

Description	Hostname of the load balancer used if Oozie HA is enabled.
Related Name	
Default Value	
API Name	oozie_load_balancer
Required	false

Coordinator Job Lookup Interval

Description	Coordinator Job Lookup trigger command is scheduled at this interval (in seconds).
Related Name	oozie.service.CoordMaterializeTriggerService.lookup.interval
Default Value	5 minute(s)
API Name	oozie_service_coord_lookup_interval
Required	false

Coordinator Action Input Check Default Timeout

Description	
--------------------	--

Default timeout for a Coordinator Action input check (in minutes) for a Coordinator Job.

Related Name	oozie.service.coord.normal.default.timeout
Default Value	2 hour(s)
API Name	oozie_service_coord_normal_default_timeout
Required	false

ShareLib Root Directory

Description	Root of the directory in HDFS where the Oozie ShareLibs are stored. The libraries are stored in the share/lib subdirectory under the specified root directory.
Related Name	oozie.service.WorkflowAppService.system.libpath
Default Value	/user/oozie
API Name	oozie_sharelib_rootdir
Required	true

Oozie Upload ShareLib Command Timeout

Description	The timeout in seconds used for the Oozie Upload ShareLib command. When the value is zero, there is no timeout for the command.
Related Name	
Default Value	270
API Name	oozie_upload_sharelib_cmd_timeout
Required	false

Oozie Upload ShareLib Command Concurrency Level

Description	The number of threads that Oozie will use for the Upload ShareLib command.
Related Name	
Default Value	8
API Name	oozie_upload_sharelib_concurrency
Required	

false

Enable JMS Integration

Description

Whether to configure Oozie properties needed for JMS integration

Related Name

Default Value

false

API Name

oozie_use_jms

Required

false

Enable SLA Integration

Description

Whether to configure Oozie properties needed for SLA integration

Related Name

Default Value

false

API Name

oozie_use_sla

Required

false

Use ACLs on Znode

Description

Use ACLs on Znode while a secure ZooKeeper is used for Oozie High Availability. Note: This config is not emitted if ZooKeeper is not secure.

Related Name

oozie.zookeeper.secure

Default Value

true

API Name

oozie_zk_secure

Required

false

ZooKeeper Namespace

Description

Namespace used by this Oozie service in ZooKeeper when High Availability is enabled.

Related Name

oozie.zookeeper.namespace

Default Value

oozie

API Name	oozie_zookeeper_namespace
Required	false

Spark on Yarn Service

Description	Name of the Spark on Yarn service that this Oozie service instance depends on
Related Name	
Default Value	
API Name	spark_on_yarn_service
Required	false

ZooKeeper Service

Description	Name of the ZooKeeper service that this Oozie service instance depends on
Related Name	
Default Value	
API Name	zookeeper_service
Required	false

Ports and Addresses

Oozie Load Balancer HTTP Port

Description	HTTP port of the load balancer used if Oozie HA is enabled and SSL is disabled.
Related Name	
Default Value	
API Name	oozie_load_balancer_http_port
Required	false

Oozie Load Balancer HTTPS Port

Description	HTTPS port of the load balancer used if Oozie HA is enabled and SSL is enabled.
Related Name	
Default Value	
API Name	

oozie_load_balancer_https_port

Required

false

Security

Kerberos Principal

Description

Kerberos principal short name used by all roles of this service.

Related Name

Default Value

oozie

API Name

kerberos_princ_name

Required

true

Oozie Credential Classes

Description

A list of credential class mappings for CredentialsProvider.

Related Name

oozie.credentials.credentialclasses

Default Value

hcat=org.apache.oozie.action.hadoop.HCatCredentials
hbase=org.apache.oozie.action.hadoop.HbaseCredentials
hive2=org.apache.oozie.action.hadoop.Hive2Credentials

API Name

oozie_credential_classes

Required

false

Enable TLS/SSL for Oozie

Description

Encrypt communication between clients and Oozie using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

oozie.https.enabled

Default Value

false

API Name

oozie_use_ssl

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Configuration Validator: JMX Exporter Port

Description	Whether to suppress configuration warnings produced by the JMX Exporter Port configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_jmx_exporter_port
Required	true

Suppress Configuration Validator: JMX Exporter configuration YAML

Description	Whether to suppress configuration warnings produced by the JMX Exporter configuration YAML configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_jmx_exporter_yaml
Required	true

Suppress Configuration Validator: Oozie Server Logging Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the Oozie Server Logging Advanced Configuration Snippet (Safety Valve) configuration validator.
Related Name	
Default Value	

	false
API Name	role_config_suppression_log4j_safety_valve
Required	true

Suppress Configuration Validator: Heap Dump Directory

Description	Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_oom_heap_dump_dir
Required	true

Suppress Configuration Validator: Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml

Description	Whether to suppress configuration warnings produced by the Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_action_config_default_safety_valve
Required	true

Suppress Configuration Validator: Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml

Description	Whether to suppress configuration warnings produced by the Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_config_safety_valve
Required	true

Suppress Configuration Validator: Oozie Server Data Directory

Description	Whether to suppress configuration warnings produced by the Oozie Server Data Directory configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_data_dir
Required	true

Suppress Configuration Validator: Oozie Database Connection Properties

Description	Whether to suppress configuration warnings produced by the Oozie Database Connection Properties configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_database_connection_properties
Required	true

Suppress Configuration Validator: Oozie Server Database Host

Description	Whether to suppress configuration warnings produced by the Oozie Server Database Host configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_database_host
Required	true

Suppress Configuration Validator: Oozie Server Database Name

Description	Whether to suppress configuration warnings produced by the Oozie Server Database Name configuration validator.
Related Name	
Default Value	false
API Name	

role_config_suppression_oozie_database_name
Required
true

Suppress Configuration Validator: Oozie Server Database Password

Description
Whether to suppress configuration warnings produced by the Oozie Server Database Password configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_oozie_database_password
Required
true

Suppress Configuration Validator: Oozie Server Database User

Description
Whether to suppress configuration warnings produced by the Oozie Server Database User configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_oozie_database_user
Required
true

Suppress Configuration Validator: Oozie Datasource Properties

Description
Whether to suppress configuration warnings produced by the Oozie Datasource Properties configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_oozie_datasource_properties
Required
true

Suppress Configuration Validator: Oozie Email Action From Address

Description
Whether to suppress configuration warnings produced by the Oozie Email Action From Address configuration validator.
Related Name

Default Value

false

API Name

role_config_suppression_oozie_email_from_address

Required

true

Suppress Configuration Validator: Oozie Email Action SMTP Host**Description**

Whether to suppress configuration warnings produced by the Oozie Email Action SMTP Host configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_smtp_host

Required

true

Suppress Configuration Validator: Oozie Email Action SMTP Authentication Password**Description**

Whether to suppress configuration warnings produced by the Oozie Email Action SMTP Authentication Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_smtp_password

Required

true

Suppress Configuration Validator: Oozie Email Action SMTP Port**Description**

Whether to suppress configuration warnings produced by the Oozie Email Action SMTP Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_email_smtp_prt

Required

true

Suppress Configuration Validator: Oozie Email Action SMTP Authentication Username**Description**

	Whether to suppress configuration warnings produced by the Oozie Email Action SMTP Authentication Username configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_email_smtp_username
Required	true

Suppress Configuration Validator: Oozie ActionService Executor Extension Classes

Description	Whether to suppress configuration warnings produced by the Oozie ActionService Executor Extension Classes configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_executor_extension_classes
Required	true

Suppress Configuration Validator: Oozie HTTP Port

Description	Whether to suppress configuration warnings produced by the Oozie HTTP Port configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_http_port
Required	true

Suppress Configuration Validator: Excluded Cipher Suites

Description	Whether to suppress configuration warnings produced by the Excluded Cipher Suites configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_oozie_https_exclude_cipher_suites
Required	

true

Suppress Configuration Validator: Oozie TLS/SSL Server Keystore File Location

Description

Whether to suppress configuration warnings produced by the Oozie TLS/SSL Server Keystore File Location configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_oozie_https_keystore_file

Required

true

Suppress Configuration Validator: Oozie TLS/SSL Server Keystore File Password

Description

Whether to suppress configuration warnings produced by the Oozie TLS/SSL Server Keystore File Password configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_oozie_https_keystore_password

Required

true

Suppress Configuration Validator: Oozie HTTPS Port

Description

Whether to suppress configuration warnings produced by the Oozie HTTPS Port configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_oozie_https_port

Required

true

Suppress Configuration Validator: Oozie TLS/SSL Trust Store File

Description

Whether to suppress configuration warnings produced by the Oozie TLS/SSL Trust Store File configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_oozie_https_truststore_file

Required

true

Suppress Configuration Validator: Oozie TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the Oozie TLS/SSL Trust Store Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_https_truststore_password

Required

true

Suppress Configuration Validator: Java Configuration Options for Oozie Server**Description**

Whether to suppress configuration warnings produced by the Java Configuration Options for Oozie Server configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_java_opts

Required

true

Suppress Configuration Validator: Directory For JSP Temp Files**Description**

Whether to suppress configuration warnings produced by the Directory For JSP Temp Files configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_jsp_tmp_dir

Required

true

Suppress Configuration Validator: Default Launcher Queue**Description**

Whether to suppress configuration warnings produced by the Default Launcher Queue configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_launcher_default_queue

Required

true

Suppress Configuration Validator: Oozie Server Log Directory**Description**

Whether to suppress configuration warnings produced by the Oozie Server Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_log_dir

Required

true

Suppress Configuration Validator: Oozie Server Plugins**Description**

Whether to suppress configuration warnings produced by the Oozie Server Plugins configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_plugins_list

Required

true

Suppress Configuration Validator: Oozie Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Oozie Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_server_role_env_safety_valve

Required

true

Suppress Configuration Validator: Oozie SchemaService Workflow Extension Schemas**Description**

Whether to suppress configuration warnings produced by the Oozie SchemaService Workflow Extension Schemas configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oozie_workflow_extension_schemas

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_receivers
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_remote_write_password
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_remote_write_url
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.
Related Name

Default Value	false
API Name	role_config_suppression_otelcol_remote_write_user
Required	true

Suppress Configuration Validator: OpenTelemetry Collector Service Section

Description	Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_service
Required	true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)

Description	Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_rm_custom_resources
Required	true

Suppress Configuration Validator: Role Triggers

Description	Whether to suppress configuration warnings produced by the Role Triggers configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_role_triggers
Required	true

Suppress Configuration Validator: Stacks Collection Directory

Description	
--------------------	--

	Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_stacks_collection_directory
Required	true

Suppress Parameter Validation: Database Dump File

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Database Dump File parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_database_dump_file
Required	true

Suppress Parameter Validation: Kerberos Principal

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_kerberos_princ_name
Required	true

Suppress Parameter Validation: Oozie Credential Classes

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Credential Classes parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_oozie_credential_classes
Required	

true

Suppress Parameter Validation: Oozie Service Environment Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name

Default Value

false

API Name

service_config_suppression_oozie_env_safety_valve

Required

true

Suppress Parameter Validation: Oozie Event Listeners

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Event Listeners parameter.

Related Name

Default Value

false

API Name

service_config_suppression_oozie_event_listeners

Required

true

Suppress Parameter Validation: JMS Broker

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMS Broker parameter.

Related Name

Default Value

false

API Name

service_config_suppression_oozie_jms_broker

Required

true

Suppress Parameter Validation: Oozie Load Balancer Hostname

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Load Balancer Hostname parameter.

Related Name

Default Value

	false
API Name	service_config_suppression_oozie_load_balancer
Required	true

Suppress Parameter Validation: Oozie Load Balancer HTTP Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Load Balancer HTTP Port parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_oozie_load_balancer_http_port
Required	true

Suppress Parameter Validation: Oozie Load Balancer HTTPS Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Load Balancer HTTPS Port parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_oozie_load_balancer_https_port
Required	true

Suppress Configuration Validator: Oozie Server Count Validator

Description	Whether to suppress configuration warnings produced by the Oozie Server Count Validator configuration validator.
Related Name	
Default Value	false
API Name	service_config_suppression_oozie_server_count_validator
Required	true

Suppress Parameter Validation: ShareLib Root Directory

Description	
-------------	--

	Whether to suppress configuration warnings produced by the built-in parameter validation for the ShareLib Root Directory parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_oozie_sharelib_rootdir
Required	true

Suppress Parameter Validation: ZooKeeper Namespace

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the ZooKeeper Namespace parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_oozie_zookeeper_namespace
Required	true

Suppress Parameter Validation: System Group

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_process_groupname
Required	true

Suppress Parameter Validation: System User

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_process_username
Required	

true

Suppress Parameter Validation: Service Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name

Default Value

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name

Default Value

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Health Test: Oozie Server Health

Description

Whether to suppress the results of the Oozie Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

service_health_suppression_oozie_oozie_servers_healthy

Required

true

Ozone Properties in Cloudera Runtime 7.2.18

Role groups:

Gateway

Advanced

Deploy Directory

Description	The directory where the client configs will be deployed
Related Name	
Default Value	/etc/ozone
API Name	client_config_root_dir
Required	true

Gateway Logging Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, a string to be inserted into log4j.properties for this role only.
Related Name	
Default Value	
API Name	log4j_safety_valve
Required	false

Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/hadoop-metrics2.properties

Description	For advanced use only, a string to be inserted into the client configuration for ozone-conf/hadoop-metrics2.properties.
Related Name	
Default Value	
API Name	ozone-conf/hadoop-metrics2.properties_client_config_safety_valve
Required	false

Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml

Description	For advanced use only, a string to be inserted into the client configuration for ozone-conf/ozone-site.xml.
Related Name	
Default Value	
API Name	

ozone-conf/ozone-site.xml_client_config_safety_valve

Required

false

Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml

Description

For advanced use only, a string to be inserted into the client configuration for ozone-conf/ssl-client.xml.

Related Name

Default Value

API Name

ozone-conf/ssl-client.xml_client_config_safety_valve

Required

false

Logs

Gateway Logging Threshold

Description

The minimum log level for Gateway logs

Related Name

Default Value

INFO

API Name

log_threshold

Required

false

Monitoring

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name

Default Value

false

API Name

enable_config_alerts

Required

false

Other

Alternatives Priority

Description

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

Related Name

Default Value

50

API Name

client_config_priority

Required

true

Security

Gateway TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.client.truststore.location

Default Value

API Name

ssl_client_truststore_location

Required

false

Gateway TLS/SSL Trust Store Password

Description

The password for the Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.client.truststore.password

Default Value

API Name

ssl_client_truststore_password

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Deploy Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Parameter Validation: Gateway Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/hadoop-metrics2.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/hadoop-metrics2.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/hadoop-metrics2.properties_client_config_safety_valve

Required

true

Suppress Parameter Validation: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ozone-site.xml_client_config_safety_valve

Required

true

Suppress Parameter Validation: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ssl-client.xml_client_config_safety_valve

Required

true

Suppress Parameter Validation: Gateway TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Gateway TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store Password parameter.

Related Name

Default Value	false
API Name	role_config_suppression_ssl_client_truststore_password
Required	true

HttpFS Gateway

Advanced

HttpFS Gateway Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
Related Name	
Default Value	
API Name	HTTSPFS_GATEWAY_role_env_safety_valve
Required	false

HttpFS Gateway Logging Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, a string to be inserted into log4j.properties for this role only.
Related Name	
Default Value	
API Name	log4j_safety_valve
Required	false

Enable auto refresh for metric configurations

Description	When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.
Related Name	
Default Value	false
API Name	metric_config_auto_refresh
Required	false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name**Default Value**

true

API Name

oom_sigkill_enabled

Required

true

HttpFS Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/httpfs-site.xml

Description

For advanced use only. A string to be inserted into ozone-conf/httpfs-site.xml for this role only.

Related Name**Default Value**

API Name

ozone-conf/httpfs-site.xml_role_safety_valve

Required

false

HttpFS Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ozone-site.xml_role_safety_valve

Required

false

HttpFS Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-client.xml_role_safety_valve

Required

false

HttpFS Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-server.xml_role_safety_valve

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart
Required
true

Role Specific System Group

Description
The group that this role's processes should run as.
Related Name
Default Value
hdfs
API Name
process_groupname
Required
true

Enable Metric Collection

Description
Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.
Related Name
Default Value
true
API Name
process_should_monitor
Required
true

Process Start Retry Attempts

Description
Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.
Related Name
Default Value
3
API Name
process_start_retries
Required
false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

Required

false

Role Specific System User

Description

The user that this role's processes should run as.

Related Name

Default Value

hdfs

API Name

process_username

Required

true

Logs

HttpFS Gateway Log Directory

Description

The log directory for log files of the role HttpFS Gateway.

Related Name

log.dir

Default Value

/var/log/hadoop-ozone

API Name

log_dir

Required

false

HttpFS Gateway Logging Threshold

Description

The minimum log level for HttpFS Gateway logs

Related Name

Default Value

INFO

API Name

log_threshold

Required

false

HttpFS Gateway Maximum Log File Backups**Description**

The maximum number of rolled log files to keep for HttpFS Gateway logs. Typically used by log4j or logback.

Related Name**Default Value**

10

API Name

max_log_backup_index

Required

false

HttpFS Gateway Max Log Size**Description**

The maximum size, in megabytes, per log file for HttpFS Gateway logs. Typically used by log4j or logback.

Related Name**Default Value**

200 MiB

API Name

max_log_size

Required

false

Monitoring**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name**Default Value**

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name

Default Value
false
API Name
enable_config_alerts
Required
false

File Descriptor Monitoring Thresholds

Description
The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name
Default Value
Warning: 50.0 %, Critical: 70.0 %
API Name
httpfs_gateway_fd_thresholds
Required
false

HttpFS Gateway Host Health Test

Description
When computing the overall HttpFS Gateway health, consider the host's health.
Related Name
Default Value
true
API Name
httpfs_gateway_host_health_enabled
Required
false

HttpFS Gateway Process Health Test

Description
Enables the health test that the HttpFS Gateway's process state is consistent with the role configuration
Related Name
Default Value
true
API Name
httpfs_gateway_scm_health_enabled
Required
false

Enable JMX Exporter (beta)

Description

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name

Default Value

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port

Description

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name

Default Value

API Name

jmx_exporter_port

Required

false

JMX Exporter configuration YAML

Description

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name

Default Value

API Name

jmx_exporter_yaml

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name

Default Value

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name

Default Value

API Name

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section

Description

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

extensions: basicauth/common: client_auth: username:
\$ROLE_PARAM(otelcol_remote_write_user) password:

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name

Default Value

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required
true

Unexpected Exits Thresholds

Description
The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.
Related Name
Default Value
Warning: Never, Critical: Any
API Name
unexpected_exits_thresholds
Required
false

Unexpected Exits Monitoring Period

Description
The period to review when computing unexpected exits.
Related Name

Related Name

httpfs.proxyuser.hue.hosts

Default Value

*

API Name

httpfs.proxyuser.hue.hosts

Required

true

Ozone HttpFS Gateway HTTP Bind Hostname

Description

The actual address the HttpFS Gateway web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.httpfs.http-address'.

Related Name

ozone.httpfs.http-bind-host

Default Value

0.0.0.0

API Name

ozone.httpfs.http-bind-host

Required

false

Java Heap Size of HttpFS Gateway**Description**

Maximum size for the Java process heap memory.

Related Name

ozone_httpfs_gateway_max_heap_size

Default Value

1 GiB

API Name

ozone_httpfs_gateway_max_heap_size

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Ports and Addresses**Ozone HttpFS Gateway HTTP Web UI Port****Description**

The base port that the HttpFS Gateway web user interface listens on. The host name of the HttpFS Gateway is combined with this port to form the 'ozone.httpfs.http-address'.

Related Name

ozone.httpfs.http-port

Default Value

9778

API Name

ozone.httpfs.http-port

Required

true

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Role-Specific Kerberos Principal

Description

Kerberos principal used by the HttpFS Gateway roles.

Related Name**Default Value**

httpfs

API Name

kerberos_role_princ_name

Required

true

HttpFS Gateway TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that HttpFS Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.client.truststore.location

Default Value**API Name**

ssl_client_truststore_location

Required

false

HttpFS Gateway TLS/SSL Trust Store Password

Description

The password for the HttpFS Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.client.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for HttpFS Gateway

Description

Encrypt communication between clients and HttpFS Gateway using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ozone.ssl.enabled

Default Value

false

API Name

ssl_enabled

Required

false

HttpFS Gateway TLS/SSL Server Keystore Key Password

Description

The password that protects the private key contained in the keystore used when HttpFS Gateway is acting as a TLS/SSL server.

Related Name

ssl.server.keystore.keypassword

Default Value
API Name
ssl_server_keystore_keypassword
Required
false

HttpFS Gateway TLS/SSL Server Keystore File Location

Description
The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when HttpFS Gateway is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.
Related Name
ssl.server.keystore.location
Default Value
API Name
ssl_server_keystore_location
Required
false

HttpFS Gateway TLS/SSL Server Keystore File Password

Description
The password for the HttpFS Gateway keystore file.
Related Name
ssl.server.keystore.password
Default Value
API Name
ssl_server_keystore_password
Required
false

Stacks Collection

Stacks Collection Data Retention

Description
The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name
stacks_collection_data_retention
Default Value
100 MiB
API Name
stacks_collection_data_retention
Required
false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value	jstack
API Name	stacks_collection_method
Required	false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false

Ozone DataNode

Advanced

Ozone DataNode Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name
Default Value
true
API Name
oom_heap_dump_enabled
Required
true

Kill When Out of Memory

Description
When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.
Related Name
Default Value
true
API Name
oom_sigkill_enabled
Required
true

Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties

Description
For advanced use only. A string to be inserted into ozone-conf/dn-audit-log4j2.properties for this role only.
Related Name
Default Value
API Name
ozone-conf/dn-audit-log4j2.properties_role_safety_valve
Required
false

Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-container-log4j2.properties

Description
For advanced use only. A string to be inserted into ozone-conf/dn-container-log4j2.properties for this role only.
Related Name
Default Value
API Name
ozone-conf/dn-container-log4j2.properties_role_safety_valve
Required
false

Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ozone-site.xml_role_safety_valve

Required

false

Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-client.xml_role_safety_valve

Required

false

Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-server.xml_role_safety_valve

Required

false

Ozone DataNode Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

OZONE_DATANODE_role_env_safety_valve

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name

Default Value

false

API Name

process_auto_restart

Required

true

Role Specific System Group

Description

The group that this role's processes should run as.

Related Name

Default Value

hdfs

API Name

process_groupname

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name

Default Value

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required
false

Process Start Wait Timeout

Description
The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
Related Name
Default Value
20
API Name
process_start_secs
Required
false

Role Specific System User

Description
The user that this role's processes should run as.
Related Name
Default Value
hdfs
API Name
process_username
Required
true

Logs

Ozone DataNode Log Directory

Description
The log directory for log files of the role Ozone DataNode.
Related Name
log.dir
Default Value
/var/log/hadoop-ozone
API Name
log_dir
Required
false

Ozone DataNode Logging Threshold

Description
The minimum log level for Ozone DataNode logs
Related Name

Default Value	INFO
API Name	log_threshold
Required	false

Ozone DataNode Maximum Log File Backups

Description	The maximum number of rolled log files to keep for Ozone DataNode logs. Typically used by log4j or logback.
Related Name	
Default Value	10
API Name	max_log_backup_index
Required	false

Ozone DataNode Max Log Size

Description	The maximum size, in megabytes, per log file for Ozone DataNode logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB
API Name	max_log_size
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Enable JMX Exporter (beta)

Description

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name**Default Value**

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port

Description

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name**Default Value****API Name**

jmx_exporter_port

Required

false

JMX Exporter configuration YAML

Description

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name**Default Value****API Name**

jmx_exporter_yaml

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/$ROLE_NAME: endpoint:
$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name

Default Value

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

API Name

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name

Default Value

false

API Name

otelcol_should_collect

Required

true

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name

Default Value

Warning: 50.0 %, Critical: 70.0 %

API Name

ozone_datanode_fd_thresholds

Required

false

Ozone DataNode Host Health Test

Description

When computing the overall Ozone DataNode health, consider the host's health.

Related Name

Default Value

true

API Name

ozone_datanode_host_health_enabled

Required

false

Ozone DataNode Process Health Test

Description

Enables the health test that the Ozone DataNode's process state is consistent with the role configuration

Related Name

Default Value

true

API Name

ozone_datanode_scm_health_enabled

Required

false

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required
true

Unexpected Exits Thresholds

Description
The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.
Related Name
Default Value
Warning: Never, Critical: Any
API Name
unexpected_exits_thresholds
Required
false

Unexpected Exits Monitoring Period

Description
The period to review when computing unexpected exits.
Related Name
Default Value
5 minute(s)
API Name
unexpected_exits_window
Required
false

Other

Datanode Ratis Metadata Directory

Description
One or more directories used for storing Datanode Ratis metadata. Ideally, this should be mapped to a fast disk like an SSD.
Related Name
dfs.container.ratis.datanode.storage.dir
Default Value
/var/lib/hadoop-ozone/datanode/ratis/data
API Name
dfs.container.ratis.datanode.storage.dir
Required
true

Number of Disks where Blocks are Stored that are Allowed to Fail

Description
The number of disks where blocks are stored that are allowed to fail before a datanode stops offering service. Set this property to -1 to specify that an unlimited number of disks can fail. If set to -1, there must be at least one good disk remaining on which to store blocks.

Related Name	failed.data.volumes.tolerated
Default Value	-1
API Name	failed.data.volumes.tolerated
Required	false

Number of Disks that Store Block Metadata that are Allowed to Fail

Description	The number of disks that store block metadata that are allowed to fail before a datanode stops offering service. Set this property to -1 to specify that an unlimited number of disks can fail. If set to -1, there must be at least one good disk remaining on which to store block metadata.
Related Name	failed.metadata.volumes.tolerated
Default Value	-1
API Name	failed.metadata.volumes.tolerated
Required	false

Graceful Shutdown Timeout

Description	The timeout in milliseconds to wait for graceful shutdown to complete.
Related Name	
Default Value	2 minute(s)
API Name	graceful_stop_timeout
Required	false

Datanode Data Directory

Description	Determines where on the local filesystem HDDS data will be stored.
Related Name	hdds.datanode.dir
Default Value	/var/lib/hadoop-ozone/datanode/data
API Name	hdds.datanode.dir
Required	

true

Datanode Out-Of-Service Replication Limit Factor

Description

Decommissioning and maintenance nodes can handle more replication commands than in-service nodes due to reduced load. This multiplier determines the increased queue capacity and executor pool size. The current default is 2.0

Related Name

hdds.datanode.replication.outofservice.limit.factor

Default Value

API Name

hdds.datanode.replication.outofservice.limit.factor

Required

false

Datanode Replication Streams Limit

Description

The maximum number of replication commands a single datanode can execute simultaneously. The current default is 10.

Related Name

hdds.datanode.replication.streams.limit

Default Value

API Name

hdds.datanode.replication.streams.limit

Required

false

Ozone Datanode HTTP Bind Hostname

Description

The actual address the Ozone Datanode web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.datanode.http-address'.

Related Name

ozone.datanode.http-bind-host

Default Value

0.0.0.0

API Name

ozone.datanode.http-bind-host

Required

false

Secure Ozone Datanode HTTPS Bind Hostname

Description

The actual address the Ozone Datanode web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.datanode.https-address'.

Related Name

ozone.datanode.https-bind-host
Default Value
0.0.0.0
API Name
ozone.datanode.https-bind-host
Required
false

HSTS Header for DataNode UI

Description
HSTS Header (Strict-Transport-Security) value to use
Related Name
ozone.http.header.Strict-Transport-Security
Default Value
max-age=63072000; includeSubDomains;
API Name
ozone.http.header.Strict-Transport-Security
Required
false

Datanode Metadata Directory

Description
Determines where on the local filesystem datanode security certificates will be stored.
Related Name
ozone.metadata.dirs
Default Value
/var/lib/hadoop-ozone/datanode/ozone-metadata
API Name
ozone.metadata.dirs
Required
true

Datanode ID Directory

Description
Ozone Datanode ID Directory
Related Name
ozone.scm.datanode.id.dir
Default Value
/var/lib/hadoop-ozone/datanode
API Name
ozone.scm.datanode.id.dir
Required
true

Java Heap Size of DataNode

Description	Maximum size for the Java process heap memory.
Related Name	ozone_datanode_heap_size
Default Value	4 GiB
API Name	ozone_datanode_heap_size
Required	false

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	rlimit_fds
Required	false

Ports and Addresses

Datanode Ratis IPC Port for Admin Requests

Description	The container IPC port number for admin requests.
Related Name	dfs.container.ratis.admin.port
Default Value	9857
API Name	dfs.container.ratis.admin.port
Required	true

Datanode Ratis IPC Port for Server-to-Server Communication

Description	The container IPC port number for server-to-server communication.
Related Name	dfs.container.ratis.server.port
Default Value	

9856

API Name

dfs.container.ratis.server.port

Required

true

Ozone Datanode HTTP Web UI Port**Description**

The base port that the Ozone Datanode web user interface listens on. The host name is combined with this port to form the 'hdds.datanode.http-address'.

Related Name

ozone.datanode.http-port

Default Value

9882

API Name

ozone.datanode.http-port

Required

true

Ozone Datanode Port (TLS/SSL)**Description**

The base port that the Ozone Datanode web user interface listens on when using HTTPS. The host name is combined with this port to form the 'hdds.datanode.https-address'.

Related Name

ozone.datanode.https-port

Default Value

9883

API Name

ozone.datanode.https-port

Required

false

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Role-Specific Kerberos Principal

Description

Kerberos principal used by the Ozone DataNode roles.

Related Name

Default Value

dn

API Name

kerberos_role_princ_name

Required

true

Ozone DataNode TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ozone DataNode might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ssl.client.truststore.location

Default Value

API Name

ssl_client_truststore_location

Required

false

Ozone DataNode TLS/SSL Trust Store Password

Description

The password for the Ozone DataNode TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ssl.client.truststore.password

Default Value

API Name

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Ozone DataNode

Description

Encrypt communication between clients and Ozone DataNode using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ozone.ssl.enabled

Default Value

false

API Name

ssl_enabled

Required

false

Ozone DataNode TLS/SSL Server Keystore Key Password

Description

The password that protects the private key contained in the keystore used when Ozone DataNode is acting as a TLS/SSL server.

Related Name

ssl.server.keystore.keypassword

Default Value

API Name

ssl_server_keystore_keypassword

Required

false

Ozone DataNode TLS/SSL Server Keystore File Location

Description

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ozone DataNode is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.server.keystore.location

Default Value

API Name

ssl_server_keystore_location
Required
false

Ozone DataNode TLS/SSL Server Keystore File Password

Description
The password for the Ozone DataNode keystore file.
Related Name
ssl.server.keystore.password
Default Value
API Name
ssl_server_keystore_password
Required
false

Stacks Collection

Stacks Collection Data Retention

Description
The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name
stacks_collection_data_retention
Default Value
100 MiB
API Name
stacks_collection_data_retention
Required
false

Stacks Collection Directory

Description
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name
stacks_collection_directory
Default Value
API Name
stacks_collection_directory
Required
false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name

Default Value

	false
API Name	
	role_config_suppression_cdh_version_validator
Required	
	true

Suppress Parameter Validation: Datanode Ratis IPC Port for Admin Requests

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Datanode Ratis IPC Port for Admin Requests parameter.
Related Name	
Default Value	false
API Name	
	role_config_suppression_dfs.container.ratis.admin.port
Required	
	true

Suppress Parameter Validation: Datanode Ratis Metadata Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Datanode Ratis Metadata Directory parameter.
Related Name	
Default Value	false
API Name	
	role_config_suppression_dfs.container.ratis.datanode.storage.dir
Required	
	true

Suppress Parameter Validation: Datanode Ratis IPC Port for Server-to-Server Communication

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Datanode Ratis IPC Port for Server-to-Server Communication parameter.
Related Name	
Default Value	false
API Name	
	role_config_suppression_dfs.container.ratis.server.port
Required	
	true

Suppress Parameter Validation: Datanode Data Directory

Description	
-------------	--

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Datanode Data Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hdds.datanode.dir
Required	true

Suppress Parameter Validation: JMX Exporter Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_jmx_exporter_port
Required	true

Suppress Parameter Validation: JMX Exporter configuration YAML

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_jmx_exporter_yaml
Required	true

Suppress Parameter Validation: Role-Specific Kerberos Principal

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Role-Specific Kerberos Principal parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_kerberos_role_princ_name
Required	

true

Suppress Parameter Validation: Ozone DataNode Logging Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Logging Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_log4j_safety_valve
Required	true

Suppress Parameter Validation: Ozone DataNode Log Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Log Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_log_dir
Required	true

Suppress Parameter Validation: Heap Dump Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oom_heap_dump_dir
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.
Related Name	
Default Value	

	false
API Name	
	role_config_suppression_otelcol_exporters
Required	
	true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_otelcol_extensions
Required	
	true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_otelcol_processors
Required	
	true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_otelcol_receivers
Required	
	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description	
-------------	--

	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_password
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_url
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_user
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_service
Required	

true

Suppress Parameter Validation: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ozone-conf/dn-audit-log4j2.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-container-log4j2.properties

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-container-log4j2.properties parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ozone-conf/dn-container-log4j2.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ozone-conf/ozone-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone-conf/ssl-client.xml_role_safety_valve
Required	true

Suppress Parameter Validation: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone-conf/ssl-server.xml_role_safety_valve
Required	true

Suppress Parameter Validation: Ozone Datanode HTTP Bind Hostname

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Datanode HTTP Bind Hostname parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone.datanode.http-bind-host
Required	true

Suppress Parameter Validation: Ozone Datanode HTTP Web UI Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Datanode HTTP Web UI Port parameter.
Related Name	

Default Value	false
API Name	role_config_suppression_ozone.datanode.http-port
Required	true

Suppress Parameter Validation: Secure Ozone Datanode HTTPS Bind Hostname

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Ozone Datanode HTTPS Bind Hostname parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone.datanode.https-bind-host
Required	true

Suppress Parameter Validation: Ozone Datanode Port (TLS/SSL)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Datanode Port (TLS/SSL) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone.datanode.https-port
Required	true

Suppress Parameter Validation: HSTS Header for DataNode UI

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the HSTS Header for DataNode UI parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone.http.header.strict-transport-security
Required	true

Suppress Parameter Validation: Datanode Metadata Directory

Description	
--------------------	--

Whether to suppress configuration warnings produced by the built-in parameter validation for the Datanode Metadata Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.metadata.dirs

Required

true

Suppress Parameter Validation: Datanode ID Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Datanode ID Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.datanode.id.dir

Required

true

Suppress Parameter Validation: Java Heap Size of DataNode**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of DataNode parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone_datanode_heap_size

Required

true

Suppress Parameter Validation: Ozone DataNode Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone_datanode_role_env_safety_valve

Required

true

Suppress Parameter Validation: Role Specific System Group**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Specific System Group parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: Role Specific System User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Specific System User parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_process_username

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

	false
API Name	
	role_config_suppression_role_triggers
Required	
	true

Suppress Parameter Validation: Ozone DataNode TLS/SSL Trust Store File

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode TLS/SSL Trust Store File parameter.
Related Name	
Default Value	false
API Name	
	role_config_suppression_ssl_client_truststore_location
Required	
	true

Suppress Parameter Validation: Ozone DataNode TLS/SSL Trust Store Password

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode TLS/SSL Trust Store Password parameter.
Related Name	
Default Value	false
API Name	
	role_config_suppression_ssl_client_truststore_password
Required	
	true

Suppress Parameter Validation: Ozone DataNode TLS/SSL Server Keystore Key Password

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode TLS/SSL Server Keystore Key Password parameter.
Related Name	
Default Value	false
API Name	
	role_config_suppression_ssl_server_keystore_keypassword
Required	
	true

Suppress Parameter Validation: Ozone DataNode TLS/SSL Server Keystore File Location

Description	
-------------	--

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode TLS/SSL Server Keystore File Location parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Ozone DataNode TLS/SSL Server Keystore File Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode TLS/SSL Server Keystore File Password parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test

Description

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ozone_ozone_datanode_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_datanode_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_datanode_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_datanode_log_directory_free_space

Required

true

Suppress Health Test: Otelcol Health**Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ozzone_ozzone_datanode_otelcol_health

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ozzone_ozzone_datanode_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ozzone_ozzone_datanode_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name	role_health_suppression_ozone_ozone_datanode_swap_memory_usage_rate
Required	true

Suppress Health Test: Unexpected Exits

Description	Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_ozone_ozone_datanode_unexpected_exits
Required	true

Ozone Manager

Advanced

Ozone Manager Logging Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, a string to be inserted into log4j.properties for this role only.
Related Name	
Default Value	
API Name	log4j_safety_valve
Required	false

Enable auto refresh for metric configurations

Description	When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.
Related Name	
Default Value	false
API Name	metric_config_auto_refresh
Required	false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when `java.lang.OutOfMemoryError` error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

`oom_heap_dump_dir`

Default Value

`/tmp`

API Name

`oom_heap_dump_dir`

Required

`false`

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name**Default Value**

`true`

API Name

`oom_heap_dump_enabled`

Required

`true`

Kill When Out of Memory

Description

When set, a `SIGKILL` signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

Related Name**Default Value**

`true`

API Name

`oom_sigkill_enabled`

Required

`true`

Ozone Manager Advanced Configuration Snippet (Safety Valve) for `ozone-conf/om-audit-log4j2.properties`

Description

For advanced use only. A string to be inserted into `ozone-conf/om-audit-log4j2.properties` for this role only.

Related Name

Default Value
API Name
ozone-conf/om-audit-log4j2.properties_role_safety_valve
Required
false

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml

Description
For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.
Related Name
Default Value
API Name
ozone-conf/ozone-site.xml_role_safety_valve
Required
false

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml

Description
For advanced use only. A string to be inserted into ozone-conf/ranger-ozone-audit.xml for this role only.
Related Name
Default Value
API Name
ozone-conf/ranger-ozone-audit.xml_role_safety_valve
Required
false

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-policymgr-ssl.xml

Description
For advanced use only. A string to be inserted into ozone-conf/ranger-ozone-policymgr-ssl.xml for this role only.
Related Name
Default Value
API Name
ozone-conf/ranger-ozone-policymgr-ssl.xml_role_safety_valve
Required
false

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml

Description

	For advanced use only. A string to be inserted into ozone-conf/ranger-ozone-security.xml for this role only.
Related Name	
Default Value	
API Name	ozone-conf/ranger-ozone-security.xml_role_safety_valve
Required	false

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml

Description	For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.
Related Name	
Default Value	
API Name	ozone-conf/ssl-client.xml_role_safety_valve
Required	false

Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml

Description	For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.
Related Name	
Default Value	
API Name	ozone-conf/ssl-server.xml_role_safety_valve
Required	false

Ozone Manager Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
Related Name	
Default Value	
API Name	OZONE_MANAGER_role_env_safety_valve
Required	false

Automatically Restart Process

Description	
-------------	--

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name

Default Value

false

API Name

process_auto_restart

Required

true

Role Specific System Group

Description

The group that this role's processes should run as.

Related Name

Default Value

hdfs

API Name

process_groupname

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name

Default Value

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required
false

Process Start Wait Timeout

Description
The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
Related Name
Default Value
20
API Name
process_start_secs
Required
false

Role Specific System User

Description
The user that this role's processes should run as.
Related Name
Default Value
hdfs
API Name
process_username
Required
true

Logs

Ozone Manager Log Directory

Description
The log directory for log files of the role Ozone Manager.
Related Name
log.dir
Default Value
/var/log/hadoop-ozone
API Name
log_dir
Required
false

Ozone Manager Logging Threshold

Description
The minimum log level for Ozone Manager logs
Related Name

Default Value	INFO
API Name	log_threshold
Required	false

Ozone Manager Maximum Log File Backups

Description	The maximum number of rolled log files to keep for Ozone Manager logs. Typically used by log4j or logback.
Related Name	
Default Value	10
API Name	max_log_backup_index
Required	false

Ozone Manager Max Log Size

Description	The maximum size, in megabytes, per log file for Ozone Manager logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB
API Name	max_log_size
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Enable JMX Exporter (beta)

Description

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name**Default Value**

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port

Description

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name**Default Value****API Name**

jmx_exporter_port

Required

false

JMX Exporter configuration YAML

Description

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name**Default Value****API Name**

jmx_exporter_yaml

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name
Default Value
API Name
monitoring_metric_filter
Required
false

OpenTelemetry Collector Exporters Section

Description
Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.
Related Name
Default Value
exporters: prometheusremotewrite/\$ROLE_NAME: endpoint: \$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls: insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s max_elapsed_time: 300s
API Name
otelcol_exporters
Required
false

OpenTelemetry Collector Extensions Section

Description
Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.
Related Name
Default Value
extensions: basicauth/common: client_auth: username: \$ROLE_PARAM(otelcol_remote_write_user) password: '\$ROLE_PARAM(otelcol_remote_write_password)'
API Name
otelcol_extensions
Required
false

OpenTelemetry Collector Processors Section

Description
Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.
Related Name
Default Value
API Name
otelcol_processors
Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name

Default Value

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

API Name

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name

Default Value

false

API Name

otelcol_should_collect

Required

true

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name

Default Value

Warning: 50.0 %, Critical: 70.0 %

API Name

ozone_manager_fd_thresholds

Required

false

Ozone Manager Host Health Test

Description

When computing the overall Ozone Manager health, consider the host's health.

Related Name

Default Value

true

API Name

ozone_manager_host_health_enabled

Required

false

Ozone Manager Process Health Test

Description

Enables the health test that the Ozone Manager's process state is consistent with the role configuration

Related Name

Default Value

true

API Name

ozone_manager_scm_health_enabled

Required

false

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name	common.process.swap_memory_rate_window
Default Value	5 minute(s)
API Name	process_swap_memory_rate_window
Required	false

Process Swap Memory Thresholds

Description	The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.
Related Name	
Default Value	Warning: 200 B, Critical: Never
API Name	process_swap_memory_thresholds
Required	false

Role Triggers

Description	<p>The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:</p> <ul style="list-style-type: none">triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.triggerExpression (mandatory) - A tsquery expression representing the trigger.streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies. <p>For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened:[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]See the trigger rules documentation for more details on how to write triggers using tsquery.The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.</p>
Related Name	
Default Value	[]
API Name	role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Graceful Shutdown Timeout****Description**

The timeout in milliseconds to wait for graceful shutdown to complete.

Related Name**Default Value**

2 minute(s)

API Name

graceful_stop_timeout

Required

false

OM ID**Description**

ID uniquely identifying each broker or controller. Never set this property at the group level; it should always be overridden on instance level.

Related Name

om.id

Default Value

API Name

om.id

Required

false

Java Heap Size of Ozone Manager

Description

Maximum size for the Java process heap memory.

Related Name

om_max_heap_size

Default Value

4 GiB

API Name

om_max_heap_size

Required

false

Ozone Default Bucket Layout

Description

This configuration controls the default bucket layout that the OM will use when creating a bucket if the client does not specify one. Supported values are OBJECT_STORE, FILE_SYSTEM_OPTIMIZED, and LEGACY.

Related Name

ozone.default.bucket.layout

Default Value

API Name

ozone.default.bucket.layout

Required

false

Ozone Filesystem Trash Checkpoint Interval

Description

Number of minutes between trash checkpoints

Related Name

ozone.fs.trash.checkpoint.interval

Default Value

1 hour(s)

API Name

ozone.fs.trash.checkpoint.interval

Required

false

Ozone Filesystem Trash Interval

Description

Controls the number of minutes after which a trash checkpoint directory is deleted permanently

Related Name

ozone.fs.trash.interval

Default Value

1 day(s)

API Name

ozone.fs.trash.interval

Required

false

HSTS Header for Ozone Manager UI

Description

HSTS Header (Strict-Transport-Security) value to use

Related Name

ozone.http.header.Strict-Transport-Security

Default Value

max-age=63072000; includeSubDomains;

API Name

ozone.http.header.Strict-Transport-Security

Required

false

Ozone Manager Metadata Directory

Description

Determines where on the local filesystem Ozone Manager security certificates will be stored.

Related Name

ozone.metadata.dirs

Default Value

/var/lib/hadoop-ozone/om/ozone-metadata

API Name

ozone.metadata.dirs

Required

true

Ozone Manager Data Directory

Description

Directory where the OzoneManager stores its metadata.

Related Name

ozone.om.db.dirs

Default Value

/var/lib/hadoop-ozone/om/data

API Name

ozone.om.db.dirs

Required

true

Ozone Manager HTTP Bind Hostname

Description

The actual address the OM web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.om.http-address'.

Related Name

ozone.om.http-bind-host

Default Value

0.0.0.0

API Name

ozone.om.http-bind-host

Required

false

Secure Ozone Manager HTTPS Bind Hostname

Description

The actual address the OM web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.om.https-address'.

Related Name

ozone.om.https-bind-host

Default Value

0.0.0.0

API Name

ozone.om.https-bind-host

Required

false

Enable Ozone S3 Multi-Tenancy feature

Description

Enable Ozone S3 Multi-Tenancy feature in Ozone Manager. This feature requires Kerberos Authentication to be enabled.

Related Name

ozone.om.multitenancy.enabled

Default Value

false

API Name

ozone.om.multitenancy.enabled

Required

false

New Ozone Manager Nodes

Description

Hostnames of newly added ozone manager nodes. If more than one hostname is to be added then put a ',' between hostnames, e.g, [hostname1,hostname2,hostname3]'.

Related Name

ozone.om.new.added.nodes
Default Value
API Name
ozone.om.new.added.nodes
Required
false

Ozone Manager Ratis Storage Directory

Description
This directory is used for storing Ozone Manager's Ratis metadata like logs. Ideally, this should be mapped to a fast disk like an SSD.
Related Name
ozone.om.ratis.storage.dir
Default Value
/var/lib/hadoop-ozone/om/ratis
API Name
ozone.om.ratis.storage.dir
Required
true

Ozone Server Replication Factor

Description
The default value of the replication factor for objects. The default is used if replication is not specified when creating a key or if no default replication is set at the bucket. Supported values for RATIS are 1, 3. Supported values for EC are rs-3-2-1024k, rs-6-3-1024k, rs-10-4-1024k, XOR-3-2-1024k, XOR-6-3-1024k, XOR-10-4-4096K (i.e XOR-3-2- <code>{CHUNK_SIZE}</code>)
Related Name
ozone.server.default.replication
Default Value
3
API Name
ozone.server.default.replication
Required
true

Ozone Server Replication Type

Description
The default replication type to be used for Objects. The default is used when a type is not specified when creating an Object or no default value is set for the bucket. Supported values are RATIS, STAND_ALONE, and EC.
Related Name
ozone.server.default.replication.type
Default Value
RATIS
API Name

ozone.server.default.replication.type
Required
true

Ozone Manager Upgrade Need Finalization Canary Enabled

Description
Determines if the Ozone Manager Upgrade Need Finalization Canary is enabled.
Related Name
ozone_om_upgrade_need_finalization_canary_enabled
Default Value
true
API Name
ozone_om_upgrade_need_finalization_canary_enabled
Required
false

Ozone Manager Upgrade Need Finalization Canary Timeout

Description
Sets Ozone Manager Upgrade Need Finalization Canary's timeout.
Related Name
ozone_om_upgrade_need_finalization_canary_timeout
Default Value
30 second(s)
API Name
ozone_om_upgrade_need_finalization_canary_timeout
Required
false

Ranger Ozone Plugin Conf Path

Description
Staging directory for Ranger Ozone Plugin Configuration. This should generally not be changed.
Related Name
ranger_ozone_plugin_conf_path
Default Value
/etc/ranger/ozone-plugin
API Name
ranger_ozone_plugin_conf_path
Required
true

Ranger Ozone Plugin Policy Cache Directory Path

Description
The directory where Ranger security policies are cached locally.
Related Name
ranger.plugin.ozone.policy.cache.dir

Default Value`/var/lib/ranger/ozone/policy-cache`**API Name**`ranger_ozone_plugin_policy_cache_directory`**Required**`true`**Ranger Ozone Plugin Audit Solr Spool Directory Path****Description**

Spool directory for Ranger audits being written to Solr.

Related Name`xasecure.audit.destination.solr.batch.filespool.dir`**Default Value**`/var/log/hadoop-ozone/ranger-audit/solr/spool`**API Name**`ranger_ozone_plugin_solr_audit_spool_directory`**Required**`true`**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**`rlimit_fds`**Required**`false`**Ports and Addresses****Ozone Manager HTTP Web UI Port****Description**

The base port that the Ozone Manager HTTP web user interface listens on. The host name of the Ozone Manager is combined with this port to form the 'ozone.om.http-address'.

Related Name`ozone.om.http-port`**Default Value**`9874`**API Name**`ozone.om.http-port`**Required**

true

Secure Ozone Manager Web UI Port (TLS/SSL)

Description

The base port that the Ozone Manager HTTP web user interface listens on when using HTTPS. The host name of the Ozone Manager is combined with this port to form the 'ozone.om.https-address'.

Related Name

ozone.om.https-port

Default Value

9875

API Name

ozone.om.https-port

Required

false

Ozone Manager Ratis port

Description

The base port that Ozone Manager's Ratis Server listens on if multiple Ozone Manager's are configured.

Related Name

ozone.om.ratis-port

Default Value

9872

API Name

ozone.om.ratis-port

Required

false

Ozone Manager RPC port

Description

The base port that Ozone Manager listens on when serving RPCs. The host name of the Ozone Manager is combined with this port to form the 'ozone.om.address'.

Related Name

ozone.om.rpc-port

Default Value

9862

API Name

ozone.om.rpc-port

Required

false

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the

value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Role-Specific Kerberos Principal

Description

Kerberos principal used by the Ozone Manager roles.

Related Name

Default Value

om

API Name

kerberos_role_princ_name

Required

true

Ozone Manager TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ozone Manager might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name	ssl.client.truststore.location
Default Value	
API Name	ssl_client_truststore_location
Required	false

Ozone Manager TLS/SSL Trust Store Password

Description	The password for the Ozone Manager TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name	ssl.client.truststore.password
Default Value	
API Name	ssl_client_truststore_password
Required	false

Enable TLS/SSL for Ozone Manager

Description	Encrypt communication between clients and Ozone Manager using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).
Related Name	ozone.ssl.enabled
Default Value	false
API Name	ssl_enabled
Required	false

Ozone Manager TLS/SSL Server Keystore Key Password

Description	The password that protects the private key contained in the keystore used when Ozone Manager is acting as a TLS/SSL server.
Related Name	ssl.server.keystore.keypassword
Default Value	
API Name	ssl_server_keystore_keypassword
Required	

false

Ozone Manager TLS/SSL Server Keystore File Location

Description

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ozone Manager is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.server.keystore.location

Default Value

API Name

ssl_server_keystore_location

Required

false

Ozone Manager TLS/SSL Server Keystore File Password

Description

The password for the Ozone Manager keystore file.

Related Name

ssl.server.keystore.password

Default Value

API Name

ssl_server_keystore_password

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user

with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value

API Name

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method
Required
false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description
Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name
Default Value
false
API Name

Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml**Description**

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone-conf/ranger-ozone-security.xml_role_safety_valve
Required	true

Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone-conf/ssl-client.xml_role_safety_valve
Required	true

Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone-conf/ssl-server.xml_role_safety_valve
Required	true

Suppress Parameter Validation: HSTS Header for Ozone Manager UI

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the HSTS Header for Ozone Manager UI parameter.
Related Name	
Default Value	

false

API Name

role_config_suppression_ozone.http.header.strict-transport-security

Required

true

Suppress Parameter Validation: Ozone Manager Metadata Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Metadata Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.metadata.dirs

Required

true

Suppress Parameter Validation: Ozone Manager Data Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Data Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.db.dirs

Required

true

Suppress Parameter Validation: Ozone Manager HTTP Bind Hostname**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager HTTP Bind Hostname parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.http-bind-host

Required

true

Suppress Parameter Validation: Ozone Manager HTTP Web UI Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager HTTP Web UI Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.http-port

Required

true

Suppress Parameter Validation: Secure Ozone Manager HTTPS Bind Hostname**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Ozone Manager HTTPS Bind Hostname parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.https-bind-host

Required

true

Suppress Parameter Validation: Secure Ozone Manager Web UI Port (TLS/SSL)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Ozone Manager Web UI Port (TLS/SSL) parameter.

Related Name**Default Value**

Suppress Parameter Validation: Ranger Ozone Plugin Conf Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Ozone Plugin Conf Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ozone_plugin_conf_path

Required

true

Suppress Parameter Validation: Ranger Ozone Plugin Policy Cache Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Ozone Plugin Policy Cache Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ozone_plugin_policy_cache_directory

Required

true

Suppress Parameter Validation: Ranger Ozone Plugin Audit Solr Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Ozone Plugin Audit Solr Spool Directory Path parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ozone_plugin_solr_audit_spool_directory

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name

Default Value

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name

Default Value

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Ozone Manager TLS/SSL Trust Store File

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Trust Store File parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Ozone Manager TLS/SSL Trust Store Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Trust Store Password parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Ozone Manager TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Parameter Validation: Ozone Manager TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Ozone Manager TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Ozone Manager Upgrade Need Finalization Canary**Description**

Whether to suppress the results of the Ozone Manager Upgrade Need Finalization Canary health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_om_upgrade_need_finalization_canary

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_manager_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_manager_file_descriptor

Required

true

Suppress Health Test: Host Health

Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ozone_ozone_manager_host_health

Suppress Health Test: Otelcol Health

Description

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ozone_ozone_manager_otelcol_health

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_manager_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_manager_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_manager_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_manager_unexpected_exits

Required

true

Ozone Prometheus

Advanced

Enable auto refresh for metric configurations

Description	When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.
Related Name	
Default Value	false
API Name	metric_config_auto_refresh
Required	false

Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml

Description	For advanced use only. A string to be inserted into ozone-conf/ozone-prometheus.yml for this role only.
Related Name	
Default Value	
API Name	ozone-conf/ozone-prometheus.yml_role_safety_valve
Required	false

Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/prometheus-token

Description	For advanced use only. A string to be inserted into ozone-conf/prometheus-token for this role only.
Related Name	
Default Value	
API Name	ozone-conf/prometheus-token_role_safety_valve
Required	false

Ozone Prometheus Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
-------------	---

Related Name	
Default Value	
API Name	OZONE_PROMETHEUS_role_env_safety_valve
Required	false

Automatically Restart Process

Description	When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.
Related Name	
Default Value	false
API Name	process_auto_restart
Required	true

Role Specific System Group

Description	The group that this role's processes should run as.
Related Name	
Default Value	hdfs
API Name	process_groupname
Required	true

Enable Metric Collection

Description	Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.
Related Name	
Default Value	true
API Name	process_should_monitor
Required	true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

Required

false

Role Specific System User

Description

The user that this role's processes should run as.

Related Name

Default Value

hdfs

API Name

process_username

Required

true

Logs

Ozone Prometheus Log Directory

Description

The log directory for log files of the role Ozone Prometheus.

Related Name

log.dir

Default Value

/var/log/hadoop-ozone

API Name

log_dir

Required

false

Monitoring

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name

Default Value

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name

Default Value

false

API Name

enable_config_alerts

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name

Default Value

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/$ROLE_NAME: endpoint:
$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required
false

OpenTelemetry Collector Service Section

Description
Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.
Related Name
Default Value
API Name
otelcol_service
Required
false

Enable OpenTelemetry Collector (beta)

Description
OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.
Related Name
Default Value
false
API Name
otelcol_should_collect
Required
true

File Descriptor Monitoring Thresholds

Description
The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name
Default Value
Warning: 50.0 %, Critical: 70.0 %
API Name
ozone_prometheus_fd_thresholds
Required
false

Ozone Prometheus Host Health Test

Description
When computing the overall Ozone Prometheus health, consider the host's health.
Related Name
Default Value

	true
API Name	ozone_prometheus_host_health_enabled
Required	false

Ozone Prometheus Process Health Test

Description	Enables the health test that the Ozone Prometheus's process state is consistent with the role configuration
Related Name	
Default Value	true
API Name	ozone_prometheus_scm_health_enabled
Required	false

Swap Memory Usage Rate Thresholds

Description	The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.
Related Name	
Default Value	Warning: Never, Critical: Never
API Name	process_swap_memory_rate_thresholds
Required	false

Swap Memory Usage Rate Window

Description	The period to review when computing unexpected swap memory usage change of the process.
Related Name	common.process.swap_memory_rate_window
Default Value	5 minute(s)
API Name	process_swap_memory_rate_window
Required	false

Process Swap Memory Thresholds

Description	
-------------	--

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name	unexpected_exits_thresholds
Required	false

Unexpected Exits Monitoring Period

Description	The period to review when computing unexpected exits.
Related Name	
Default Value	5 minute(s)
API Name	unexpected_exits_window
Required	false

Other

CA File Path

Description	Location of the CA File for Prometheus
Related Name	ozone.prometheus.ca.file
Default Value	AUTO_TLS_CA_FILE
API Name	ozone.prometheus.ca.file
Required	false

Prometheus Data Retention time.

Description	How long to retain samples in storage. Units Supported: y, w, d, h, m, s, ms.
Related Name	ozone.prometheus.data.retention.time
Default Value	15d
API Name	ozone.prometheus.data.retention.time
Required	false

Prometheus Data Directory

Description	Directory where the Prometheus Server stores its metadata.
--------------------	--

Related Name

ozone.prometheus.db.dir

Default Value

/var/lib/hadoop-ozone/prometheus/data

API Name

ozone.prometheus.db.dir

Required

true

Prometheus server extra flags.**Description**

Extra command line flags that can be used while starting up the server. For example, '--query.timeout=2m --query.max-samples=5000'

Related Name

ozone.prometheus.extra.flags

Default Value**API Name**

ozone.prometheus.extra.flags

Required

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	rlimit_fds
Required	false

Ports and Addresses

Prometheus HTTP Port

Description	The base port that the prometheus web user interface listens on.
Related Name	ozone.prometheus.http-port
Default Value	9094
API Name	ozone.prometheus.http-port
Required	true

Resource Management

Cgroup CPU Shares

Description	Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name	cpu.shares
Default Value	1024
API Name	rm_cpu_shares
Required	true

Custom Control Group Resources (overrides Cgroup settings)

Description	
-------------	--

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the `cgexec` command: `resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`
These settings override other cgroup settings.

Related Name

`custom.cgroups`

Default Value**API Name**

`rm_custom_resources`

Required

`false`

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

`blkio.weight`

Default Value

`500`

API Name

`rm_io_weight`

Required

`true`

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

`memory.limit_in_bytes`

Default Value

`-1 MiB`

API Name

`rm_memory_hard_limit`

Required

`true`

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Ozone Prometheus Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Prometheus Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name

Default Value	false
API Name	role_config_suppression_otelcol_exporters
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_extensions
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_processors
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_receivers
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description	
--------------------	--

	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_password
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_url
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_user
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_service
Required	

true

Suppress Parameter Validation: Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ozone-conf/ozone-prometheus.yml_role_safety_valve

Required

Suppress Parameter Validation: Role Specific System Group**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Specific System Group parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: Role Specific System User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Specific System User parameter.

Related Name**Default Value**

false

API Name

`role_config_suppression_process_username`**Required**`true`**Suppress Parameter Validation: Prometheus Binary Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Prometheus Binary Location parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_prometheus.location`**Required**`true`**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_rm_custom_resources`**Required**`true`**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_role_triggers`**Required**`true`**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name
Default Value
false
API Name
role_health_suppression_ozone_ozone_prometheus_audit_health
Required
true

Suppress Health Test: File Descriptors

Description
Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name
Default Value
false
API Name
role_health_suppression_ozone_ozone_prometheus_file_descriptor
Required
true

Suppress Health Test: Host Health

Description
Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name
Default Value
false
API Name
role_health_suppression_ozone_ozone_prometheus_host_health
Required
true

Suppress Health Test: Log Directory Free Space

Description
Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name
Default Value
false
API Name
role_health_suppression_ozone_ozone_prometheus_log_directory_free_space
Required

true

Suppress Health Test: Otelcol Health

Description

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ozone_ozone_prometheus_otelcol_health

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ozone_ozone_prometheus_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ozone_ozone_prometheus_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name
Default Value
false
API Name
role_health_suppression_ozone_ozone_prometheus_swap_memory_usage_rate
Required

Suppress Health Test: Unexpected Exits

Description
Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name
Default Value
false
API Name
role_health_suppression_ozone_ozone_prometheus_unexpected_exits
Required
true

Ozone Recon

Advanced

Ozone Recon Logging Advanced Configuration Snippet (Safety Valve)

Description
For advanced use only, a string to be inserted into log4j.properties for this role only.
Related Name
Default Value
API Name
log4j_safety_valve
Required
false

Enable auto refresh for metric configurations

Description
When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.
Related Name
Default Value
false
API Name
metric_config_auto_refresh

Required
false

Heap Dump Directory

Description
Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.
Related Name
oom_heap_dump_dir
Default Value
/tmp
API Name
oom_heap_dump_dir
Required
false

Dump Heap When Out of Memory

Description
When set, generates a heap dump file when when an out-of-memory error occurs.
Related Name
Default Value
true
API Name
oom_heap_dump_enabled
Required
true

Kill When Out of Memory

Description
When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.
Related Name
Default Value
true
API Name
oom_sigkill_enabled
Required
true

Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml

Description
For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ozone-site.xml_role_safety_valve

Required

false

Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-client.xml_role_safety_valve

Required

false

Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-server.xml_role_safety_valve

Required

false

Ozone Recon Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment.
Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

OZONE_RECON_role_env_safety_valve

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name

Default Value

false

API Name

process_auto_restart

Required

true

Role Specific System Group**Description**

The group that this role's processes should run as.

Related Name**Default Value**

hdfs

API Name

process_groupname

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

Required

false

Role Specific System User

Description

The user that this role's processes should run as.

Related Name

Default Value

hdfs

API Name

process_username

Required

true

Logs

Ozone Recon Log Directory

Description

The log directory for log files of the role Ozone Recon.

Related Name

log.dir

Default Value

/var/log/hadoop-ozone

API Name

log_dir

Required

false

Ozone Recon Logging Threshold

Description

The minimum log level for Ozone Recon logs

Related Name

Default Value

INFO

API Name

log_threshold
Required
false

Ozone Recon Maximum Log File Backups

Description
The maximum number of rolled log files to keep for Ozone Recon logs. Typically used by log4j or logback.
Related Name
Default Value
10
API Name
max_log_backup_index
Required
false

Ozone Recon Max Log Size

Description
The maximum size, in megabytes, per log file for Ozone Recon logs. Typically used by log4j or logback.
Related Name
Default Value
200 MiB
API Name
max_log_size
Required
false

Monitoring

Enable Health Alerts for this Role

Description
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name
Default Value
false
API Name
enable_config_alerts
Required
false

Enable JMX Exporter (beta)

Description
JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. See the JMX Exporter documentation.
Related Name
Default Value
false
API Name
jmx_exporter_enabled
Required
true

JMX Exporter Port

Description
JMX Exporter needs a port to implement a Prometheus exporter.
Related Name
Default Value
API Name
jmx_exporter_port
Required
false

JMX Exporter configuration YAML

Description
This configuration is passed to JMX Exporter as it is. See the JMX Exporter documentation.
Related Name
Default Value
API Name
jmx_exporter_yaml
Required
false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name

Default Value

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior).For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name

Default Value**API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

API Name

ozone_recon_scm_health_enabled

Required

false

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

	common.process.swap_memory_rate_window
Default Value	5 minute(s)
API Name	process_swap_memory_rate_window
Required	false

Process Swap Memory Thresholds

Description	The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.
Related Name	
Default Value	Warning: 200 B, Critical: Never
API Name	process_swap_memory_thresholds
Required	false

Role Triggers

Description	<p>The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:</p> <ul style="list-style-type: none">triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.triggerExpression (mandatory) - A tsquery expression representing the trigger.streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies. <p>For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened:[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]See the trigger rules documentation for more details on how to write triggers using tsquery.The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.</p>
Related Name	
Default Value	[]
API Name	role_triggers

Required
true

Unexpected Exits Thresholds

Description
The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.
Related Name
Default Value
Warning: Never, Critical: Any
API Name
unexpected_exits_thresholds
Required
false

Unexpected Exits Monitoring Period

Description
The period to review when computing unexpected exits.
Related Name

API Name
ozone.http.header.Strict-Transport-Security
Required
false

Recon Metadata Directory

Description
Determines where on the local filesystem recon security certificates will be stored.
Related Name
ozone.metadata.dirs

Default Value`/var/lib/hadoop-ozone/recon/ozone-metadata`**API Name**`ozone.metadata.dirs`**Required**`true`**Recon Data Directory****Description**

Directory where the Recon Server stores its metadata.

Related Name`ozone.recon.db.dir`**Default Value**`/var/lib/hadoop-ozone/recon/data`**API Name**`ozone.recon.db.dir`**Required**`true`**Enable HeatMap Feature in Recon****Description**

Enables HeatMap Feature in Recon.

Related Name`ozone.recon.heatmap.enable`**Default Value**`true`**API Name**`ozone.recon.heatmap.enable`**Required**`false`**Recon HTTP Bind Hostname****Description**

The actual address the Recon web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.recon.http-address'.

Related Name`ozone.recon.http-bind-host`**Default Value**`0.0.0.0`**API Name**`ozone.recon.http-bind-host`**Required**`false`

Secure Recon HTTPS Bind Hostname

Description	The actual address the Recon web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.recon.https-address'.
Related Name	ozone.recon.https-bind-host
Default Value	0.0.0.0
API Name	ozone.recon.https-bind-host
Required	false

Recon OzoneManager Data Directory

Description	Directory where the Recon Server stores OzoneManager's metadata
Related Name	ozone.recon.om.db.dir
Default Value	/var/lib/hadoop-ozone/recon/om/data
API Name	ozone.recon.om.db.dir
Required	true

Recon StorageContainerManager Data Directory

Description	Directory where the Recon Server stores StorageContainerManager's metadata
Related Name	ozone.recon.scm.db.dirs
Default Value	/var/lib/hadoop-ozone/recon/scm/data
API Name	ozone.recon.scm.db.dirs
Required	true

Java Heap Size of Recon

Description	Maximum size for the Java process heap memory.
Related Name	ozone_recon_max_heap_size
Default Value	1 GiB
API Name	

ozone_recon_max_heap_size

Required

false

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name

Default Value

API Name

rlimit_fds

Required

false

Ports and Addresses

Recon HTTP Web UI Port

Description

The base port that the Recon web user interface listens on. The host name of the Recon web user interface is combined with this port to form the 'ozone.recon.http-address'.

Related Name

ozone.recon.http-port

Default Value

9888

API Name

ozone.recon.http-port

Required

true

Secure Recon Web UI Port (TLS/SSL)

Description

The base port that the Recon web user interface listens on when using HTTPS. The host name of the Recon web user interface is combined with this port to form the 'ozone.recon.https-address'.

Related Name

ozone.recon.https-port

Default Value

9889

API Name

ozone.recon.https-port

Required

false

Recon RPC Port

Description

The base port that Recon listens on when serving RPCs. The host name of Recon is combined with this port to form the 'ozone.recon.address'.

Related Name

ozone.recon.rpc-port

Default Value

9891

API Name

ozone.recon.rpc-port

Required

true

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Role-Specific Kerberos Principal

Description	Kerberos principal used by the Ozone Recon roles.
Related Name	
Default Value	recon
API Name	kerberos_role_princ_name
Required	true

Ozone Recon TLS/SSL Trust Store File

Description	The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ozone Recon might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.
Related Name	ssl.client.truststore.location
Default Value	
API Name	ssl_client_truststore_location
Required	false

Ozone Recon TLS/SSL Trust Store Password

Description	The password for the Ozone Recon TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name	ssl.client.truststore.password
Default Value	
API Name	ssl_client_truststore_password
Required	false

Enable TLS/SSL for Ozone Recon

Description	Encrypt communication between clients and Ozone Recon using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).
Related Name	

ozone.ssl.enabled
Default Value
false
API Name
ssl_enabled
Required
false

Ozone Recon TLS/SSL Server Keystore Key Password

Description
The password that protects the private key contained in the keystore used when Ozone Recon is acting as a TLS/SSL server.
Related Name
ssl.server.keystore.keypassword
Default Value
API Name
ssl_server_keystore_keypassword
Required
false

Ozone Recon TLS/SSL Server Keystore File Location

Description
The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ozone Recon is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.
Related Name
ssl.server.keystore.location
Default Value
API Name
ssl_server_keystore_location
Required
false

Ozone Recon TLS/SSL Server Keystore File Password

Description
The password for the Ozone Recon keystore file.
Related Name
ssl.server.keystore.password
Default Value
API Name
ssl_server_keystore_password
Required
false

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	100 MiB
API Name	stacks_collection_data_retention
Required	false

Stacks Collection Directory

Description	The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name	stacks_collection_directory
Default Value	
API Name	stacks_collection_directory
Required	false

Stacks Collection Enabled

Description	Whether or not periodic stacks collection is enabled.
Related Name	stacks_collection_enabled
Default Value	false
API Name	stacks_collection_enabled
Required	true

Stacks Collection Frequency

Description	The frequency with which stacks are collected.
Related Name	

stacks_collection_frequency
Default Value
5.0 second(s)
API Name
stacks_collection_frequency
Required
false

Stacks Collection Method

Description
The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name
stacks_collection_method
Default Value
jstack
API Name
stacks_collection_method
Required
false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description
Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_cdh_version_validator
Required
true

Suppress Parameter Validation: JMX Exporter Port

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.
Related Name
Default Value
false
API Name

`role_config_suppression_jmx_exporter_port`**Required**`true`**Suppress Parameter Validation: JMX Exporter configuration YAML****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_jmx_exporter_yaml`**Required**`true`**Suppress Parameter Validation: Role-Specific Kerberos Principal****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role-Specific Kerberos Principal parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_kerberos_role_princ_name`**Required**`true`**Suppress Parameter Validation: Ozone Recon Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_log4j_safety_valve`**Required**`true`**Suppress Parameter Validation: Ozone Recon Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_remote_write_user
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_service
Required
true

Suppress Parameter Validation: Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ozone-conf/ozone-site.xml_role_safety_valve
Required
true

Suppress Parameter Validation: Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ssl-client.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ssl-server.xml_role_safety_valve

Required

true

Suppress Parameter Validation: HSTS Header for Recon UI

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the HSTS Header for Recon UI parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.http.header.strict-transport-security

Required

true

Suppress Parameter Validation: Recon Metadata Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon Metadata Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.metadata.dirs
Required
true

Suppress Parameter Validation: Recon Data Directory

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon Data Directory parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ozone.recon.db.dir
Required
true

Suppress Parameter Validation: Recon HTTP Bind Hostname

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon HTTP Bind Hostname parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ozone.recon.http-bind-host
Required
true

Suppress Parameter Validation: Recon HTTP Web UI Port

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon HTTP Web UI Port parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ozone.recon.http-port
Required
true

Suppress Parameter Validation: Secure Recon HTTPS Bind Hostname

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Recon HTTPS Bind Hostname parameter.
Related Name

Default Value

false

API Name

role_config_suppression_ozone.recon.https-bind-host

Required

true

Suppress Parameter Validation: Secure Recon Web UI Port (TLS/SSL)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Recon Web UI Port (TLS/SSL) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.https-port

Required

true

Suppress Parameter Validation: Recon OzoneManager Data Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon OzoneManager Data Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.om.db.dir

Required

true

Suppress Parameter Validation: Recon RPC Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon RPC Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.rpc-port

Required

true

Suppress Parameter Validation: Recon StorageContainerManager Data Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon StorageContainerManager Data Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ozone.recon.scm.db.dirs

Required

true

Suppress Parameter Validation: Java Heap Size of Recon

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of Recon parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ozone_recon_max_heap_size

Required

true

Suppress Parameter Validation: Ozone Recon Environment Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ozone_recon_role_env_safety_valve

Required

true

Suppress Parameter Validation: Role Specific System Group

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Specific System Group parameter.

Related Name

Default Value

false

API Name

role_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: Role Specific System User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Specific System User parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_process_username

Required

true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Parameter Validation: Role Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Ozone Recon TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Ozone Recon TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Ozone Recon TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Parameter Validation: Ozone Recon TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Ozone Recon TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_recon_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_recon_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_recon_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_recon_log_directory_free_space

Required

true

Suppress Health Test: Otelcol Health**Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_recon_otelcol_health

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_recon_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_recon_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_recon_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_ozone_recon_unexpected_exits

Required

true

S3 Gateway

Advanced

S3 Gateway Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when an out-of-memory error occurs.

Related Name

Default Value

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name

Default Value

true

API Name

oom_sigkill_enabled

Required

true

S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml

Description

For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.

Related Name

Default Value

API Name

ozone-conf/ozone-site.xml_role_safety_valve

Required

false

S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/s3g-audit-log4j2.properties

Description

For advanced use only. A string to be inserted into ozone-conf/s3g-audit-log4j2.properties for this role only.

Related Name

Default Value

API Name

ozone-conf/s3g-audit-log4j2.properties_role_safety_valve

Required
false

S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml

Description
For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.
Related Name
Default Value
API Name
ozone-conf/ssl-client.xml_role_safety_valve
Required
false

S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml

Description
For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.
Related Name
Default Value
API Name
ozone-conf/ssl-server.xml_role_safety_valve
Required
false

Automatically Restart Process

Description
When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.
Related Name
Default Value
false
API Name
process_auto_restart
Required
true

Role Specific System Group

Description
The group that this role's processes should run as.
Related Name
Default Value
hdfs
API Name
process_groupname

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Role Specific System User**Description**

The user that this role's processes should run as.

Related Name	
Default Value	hdfs
API Name	process_username
Required	true

S3 Gateway Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
Related Name	
Default Value	
API Name	S3_GATEWAY_role_env_safety_valve
Required	false

Logs

S3 Gateway Log Directory

Description	The log directory for log files of the role S3 Gateway.
Related Name	log.dir
Default Value	/var/log/hadoop-ozone
API Name	log_dir
Required	false

S3 Gateway Logging Threshold

Description	The minimum log level for S3 Gateway logs
Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

S3 Gateway Maximum Log File Backups

Description	The maximum number of rolled log files to keep for S3 Gateway logs. Typically used by log4j or logback.
Related Name	
Default Value	10
API Name	max_log_backup_index
Required	false

S3 Gateway Max Log Size

Description	The maximum size, in megabytes, per log file for S3 Gateway logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB
API Name	max_log_size
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	

enable_config_alerts
Required
false

Enable JMX Exporter (beta)

Description
JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. See the JMX Exporter documentation.
Related Name
Default Value
false
API Name
jmx_exporter_enabled
Required
true

JMX Exporter Port

Description
JMX Exporter needs a port to implement a Prometheus exporter.
Related Name
Default Value
API Name
jmx_exporter_port
Required
false

JMX Exporter configuration YAML

Description
This configuration is passed to JMX Exporter as it is. See the JMX Exporter documentation.
Related Name
Default Value
API Name
jmx_exporter_yaml
Required
false

Log Directory Free Space Monitoring Absolute Thresholds

Description
The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
Related Name
Default Value
Warning: 10 GiB, Critical: 5 GiB

API Name`log_directory_free_space_absolute_thresholds`**Required**`false`**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**`Warning: Never, Critical: Never`**API Name**`log_directory_free_space_percentage_thresholds`**Required**`false`**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**`monitoring_metric_filter`**Required**`false`

OpenTelemetry Collector Exporters Section

Description

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section

Description

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

extensions: basicauth/common: client_auth: username:
\$ROLE_PARAM(otelcol_remote_write_user) password:
'\$ROLE_PARAM(otelcol_remote_write_password)'

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section

Description

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

API Name

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE,

`$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name

Default Value

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression. Specify `$INFRA(cdp_request_signer_password)` when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression. Specify `$INFRA(cdp_request_signer_url)` when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

`$INFRA(cdp_request_signer_url)`

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_user)` expression. Specify `$INFRA(cdp_request_signer_username)` when forwarding to Cloudera Observability central monitoring.

Related Name	
Default Value	\$INFRA(cdp_request_signer_username)
API Name	otelcol_remote_write_user
Required	false

OpenTelemetry Collector Service Section

Description	Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.
Related Name	
Default Value	
API Name	otelcol_service
Required	false

Enable OpenTelemetry Collector (beta)

Description	OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.
Related Name	
Default Value	false
API Name	otelcol_should_collect
Required	true

Swap Memory Usage Rate Thresholds

Description	The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.
Related Name	
Default Value	Warning: Never, Critical: Never
API Name	process_swap_memory_rate_thresholds
Required	false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

	[]
API Name	role_triggers
Required	true

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	s3_gateway_fd_thresholds
Required	false

S3 Gateway Host Health Test

Description	When computing the overall S3 Gateway health, consider the host's health.
Related Name	
Default Value	true
API Name	s3_gateway_host_health_enabled
Required	false

S3 Gateway Process Health Test

Description	Enables the health test that the S3 Gateway's process state is consistent with the role configuration
Related Name	
Default Value	true
API Name	s3_gateway_scm_health_enabled
Required	false

Unexpected Exits Thresholds

Description	The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.
-------------	---

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**HSTS Header for S3G HTTPS Endpoint****Description**

HSTS Header (Strict-Transport-Security) value to use

Related Name

ozone.http.header.Strict-Transport-Security

Default Value

max-age=63072000; includeSubDomains;

API Name

ozone.http.header.Strict-Transport-Security

Required

false

Ozone S3 Gateway HTTP Bind Hostname**Description**

The actual address the S3 Gateway web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.s3g.http-address'.

Related Name

ozone.s3g.http-bind-host

Default Value

0.0.0.0

API Name

ozone.s3g.http-bind-host

Required

false

Secure Ozone S3 Gateway HTTPS Bind Hostname

Description

The actual address the S3 Gateway web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.s3g.https-address'.

Related Name

ozone.s3g.https-bind-host

Default Value

0.0.0.0

API Name

ozone.s3g.https-bind-host

Required

false

Java Heap Size of S3 Gateway

Description

Maximum size for the Java process heap memory.

Related Name

ozone_S3_gateway_max_heap_size

Default Value

1 GiB

API Name

ozone_S3_gateway_max_heap_size

Required

false

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name

Default Value

API Name

rlimit_fds

Required

false

Ports and Addresses

Ozone S3 Gateway HTTP Web UI Port

Description

The base port that the S3 Gateway web user interface listens on. The host name of the S3 Gateway is combined with this port to form the 'ozone.s3g.http-address'.

Related Name

ozone.s3g.http-port

Default Value

9878

API Name

ozone.s3g.http-port

Required

true

Secure Ozone S3 Gateway Web UI Port (TLS/SSL)**Description**

The base port that the S3 Gateway web user interface listens on when using HTTPS. The host name of the S3 Gateway is combined with this port to form the 'ozone.s3g.https-address'.

Related Name

ozone.s3g.https-port

Default Value

9879

API Name

ozone.s3g.https-port

Required

false

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups
Default Value
API Name
rm_custom_resources
Required
false

Cgroup I/O Weight

Description
Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.
Related Name
blkio.weight
Default Value
500
API Name
rm_io_weight
Required
true

Cgroup Memory Hard Limit

Description
Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'
Related Name
memory.limit_in_bytes
Default Value
-1 MiB
API Name
rm_memory_hard_limit
Required
true

Cgroup Memory Soft Limit

Description
Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'
Related Name

memory.soft_limit_in_bytes
Default Value
-1 MiB
API Name
rm_memory_soft_limit
Required
true

Security

Role-Specific Kerberos Principal

Description
Kerberos principal used by the S3 Gateway roles.
Related Name
Default Value
s3g
API Name
kerberos_role_princ_name
Required
true

S3 Gateway TLS/SSL Trust Store File

Description
The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that S3 Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.
Related Name
ssl.client.truststore.location
Default Value
API Name
ssl_client_truststore_location
Required
false

S3 Gateway TLS/SSL Trust Store Password

Description
The password for the S3 Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name
ssl.client.truststore.password
Default Value
API Name
ssl_client_truststore_password

Required

false

Enable TLS/SSL for S3 Gateway**Description**

Encrypt communication between clients and S3 Gateway using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ozone.ssl.enabled

Default Value

false

API Name

ssl_enabled

Required

false

S3 Gateway TLS/SSL Server Keystore Key Password**Description**

The password that protects the private key contained in the keystore used when S3 Gateway is acting as a TLS/SSL server.

Related Name

ssl.server.keystore.keypassword

Default Value**API Name**

ssl_server_keystore_keypassword

Required

false

S3 Gateway TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when S3 Gateway is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.server.keystore.location

Default Value**API Name**

ssl_server_keystore_location

Required

false

S3 Gateway TLS/SSL Server Keystore File Password**Description**

The password for the S3 Gateway keystore file.

Related Name

ssl.server.keystore.password

Default Value

API Name

ssl_server_keystore_password

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value

API Name

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required
true

Stacks Collection Frequency

Description
The frequency with which stacks are collected.
Related Name
stacks_collection_frequency
Default Value
5.0 second(s)
API Name
stacks_collection_frequency
Required
false

Stacks Collection Method

Description
The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name
stacks_collection_method
Default Value
jstack
API Name
stacks_collection_method

Required

true

Suppress Parameter Validation: S3 Gateway TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: S3 Gateway TLS/SSL Server Keystore Key Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway TLS/SSL Server Keystore Key Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_keypassword

Required

true

Suppress Parameter Validation: S3 Gateway TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location
Required
true

Suppress Parameter Validation: S3 Gateway TLS/SSL Server Keystore File Password

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway TLS/SSL Server Keystore File Password parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ssl_server_keystore_password
Required
true

Suppress Parameter Validation: Stacks Collection Directory

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.
Related Name
Default Value
false
API Name
role_config_suppression_stacks_collection_directory
Required
true

Suppress Health Test: Audit Pipeline Test

Description
Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name
Default Value
false
API Name
role_health_suppression_ozone_s3_gateway_audit_health
Required
true

Suppress Health Test: File Descriptors

Description

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_s3_gateway_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_s3_gateway_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_s3_gateway_log_directory_free_space

Required

true

Suppress Health Test: Otelcol Health**Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name`role_health_suppression_ozone_s3_gateway_otelcol_health`**Required**`true`**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**`false`**API Name**`role_health_suppression_ozone_s3_gateway_scm_health`**Required**`true`**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**`false`**API Name**`role_health_suppression_ozone_s3_gateway_swap_memory_usage`**Required**`true`**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**`false`**API Name**`role_health_suppression_ozone_s3_gateway_swap_memory_usage_rate`**Required**`true`

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_s3_gateway_unexpected_exits

Required

true

Service-Wide**Advanced****Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

For advanced use only, a string to be inserted into ozone-conf/ozone-site.xml. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

ozone-conf/ozone-site.xml_service_safety_valve

Required

false

Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

For advanced use only, a string to be inserted into ozone-conf/ssl-client.xml. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value****API Name**

ozone-conf/ssl-client.xml_service_safety_valve

Required

false

Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml**Description**

For advanced use only, a string to be inserted into ozone-conf/ssl-server.xml. Applies to configurations of all roles in this service except client configuration.

Related Name**Default Value**

API Name	ozone-conf/ssl-server.xml_service_safety_valve
Required	false

Ozone Service Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	OZONE_service_env_safety_valve
Required	false

System Group

Description	The group that this service's processes should run as.
Related Name	
Default Value	hdfs
API Name	process_groupname
Required	true

System User

Description	The user that this service's processes should run as.
Related Name	
Default Value	hdfs
API Name	process_username
Required	true

Monitoring

Enable Service Level Health Alerts

Description	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	

Default Value

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Healthy Ozone DataNode Monitoring Thresholds**Description**

The health test thresholds of the overall Ozone DataNode health. The check returns "Concerning" health if the percentage of "Healthy" Ozone DataNodes falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Ozone DataNodes falls below the critical threshold.

Related Name**Default Value**

Warning: 99.0 %, Critical: 90.0 %

API Name

OZONE_OZONE_DATANODE_healthy_thresholds

Required

false

Healthy Ozone Manager Monitoring Thresholds**Description**

The health test thresholds of the overall Ozone Manager health. The check returns "Concerning" health if the percentage of "Healthy" Ozone Managers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Ozone Managers falls below the critical threshold.

Related Name**Default Value**

Warning: 75.0 %, Critical: 50.0 %

API Name

OZONE_OZONE_MANAGER_healthy_thresholds

Required

false

Healthy Storage Container Manager Monitoring Thresholds

Description

The health test thresholds of the overall Storage Container Manager health. The check returns "Concerning" health if the percentage of "Healthy" Storage Container Managers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Storage Container Managers falls below the critical threshold.

Related Name

Default Value

Warning: 75.0 %, Critical: 50.0 %

API Name

OZONE_STORAGE_CONTAINER_MANAGER_healthy_thresholds

Required

false

Service Triggers

Description

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name

Default Value

[]

API Name

service_triggers

Required

true

Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

Related Name

Default Value

API Name

smon_derived_configs_safety_valve

Required

false

Other

CM API Bucket Owner

Description

Name of the role to use to get credentials for the kerberos principal to set the owner when creating a bucket via CM APIs. If no role name is specified, the Hive kerberos principal is used by default.

Related Name

cm.api.bucket.owner

Default Value

API Name

cm.api.bucket.owner

Required

false

Ozone HttpFS Gateway Proxy User Groups

Description

Comma-delimited list of groups to allow the Ozone HttpFS Gateway to impersonate. To disable entirely, use a string that does not correspond to a group name, such as '_no_group_'

Related Name

hadoop.proxyuser.httpfs.groups

Default Value

*

API Name

hadoop.proxyuser.httpfs.groups

Required

true

Ozone HttpFS Gateway Proxy User Hosts

Description

Comma-delimited list of hosts to allow the Ozone HttpFS Gateway to impersonate. To disable entirely, use a string that does not correspond to a group name, such as '_no_group_'

Related Name

hadoop.proxyuser.httpfs.hosts

Default Value

*

API Name

hadoop.proxyuser.httpfs.hosts

Required

true

Hue Proxy User Groups

Description	Comma-delimited list of groups to allow the Hue user to impersonate.To disable entirely, use a string that does not correspond to a group name, such as '_no_group_'
Related Name	hadoop.proxyuser.hue.groups
Default Value	*
API Name	hadoop.proxyuser.hue.groups
Required	true

Hue Proxy User Hosts

Description	Comma-delimited list of hosts to allow the Hue user to impersonate.To disable entirely, use a string that does not correspond to a group name, such as '_no_group_'
Related Name	hadoop.proxyuser.hue.hosts
Default Value	*
API Name	hadoop.proxyuser.hue.hosts
Required	true

Ozone Proxy User Groups

Description	Comma-delimited list of groups to allow the Ozone user to impersonate.To disable entirely, use a string that does not correspond to a group name, such as '_no_group_'
Related Name	hadoop.proxyuser.om.groups
Default Value	*
API Name	hadoop.proxyuser.om.groups
Required	true

Ozone Proxy User Hosts

Description	Comma-delimited list of hosts to allow the Ozone user to impersonate.To disable entirely, use a string that does not correspond to a group name, such as '_no_group_'
Related Name	hadoop.proxyuser.om.hosts

Default Value

*

API Name

hadoop.proxyuser.om.hosts

Required

true

Choose RocksDB profile**Description**

This property allows user to pick a configuration that tunes the RocksDB settings for the hardware it is running on. Right now, we have SSD and DISK as profile options.

Related Name

hdds.db.profile

Default Value

DISK

API Name

hdds.db.profile

Required

false

Enable HDDS gRPC Server TLS**Description**

Enable HDDS gRPC server TLS on this cluster. Please note this won't take effect unless Kerberos Authentication (ozone.security.enabled) is enabled as well.

Related Name

hdds.grpc.tls.enabled

Default Value

false

API Name

hdds.grpc.tls.enabled

Required

false

Ozone Prometheus Endpoint Token**Description**

Enables token based authentication for Prometheus servlet endpoints. This will disable SPNEGO based authentication on the endpoints.

Related Name

hdds.prometheus.endpoint.token

Default Value**API Name**

hdds.prometheus.endpoint.token

Required

false

HDFS Service

Description

Name of the HDFS service that this Ozone service instance depends on

Related Name**Default Value****API Name**

hdfs_service

Required

false

Ozone Administrators

Description

A comma separated list of Kerberos principals of Ozone Administrators. This will be effective only when security is enabled.

Related Name

ozone.administrators

Default Value**API Name**

ozone.administrators

Required

false

Ozone Replication Factor

Description

Default replication factor value for keys stored in Ozone. The actual number of replications can be specified when writing the key. The default is used if replication value is not specified. Supported values: 1 and 3.

Related Name

ozone.replication

Default Value

3

API Name

ozone.replication

Required

true

Ozone Incremental Replication Extra Snapshots to Keep

Description

How many extra snapshots to keep that have been created by incremental Ozone replication on source and target clusters. By using the default value (0) only the snapshot from the latest incremental replication will be kept.

Related Name

ozone.replication.incremental.snapshots.keep

Default Value

0

API Name	ozone.replication.incremental.snapshots.keep
Required	false

Ozone SCM Primordial Node ID

Description	SCM Primordial Node ID is the hostname of the SCM which should act as a Root Certificate Authority(CA) for Ozone during security initialization. It is mandatory to have a Primordial Node ID when there is more than one SCM instance configured.
Related Name	ozone.scm.primordial.node.id
Default Value	
API Name	ozone.scm.primordial.node.id
Required	false

Ozone SCM Service ID

Description	A final alphanumerical name to identify this Ozone service. The value is configured during installation, and should not be modified after that, as any change in the service id may cause service disruption.
Related Name	ozone.scm.service.id
Default Value	scm1
API Name	ozone.scm.service.id
Required	true

Enable Kerberos Authentication

Description	Enables Kerberos authentication for Ozone.
Related Name	ozone.security.enabled
Default Value	false
API Name	ozone.security.enabled
Required	false

Enable Kerberos Authentication for HTTP web consoles

Description

Enables Kerberos authentication for Ozone HTTP web consoles for all roles of this service using the SPNEGO protocol. Note: This is effective only if Kerberos is enabled for the Ozone service.

Related Name

ozone.security.http.kerberos.enabled

Default Value

false

API Name

ozone.security.http.kerberos.enabled

Required

false

Ozone Service ID

Description

A final alphanumerical name to identify this Ozone service. The value is configured during installation, and should not be modified after that, as any change in the service id may cause service disruption.

Related Name

ozone.service.id

Default Value

API Name

ozone.service.id

Required

true

Ozone Basic Health Check Enabled

Description

Determines if the Ozone Basic health check is enabled.

Related Name

ozone_basic_health_check_enabled

Default Value

true

API Name

ozone_basic_health_check_enabled

Required

false

Ozone Basic Health Check's Keystore's Key Encryption Algorithm

Description

Ozone Basic Health Check's Keystore's Key Encryption Algorithm

Related Name

ozone_basic_health_check_keystore_key_encryption_algo

Default Value

AES

API Name
ozone_basic_health_check_keystore_key_encryption_algo
Required
false

Ozone Basic Health Check's Keystore Type

Description
Ozone Basic Health Check's Keystore Type
Related Name
ozone_basic_health_check_keystore_type
Default Value
JCEKS
API Name
ozone_basic_health_check_keystore_type
Required
false

Ozone Basic Health Check's Timeout

Description
Ozone Basic Health Check's Timeout
Related Name
ozone_basic_health_check_timeout
Default Value
1 minute(s)
API Name
ozone_basic_health_check_timeout
Required
false

Ozone Java Options

Description
These arguments will be passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags would be passed here.
Related Name
ozone_java_opts
Default Value
java_args
API Name
ozone_java_opts
Required
false

Ranger Ozone Plugin Hdfs Audit Directory

Description
The DFS path on which Ranger audits are written.

Related Name	ranger_ozone_plugin_hdfs_audit_directory
Default Value	\$ranger_base_audit_url/ozone
API Name	ranger_ozone_plugin_hdfs_audit_directory
Required	false

RANGER Service

Description	Name of the RANGER service that this Ozone service instance depends on
Related Name	
Default Value	
API Name	ranger_service
Required	false

Solr Service

Description	Name of the Solr service that this Ozone service instance depends on
Related Name	
Default Value	
API Name	solr_service
Required	false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Configuration Validator: Deploy Directory**Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_client_config_root_dir

Required

true

Suppress Configuration Validator: Datanode Ratis IPC Port for Admin Requests**Description**

Whether to suppress configuration warnings produced by the Datanode Ratis IPC Port for Admin Requests configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_dfs.container.ratis.admin.port

Required

true

Suppress Configuration Validator: Datanode Ratis Metadata Directory**Description**

Whether to suppress configuration warnings produced by the Datanode Ratis Metadata Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_dfs.container.ratis.datanode.storage.dir

Required

true

Suppress Configuration Validator: Datanode Ratis IPC Port for Server-to-Server Communication**Description**

Whether to suppress configuration warnings produced by the Datanode Ratis IPC Port for Server-to-Server Communication configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_dfs.container.ratis.server.port

Required

true

Suppress Configuration Validator: Balancing Interval

Description

Whether to suppress configuration warnings produced by the Balancing Interval configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_hdds.container.balancer.balancing.iteration.interval

Required

true

Suppress Configuration Validator: Exclude Containers from Balancing

Description

Whether to suppress configuration warnings produced by the Exclude Containers from Balancing configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_hdds.container.balancer.exclude.containers

Required

true

Suppress Configuration Validator: Exclude Datanodes

Description

Whether to suppress configuration warnings produced by the Exclude Datanodes configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_hdds.container.balancer.exclude.datanodes

Required

true

Suppress Configuration Validator: Include Datanodes

Description

Whether to suppress configuration warnings produced by the Include Datanodes configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_hdds.container.balancer.include.datanodes

Required

true

Suppress Configuration Validator: Container Move Replication Timeout**Description**

Whether to suppress configuration warnings produced by the Container Move Replication Timeout configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.container.balancer.move.replication.timeout

Required

true

Suppress Configuration Validator: Container Move Timeout**Description**

Whether to suppress configuration warnings produced by the Container Move Timeout configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.container.balancer.move.timeout

Required

true

Suppress Configuration Validator: Maximum Size Entering Target**Description**

Whether to suppress configuration warnings produced by the Maximum Size Entering Target configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.container.balancer.size.entering.target.max

Required

true

Suppress Configuration Validator: Maximum Size Leaving Source**Description**

Whether to suppress configuration warnings produced by the Maximum Size Leaving Source configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.container.balancer.size.leaving.source.max

Required

true

Suppress Configuration Validator: Maximum Size to Move in Balancing**Description**

Whether to suppress configuration warnings produced by the Maximum Size to Move in Balancing configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.container.balancer.size.moved.max.per.iteration

Required

true

Suppress Configuration Validator: Datanode Data Directory**Description**

Whether to suppress configuration warnings produced by the Datanode Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.datanode.dir

Required

true

Suppress Configuration Validator: Over Replication Processing Interval**Description**

Whether to suppress configuration warnings produced by the Over Replication Processing Interval configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.scm.replication.over.replicated.interval

Required

true

Suppress Configuration Validator: Replication Thread Interval

Description

Whether to suppress configuration warnings produced by the Replication Thread Interval configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.scm.replication.thread.interval

Required

true

Suppress Configuration Validator: Under Replication Processing Interval

Description

Whether to suppress configuration warnings produced by the Under Replication Processing Interval configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.scm.replication.under.replicated.interval

Required

true

Suppress Configuration Validator: Datanode Container Protocol ACL

Description

Whether to suppress configuration warnings produced by the Datanode Container Protocol ACL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.security.client.datanode.container.protocol.acl

Required

true

Suppress Configuration Validator: SCM Client Certificate Protocol ACL

Description

Whether to suppress configuration warnings produced by the SCM Client Certificate Protocol ACL configuration validator.

Related Name**Default Value**

false

API Name`role_config_suppression_hdds.security.client.scm.certificate.protocol.acl`**Required**`true`**Suppress Configuration Validator: Hive Proxy User Groups for Ozone HttpFS****Description**

Whether to suppress configuration warnings produced by the Hive Proxy User Groups for Ozone HttpFS configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_httpfs.proxyuser.hive.groups`**Required**`true`**Suppress Configuration Validator: Hive Proxy User Hosts for Ozone HttpFS****Description**

Whether to suppress configuration warnings produced by the Hive Proxy User Hosts for Ozone HttpFS configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_httpfs.proxyuser.hive.hosts`**Required**`true`**Suppress Configuration Validator: Hue Proxy User Groups for Ozone HttpFS****Description**

Whether to suppress configuration warnings produced by the Hue Proxy User Groups for Ozone HttpFS configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_httpfs.proxyuser.hue.groups`**Required**`true`**Suppress Configuration Validator: Hue Proxy User Hosts for Ozone HttpFS****Description**

Whether to suppress configuration warnings produced by the Hue Proxy User Hosts for Ozone HttpFS configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_httpfs.proxyuser.hue.hosts

Required

true

Suppress Configuration Validator: HttpFS Gateway Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the HttpFS Gateway Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_httpfs_gateway_role_env_safety_valve

Required

true

Suppress Configuration Validator: JMX Exporter Port**Description**

Whether to suppress configuration warnings produced by the JMX Exporter Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Configuration Validator: JMX Exporter configuration YAML**Description**

Whether to suppress configuration warnings produced by the JMX Exporter configuration YAML configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_yaml

Required

true

Suppress Configuration Validator: Role-Specific Kerberos Principal**Description**

Whether to suppress configuration warnings produced by the Role-Specific Kerberos Principal configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_kerberos_role_princ_name

Required

true

Suppress Configuration Validator: Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Configuration Validator: Storage Container Manager Log Directory**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Configuration Validator: Topology Script File Name**Description**

Whether to suppress configuration warnings produced by the Topology Script File Name configuration validator.

Related Name**Default Value**

false

API Name

`role_config_suppression_net.topology.script.file.name`**Required**`true`**Suppress Configuration Validator: OM ID****Description**

Whether to suppress configuration warnings produced by the OM ID configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_om.id`**Required**`true`**Suppress Configuration Validator: Java Heap Size of Ozone Manager****Description**

Whether to suppress configuration warnings produced by the Java Heap Size of Ozone Manager configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_om_max_heap_size`**Required**`true`**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_oom_heap_dump_dir`**Required**`true`**Suppress Configuration Validator: OpenTelemetry Collector Exporters Section****Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Configuration Validator: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties**Description**

Whether to suppress configuration warnings produced by the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/dn-audit-log4j2.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-container-log4j2.properties**Description**

Whether to suppress configuration warnings produced by the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-container-log4j2.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/dn-container-log4j2.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/hadoop-metrics2.properties**Description**

Whether to suppress configuration warnings produced by the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/hadoop-metrics2.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/hadoop-metrics2.properties_client_config_safety_valve

Required

true

Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/hadoop-policy.xml**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/hadoop-policy.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/hadoop-policy.xml_role_safety_valve

Required

true

Suppress Configuration Validator: HttpFS Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/httpfs-site.xml**Description**

Whether to suppress configuration warnings produced by the HttpFS Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/httpfs-site.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/httpfs-site.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/om-audit-log4j2.properties**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/om-audit-log4j2.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/om-audit-log4j2.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml**Description**

Whether to suppress configuration warnings produced by the Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ozone-prometheus.yml_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

Whether to suppress configuration warnings produced by the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ozone-site.xml_client_config_safety_valve

Required

true

Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ozone-site.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/prometheus-token**Description**

Whether to suppress configuration warnings produced by the Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/prometheus-token configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/prometheus-token_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ranger-ozone-audit.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-policymgr-ssl.xml**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-policymgr-ssl.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ranger-ozone-policymgr-ssl.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ranger-ozone-security.xml_role_safety_valve

Required

true

Suppress Configuration Validator: S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/s3g-audit-log4j2.properties**Description**

Whether to suppress configuration warnings produced by the S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/s3g-audit-log4j2.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/s3g-audit-log4j2.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/scm-audit-log4j2.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

Whether to suppress configuration warnings produced by the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ssl-client.xml_client_config_safety_valve

Required

true

Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml configuration validator.

Related Name**Default Value**

false

API Name	role_config_suppression_ozone-conf/ssl-client.xml_role_safety_valve
Required	true

Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml

Description	Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone-conf/ssl-server.xml_role_safety_valve
Required	true

Suppress Configuration Validator: Ozone Datanode HTTP Bind Hostname

Description	Whether to suppress configuration warnings produced by the Ozone Datanode HTTP Bind Hostname configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone.datanode.http-bind-host
Required	true

Suppress Configuration Validator: Ozone Datanode HTTP Web UI Port

Description	Whether to suppress configuration warnings produced by the Ozone Datanode HTTP Web UI Port configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone.datanode.http-port
Required	true

Suppress Configuration Validator: Secure Ozone Datanode HTTPS Bind Hostname

Description	
--------------------	--

Whether to suppress configuration warnings produced by the Secure Ozone Datanode HTTPS Bind Hostname configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.datanode.https-bind-host

Required

true

Suppress Configuration Validator: Ozone Datanode Port (TLS/SSL)**Description**

Whether to suppress configuration warnings produced by the Ozone Datanode Port (TLS/SSL) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.datanode.https-port

Required

true

Suppress Configuration Validator: HSTS Header for Ozone SCM UI**Description**

Whether to suppress configuration warnings produced by the HSTS Header for Ozone SCM UI configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.http.header.strict-transport-security

Required

true

Suppress Configuration Validator: Ozone HttpFS Gateway HTTP Bind Hostname**Description**

Whether to suppress configuration warnings produced by the Ozone HttpFS Gateway HTTP Bind Hostname configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.httpfs.http-bind-host

Required

true

Suppress Configuration Validator: Ozone HttpFS Gateway HTTP Web UI Port

Description

Whether to suppress configuration warnings produced by the Ozone HttpFS Gateway HTTP Web UI Port configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ozone.httpfs.http-port

Required

true

Suppress Configuration Validator: Storage Container Manager Metadata Directory

Description

Whether to suppress configuration warnings produced by the Storage Container Manager Metadata Directory configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ozone.metadata.dirs

Required

true

Suppress Configuration Validator: Ozone Manager Data Directory

Description

Whether to suppress configuration warnings produced by the Ozone Manager Data Directory configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ozone.om.db.dirs

Required

true

Suppress Configuration Validator: Ozone Manager HTTP Bind Hostname

Description

Whether to suppress configuration warnings produced by the Ozone Manager HTTP Bind Hostname configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ozone.om.http-bind-host

Required

true

Suppress Configuration Validator: Ozone Manager HTTP Web UI Port**Description**

Whether to suppress configuration warnings produced by the Ozone Manager HTTP Web UI Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.http-port

Required

true

Suppress Configuration Validator: Secure Ozone Manager HTTPS Bind Hostname**Description**

Whether to suppress configuration warnings produced by the Secure Ozone Manager HTTPS Bind Hostname configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.https-bind-host

Required

true

Suppress Configuration Validator: Secure Ozone Manager Web UI Port (TLS/SSL)**Description**

Whether to suppress configuration warnings produced by the Secure Ozone Manager Web UI Port (TLS/SSL) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.https-port

Required

true

Suppress Configuration Validator: New Ozone Manager Nodes**Description**

Whether to suppress configuration warnings produced by the New Ozone Manager Nodes configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.new.added.nodes

Required

true

Suppress Configuration Validator: Ozone Manager Ratis port**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Ratis port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.ratis-port

Required

true

Suppress Configuration Validator: Ozone Manager Ratis Storage Directory**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Ratis Storage Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.ratis.storage.dir

Required

true

Suppress Configuration Validator: Ozone Manager RPC port**Description**

Whether to suppress configuration warnings produced by the Ozone Manager RPC port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.om.rpc-port

Required

true

Suppress Configuration Validator: CA File Path**Description**

Whether to suppress configuration warnings produced by the CA File Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.ca.file

Required

true

Suppress Configuration Validator: Prometheus Data Retention time.**Description**

Whether to suppress configuration warnings produced by the Prometheus Data Retention time. configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.data.retention.time

Required

true

Suppress Configuration Validator: Prometheus Data Directory**Description**

Whether to suppress configuration warnings produced by the Prometheus Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.db.dir

Required

true

Suppress Configuration Validator: Prometheus server extra flags.**Description**

Whether to suppress configuration warnings produced by the Prometheus server extra flags. configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.prometheus.extra.flags

Required
true

Suppress Configuration Validator: Prometheus HTTP Port

Description
Whether to suppress configuration warnings produced by the Prometheus HTTP Port configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_ozone.prometheus.http-port
Required
true

Suppress Configuration Validator: Prometheus server log level.

Description
Whether to suppress configuration warnings produced by the Prometheus server log level. configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_ozone.prometheus.log.level
Required
true

Suppress Configuration Validator: Recon Data Directory

Description
Whether to suppress configuration warnings produced by the Recon Data Directory configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_ozone.recon.db.dir
Required
true

Suppress Configuration Validator: Recon HTTP Bind Hostname

Description
Whether to suppress configuration warnings produced by the Recon HTTP Bind Hostname configuration validator.
Related Name
Default Value

	false
API Name	role_config_suppression_ozone.recon.http-bind-host
Required	true

Suppress Configuration Validator: Recon HTTP Web UI Port

Description	Whether to suppress configuration warnings produced by the Recon HTTP Web UI Port configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone.recon.http-port
Required	true

Suppress Configuration Validator: Secure Recon HTTPS Bind Hostname

Description	Whether to suppress configuration warnings produced by the Secure Recon HTTPS Bind Hostname configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone.recon.https-bind-host
Required	true

Suppress Configuration Validator: Secure Recon Web UI Port (TLS/SSL)

Description	Whether to suppress configuration warnings produced by the Secure Recon Web UI Port (TLS/SSL) configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone.recon.https-port
Required	true

Suppress Configuration Validator: Recon OzoneManager Data Directory

Description	
-------------	--

Whether to suppress configuration warnings produced by the Recon OzoneManager Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.om.db.dir

Required

true

Suppress Configuration Validator: Recon RPC Port**Description**

Whether to suppress configuration warnings produced by the Recon RPC Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.rpc-port

Required

true

Suppress Configuration Validator: Recon StorageContainerManager Data Directory**Description**

Whether to suppress configuration warnings produced by the Recon StorageContainerManager Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.recon.scm.db.dirs

Required

true

Suppress Configuration Validator: Ozone S3 Gateway HTTP Bind Hostname**Description**

Whether to suppress configuration warnings produced by the Ozone S3 Gateway HTTP Bind Hostname configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.s3g.http-bind-host

Required

true

Suppress Configuration Validator: Ozone S3 Gateway HTTP Web UI Port

Description	Whether to suppress configuration warnings produced by the Ozone S3 Gateway HTTP Web UI Port configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone.s3g.http-port
Required	true

Suppress Configuration Validator: Secure Ozone S3 Gateway HTTPS Bind Hostname

Description	Whether to suppress configuration warnings produced by the Secure Ozone S3 Gateway HTTPS Bind Hostname configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone.s3g.https-bind-host
Required	true

Suppress Configuration Validator: Secure Ozone S3 Gateway Web UI Port (TLS/SSL)

Description	Whether to suppress configuration warnings produced by the Secure Ozone S3 Gateway Web UI Port (TLS/SSL) configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_ozone.s3g.https-port
Required	true

Suppress Configuration Validator: Storage Container Manager Block Client port

Description	Whether to suppress configuration warnings produced by the Storage Container Manager Block Client port configuration validator.
Related Name	
Default Value	false

API Name`role_config_suppression_ozone.scm.block.client.port`**Required**`true`**Suppress Configuration Validator: Storage Container Manager Client port****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Client port configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ozone.scm.client.port`**Required**`true`**Suppress Configuration Validator: Datanode ID Directory****Description**

Whether to suppress configuration warnings produced by the Datanode ID Directory configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ozone.scm.datanode.id.dir`**Required**`true`**Suppress Configuration Validator: Storage Container Manager Datanode port****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Datanode port configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ozone.scm.datanode.port`**Required**`true`**Suppress Configuration Validator: Storage Container Manager Data Directory****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Data Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.db.dirs

Required

true

Suppress Configuration Validator: Storage Container Manager GRPC port**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager GRPC port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.grpc.port

Required

true

Suppress Configuration Validator: Storage Container Manager Ratis Storage Directory**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Ratis Storage Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.ha.ratis.storage.dir

Required

true

Suppress Configuration Validator: Storage Container Manager HTTP Bind Hostname**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager HTTP Bind Hostname configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.http-bind-host

Required

true

Suppress Configuration Validator: Storage Container Manager HTTP Web UI Port**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager HTTP Web UI Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.http-port

Required

true

Suppress Configuration Validator: Secure Storage Container Manager HTTPS Bind Hostname**Description**

Whether to suppress configuration warnings produced by the Secure Storage Container Manager HTTPS Bind Hostname configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.https-bind-host

Required

true

Suppress Configuration Validator: Secure Storage Container Manager Web UI Port (TLS/SSL)**Description**

Whether to suppress configuration warnings produced by the Secure Storage Container Manager Web UI Port (TLS/SSL) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.https-port

Required

true

Suppress Configuration Validator: Storage Container Manager Ratis port**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Ratis port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.ratis.port
Required
true

Suppress Configuration Validator: Storage Container Manager Security Service port

Description
Whether to suppress configuration warnings produced by the Storage Container Manager Security Service port configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_ozone.scm.security.service.port
Required
true

Suppress Configuration Validator: Ozone Server Replication Factor

Description
Whether to suppress configuration warnings produced by the Ozone Server Replication Factor configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_ozone.server.default.replication
Required
true

Suppress Configuration Validator: Ozone Server Replication Type

Description
Whether to suppress configuration warnings produced by the Ozone Server Replication Type configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_ozone.server.default.replication.type
Required
true

Suppress Configuration Validator: Java Heap Size of DataNode

Description
Whether to suppress configuration warnings produced by the Java Heap Size of DataNode configuration validator.
Related Name

Default Value

false

API Name

role_config_suppression_ozone_datanode_heap_size

Required

true

Suppress Configuration Validator: Ozone DataNode Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Ozone DataNode Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone_datanode_role_env_safety_valve

Required

true

Suppress Configuration Validator: Java Heap Size of HttpFS Gateway**Description**

Whether to suppress configuration warnings produced by the Java Heap Size of HttpFS Gateway configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone_httpfs_gateway_max_heap_size

Required

true

Suppress Configuration Validator: Ozone Manager Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Ozone Manager Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone_manager_role_env_safety_valve

Required

true

Suppress Configuration Validator: Ozone Prometheus Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Ozone Prometheus Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone_prometheus_role_env_safety_valve

Required

true

Suppress Configuration Validator: Java Heap Size of Recon**Description**

Whether to suppress configuration warnings produced by the Java Heap Size of Recon configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone_recon_max_heap_size

Required

true

Suppress Configuration Validator: Ozone Recon Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Ozone Recon Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone_recon_role_env_safety_valve

Required

true

Suppress Configuration Validator: Java Heap Size of S3 Gateway**Description**

Whether to suppress configuration warnings produced by the Java Heap Size of S3 Gateway configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone_s3_gateway_max_heap_size

Required

true

Suppress Configuration Validator: Role Specific System Group**Description**

Whether to suppress configuration warnings produced by the Role Specific System Group configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_process_groupname

Required

true

Suppress Configuration Validator: Role Specific System User**Description**

Whether to suppress configuration warnings produced by the Role Specific System User configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_process_username

Required

true

Suppress Configuration Validator: Prometheus Binary Location**Description**

Whether to suppress configuration warnings produced by the Prometheus Binary Location configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_prometheus.location

Required

true

Suppress Configuration Validator: Ranger Ozone Plugin Conf Path**Description**

Whether to suppress configuration warnings produced by the Ranger Ozone Plugin Conf Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ozone_plugin_conf_path

Required

true

Suppress Configuration Validator: Ranger Ozone Plugin Policy Cache Directory Path**Description**

Whether to suppress configuration warnings produced by the Ranger Ozone Plugin Policy Cache Directory Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ozone_plugin_policy_cache_directory

Required

true

Suppress Configuration Validator: Ranger Ozone Plugin Audit Solr Spool Directory Path**Description**

Whether to suppress configuration warnings produced by the Ranger Ozone Plugin Audit Solr Spool Directory Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ozone_plugin_solr_audit_spool_directory

Required

true

Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)**Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_rm_custom_resources

Required

true

Suppress Configuration Validator: Role Triggers**Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Configuration Validator: S3 Gateway Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the S3 Gateway Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_s3_gateway_role_env_safety_valve

Required

true

Suppress Configuration Validator: Java Heap Size of Storage Container Manager**Description**

Whether to suppress configuration warnings produced by the Java Heap Size of Storage Container Manager configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_scm_max_heap_size

Required

true

Suppress Configuration Validator: Storage Container Manager TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager TLS/SSL Trust Store File configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location
Required
true

Suppress Configuration Validator: Storage Container Manager TLS/SSL Trust Store Password

Description
Whether to suppress configuration warnings produced by the Storage Container Manager TLS/SSL Trust Store Password configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_ssl_client_truststore_password
Required
true

Suppress Configuration Validator: Storage Container Manager TLS/SSL Server Keystore Key Password

Description
Whether to suppress configuration warnings produced by the Storage Container Manager TLS/SSL Server Keystore Key Password configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_ssl_server_keystore_keypassword
Required
true

Suppress Configuration Validator: Storage Container Manager TLS/SSL Server Keystore File Location

Description
Whether to suppress configuration warnings produced by the Storage Container Manager TLS/SSL Server Keystore File Location configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_ssl_server_keystore_location
Required
true

Suppress Configuration Validator: Storage Container Manager TLS/SSL Server Keystore File Password

Description

Whether to suppress configuration warnings produced by the Storage Container Manager TLS/SSL Server Keystore File Password configuration validator.	
Related Name	
Default Value	false
API Name	role_config_suppression_ssl_server_keystore_password
Required	true

Suppress Configuration Validator: Stacks Collection Directory

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.	
Related Name	
Default Value	false
API Name	role_config_suppression_stacks_collection_directory
Required	true

Suppress Configuration Validator: Storage Container Manager Environment Advanced Configuration Snippet (Safety Valve)

Whether to suppress configuration warnings produced by the Storage Container Manager Environment Advanced Configuration Snippet (Safety Valve) configuration validator.	
Related Name	
Default Value	false
API Name	role_config_suppression_storage_container_manager_role_env_safety_valve
Required	true

Suppress Parameter Validation: CM API Bucket Owner

Whether to suppress configuration warnings produced by the built-in parameter validation for the CM API Bucket Owner parameter.	
Related Name	
Default Value	false
API Name	service_config_suppression_cm.api.bucket.owner

Required

true

Suppress Configuration Validator: Gateway Count Validator**Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_gateway_count_validator

Required

true

Suppress Parameter Validation: Ozone HttpFS Gateway Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone HttpFS Gateway Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_hadoop.proxyuser.httpfs.groups

Required

true

Suppress Parameter Validation: Ozone HttpFS Gateway Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone HttpFS Gateway Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_hadoop.proxyuser.httpfs.hosts

Required

true

Suppress Parameter Validation: Hue Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hue Proxy User Groups parameter.

Related Name**Default Value**

	false
API Name	service_config_suppression_hadoop.proxyuser.hue.groups
Required	true

Suppress Parameter Validation: Hue Proxy User Hosts

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Hue Proxy User Hosts parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_hadoop.proxyuser.hue.hosts
Required	true

Suppress Parameter Validation: Ozone Proxy User Groups

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Proxy User Groups parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_hadoop.proxyuser.om.groups
Required	true

Suppress Parameter Validation: Ozone Proxy User Hosts

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Proxy User Hosts parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_hadoop.proxyuser.om.hosts
Required	true

Suppress Parameter Validation: Ozone Prometheus Endpoint Token

Description	
-------------	--

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Prometheus Endpoint Token parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_hdds.prometheus.endpoint.token

Required

true

Suppress Configuration Validator: HttpFS Gateway Count Validator**Description**

Whether to suppress configuration warnings produced by the HttpFS Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_httpfs_gateway_count_validator

Required

true

Suppress Parameter Validation: Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ozone-conf/ozone-site.xml_service_safety_valve

Required

true

Suppress Parameter Validation: Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

Related Name**Default Value**

false

API Name`service_config_suppression_ozone-conf/ssl-client.xml_service_safety_valve`**Required**`true`**Suppress Parameter Validation: Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml parameter.

Related Name**Default Value**`false`**API Name**`service_config_suppression_ozone-conf/ssl-server.xml_service_safety_valve`**Required**`true`**Suppress Parameter Validation: Ozone Administrators****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Administrators parameter.

Related Name**Default Value**`false`**API Name**`service_config_suppression_ozone.administrators`**Required**`true`**Suppress Parameter Validation: Ozone SCM Primordial Node ID****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone SCM Primordial Node ID parameter.

Related Name**Default Value**`false`**API Name**`service_config_suppression_ozone.scm.primordial.node.id`**Required**`true`**Suppress Parameter Validation: Ozone SCM Service ID****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone SCM Service ID parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ozone.scm.service.id

Required

true

Suppress Parameter Validation: Ozone Service ID**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Service ID parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ozone.service.id

Required

true

Suppress Parameter Validation: Ozone Basic Health Check's Keystore's Key Encryption Algorithm**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Basic Health Check's Keystore's Key Encryption Algorithm parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ozone_basic_health_check_keystore_key_encryption_algo

Required

true

Suppress Parameter Validation: Ozone Basic Health Check's Keystore Type**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Basic Health Check's Keystore Type parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ozone_basic_health_check_keystore_type

Required

true

Suppress Configuration Validator: Ozone DataNode Count Validator

Description

Whether to suppress configuration warnings produced by the Ozone DataNode Count Validator configuration validator.

Related Name

Default Value

false

API Name

service_config_suppression_ozone_datanode_count_validator

Required

true

Suppress Parameter Validation: Ozone Java Options

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Java Options parameter.

Related Name

Default Value

false

API Name

service_config_suppression_ozone_java_opts

Required

true

Suppress Configuration Validator: Ozone Manager Count Validator

Description

Whether to suppress configuration warnings produced by the Ozone Manager Count Validator configuration validator.

Related Name

Default Value

false

API Name

service_config_suppression_ozone_manager_count_validator

Required

true

Suppress Configuration Validator: Ozone Prometheus Count Validator

Description

Whether to suppress configuration warnings produced by the Ozone Prometheus Count Validator configuration validator.

Related Name

Default Value

false

API Name

service_config_suppression_ozone_prometheus_count_validator

Required

true

Suppress Configuration Validator: Ozone Recon Count Validator**Description**

Whether to suppress configuration warnings produced by the Ozone Recon Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_ozone_recon_count_validator

Required

true

Suppress Parameter Validation: Ozone Service Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ozone_service_env_safety_valve

Required

true

Suppress Parameter Validation: System Group**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_groupname

Required

true

Suppress Parameter Validation: System User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_process_username

Required

true

Suppress Parameter Validation: Ranger Ozone Plugin Hdfs Audit Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Ozone Plugin Hdfs Audit Directory parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_ranger_ozone_plugin_hdfs_audit_directory

Required

true

Suppress Configuration Validator: S3 Gateway Count Validator**Description**

Whether to suppress configuration warnings produced by the S3 Gateway Count Validator configuration validator.

Related Name**Default Value**

false

API Name

service_config_suppression_s3_gateway_count_validator

Required

true

Suppress Parameter Validation: Service Triggers**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

Related Name**Default Value**

false

API Name

service_config_suppression_service_triggers

Required

true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

Related Name

Default Value

false

API Name

service_config_suppression_smon_derived_configs_safety_valve

Required

true

Suppress Configuration Validator: Storage Container Manager Count Validator

Description

Whether to suppress configuration warnings produced by the Storage Container Manager Count Validator configuration validator.

Related Name

Default Value

false

API Name

service_config_suppression_storage_container_manager_count_validator

Required

true

Suppress Health Test: Ozone Basic Canary

Description

Whether to suppress the results of the Ozone Basic Canary health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

service_health_suppression_ozone_basic_health_check

Required

true

Suppress Health Test: Ozone DataNode Health

Description

Whether to suppress the results of the Ozone DataNode Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value	false
API Name	service_health_suppression_ozone_ozone_datanode_healthy
Required	true

Suppress Health Test: Ozone Manager Health

Description	Whether to suppress the results of the Ozone Manager Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	service_health_suppression_ozone_ozone_manager_healthy
Required	true

Suppress Health Test: Storage Container Manager Health

Description	Whether to suppress the results of the Storage Container Manager Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	service_health_suppression_ozone_storage_container_manager_healthy
Required	true

Storage Container Manager

Advanced

Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, a string to be inserted into log4j.properties for this role only.
Related Name	
Default Value	
API Name	log4j_safety_valve
Required	

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name

Default Value

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name

Default Value

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name
Default Value
true
API Name
oom_sigkill_enabled
Required
true

Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/hadoop-policy.xml

Description
For advanced use only. A string to be inserted into ozone-conf/hadoop-policy.xml for this role only.
Related Name
Default Value
API Name
ozone-conf/hadoop-policy.xml_role_safety_valve
Required
false

Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml

Description
For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.
Related Name
Default Value
API Name
ozone-conf/ozone-site.xml_role_safety_valve
Required
false

Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties

Description
For advanced use only. A string to be inserted into ozone-conf/scm-audit-log4j2.properties for this role only.
Related Name
Default Value
API Name
ozone-conf/scm-audit-log4j2.properties_role_safety_valve
Required
false

Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-client.xml_role_safety_valve

Required

false

Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml**Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

Related Name**Default Value****API Name**

ozone-conf/ssl-server.xml_role_safety_valve

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Role Specific System Group**Description**

The group that this role's processes should run as.

Related Name**Default Value**

hdfs

API Name

process_groupname

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Role Specific System User

Description

The user that this role's processes should run as.

Related Name**Default Value**

hdfs
API Name
process_username
Required
true

Storage Container Manager Environment Advanced Configuration Snippet (Safety Valve)

Description
For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
Related Name
Default Value
API Name
STORAGE_CONTAINER_MANAGER_role_env_safety_valve
Required
false

Logs

Storage Container Manager Log Directory

Description
The log directory for log files of the role Storage Container Manager.
Related Name
log.dir
Default Value
/var/log/hadoop-ozone
API Name
log_dir
Required
false

Storage Container Manager Logging Threshold

Description
The minimum log level for Storage Container Manager logs
Related Name
Default Value
INFO
API Name
log_threshold
Required
false

Storage Container Manager Maximum Log File Backups

Description

	The maximum number of rolled log files to keep for Storage Container Manager logs. Typically used by log4j or logback.
Related Name	
Default Value	10
API Name	max_log_backup_index
Required	false

Storage Container Manager Max Log Size

Description	The maximum size, in megabytes, per log file for Storage Container Manager logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB
API Name	max_log_size
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts

Required
false

Enable JMX Exporter (beta)

Description
JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. See the JMX Exporter documentation.
Related Name
Default Value
false
API Name
jmx_exporter_enabled
Required
true

JMX Exporter Port

Description
JMX Exporter needs a port to implement a Prometheus exporter.
Related Name
Default Value
API Name
jmx_exporter_port
Required
false

JMX Exporter configuration YAML

Description
This configuration is passed to JMX Exporter as it is. See the JMX Exporter documentation.
Related Name
Default Value
API Name
jmx_exporter_yaml
Required
false

Log Directory Free Space Monitoring Absolute Thresholds

Description
The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
Related Name
Default Value
Warning: 10 GiB, Critical: 5 GiB
API Name

`log_directory_free_space_absolute_thresholds`**Required**`false`**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**`Warning: Never, Critical: Never`**API Name**`log_directory_free_space_percentage_thresholds`**Required**`false`**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

Related Name**Default Value****API Name**`monitoring_metric_filter`**Required**`false`

OpenTelemetry Collector Exporters Section

Description

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section

Description

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

extensions: basicauth/common: client_auth: username:
\$ROLE_PARAM(otelcol_remote_write_user) password:
'\$ROLE_PARAM(otelcol_remote_write_password)'

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section

Description

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name

Default Value

API Name

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE,

`$ROLE_PARAM(my_parameter_name)` - e.g.: a port parameter for the role's metrics, `$DECODE_B64(...)` and `$DECODE_URL(...)` to decode encoded parameters, `$ENV_PARAM(name)` to fetch params from the process' environment, `$SYS_PARAM(name)` to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_password)` expression. Specify `$INFRA(cdp_request_signer_password)` when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name**Default Value**

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL**Description**

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_url)` expression. Specify `$INFRA(cdp_request_signer_url)` when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

`$INFRA(cdp_request_signer_url)`

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username**Description**

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the `$ROLE_PARAM(otelcol_remote_write_user)` expression. Specify `$INFRA(cdp_request_signer_username)` when forwarding to Cloudera Observability central monitoring.

Related Name	
Default Value	\$INFRA(cdp_request_signer_username)
API Name	otelcol_remote_write_user
Required	false

OpenTelemetry Collector Service Section

Description	Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.
Related Name	
Default Value	
API Name	otelcol_service
Required	false

Enable OpenTelemetry Collector (beta)

Description	OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.
Related Name	
Default Value	false
API Name	otelcol_should_collect
Required	true

Swap Memory Usage Rate Thresholds

Description	The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.
Related Name	
Default Value	Warning: Never, Critical: Never
API Name	process_swap_memory_rate_thresholds
Required	false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

	[]
API Name	role_triggers
Required	true

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	storage_container_manager_fd_thresholds
Required	false

Storage Container Manager Host Health Test

Description	When computing the overall Storage Container Manager health, consider the host's health.
Related Name	
Default Value	true
API Name	storage_container_manager_host_health_enabled
Required	false

Storage Container Manager Process Health Test

Description	Enables the health test that the Storage Container Manager's process state is consistent with the role configuration
Related Name	
Default Value	true
API Name	storage_container_manager_scm_health_enabled
Required	false

Unexpected Exits Thresholds

Description	The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.
-------------	---

Related Name
Default Value
Warning: Never, Critical: Any
API Name
unexpected_exits_thresholds
Required
false

Unexpected Exits Monitoring Period

Description
The period to review when computing unexpected exits.
Related Name
Default Value
5 minute(s)
API Name
unexpected_exits_window
Required
false

Other

Graceful Shutdown Timeout

Description
The timeout in milliseconds to wait for graceful shutdown to complete.
Related Name
Default Value
2 minute(s)
API Name
graceful_stop_timeout
Required
false

Balancing Interval

Description
The interval period between each iteration of Container Balancer. The current default is 70m. This means that Container Balancer will balance every 70 minutes. Units supported: d, h, m, s, ms.
Related Name
hdds.container.balancer.balancing.iteration.interval
Default Value
API Name
hdds.container.balancer.balancing.iteration.interval
Required
false

Maximum Percentage of Datanodes Involved in Balancing

Description

Maximum percentage of healthy, in-service datanodes that can be involved in balancing in one iteration (for example, '20' for 20%).

Related Name

hdds.container.balancer.datanodes.involved.max.percentage.per.iteration

Default Value

20

API Name

hdds.container.balancer.datanodes.involved.max.percentage.per.iteration

Required

false

Exclude Containers from Balancing

Description

Containers to exclude from balancing. Specified as a string of Container IDs (for example, '1, 2, 3').

Related Name

hdds.container.balancer.exclude.containers

Default Value**API Name**

hdds.container.balancer.exclude.containers

Required

false

Exclude Datanodes

Description

A comma separated string of Datanode hostnames or IP addresses that will be excluded from balancing.

Related Name

hdds.container.balancer.exclude.datanodes

Default Value**API Name**

hdds.container.balancer.exclude.datanodes

Required

false

Include Datanodes

Description

A comma separated string of Datanode hostnames or IP addresses that will be the only participants in balancing.

Related Name

hdds.container.balancer.include.datanodes

Default Value**API Name**

hdds.container.balancer.include.datanodes

Required

false

Number of Balancing Iterations

Description

Number of iterations that Container Balancer will run for.

Related Name

hdds.container.balancer.iterations

Default Value

10

API Name

hdds.container.balancer.iterations

Required

false

Container Move Replication Timeout

Description

The amount of time to allow a single container's replication from source to target as part of container move. The current default is 50m. This means that if "hdds.container.balancer.move.timeout" is 65m, then out of those 65 minutes 50 minutes will be the deadline for replication to complete. The value of this configuration should always be less than "hdds.container.balancer.move.timeout". Units supported: d, h, m, s, ms.

Related Name

hdds.container.balancer.move.replication.timeout

Default Value

API Name

hdds.container.balancer.move.replication.timeout

Required

false

Container Move Timeout

Description

The amount of time to allow a single container to move from source to target. The current default is 65m. This means that a container is allowed a total of 65 minutes to complete its move from a source Datanode to a target Datanode, as part of container balancing. Units supported: d, h, m, s, ms.

Related Name

hdds.container.balancer.move.timeout

Default Value

API Name

hdds.container.balancer.move.timeout

Required

false

Maximum Size Entering Target

Description

The maximum size that can enter a target datanode in each iteration while balancing. This is the sum of data from multiple sources. Units supported: eb, pb, tb, gb, mb, kb, b.

Related Name

hdds.container.balancer.size.entering.target.max

Default Value

26gb

API Name

hdds.container.balancer.size.entering.target.max

Required

false

Maximum Size Leaving Source

Description

The maximum size that can leave a source datanode in each iteration while balancing. This is the sum of data moving to multiple targets. Units supported: eb, pb, tb, gb, mb, kb, b.

Related Name

hdds.container.balancer.size.leaving.source.max

Default Value

26gb

API Name

hdds.container.balancer.size.leaving.source.max

Required

false

Maximum Size to Move in Balancing

Description

The maximum size of data that will be moved by Container Balancer in one iteration. Units supported: eb, pb, tb, gb, mb, kb, b.

Related Name

hdds.container.balancer.size.moved.max.per.iteration

Default Value

500gb

API Name

hdds.container.balancer.size.moved.max.per.iteration

Required

false

Balancing Threshold

Description

The percentage deviation from average utilization, after which a node will be rebalanced (for example, '10' for 10%).

Related Name

hdds.container.balancer.utilization.threshold

Default Value

10.0

API Name

hdds.container.balancer.utilization.threshold

Required

false

Datanode Delete Container Limit**Description**

A limit to restrict the total number of delete container commands queued on a datanode.

Related Name

hdds.scm.replication.datanode.delete.container.limit

Default Value**API Name**

hdds.scm.replication.datanode.delete.container.limit

Required

false

Datanode Reconstruction Weight**Description**

When counting the number of replication commands on a datanode, the number of reconstruction commands is multiplied by this weight to ensure reconstruction commands use more of the "hdds.scm.replication.datanode.replication.limit" capacity, as they are more expensive to process. The current default is 3.

Related Name

hdds.scm.replication.datanode.reconstruction.weight

Default Value**API Name**

hdds.scm.replication.datanode.reconstruction.weight

Required

false

Datanode Replication Limit**Description**

A limit to restrict the total number of replication and reconstruction commands queued on a datanode. The current default is 20.

Related Name

hdds.scm.replication.datanode.replication.limit

Default Value**API Name**

hdds.scm.replication.datanode.replication.limit

Required

false

Inflight Limit Factor

Description

The overall replication task limit on a cluster is the number of healthy nodes, times the "hdds.scm.replication.datanode.replication.limit". This factor, which should be from zero through 1, scales that limit down to reduce the overall number of replicas pending creation on the cluster. A setting of zero disables global limit checking. A setting of 1 effectively disables it, by making the limit equal to the above equation. The current default is 0.75.

Related Name

hdds.scm.replication.inflight.limit.factor

Default Value**API Name**

hdds.scm.replication.inflight.limit.factor

Required

false

Remaining Redundancy For Maintenance

Description

The number of redundant container replicas which must be available for a node to enter maintenance. If putting a node into maintenance reduces the redundancy below this value, the node will remain in the ENTERING_MAINTENANCE state until a new replica is created. For an EC container, redundancy is 1 if there are a total of data + 1 replicas, meaning 1 more replica can be lost before this container becomes unrecoverable. Example configurations: Consider an EC(3-2) container. If the value of this configuration is 1, then 1 Datanode hosting its replica can be put into maintenance and 4 other replicas should be available. If the value is 0, then 2 Datanodes hosting its replicas can be put into maintenance and 3 other replicas should be available. Set this to a high value to be safer but require more time for nodes to enter maintenance. The current default is 1.

Related Name

hdds.scm.replication.maintenance.remaining.redundancy

Default Value**API Name**

hdds.scm.replication.maintenance.remaining.redundancy

Required

false

Over Replication Processing Interval

Description

How frequently to check if there is work to process on the over replicated queue. The current default is 30s. This means that every 30 seconds, this thread will process over replicated containers identified by Replication Manager. Units supported: d, h, m, s, ms.

Related Name

hdds.scm.replication.over.replicated.interval

Default Value**API Name**

hdds.scm.replication.over.replicated.interval

Required

false

Replication Thread Interval

Description

There is a replication monitor thread running inside SCM which takes care of replicating the containers in the cluster. This property is used to configure the interval in which that thread runs. The current default is 300s. This means that the replication thread will run every 300 seconds. Units supported: d, h, m, s, ms.

Related Name

hdds.scm.replication.thread.interval

Default Value**API Name**

hdds.scm.replication.thread.interval

Required

false

Under Replication Processing Interval

Description

How frequently to check if there is work to process on the under replicated queue. The current default is 30s. This means that every 30 seconds, this thread will process under replicated containers identified by Replication Manager. Units supported: d, h, m, s, ms.

Related Name

hdds.scm.replication.under.replicated.interval

Default Value**API Name**

hdds.scm.replication.under.replicated.interval

Required

false

Datanode Container Protocol ACL

Description

ACLs that define which users can access the Datanode Container Protocol in SCM. It is a comma separated list of Kerberos Principals.

Related Name

hdds.security.client.datanode.container.protocol.acl

Default Value

OZONE_SERVICE_PRINCIPALS

API Name

hdds.security.client.datanode.container.protocol.acl

Required

false

SCM Client Certificate Protocol ACL

Description

ACLs that define which users can access the SCM Certificate Protocol. It is a comma separated list of Kerberos Principals.

Related Name

hdds.security.client.scm.certificate.protocol.acl

Default Value	OZONE_ADMINS, OZONE_SERVICE_PRINCIPALS
API Name	hdds.security.client.scm.certificate.protocol.acl
Required	false

Topology Script File Name

Description	Full path to a custom topology script on the host file system. The topology script is used to determine the rack location of nodes. If left with "{{DEFAULT_TOPOLOGY_SCRIPT}}", a topology script will be provided that uses your hosts' rack information, visible in the "Hosts" page.
Related Name	net.topology.script.file.name
Default Value	DEFAULT_TOPOLOGY_SCRIPT
API Name	net.topology.script.file.name
Required	false

HSTS Header for Ozone SCM UI

Description	HSTS Header (Strict-Transport-Security) value to use
Related Name	ozone.http.header.Strict-Transport-Security
Default Value	max-age=63072000; includeSubDomains;
API Name	ozone.http.header.Strict-Transport-Security
Required	false

Storage Container Manager Metadata Directory

Description	Determines where on the local filesystem SCM security certificates will be stored.
Related Name	ozone.metadata.dirs
Default Value	/var/lib/hadoop-ozone/scm/ozone-metadata
API Name	ozone.metadata.dirs
Required	true

Storage Container Manager Data Directory

Description

Directory where the StorageContainerManager stores its metadata

Related Name

ozone.scm.db.dirs

Default Value

/var/lib/hadoop-ozone/scm/data

API Name

ozone.scm.db.dirs

Required

true

Storage Container Manager Ratis Storage Directory

Description

Storage directory used by SCM to write Ratis logs.

Related Name

ozone.scm.ha.ratis.storage.dir

Default Value

/var/lib/hadoop-ozone/scm/ratis

API Name

ozone.scm.ha.ratis.storage.dir

Required

true

Storage Container Manager HTTP Bind Hostname

Description

The actual address the SCM web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.scm.http-address'.

Related Name

ozone.scm.http-bind-host

Default Value

0.0.0.0

API Name

ozone.scm.http-bind-host

Required

false

Secure Storage Container Manager HTTPS Bind Hostname

Description

The actual address the SCM web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.scm.https-address'.

Related Name

ozone.scm.https-bind-host

Default Value

0.0.0.0

API Name

ozone.scm.https-bind-host

Required

false

Pipeline Per Volume Factor**Description**

Non negative number that scales the number of Erasure Coding pipelines per Erasure Coding scheme. The maximum number of pipelines will be limited to the number of healthy volumes in the cluster divided by the number of nodes required for the EC scheme, multiplied by this factor. The current default is 1.

Related Name

ozone.scm.pipeline.per.volume.factor

Default Value**API Name**

ozone.scm.pipeline.per.volume.factor

Required

false

Ozone Storage Container Manager Safemode Canary Enabled**Description**

Determines if the Ozone Storage Container Manager Safemode checker canary is enabled.

Related Name

ozone_scm_safemode_canary_enabled

Default Value

true

API Name

ozone_scm_safemode_canary_enabled

Required

false

Ozone Storage Container Manager Safemode Canary Timeout**Description**

Ozone Storage Container Manager Safemode Canary's timeout

Related Name

ozone_scm_safemode_canary_timeout

Default Value

30 second(s)

API Name

ozone_scm_safemode_canary_timeout

Required

false

Ozone Storage Container Manager Upgrade Need Finalization Canary Enabled**Description**

Determines if the Ozone Storage Container Manager Upgrade Need Finalization Canary is enabled.

Related Name

ozone_scm_upgrade_need_finalization_canary_enabled

Default Value

true

API Name

ozone_scm_upgrade_need_finalization_canary_enabled

Required

false

Ozone Storage Container Manager Upgrade Need Finalization Canary Timeout

Description

Sets Ozone Storage Container Manager Upgrade Need Finalization Canary's timeout.

Related Name

ozone_scm_upgrade_need_finalization_canary_timeout

Default Value

30 second(s)

API Name

ozone_scm_upgrade_need_finalization_canary_timeout

Required

false

Java Heap Size of Storage Container Manager

Description

Maximum size for the Java process heap memory.

Related Name

scm_max_heap_size

Default Value

4 GiB

API Name

scm_max_heap_size

Required

false

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required
false

Ports and Addresses

Storage Container Manager Block Client port

Description
The port number of the Ozone SCM block client service.
Related Name
ozone.scm.block.client.port
Default Value
9863
API Name
ozone.scm.block.client.port
Required
false

Storage Container Manager Client port

Description
The port number of the Ozone SCM block client service.
Related Name
ozone.scm.client.port
Default Value
9860
API Name
ozone.scm.client.port
Required
false

Storage Container Manager Datanode port

Description
The port number of the Ozone SCM service.
Related Name
ozone.scm.datanode.port
Default Value
9861
API Name
ozone.scm.datanode.port
Required
false

Storage Container Manager GRPC port

Description
Port used by SCM for Grpc Server.
Related Name

ozone.scm.grpc.port
Default Value
9895
API Name
ozone.scm.grpc.port
Required
false

Storage Container Manager HTTP Web UI Port

Description
The base port that the Storage Container Manager web user interface listens on. The host name of the Storage Container Manager is combined with this port to form the 'ozone.scm.http-address'.
Related Name
ozone.scm.http-port
Default Value
9876
API Name
ozone.scm.http-port
Required
true

Secure Storage Container Manager Web UI Port (TLS/SSL)

Description
The base port that the Storage Container Manager web user interface listens on when using HTTPS. The host name of the Storage Container Manager is combined with this port to form the 'ozone.scm.https-address'.
Related Name
ozone.scm.https-port
Default Value
9877
API Name
ozone.scm.https-port
Required
false

Storage Container Manager Ratis port

Description
The base port that SCM's Ratis Server listens on if multiple SCM's are configured.
Related Name
ozone.scm.ratis.port
Default Value
9894
API Name
ozone.scm.ratis.port
Required

false

Storage Container Manager Security Service port

Description

SCM security server port.

Related Name

ozone.scm.security.service.port

Default Value

9961

API Name

ozone.scm.security.service.port

Required

false

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value

API Name

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Role-Specific Kerberos Principal

Description	Kerberos principal used by the Storage Container Manager roles.
Related Name	
Default Value	scm
API Name	kerberos_role_princ_name
Required	true

Storage Container Manager TLS/SSL Trust Store File

Description	The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Storage Container Manager might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.
Related Name	ssl.client.truststore.location
Default Value	
API Name	ssl_client_truststore_location
Required	false

Storage Container Manager TLS/SSL Trust Store Password

Description	The password for the Storage Container Manager TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name	ssl.client.truststore.password
Default Value	
API Name	ssl_client_truststore_password
Required	false

Enable TLS/SSL for Storage Container Manager

Description	Encrypt communication between clients and Storage Container Manager using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).
Related Name	

ozone.ssl.enabled
Default Value
false
API Name
ssl_enabled
Required
false

Storage Container Manager TLS/SSL Server Keystore Key Password

Description
The password that protects the private key contained in the keystore used when Storage Container Manager is acting as a TLS/SSL server.
Related Name
ssl.server.keystore.keypassword
Default Value
API Name
ssl_server_keystore_keypassword
Required
false

Storage Container Manager TLS/SSL Server Keystore File Location

Description
The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Storage Container Manager is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.
Related Name
ssl.server.keystore.location
Default Value
API Name
ssl_server_keystore_location
Required
false

Storage Container Manager TLS/SSL Server Keystore File Password

Description
The password for the Storage Container Manager keystore file.
Related Name
ssl.server.keystore.password
Default Value
API Name
ssl_server_keystore_password
Required
false

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	100 MiB
API Name	stacks_collection_data_retention
Required	false

Stacks Collection Directory

Description	The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name	stacks_collection_directory
Default Value	
API Name	stacks_collection_directory
Required	false

Stacks Collection Enabled

Description	Whether or not periodic stacks collection is enabled.
Related Name	stacks_collection_enabled
Default Value	false
API Name	stacks_collection_enabled
Required	true

Stacks Collection Frequency

Description	The frequency with which stacks are collected.
Related Name	

stacks_collection_frequency
Default Value
5.0 second(s)
API Name
stacks_collection_frequency
Required
false

Stacks Collection Method

Description
The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name
stacks_collection_method
Default Value
jstack
API Name
stacks_collection_method
Required
false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description
Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_cdh_version_validator
Required
true

Suppress Parameter Validation: Balancing Interval

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Balancing Interval parameter.
Related Name
Default Value
false
API Name

`role_config_suppression_hdds.container.balancer.balancing.iteration.interval`**Required**`true`**Suppress Parameter Validation: Exclude Containers from Balancing****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Exclude Containers from Balancing parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_hdds.container.balancer.exclude.containers`**Required**`true`**Suppress Parameter Validation: Exclude Datanodes****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Exclude Datanodes parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_hdds.container.balancer.exclude.datanodes`**Required**`true`**Suppress Parameter Validation: Include Datanodes****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Include Datanodes parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_hdds.container.balancer.include.datanodes`**Required**`true`**Suppress Parameter Validation: Container Move Replication Timeout****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Container Move Replication Timeout parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hdds.container.balancer.move.replication.timeout

Required

true

Suppress Parameter Validation: Container Move Timeout**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Container Move Timeout parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.container.balancer.move.timeout

Required

true

Suppress Parameter Validation: Maximum Size Entering Target**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Maximum Size Entering Target parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.container.balancer.size.entering.target.max

Required

true

Suppress Parameter Validation: Maximum Size Leaving Source**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Maximum Size Leaving Source parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.container.balancer.size.leaving.source.max

Required

true

Suppress Parameter Validation: Maximum Size to Move in Balancing**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Maximum Size to Move in Balancing parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.container.balancer.size.moved.max.per.iteration

Required

true

Suppress Parameter Validation: Over Replication Processing Interval**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Over Replication Processing Interval parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.scm.replication.over.replicated.interval

Required

true

Suppress Parameter Validation: Replication Thread Interval**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Replication Thread Interval parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.scm.replication.thread.interval

Required

true

Suppress Parameter Validation: Under Replication Processing Interval**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Under Replication Processing Interval parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hdds.scm.replication.under.replicated.interval

Required

true

Suppress Parameter Validation: Datanode Container Protocol ACL

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Datanode Container Protocol ACL parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hdds.security.client.datanode.container.protocol.acl
Required	true

Suppress Parameter Validation: SCM Client Certificate Protocol ACL

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the SCM Client Certificate Protocol ACL parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hdds.security.client.scm.certificate.protocol.acl
Required	true

Suppress Parameter Validation: JMX Exporter Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_jmx_exporter_port
Required	true

Suppress Parameter Validation: JMX Exporter configuration YAML

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.
Related Name	
Default Value	false

API Name
role_config_suppression_jmx_exporter_yaml
Required
true

Suppress Parameter Validation: Role-Specific Kerberos Principal

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Role-Specific Kerberos Principal parameter.
Related Name
Default Value
false
API Name
role_config_suppression_kerberos_role_princ_name
Required
true

Suppress Parameter Validation: Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve)

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve) parameter.
Related Name
Default Value
false
API Name
role_config_suppression_log4j_safety_valve
Required
true

Suppress Parameter Validation: Storage Container Manager Log Directory

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Log Directory parameter.
Related Name
Default Value
false
API Name
role_config_suppression_log_dir
Required
true

Suppress Parameter Validation: Topology Script File Name

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Topology Script File Name parameter.

Related Name

Default Value

false

API Name

role_config_suppression_net.topology.script.file.name

Required

true

Suppress Parameter Validation: Heap Dump Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_password

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.

Related Name

Default Value

false

API Name

role_config_suppression_otelcol_remote_write_url

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_user

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Service Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/hadoop-policy.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/hadoop-policy.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/hadoop-policy.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ozone-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/scm-audit-log4j2.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ssl-client.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone-conf/ssl-server.xml_role_safety_valve

Required

true

Suppress Parameter Validation: HSTS Header for Ozone SCM UI**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HSTS Header for Ozone SCM UI parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.http.header.strict-transport-security

Required

true

Suppress Parameter Validation: Storage Container Manager Metadata Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Metadata Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.metadata.dirs

Required

true

Suppress Parameter Validation: Storage Container Manager Block Client port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Block Client port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.block.client.port

Required

true

Suppress Parameter Validation: Storage Container Manager Client port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Client port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.client.port

Required

true

Suppress Parameter Validation: Storage Container Manager Datanode port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Datanode port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.datanode.port

Required

true

Suppress Parameter Validation: Storage Container Manager Data Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Data Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.db.dirs

Required

true

Suppress Parameter Validation: Storage Container Manager GRPC port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager GRPC port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.grpc.port

Required

true

Suppress Parameter Validation: Storage Container Manager Ratis Storage Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Ratis Storage Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.ha.ratis.storage.dir

Required

true

Suppress Parameter Validation: Storage Container Manager HTTP Bind Hostname**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager HTTP Bind Hostname parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.http-bind-host

Required

true

Suppress Parameter Validation: Storage Container Manager HTTP Web UI Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager HTTP Web UI Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.http-port

Required

true

Suppress Parameter Validation: Secure Storage Container Manager HTTPS Bind Hostname**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Storage Container Manager HTTPS Bind Hostname parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.https-bind-host

Required

true

Suppress Parameter Validation: Secure Storage Container Manager Web UI Port (TLS/SSL)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Storage Container Manager Web UI Port (TLS/SSL) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ozone.scm.https-port

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Parameter Validation: Storage Container Manager Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_storage_container_manager_role_env_safety_valve

Required

true

Suppress Health Test: Ozone SCM Safemode Canary**Description**

Whether to suppress the results of the Ozone SCM Safemode Canary health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_scm_safemode_canary

Required

true

Suppress Health Test: Ozone SCM Upgrade Need Finalization Canary**Description**

Whether to suppress the results of the Ozone SCM Upgrade Need Finalization Canary health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_scm_upgrade_need_finalization_canary

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_storage_container_manager_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_storage_container_manager_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_storage_container_manager_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name	role_health_suppression_ozone_storage_container_manager_log_directory_free_space
Required	true

Suppress Health Test: Otelcol Health

Description	Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_ozone_storage_container_manager_otelcol_health
Required	true

Suppress Health Test: Process Status

Description	Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_ozone_storage_container_manager_scm_health
Required	true

Suppress Health Test: Swap Memory Usage

Description	Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_ozone_storage_container_manager_swap_memory_usage
Required	true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_storage_container_manager_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits

Description

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ozone_storage_container_manager_unexpected_exits

Required

Phoenix Properties in Cloudera Runtime 7.2.18

Role groups:

Query Server

Advanced

Query Server Logging Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name

Default Value

true

API Name

oom_sigkill_enabled

Required

true

Query Server Advanced Configuration Snippet (Safety Valve) for phoenix-site.xml**Description**

For advanced use only. A string to be inserted into phoenix-site.xml for this role only.

Related Name**Default Value****API Name**

phoenix-site.xml_role_safety_valve

Required

false

Query Server Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

PHOENIX_QUERY_SERVER_role_env_safety_valve

Required

false

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from

publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name

Default Value

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

Required

false

Logs

Query Server Log Directory

Description

The log directory for log files of the role Query Server.

Related Name

log_dir

Default Value

/var/log/phoenix

API Name
log_dir
Required
false

Query Server Logging Threshold

Description
The minimum log level for Query Server logs
Related Name
Default Value
INFO
API Name
log_threshold
Required
false

Query Server Maximum Log File Backups

Description
The maximum number of rolled log files to keep for Query Server logs. Typically used by log4j or logback.
Related Name
Default Value
10
API Name
max_log_backup_index
Required
false

Query Server Max Log Size

Description
The maximum size, in megabytes, per log file for Query Server logs. Typically used by log4j or logback.
Related Name
Default Value
200 MiB
API Name
max_log_size
Required
false

Monitoring

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold

Related Name

Default Value

true

API Name

enable_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name

Default Value

false

API Name

enable_config_alerts

Required

false

Enable JMX Exporter (beta)

Description

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name

Default Value

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port

Description

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name

Default Value

API Name

jmx_exporter_port

Required

false

JMX Exporter configuration YAML

Description

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name**Default Value****API Name**

jmx_exporter_yaml

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.

- **Metric Name** - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking **View as JSON**. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

`false`

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name

Default Value	false
API Name	otelcol_should_collect
Required	true

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	phoenix_query_server_fd_thresholds
Required	false

Query Server Host Health Test

Description	When computing the overall Query Server health, consider the host's health.
Related Name	
Default Value	true
API Name	phoenix_query_server_host_health_enabled
Required	false

Query Server Process Health Test

Description	Enables the health test that the Query Server's process state is consistent with the role configuration
Related Name	
Default Value	true
API Name	phoenix_query_server_scm_health_enabled
Required	false

Swap Memory Usage Rate Thresholds

Description	
--------------------	--

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name**Default Value**

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.

- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Enable Remote User Extractor****Description**

Boolean which controls if a remote user to impersonate should be extracted from the HTTP request parameter made by that user instead of the HTTP-authenticated user name (which is the default). Required for accessing Phoenix Query Server via Knox.

Related Name

phoenix.queryserver.withRemoteUserExtractor

Default Value

true

API Name

phoenix_query_server_with_remote_user_extractor

Required

false

Additional Phoenix Query Server Options

Description

These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here.

Related Name

phoenix_queryserver_java_opts

Default Value

API Name

phoenix_queryserver_java_opts

Required

false

Phoenix Query Server Max Heapsize

Description

Maximum size for the Phoenix Query Server Java Process heap. Passed to Java -Xmx.

Related Name

phoenix_queryserver_max_heap_size

Default Value

2 GiB

API Name

phoenix_queryserver_max_heap_size

Required

true

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name

Default Value

API Name

`rlimit_fds`**Required**`false`**Ports and Addresses****Phoenix Query Server Port****Description**

The port Phoenix Query Server will listen on

Related Name`phoenix.queryserver.http.port`**Default Value**`8765`**API Name**`phoenix_query_server_port`**Required**`false`**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name`cpu.shares`**Default Value**`1024`**API Name**`rm_cpu_shares`**Required**`true`**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the `cgroupexec` command: `resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`
These settings override other cgroup settings.

Related Name`custom.cgroups`**Default Value****API Name**`rm_custom_resources`

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit
Required
true

Security

Query Server TLS/SSL Trust Store File

Description
The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Query Server might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.
Related Name
phoenix.queryserver.tls.truststore
Default Value
API Name
ssl_client_truststore_location
Required
false

Query Server TLS/SSL Trust Store Password

Description
The password for the Query Server TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name
phoenix.queryserver.tls.truststore.password
Default Value
API Name
ssl_client_truststore_password
Required
false

Enable TLS/SSL for Query Server

Description
Encrypt communication between clients and Query Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).
Related Name
phoenix.queryserver.tls.enabled
Default Value
false
API Name
ssl_enabled
Required
false

Query Server TLS/SSL Server Keystore File Location

Description	The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Query Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.
Related Name	phoenix.queryserver.tls.keystore
Default Value	
API Name	ssl_server_keystore_location
Required	false

Query Server TLS/SSL Server Keystore File Password

Description	The password for the Query Server keystore file.
Related Name	phoenix.queryserver.tls.keystore.password
Default Value	
API Name	ssl_server_keystore_password
Required	false

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	100 MiB
API Name	stacks_collection_data_retention
Required	false

Stacks Collection Directory

Description	The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name	

stacks_collection_directory
Default Value
API Name
stacks_collection_directory
Required
false

Stacks Collection Enabled

Description
Whether or not periodic stacks collection is enabled.
Related Name
stacks_collection_enabled
Default Value
false
API Name
stacks_collection_enabled
Required
true

Stacks Collection Frequency

Description
The frequency with which stacks are collected.
Related Name
stacks_collection_frequency
Default Value
5.0 second(s)
API Name
stacks_collection_frequency
Required
false

Stacks Collection Method

Description
The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name
stacks_collection_method
Default Value
jstack
API Name
stacks_collection_method
Required
false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Parameter Validation: JMX Exporter Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_jmx_exporter_port
Required	true

Suppress Parameter Validation: JMX Exporter configuration YAML

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_jmx_exporter_yaml
Required	true

Suppress Parameter Validation: Query Server Logging Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Query Server Logging Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	

	false
API Name	role_config_suppression_log4j_safety_valve
Required	true

Suppress Parameter Validation: Query Server Log Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Query Server Log Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_log_dir
Required	true

Suppress Parameter Validation: Heap Dump Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_oom_heap_dump_dir
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_exporters
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description	
-------------	--

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

Suppress Parameter Validation: Phoenix Query Server Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Phoenix Query Server Port parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_phoenix_query_server_port
Required	
	true

Suppress Parameter Validation: Query Server Environment Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Query Server Environment Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_phoenix_query_server_role_env_safety_valve
Required	
	true

Suppress Parameter Validation: Additional Phoenix Query Server Options

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional Phoenix Query Server Options parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_phoenix_queryserver_java_opts
Required	
	true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description	
-------------	--

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_rm_custom_resources
Required	true

Suppress Parameter Validation: Role Triggers

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_role_triggers
Required	true

Suppress Parameter Validation: Query Server TLS/SSL Trust Store File

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Query Server TLS/SSL Trust Store File parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ssl_client_truststore_location
Required	true

Suppress Parameter Validation: Query Server TLS/SSL Trust Store Password

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Query Server TLS/SSL Trust Store Password parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ssl_client_truststore_password
Required	

true

Suppress Parameter Validation: Query Server TLS/SSL Server Keystore File Location

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Query Server TLS/SSL Server Keystore File Location parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Query Server TLS/SSL Server Keystore File Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Query Server TLS/SSL Server Keystore File Password parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

Suppress Parameter Validation: Stacks Collection Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test

Description

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

	false
API Name	role_health_suppression_phoenix_phoenix_query_server_audit_health
Required	true

Suppress Health Test: File Descriptors

Description	Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_phoenix_phoenix_query_server_file_descriptor
Required	true

Suppress Health Test: Host Health

Description	Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_phoenix_phoenix_query_server_host_health
Required	true

Suppress Health Test: Log Directory Free Space

Description	Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_phoenix_phoenix_query_server_log_directory_free_space
Required	true

Suppress Health Test: Otelcol Health

Description

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_phoenix_phoenix_query_server_otelcol_health

Required

true

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_phoenix_phoenix_query_server_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_phoenix_phoenix_query_server_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value	false
API Name	role_health_suppression_phoenix_phoenix_query_server_swap_memory_usage_rate
Required	true

Suppress Health Test: Unexpected Exits

Description	Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_phoenix_phoenix_query_server_unexpected_exits
Required	true

Service-Wide

Advanced

Phoenix Service Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	PHOENIX_service_env_safety_valve
Required	false

System Group

Description	The group that this service's processes should run as.
Related Name	
Default Value	phoenix
API Name	process_groupname
Required	true

System User

Description	The user that this service's processes should run as.
Related Name	
Default Value	phoenix
API Name	process_username
Required	true

Monitoring

Enable Service Level Health Alerts

Description	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts
Required	false

Healthy Query Server Monitoring Thresholds

Description	The health test thresholds of the overall Query Server health. The check returns "Concerning" health if the percentage of "Healthy" Query Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Query Servers falls below the critical threshold.
Related Name	
Default Value	Warning: 99.0 %, Critical: 90.0 %

API Name

PHOENIX_PHOENIX_QUERY_SERVER_healthy_thresholds

Required

false

Service Triggers**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Ranger Properties in Cloudera Runtime 7.2.18

Role groups:

Ranger Admin

Advanced

Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml

Description
For advanced use only. A string to be inserted into conf/ranger-admin-site.xml for this role only.
Related Name
Default Value
API Name
conf/ranger-admin-site.xml_role_safety_valve
Required
false

Ranger Admin Logging Advanced Configuration Snippet (Safety Valve)

Description
For advanced use only, a string to be inserted into log4j.properties for this role only.
Related Name
Default Value
API Name
log4j_safety_valve
Required
false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name

Default Value

true

API Name

oom_sigkill_enabled

Required

true

Automatically Restart Process**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name**Default Value**

false

API Name

process_auto_restart

Required

true

Enable Metric Collection**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name

process_start_secs

Required

false

Ranger Admin Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name

Default Value

API Name

RANGER_ADMIN_role_env_safety_valve

Required

false

Logs

Ranger Admin Log Directory

Description

The log directory for log files of the role Ranger Admin.

Related Name

ranger.logs.base.dir

Default Value

/var/log/ranger/admin

API Name

log_dir

Required

false

Ranger Admin Logging Threshold

Description

The minimum log level for Ranger Admin logs

Related Name

Default Value

INFO

API Name

log_threshold
Required
false

Ranger Admin Maximum Log File Backups

Description
The maximum number of rolled log files to keep for Ranger Admin logs. Typically used by log4j or logback.
Related Name
Default Value
10
API Name
max_log_backup_index
Required
false

Ranger Admin Max Log Size

Description
The maximum size, in megabytes, per log file for Ranger Admin logs. Typically used by log4j or logback.
Related Name
Default Value
200 MiB
API Name
max_log_size
Required
false

Monitoring

Enable Health Alerts for this Role

Description
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Enable JMX Exporter (beta)**Description**

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name**Default Value**

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port**Description**

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name**Default Value****API Name**

jmx_exporter_port

Required

false

JMX Exporter configuration YAML**Description**

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name**Default Value****API Name**

jmx_exporter_yaml

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name

Default Value

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name

Default Value**API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name

Default Value

Warning: 50.0 %, Critical: 70.0 %

API Name

ranger_admin_fd_thresholds

Required

false

Ranger Admin Host Health Test

Description

When computing the overall Ranger Admin health, consider the host's health.

Related Name**Default Value**

true

API Name

ranger_admin_host_health_enabled

Required

false

Ranger Admin Process Health Test**Description**

Enables the health test that the Ranger Admin's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

ranger_admin_scm_health_enabled

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.
- streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

Maximum Shards for Solr Collection of Ranger Audits

Description

Maximum number of shards for the Ranger Audit Solr collection. The recommended value is, number of replica given multiple by number of shards given for the collection.

Related Name

ranger.audit.solr.max.shards.per.node

Default Value

1

API Name

ranger.audit.solr.max.shards.per.node

Required

true

Replicas for Solr Collection of Ranger Audits

Description

Number of replicas for Ranger Audit Solr collection. The recommended value is, number of Solr servers running in the current cluster divided by number of shards for the collection.

Related Name

ranger.audit.solr.no.replica

Default Value

1

API Name

ranger.audit.solr.no.replica

Required

true

Shards for Solr Collection of Ranger Audits

Description

Number of shards required for Ranger Audit Solr collection. The recommended number of shards is equal or less than the number of Solr Server running in the current cluster.

Related Name

ranger.audit.solr.no.shards

Default Value

1

API Name

ranger.audit.solr.no.shards

Required

true

Enable Knox Trusted Proxy Support

Description

Determine if the Ranger service should allow authentication using Knox trusted proxy.

Related Name

ranger.authentication.allow.trustedproxy

Default Value

true

API Name

ranger.authentication.allow.trustedproxy

Required

false

Default Policy Groups**Description**

Single or comma separated list of groups that are required in default policies for Ranger plugin services. The groups will be added for any new Ranger Plugin services created in Ranger Admin after setting value to this parameter.

Related Name

ranger.default.policy.groups

Default Value**API Name**

ranger.default.policy.groups

Required

false

Default Policy Users**Description**

Single or comma separated list of users that are required in default policies for Ranger plugin services. The users will be added for any new Ranger Plugin services created in Ranger Admin after setting value to this parameter.

Related Name

ranger.default.policy.users

Default Value**API Name**

ranger.default.policy.users

Required

false

Admin AD Auth Base DN**Description**

This parameter is only used if Authentication method is AD. The Distinguished Name (DN) of the starting point for directory server searches.

Related Name

ranger.ldap.ad.base.dn

Default Value**API Name**

ranger.ldap.ad.base.dn

Required

false

Admin AD Auth Bind DN**Description**

Full distinguished name (DN), including common name (CN), of an AD user account that has privileges to search for users. Only used if Authentication method is AD

Related Name

ranger.ldap.ad.bind.dn

Default Value**API Name**

ranger.ldap.ad.bind.dn

Required

false

Admin AD Auth Domain Name**Description**

AD domain. Only used if Authentication method is AD.

Related Name

ranger.ldap.ad.domain

Default Value**API Name**

ranger.ldap.ad.domain

Required

false

Admin AD Auth Referral**Description**

This parameter is only used if Authentication method is AD. Set to follow if multiple AD servers are configured to return continuation references for results. Set to ignore (default) if no referrals should be followed.

Related Name

ranger.ldap.ad.referral

Default Value

ignore

API Name

ranger.ldap.ad.referral

Required

false

Admin AD Auth URL**Description**

AD URL. Only used if Authentication method is AD

Related Name

ranger.ldap.ad.url

Default Value**API Name**

ranger.ldap.ad.url

Required

false

Admin AD Auth User Search Filter

Description

AD user search filter. Only used if Authentication method is AD.

Related Name

ranger.ldap.ad.user.searchfilter

Default Value**API Name**

ranger.ldap.ad.user.searchfilter

Required

false

Admin LDAP Auth Base DN

Description

The Distinguished Name (DN) of the starting point for directory server searches. Only used if Authentication method is LDAP.

Related Name

ranger.ldap.base.dn

Default Value**API Name**

ranger.ldap.base.dn

Required

false

Admin LDAP Auth Bind User

Description

Full distinguished name (DN), including common name (CN), of an LDAP user account that has privileges to search for users. This user is used for searching the users. This could be read-only LDAP user. Example: cn=admin,dc=example,dc=com

Related Name

ranger.ldap.bind.dn

Default Value**API Name**

ranger.ldap.bind.dn

Required

false

Admin LDAP Auth Group Role Attribute

Description

LDAP group role attribute. Only used if Authentication method is LDAP.

Related Name

ranger.ldap.group.roleattribute

Default Value

API Name

ranger.ldap.group.roleattribute

Required

false

Admin LDAP Auth Group Search Base**Description**

LDAP group searchbase. Only used if Authentication method is LDAP.

Related Name

ranger.ldap.group.searchbase

Default Value**API Name**

ranger.ldap.group.searchbase

Required

false

Admin LDAP Auth Group Search Filter**Description**

LDAP group search filter. Only used if Authentication method is LDAP.

Related Name

ranger.ldap.group.searchfilter

Default Value**API Name**

ranger.ldap.group.searchfilter

Required

false

Admin LDAP Auth Referral**Description**

This parameter is only used if Authentication method is LDAP. Set to follow if multiple LDAP servers are configured to return continuation references for results. Set to ignore (default) if no referrals should be followed. When this parameter is set to throw, all of the normal entries are returned in the enumeration first, before the ReferralException is thrown.

Related Name

ranger.ldap.referral

Default Value

ignore

API Name

ranger.ldap.referral

Required

false

Admin LDAP Auth URL**Description**

LDAP server URL. Example: value = ldap://localhost:389 or ldaps://localhost:636

Related Name

ranger.ldap.url

Default Value**API Name**

ranger.ldap.url

Required

false

Admin LDAP Auth User DN Pattern**Description**

LDAP user DN. Only used if Authentication method is LDAP.

Related Name

ranger.ldap.user.dnpattern

Default Value**API Name**

ranger.ldap.user.dnpattern

Required

false

Admin LDAP Auth User Search Filter**Description**

LDAP user search filter. Only used if Authentication method is LDAP.

Related Name

ranger.ldap.user.searchfilter

Default Value**API Name**

ranger.ldap.user.searchfilter

Required

false

SSO Browser Useragent**Description**

Comma seperated values of browser agent

Related Name

ranger.sso.browser.useragent

Default Value

Mozilla, chrome

API Name

ranger.sso.browser.useragent

Required

false

Enable Ranger SSO**Description**

Determine if Ranger is Knox SSO enabled or not ?

Related Name

ranger.sso.enabled

Default Value

false

API Name

ranger.sso.enabled

Required

false

SSO Provider Url**Description**

SSO provider url Example: https://KNOX_HOST:KNOX_PORT/gateway/
KNOXSSO_TOPOLOGY_NAME/api/v1/websso

Related Name

ranger.sso.providerurl

Default Value**API Name**

ranger.sso.providerurl

Required

false

SSO Public Key**Description**

Public key for SSO cookie verification

Related Name

ranger.sso.publicKey

Default Value**API Name**

ranger.sso.publicKey

Required

false

Enable Auto Create Tag Service**Description**

Whether to create tag service in Ranger Admin.

Related Name

ranger.tagservice.auto.create

Default Value

true

API Name

ranger.tagservice.auto.create

Required

false

Enable Tag Service Auto Link

Description	Whether to link the Tag service set in "Tag Service Name" parameter to all available services in Ranger Admin.
Related Name	ranger.tagservice.auto.link
Default Value	true
API Name	ranger.tagservice.auto.link
Required	false

Tag Service Name

Description	Name of the tag service that will be created in Ranger Admin when "Enable Auto Create Tag Service" parameter is enabled.
Related Name	ranger.tagservice.auto.name
Default Value	cm_tag
API Name	ranger.tagservice.auto.name
Required	false

Admin UNIX Auth Remote Login

Description	Whether remote login is enabled. Only used if Authentication method is UNIX.
Related Name	ranger.unixauth.remote.login.enabled
Default Value	true
API Name	ranger.unixauth.remote.login.enabled
Required	false

Admin UNIX Auth Service Hostname

Description	Host where unix authentication service is running. Only used if Authentication method is UNIX. {{RANGER_USERSYNC_HOST}} is a placeholder value which will be replaced with the host where Ranger Usersync will be installed in the current cluster.
Related Name	ranger.unixauth.service.hostname

Default Value	RANGER_USERSYNC_HOST
API Name	ranger.unixauth.service.hostname
Required	false

Ranger Admin Canary Health Enabled

Description	Ranger Admin Canary is enabled/disabled
Related Name	ranger_admin_canary_health_enabled
Default Value	true
API Name	ranger_admin_canary_health_enabled
Required	false

Ranger Admin Canary Health Timeout

Description	Timeout for Ranger Admin Canary health check
Related Name	ranger_admin_canary_health_timeout
Default Value	30 second(s)
API Name	ranger_admin_canary_health_timeout
Required	false

Ranger Admin Conf Path

Description	Staging directory for Ranger Admin Configuration. This should generally not be changed.
Related Name	ranger_admin_conf_path
Default Value	/etc/ranger/admin
API Name	ranger_admin_conf_path
Required	true

Ranger Admin Max Heapsize

Description

Maximum size for the Java Process heap. Passed to Java -Xmx. Measured in megabytes.

Related Name

ranger_admin_max_heap_size

Default Value

1 GiB

API Name

ranger_admin_max_heap_size

Required

true

Admin Authentication Method

Description

Authentication Method for login to Ranger Admin.

Related Name

ranger.authentication.method

Default Value

PAM

API Name

ranger_authentication_method

Required

false

Ranger Database Host

Description

Hostname of the database used by Ranger Admin. If the port is non-default for your database type, use host:port notation.

Related Name

ranger_database_host

Default Value

API Name

ranger_database_host

Required

true

Ranger Database Name

Description

Name of Ranger Admin database.

Related Name

ranger_database_name

Default Value

ranger

API Name

ranger_database_name

Required

true

Ranger Database User Password

Description

Password for Ranger Admin database.

Related Name

ranger.jpa.jdbc.password

Default Value

API Name

ranger_database_password

Required

true

Ranger Database Type

Description

Database type to be used.

Related Name

ranger_database_type

Default Value

PostgreSQL

API Name

ranger_database_type

Required

true

Ranger Database User

Description

User for Ranger Admin database.

Related Name

ranger.jpa.jdbc.user

Default Value

rangeradmin

API Name

ranger_database_user

Required

true

Admin AD Auth Bind Password

Description

Password for the account that can search for users. Only used if Authentication method is AD

Related Name

ranger.ldap.ad.bind.password

Default Value

API Name

ranger_ldap_ad_bind_password
Required
false

Admin LDAP Auth Bind User Password

Description
Password for the account that can search for users.
Related Name
ranger.ldap.bind.password
Default Value
API Name
ranger_ldap_bind_password
Required
false

Knox Proxy User Groups

Description
Accepts a list of group names. The Knox user can impersonate only the users that belong to the groups specified in the list. The wildcard value * may be used to allow impersonation of any user belonging to any group.
Related Name
ranger.proxyuser.knox.groups
Default Value
*
API Name
ranger_proxyuser_knox_groups
Required
false

Knox Proxy User Hosts

Description
Accepts a list of IP addresses, IP address ranges in CIDR format and/or host names. The Knox user can impersonate only the requests coming from hosts specified in the list. The wildcard value * may be used to allow impersonation from any host.
Related Name
ranger.proxyuser.knox.hosts
Default Value
*
API Name
ranger_proxyuser_knox_hosts
Required
false

Knox Proxy User Users

Description

Accepts a list of usernames. The Knox user can impersonate only the users specified in the list. The wildcard value * may be used to allow impersonation of any user.

Related Name

ranger.proxyuser.knox.users

Default Value

*

API Name

ranger_proxyuser_knox_users

Required

false

Ranger Tomcat Work Dir

Description

Tomcat work directory for Ranger Admin. This should generally not be changed.

Related Name

ranger_tomcat_work_dir

Default Value

/var/lib/ranger/admin

API Name

ranger_tomcat_work_dir

Required

true

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name

Default Value

API Name

rlimit_fds

Required

false

Ports and Addresses

Admin Unix Auth Service Port

Description

Port for unix authentication service. Only used if Authentication method is UNIX.

Related Name

ranger.unixauth.service.port

Default Value

5151

API Name	ranger.unixauth.service.port
Required	false

Resource Management

Cgroup CPU Shares

Description	Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name	cpu.shares
Default Value	1024
API Name	rm_cpu_shares
Required	true

Custom Control Group Resources (overrides Cgroup settings)

Description	Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***
Related Name	custom.cgroups
Default Value	
API Name	rm_custom_resources
Required	false

Cgroup I/O Weight

Description	Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.
Related Name	blkio.weight
Default Value	500
API Name	

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Ranger Admin TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ranger Admin might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ranger.truststore.file

Default Value**API Name**

ssl_client_truststore_location

Required

false

Ranger Admin TLS/SSL Trust Store Password**Description**

The password for the Ranger Admin TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

ranger.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Ranger Admin**Description**

Encrypt communication between clients and Ranger Admin using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ranger.service.https.attrib.ssl.enabled

Default Value

false

API Name

ssl_enabled

Required

false

Ranger Admin TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ranger Admin is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ranger.https.attrib.keystore.file

Default Value**API Name**

ssl_server_keystore_location

Required

false

Ranger Admin TLS/SSL Server Keystore File Password

Description	The password for the Ranger Admin keystore file.
Related Name	ranger.service.https.attrib.keystore.pass
Default Value	
API Name	ssl_server_keystore_password
Required	false

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	100 MiB
API Name	stacks_collection_data_retention
Required	false

Stacks Collection Directory

Description	The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name	stacks_collection_directory
Default Value	
API Name	stacks_collection_directory
Required	false

Stacks Collection Enabled

Description	Whether or not periodic stacks collection is enabled.
Related Name	stacks_collection_enabled

Default Value	false
API Name	stacks_collection_enabled
Required	true

Stacks Collection Frequency

Description	The frequency with which stacks are collected.
Related Name	stacks_collection_frequency
Default Value	5.0 second(s)
API Name	stacks_collection_frequency
Required	false

Stacks Collection Method

Description	The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name	stacks_collection_method
Default Value	jstack
API Name	stacks_collection_method
Required	false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/ranger-admin-site.xml_role_safety_valve

Required

true

Suppress Parameter Validation: JMX Exporter Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Parameter Validation: JMX Exporter configuration YAML**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_yaml

Required

true

Suppress Parameter Validation: Ranger Admin Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Ranger Admin Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers

Required

true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_remote_write_password
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_remote_write_url
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_remote_write_user
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_service
Required
true

Suppress Parameter Validation: Exclude Users from Audit Access Tab

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Exclude Users from Audit Access Tab parameter.
Related Name

Default Value
false
API Name
role_config_suppression_ranger.accesslogs.exclude.users.list
Required
true

Suppress Parameter Validation: Kerberos Cookie Path

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Cookie Path parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ranger.admin.kerberos.cookie.path
Required
true

Suppress Parameter Validation: Default Policy Groups

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Policy Groups parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ranger.default.policy.groups
Required
true

Suppress Parameter Validation: Default Policy Users

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Policy Users parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ranger.default.policy.users
Required
true

Suppress Parameter Validation: Admin AD Auth Base DN

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth Base DN parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.ad.base.dn

Required

true

Suppress Parameter Validation: Admin AD Auth Bind DN**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth Bind DN parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.ad.bind.dn

Required

true

Suppress Parameter Validation: Admin AD Auth Domain Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth Domain Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.ad.domain

Required

true

Suppress Parameter Validation: Admin AD Auth URL**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth URL parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.ad.url

Required

true

Suppress Parameter Validation: Admin AD Auth User Search Filter

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth User Search Filter parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.ad.user.searchfilter

Required

true

Suppress Parameter Validation: Admin LDAP Auth Base DN

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth Base DN parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.base.dn

Required

true

Suppress Parameter Validation: Admin LDAP Auth Bind User

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth Bind User parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.bind.dn

Required

true

Suppress Parameter Validation: Admin LDAP Auth Group Role Attribute

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth Group Role Attribute parameter.

Related Name**Default Value**

false

API Name`role_config_suppression_ranger.ldap.group.roleattribute`**Required**`true`**Suppress Parameter Validation: Admin LDAP Auth Group Search Base****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth Group Search Base parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.group.searchbase`**Required**`true`**Suppress Parameter Validation: Admin LDAP Auth Group Search Filter****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth Group Search Filter parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.group.searchfilter`**Required**`true`**Suppress Parameter Validation: Admin LDAP Auth URL****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth URL parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.url`**Required**`true`**Suppress Parameter Validation: Admin LDAP Auth User DN Pattern****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth User DN Pattern parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.user.dnpattern

Required

true

Suppress Parameter Validation: Admin LDAP Auth User Search Filter**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth User Search Filter parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.user.searchfilter

Required

true

Suppress Parameter Validation: SSO Browser Useragent**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSO Browser Useragent parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.sso.browser.useragent

Required

true

Suppress Parameter Validation: SSO Provider Url**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSO Provider Url parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.sso.providerurl

Required

true

Suppress Parameter Validation: SSO Public Key**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSO Public Key parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.sso.publickey

Required

true

Suppress Parameter Validation: Tag Service Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tag Service Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.tagservice.auto.name

Required

true

Suppress Parameter Validation: Admin UNIX Auth Service Hostname**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin UNIX Auth Service Hostname parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.unixauth.service.hostname

Required

true

Suppress Parameter Validation: Admin Unix Auth Service Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Unix Auth Service Port parameter.

Related Name**Default Value**

false

API Name

`role_config_suppression_ranger.unixauth.service.port`**Required**`true`**Suppress Parameter Validation: Ranger Admin Conf Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Conf Path parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger_admin_conf_path`**Required**`true`**Suppress Parameter Validation: Ranger Admin Max Heapsize****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Max Heapsize parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger_admin_max_heap_size`**Required**`true`**Suppress Parameter Validation: Ranger Admin Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Environment Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger_admin_role_env_safety_valve`**Required**`true`**Suppress Parameter Validation: Ranger Database Host****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Database Host parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_database_host

Required

true

Suppress Parameter Validation: Ranger Database Name**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Database Name parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_database_name

Required

true

Suppress Parameter Validation: Ranger Database User Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Database User Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_database_password

Required

true

Suppress Parameter Validation: Ranger Database User**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Database User parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_database_user

Required

true

Suppress Parameter Validation: Admin AD Auth Bind Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth Bind Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ldap_ad_bind_password

Required

true

Suppress Parameter Validation: Admin LDAP Auth Bind User Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth Bind User Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ldap_bind_password

Required

true

Suppress Parameter Validation: Knox Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Proxy User Groups parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_proxyuser_knox_groups

Required

true

Suppress Parameter Validation: Knox Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_proxyuser_knox_hosts
Required
true

Suppress Parameter Validation: Knox Proxy User Users

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Proxy User Users parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ranger_proxyuser_knox_users
Required
true

Suppress Parameter Validation: Ranger Tomcat Work Dir

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tomcat Work Dir parameter.
Related Name
Default Value
false
API Name
role_config_suppression_ranger_tomcat_work_dir
Required
true

Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.
Related Name
Default Value
false
API Name
role_config_suppression_rm_custom_resources
Required
true

Suppress Parameter Validation: Role Triggers

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.
Related Name

Default Value

false

API Name

role_config_suppression_role_triggers

Required

true

Suppress Parameter Validation: Ranger Admin TLS/SSL Trust Store File**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin TLS/SSL Trust Store File parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Parameter Validation: Ranger Admin TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin TLS/SSL Trust Store Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Parameter Validation: Ranger Admin TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin TLS/SSL Server Keystore File Location parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Parameter Validation: Ranger Admin TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin TLS/SSL Server Keystore File Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Ranger Admin URL Canary Check**Description**

Whether to suppress the results of the Ranger Admin URL Canary Check health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_admin_canary

Required

true

Suppress Health Test: Audit Pipeline Test**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_admin_audit_health

Required

true

Suppress Health Test: File Descriptors**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_admin_file_descriptor

Required

true

Suppress Health Test: Host Health**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_admin_host_health

Required

true

Suppress Health Test: Log Directory Free Space**Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_admin_log_directory_free_space

Required

true

Suppress Health Test: Otelcol Health**Description**

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_admin_otelcol_health

Required

true

Suppress Health Test: Process Status**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_admin_scm_health

Required

true

Suppress Health Test: Swap Memory Usage**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_admin_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_admin_swap_memory_usage_rate

Required

true

Suppress Health Test: Unexpected Exits**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name**Default Value**

false

API Name

role_health_suppression_ranger_ranger_admin_unexpected_exits

Required

true

Ranger Tagsync**Advanced****Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties****Description**

For advanced use only. A string to be inserted into conf/atlas-application.properties for this role only.

Related Name**Default Value****API Name**

conf/atlas-application.properties_role_safety_valve

Required

false

Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml**Description**

For advanced use only. A string to be inserted into conf/ranger-tagsync-policymgr-ssl.xml for this role only.

Related Name**Default Value****API Name**

conf/ranger-tagsync-policymgr-ssl.xml_role_safety_valve

Required

false

Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml**Description**

For advanced use only. A string to be inserted into conf/ranger-tagsync-site.xml for this role only.

Related Name**Default Value****API Name**

conf/ranger-tagsync-site.xml_role_safety_valve

Required

false

Ranger Tagsync Logging Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir
Required
false

Dump Heap When Out of Memory

Description
When set, generates a heap dump file when when an out-of-memory error occurs.
Related Name
Default Value
true
API Name
oom_heap_dump_enabled
Required
true

Kill When Out of Memory

Description
When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.
Related Name
Default Value
true
API Name
oom_sigkill_enabled
Required
true

Automatically Restart Process

Description
When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.
Related Name
Default Value
false
API Name
process_auto_restart
Required
true

Enable Metric Collection

Description
Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name**Default Value**

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name**Default Value**

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name**Default Value**

20

API Name

process_start_secs

Required

false

Ranger Tagsync Environment Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

Related Name**Default Value****API Name**

RANGER_TAGSYNC_role_env_safety_valve

Required

false

Logs

Ranger Tagsync Log Directory

Description	The log directory for log files of the role Ranger Tagsync.
Related Name	ranger.tagsync.logdir
Default Value	/var/log/ranger/tagsync
API Name	log_dir
Required	false

Ranger Tagsync Logging Threshold

Description	The minimum log level for Ranger Tagsync logs
Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

Ranger Tagsync Maximum Log File Backups

Description	The maximum number of rolled log files to keep for Ranger Tagsync logs. Typically used by log4j or logback.
Related Name	
Default Value	10
API Name	max_log_backup_index
Required	false

Ranger Tagsync Max Log Size

Description	The maximum size, in megabytes, per log file for Ranger Tagsync logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB

API Name
max_log_size
Required
false

Monitoring

Enable Health Alerts for this Role

Description
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name
Default Value
false
API Name
enable_config_alerts
Required
false

Enable JMX Exporter (beta)

Description
JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. See the JMX Exporter documentation.
Related Name
Default Value
false
API Name
jmx_exporter_enabled
Required
true

JMX Exporter Port

Description

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name**Default Value****API Name**

jmx_exporter_port

Required

false

JMX Exporter configuration YAML**Description**

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name**Default Value****API Name**

jmx_exporter_yaml

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name**Default Value****API Name**

`monitoring_metric_filter`

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/$ROLE_NAME: endpoint:
$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s
```

API Name

`otelcol_exporters`

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section**Description**

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name**Default Value****API Name**

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password**Description**

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name
Default Value

API Name

otelcol_remote_write_user
Required
false

OpenTelemetry Collector Service Section

Description
Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.
Related Name
Default Value
API Name
otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value	Warning: 200 B, Critical: Never
API Name	process_swap_memory_thresholds
Required	false

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	ranger_tagsync_fd_thresholds
Required	false

Ranger Tagsync Host Health Test

Description	When computing the overall Ranger Tagsync health, consider the host's health.
Related Name	
Default Value	true
API Name	ranger_tagsync_host_health_enabled
Required	false

Ranger Tagsync Process Health Test

Description	Enables the health test that the Ranger Tagsync's process state is consistent with the role configuration
Related Name	
Default Value	true
API Name	ranger_tagsync_scm_health_enabled
Required	false

Role Triggers

Description	
--------------------	--

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a `DataNode` fires if the `DataNode` has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

`role_triggers`

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

`unexpected_exits_thresholds`

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

Other

Atlas Source: Kafka Consumer Group

Description
Kafka consumer group.
Related Name
atlas.kafka.entities.group.id
Default Value
ranger_entities_consumer
API Name
atlas.kafka.entities.group.id
Required
false

Graceful Shutdown Timeout

Description
The timeout in milliseconds to wait for graceful shutdown to complete.
Related Name
Default Value
18 second(s)
API Name
graceful_stop_timeout
Required
false

Capture Cluster name

Description
Capture cluster name.
Related Name
ranger.tagsync.atlas.default.cluster.name
Default Value
API Name
ranger.tagsync.atlas.default.cluster.name
Required
false

Enable Ranger Tagsync Cookie Authentication

Description
Enable cookie-based authentication for requests going from Ranger Tagsync to Ranger Admin.
Related Name
ranger.tagsync.cookie.enabled

Default Value	true
API Name	ranger.tagsync.cookie.enabled
Required	false

Ranger Tagsync Username

Description	Ranger Tagsync username in Ranger Admin.
Related Name	ranger.tagsync.dest.ranger.username
Default Value	rangertagsync
API Name	ranger.tagsync.dest.ranger.username
Required	false

Enable File Tag Source

Description	Whether to sync tags from file.
Related Name	ranger.tagsync.source.file
Default Value	false
API Name	ranger.tagsync.source.file
Required	false

File Source: File Update Polling Interval

Description	Sync Interval for updating tags from file.
Related Name	ranger.tagsync.source.file.check.interval.millis
Default Value	1 minute(s)
API Name	ranger.tagsync.source.file.check.interval.millis
Required	false

File Source: Filename

Description

	Filename containing tags.
Related Name	ranger.tagsync.source.file.filename
Default Value	
API Name	ranger.tagsync.source.file.filename
Required	false

Ranger Tagsync Conf Path

Description	Staging directory for Ranger Tagsync Configuration. This should generally not be changed.
Related Name	ranger_tagsync_conf_path
Default Value	/etc/ranger/tagsync
API Name	ranger_tagsync_conf_path
Required	true

Ranger Tagsync Max Heapsize

Description	Maximum size for the Java Process heap. Passed to Java -Xmx. Measured in megabytes.
Related Name	ranger_tagsync_max_heap_size
Default Value	1 GiB
API Name	ranger_tagsync_max_heap_size
Required	true

Enable Ranger Tagsync Metrics

Description	Controls whether the Ranger Tagsync metrics are enabled.
Related Name	ranger.tagsync.metrics.enabled
Default Value	true
API Name	ranger_tagsync_metrics_enabled
Required	false

Ranger Tagsync Metrics File Name

Description	File name for the metrics exposed by Ranger Tagsync. The file is updated at the frequency configured by Ranger Tagsync Metrics Frequency.
Related Name	ranger.tagsync.metrics.filename
Default Value	metrics.json
API Name	ranger_tagsync_metrics_filename
Required	false

Ranger Tagsync Metrics File Path

Description	The location at which the metrics exposed by Ranger Tagsync will be written.
Related Name	ranger.tagsync.metrics.filepath
Default Value	/var/log/ranger/metrics-tagsync
API Name	ranger_tagsync_metrics_filepath
Required	false

Ranger Tagsync Metrics Frequency

Description	The frequency at which the metrics are logged at Ranger Tagsync Metrics File Path.
Related Name	ranger.tagsync.metrics.frequencytimeinmillis
Default Value	1 minute(s)
API Name	ranger_tagsync_metrics_frequency
Required	false

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	

API Name

rlimit_fds

Required

false

Resource Management**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value**API Name**

rm_custom_resources

Required

false

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight
Required
true

Cgroup Memory Hard Limit

Description
Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'
Related Name
memory.limit_in_bytes
Default Value
-1 MiB
API Name
rm_memory_hard_limit
Required
true

Cgroup Memory Soft Limit

Description
Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'
Related Name
memory.soft_limit_in_bytes
Default Value
-1 MiB
API Name
rm_memory_soft_limit
Required
true

Security

Ranger Tagsync TLS/SSL Trust Store File

Description
The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ranger Tagsync might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.
Related Name
xasecure.policymgr.clientssl.truststore

Default Value**API Name**

ssl_client_truststore_location

Required

false

Ranger Tagsync TLS/SSL Trust Store Password**Description**

The password for the Ranger Tagsync TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

xasecure.policymgr.clientssl.truststore.password

Default Value**API Name**

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Ranger Tagsync**Description**

Encrypt communication between clients and Ranger Tagsync using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name**Default Value**

false

API Name

ssl_enabled

Required

false

Ranger Tagsync TLS/SSL Server Keystore File Location**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ranger Tagsync is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

xasecure.policymgr.clientssl.keystore

Default Value**API Name**

ssl_server_keystore_location

Required

false

Ranger Tagsync TLS/SSL Server Keystore File Password

Description

The password for the Ranger Tagsync keystore file.

Related Name

xasecure.policymgr.clientssl.keystore.password

Default Value**API Name**

ssl_server_keystore_password

Required

false

Stacks Collection

Stacks Collection Data Retention

Description

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

Related Name

stacks_collection_data_retention

Default Value

100 MiB

API Name

stacks_collection_data_retention

Required

false

Stacks Collection Directory

Description

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

Related Name

stacks_collection_directory

Default Value**API Name**

stacks_collection_directory

Required

false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value	false
API Name	stacks_collection_enabled
Required	true

Stacks Collection Frequency

Description	The frequency with which stacks are collected.
Related Name	stacks_collection_frequency
Default Value	5.0 second(s)
API Name	stacks_collection_frequency
Required	false

Stacks Collection Method

Description	The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name	stacks_collection_method
Default Value	jstack
API Name	stacks_collection_method
Required	false

Suppressions

Suppress Parameter Validation: Atlas Source: Kafka Consumer Group

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Atlas Source: Kafka Consumer Group parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_atlas.kafka.entities.group.id

Required

true

Suppress Configuration Validator: CDH Version Validator**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/atlas-application.properties_role_safety_valve

Required

true

Suppress Parameter Validation: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/ranger-tagsync-policymgr-ssl.xml_role_safety_valve

Required

true

Suppress Parameter Validation: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml**Description**

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_conf/ranger-tagsync-site.xml_role_safety_valve
Required	true

Suppress Parameter Validation: JMX Exporter Port

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_jmx_exporter_port
Required	true

Suppress Parameter Validation: JMX Exporter configuration YAML

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_jmx_exporter_yaml
Required	true

Suppress Parameter Validation: Ranger Tagsync Logging Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Logging Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_log4j_safety_valve

Required
true

Suppress Parameter Validation: Ranger Tagsync Log Directory

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Log Directory parameter.
Related Name
Default Value
false
API Name
role_config_suppression_log_dir
Required
true

Suppress Parameter Validation: Heap Dump Directory

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.
Related Name
Default Value
false
API Name
role_config_suppression_oom_heap_dump_dir
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.

Default Value

	false
API Name	role_config_suppression_otelcol_extensions
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_processors
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_receivers
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_password
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL

Description	
-------------	--

	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_url
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_user
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_service
Required	true

Suppress Parameter Validation: Capture Cluster name

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Capture Cluster name parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ranger.tagsync.atlas.default.cluster.name
Required	

true

Suppress Parameter Validation: Ranger Tagsync Username

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Username parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ranger.tagsync.dest.ranger.username
Required	true

Suppress Parameter Validation: File Source: Filename

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the File Source: Filename parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ranger.tagsync.source.file.filename
Required	true

Suppress Parameter Validation: Ranger Tagsync Conf Path

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Conf Path parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_ranger_tagsync_conf_path
Required	true

Suppress Parameter Validation: Ranger Tagsync Max Heapsize

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Max Heapsize parameter.
Related Name	
Default Value	false

API Name`role_config_suppression_ranger_tagsync_max_heap_size`**Required**`true`**Suppress Parameter Validation: Ranger Tagsync Metrics File Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Metrics File Name parameter.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger_tagsync_metrics_filename`**Required**`true`**Suppress Parameter Validation: Ranger Tagsync Metrics File Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Metrics File Path parameter.

Suppress Parameter Validation: Ranger Tagsync TLS/SSL Server Keystore File Password

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync TLS/SSL Server Keystore File Password parameter.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_server_keystore_password

Required

true

Suppress Parameter Validation: Stacks Collection Directory

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

Related Name

Default Value

false

API Name

role_config_suppression_stacks_collection_directory

Required

true

Suppress Health Test: Audit Pipeline Test

Description

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

	false
API Name	role_health_suppression_ranger_ranger_tagsync_audit_health
Required	true

Suppress Health Test: File Descriptors

Description	Whether to suppress the results of the File Descriptors heath test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_ranger_ranger_tagsync_file_descriptor
Required	true

Suppress Health Test: Host Health

Description	Whether to suppress the results of the Host Health heath test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_ranger_ranger_tagsync_host_health
Required	true

Suppress Health Test: Log Directory Free Space

Description	Whether to suppress the results of the Log Directory Free Space heath test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_ranger_ranger_tagsync_log_directory_free_space
Required	true

Suppress Health Test: Otelcol Health

Description

Whether to suppress the results of the Otelcol Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

Suppress Health Test: Process Status

Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ranger_ranger_tagsync_scm_health

Required

true

Suppress Health Test: Swap Memory Usage

Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value

false

API Name

role_health_suppression_ranger_ranger_tagsync_swap_memory_usage

Required

true

Suppress Health Test: Swap Memory Usage Rate Beta

Description

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

Related Name

Default Value	false
API Name	role_health_suppression_ranger_ranger_tagsync_swap_memory_usage_rate
Required	true

Suppress Health Test: Unexpected Exits

Description	Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	role_health_suppression_ranger_ranger_tagsync_unexpected_exits
Required	true

Ranger Usersync

Advanced

Ranger Usersync Advanced Configuration Snippet (Safety Valve) for conf/ranger-ugsync-site.xml

Description	For advanced use only. A string to be inserted into conf/ranger-ugsync-site.xml for this role only.
Related Name	
Default Value	
API Name	conf/ranger-ugsync-site.xml_role_safety_valve
Required	false

Ranger Usersync Logging Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, a string to be inserted into log4j.properties for this role only.
Related Name	
Default Value	
API Name	log4j_safety_valve
Required	false

Enable auto refresh for metric configurations

Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required

false

Heap Dump Directory

Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

Related Name

oom_heap_dump_dir

Default Value

/tmp

API Name

oom_heap_dump_dir

Required

false

Dump Heap When Out of Memory

Description

When set, generates a heap dump file when when an out-of-memory error occurs.

Related Name**Default Value**

true

API Name

oom_heap_dump_enabled

Required

true

Kill When Out of Memory

Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

Related Name

Default Value	true
API Name	oom_sigkill_enabled
Required	true

Automatically Restart Process

Description	When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.
Related Name	
Default Value	false
API Name	process_auto_restart
Required	true

Enable Metric Collection

Description	Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.
Related Name	
Default Value	true
API Name	process_should_monitor
Required	true

Process Start Retry Attempts

Description	Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.
Related Name	
Default Value	3
API Name	process_start_retries
Required	false

Process Start Wait Timeout

Description	The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
Related Name	
Default Value	20
API Name	process_start_secs
Required	false

Ranger Usersync Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
Related Name	
Default Value	
API Name	RANGER_USERSYNC_role_env_safety_valve
Required	false

Logs

Ranger Usersync Log Directory

Description	The log directory for log files of the role Ranger Usersync.
Related Name	ranger.usersync.logdir
Default Value	/var/log/ranger/usersync
API Name	log_dir
Required	false

Ranger Usersync Logging Threshold

Description	The minimum log level for Ranger Usersync logs
Related Name	
Default Value	INFO
API Name	

log_threshold
Required
false

Ranger Usersync Maximum Log File Backups

Description
The maximum number of rolled log files to keep for Ranger Usersync logs. Typically used by log4j or logback.
Related Name
Default Value
10
API Name
max_log_backup_index
Required
false

Ranger Usersync Max Log Size

Description
The maximum size, in megabytes, per log file for Ranger Usersync logs. Typically used by log4j or logback.
Related Name
Default Value
200 MiB
API Name
max_log_size
Required
false

Monitoring

Enable Health Alerts for this Role

Description
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name
Default Value
true
API Name
enable_alerts
Required
false

Enable Configuration Change Alerts

Description
When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name**Default Value**

false

API Name

enable_config_alerts

Required

false

Enable JMX Exporter (beta)**Description**

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name**Default Value**

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port**Description**

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name**Default Value****API Name**

jmx_exporter_port

Required

false

JMX Exporter configuration YAML**Description**

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name**Default Value****API Name**

jmx_exporter_yaml

Required

false

Log Directory Free Space Monitoring Absolute Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name**Default Value**

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name

Default Value**API Name**

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section**Description**

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
exporters: prometheusremotewrite/$ROLE_NAME: endpoint:
$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:
insecure_skip_verify: true retry_on_failure: enabled: true initial_interval: 10s max_interval: 40s
max_elapsed_time: 300s
```

API Name

otelcol_exporters

Required

false

OpenTelemetry Collector Extensions Section**Description**

Define the extensions settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

```
extensions: basicauth/common: client_auth: username:
$ROLE_PARAM(otelcol_remote_write_user) password:
'$ROLE_PARAM(otelcol_remote_write_password)'
```

API Name

otelcol_extensions

Required

false

OpenTelemetry Collector Processors Section**Description**

Define the processors settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_processors

Required

false

OpenTelemetry Collector Receivers Section

Description

Define the receivers settings as a yaml snippet according to the OpenTelemetry Collector standards. A number of variables can help to use the same config everywhere. The follow strings or expressions will be substituted: \$HOST_NAME, \$CLUSTER_NAME, \$CLUSTER_ID, \$SERVICE_TYPE, \$SERVICE_NAME, \$ROLE_NAME, \$ROLE_TYPE, \$ROLE_PARAM(my_parameter_name) - e.g.: a port parameter for the role's metrics, \$DECODE_B64(...) and \$DECODE_URL(...) to decode encoded parameters, \$ENV_PARAM(name) to fetch params from the process' environment, \$SYS_PARAM(name) to fetch java system properties.

Related Name

Default Value

API Name

otelcol_receivers

Required

false

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name**Default Value**

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section

Description

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)

Description

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds

Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window

Description

The period to review when computing unexpected swap memory usage change of the process.

Related Name

common.process.swap_memory_rate_window

Default Value

5 minute(s)

API Name

process_swap_memory_rate_window

Required

false

Process Swap Memory Thresholds

Description

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

Related Name

Default Value

Warning: 200 B, Critical: Never

API Name

process_swap_memory_thresholds

Required

false

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name

Default Value

Warning: 50.0 %, Critical: 70.0 %

API Name

ranger_usersync_fd_thresholds

Required

false

Ranger Usersync Host Health Test

Description

When computing the overall Ranger Usersync health, consider the host's health.

Related Name**Default Value**

true

API Name

ranger_usersync_host_health_enabled

Required

false

Ranger Usersync Process Health Test**Description**

Enables the health test that the Ranger Usersync's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

ranger_usersync_scm_health_enabled

Required

false

Role Triggers**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period**Description**

The period to review when computing unexpected exits.

Related Name**Default Value**

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other**Graceful Shutdown Timeout****Description**

The timeout in milliseconds to wait for graceful shutdown to complete.

Related Name**Default Value**

18 second(s)

API Name

graceful_stop_timeout

Required

false

Enable Ranger Usersync Cookie Authentication**Description**

Enable cookie-based authentication for requests going from Ranger Usersync to Ranger Admin.

Related Name

ranger.usersync.cookie.enabled

Default Value

	true
API Name	ranger.usersync.cookie.enabled
Required	false

Enable User Sync

Description	Should users and groups be synchronized to Ranger Database? Required to setup Ranger policies.
Related Name	ranger.usersync.enabled
Default Value	true
API Name	ranger.usersync.enabled
Required	false

Usersync Filesource File Name

Description	Path to the file with the users and groups information. Only used when Usersync Sync Source is set to "org.apache.ranger.unixusersync.process.FileSourceUserGroupBuilder". Example: /tmp/usergroup.json or /tmp/usergroup.csv or /tmp/usergroup.txt
Related Name	ranger.usersync.filesource.file
Default Value	
API Name	ranger.usersync.filesource.file
Required	false

Usersync Filesource Delimiter

Description	Delimiter used in file, if File based user sync is used
Related Name	ranger.usersync.filesource.text.delimiter
Default Value	,
API Name	ranger.usersync.filesource.text.delimiter
Required	false

Ranger Usersync Group Based Role Assignment Rules

Description

The parameter is used to assign roles to users and groups synced in Ranger Admin. Based on the given values specified in the above delimiter parameters, Ranger Usersync will parse the value specified in this parameter and sync users and groups along with roles given. Example - "ROLE_SYS_ADMIN:u:username1,username2&ROLE_KEY_ADMIN:g:groupname1".

Related Name

ranger.usersync.group.based.role.assignment.rules

Default Value**API Name**

ranger.usersync.group.based.role.assignment.rules

Required

false

Usersync Group Member Attribute**Description**

LDAP group member attribute name. Example: member

Related Name

ranger.usersync.group.memberattributename

Default Value**API Name**

ranger.usersync.group.memberattributename

Required

false

Usersync Group Name Attribute**Description**

LDAP group name attribute. Example: cn

Related Name

ranger.usersync.group.nameattribute

Default Value**API Name**

ranger.usersync.group.nameattribute

Required

false

Usersync Group Object Class**Description**

LDAP Group object class. Example: group

Related Name

ranger.usersync.group.objectclass

Default Value**API Name**

ranger.usersync.group.objectclass

Required

false

Usersync Enable Group Search First

Description

Enable Group Search First.

Related Name

ranger.usersync.group.search.first.enabled

Default Value

false

API Name

ranger.usersync.group.search.first.enabled

Required

false

Usersync Group Search Base

Description

Search base for groups. Sample value would be ou=groups,dc=hadoop,dc=apache,dc=org. The parameter overrides value specified in ranger.usersync.ldap.searchBase, ranger.usersync.ldap.user.searchbase. If a value is not specified, takes the value of ranger.usersync.ldap.searchBase. If ranger.usersync.ldap.searchBase is also not specified, takes the value of ranger.usersync.ldap.user.searchbase. Multiple Ous can be configured with ; (semicolon) separated eg: ou=groups,DC=example,DC=com;ou=group1,ou=group2

Related Name

ranger.usersync.group.searchbase

Default Value**API Name**

ranger.usersync.group.searchbase

Required

false

Usersync Enable Group Sync

Description

Whether Usersync should use ldapsearch to find groups instead of relying on user entry attributes.

Related Name

ranger.usersync.group.searchenabled

Default Value

true

API Name

ranger.usersync.group.searchenabled

Required

false

Usersync Group Search Filter

Description

Optional additional filter constraining the groups selected for syncing. A sample value would be (dept=eng)

Related Name

ranger.usersync.group.searchfilter

Default Value**API Name**

ranger.usersync.group.searchfilter

Required

false

Usersync Group Search Scope**Description**

Search scope for the groups. Value "base" indicates that only the entry specified as the search base in ranger.usersync.group.searchbase should be considered. One "indicates" that only the immediate children of the entry specified as the search base in ranger.usersync.group.searchbase should be considered. "Sub" indicates that the entry specified as the search base in ranger.usersync.group.searchbase, and all of its subordinates to any depth, should be considered.

Related Name

ranger.usersync.group.searchscope

Default Value

sub

API Name

ranger.usersync.group.searchscope

Required

false

Usersync Group Usermap Sync**Description**

Whether to sync all groups for a user.

Related Name

ranger.usersync.group.usermapsyncenabled

Default Value

true

API Name

ranger.usersync.group.usermapsyncenabled

Required

false

Usersync Bind User**Description**

Full distinguished name (DN), including common name (CN), of an LDAP user account that has privileges to search for users. This user is used for searching the users. This could be read-only LDAP user. Example: cn=admin,dc=example,dc=com

Related Name

ranger.usersync.ldap.binddn

Default Value**API Name**

ranger.usersync.ldap.binddn

Required

false

Usersync Incremental Sync

Description

Enable Incremental Sync.

Related Name

ranger.usersync.ldap.deltasync

Default Value

true

API Name

ranger.usersync.ldap.deltasync

Required

false

Usersync Group Hierarchy Levels

Description

Levels of LDAP directory tree where the groups need to be searched.

Related Name

ranger.usersync.ldap.grouphierarchylevels

Default Value

0

API Name

ranger.usersync.ldap.grouphierarchylevels

Required

false

Usersync Groupname Case Conversion

Description

Used for converting syncing groups to the selected case conversion.

Related Name

ranger.usersync.ldap.groupname.caseconversion

Default Value

none

API Name

ranger.usersync.ldap.groupname.caseconversion

Required

false

Usersync Referral

Description

Set to follow if multiple LDAP/AD servers are configured to return continuation references for results. Set to ignore if no referrals should be followed. When this parameter is set to throw, all of the normal entries are returned in the enumeration first, before the ReferralException is thrown.

Related Name

ranger.usersync.ldap.referral

Default Value

ignore

API Name

ranger.usersync.ldap.referral

Required

false

Usersync Search Base**Description**

Search base for users and groups. Sample value would be dc=hadoop,dc=apache,dc=org. Multiple Ous can be configured with ; (semicolon) separated.

Related Name

ranger.usersync.ldap.searchBase

Default Value**API Name**

ranger.usersync.ldap.searchBase

Required

false

Usersync Enable STARTTLS**Description**

Enable LDAP STARTTLS.

Related Name

ranger.usersync.ldap.starttls

Default Value

false

API Name

ranger.usersync.ldap.starttls

Required

false

Usersync LDAP/AD URL**Description**

LDAP server URL. Example: value = ldap://localhost:389 or ldaps://localhost:636

Related Name

ranger.usersync.ldap.url

Default Value**API Name**

ranger.usersync.ldap.url

Required

false

Usersync User Group Name Attribute**Description**

LDAP user group name attribute. Generally it is the same as username attribute. Example: sAMAccountName in AD, uid or cn in OpenLDAP

Related Name

ranger.usersync.ldap.user.groupnameattribute

Default Value**API Name**

ranger.usersync.ldap.user.groupnameattribute

Required

false

Usersync User Name Attribute**Description**

LDAP user name attribute. Example: sAMAccountName in AD, uid or cn in OpenLDAP

Related Name

ranger.usersync.ldap.user.nameattribute

Default Value**API Name**

ranger.usersync.ldap.user.nameattribute

Required

false

Usersync User Object Class**Description**

LDAP User Object Class. Example: person or user

Related Name

ranger.usersync.ldap.user.objectclass

Default Value**API Name**

ranger.usersync.ldap.user.objectclass

Required

false

Usersync User Search Base**Description**

Search base for users. Sample value would be ou=users,dc=hadoop,dc=apache,dc=org. Overrides value specified in ranger.usersync.ldap.searchBase. Multiple Ous can be configured with ; (semicolon) separated eg: cn=users,dc=example,dc=com;ou=example1,ou=example2

Related Name

ranger.usersync.ldap.user.searchbase

Default Value**API Name**

ranger.usersync.ldap.user.searchbase

Required

false

Usersync User Search Filter

Description	Optional additional filter constraining the users selected for syncing. A sample value would be (dept=eng). Customize the value to suit your deployment.
Related Name	ranger.usersync.ldap.user.searchfilter
Default Value	
API Name	ranger.usersync.ldap.user.searchfilter
Required	false

Usersync User Search Scope

Description	Search scope for the users. Value "base" indicates that only the entry specified as the search base in ranger.usersync.ldap.user.searchbase should be considered. "One" indicates that only the immediate children of the entry specified as the search base in ranger.usersync.ldap.user.searchbase should be considered. "Sub" indicates that the entry specified as the search base in ranger.usersync.ldap.user.searchbase, and all of its subordinates to any depth, should be considered.
Related Name	ranger.usersync.ldap.user.searchscope
Default Value	sub
API Name	ranger.usersync.ldap.user.searchscope
Required	false

Usersync Username Case Conversion

Description	Used for converting syncing users to the selected case conversion.
Related Name	ranger.usersync.ldap.username.caseconversion
Default Value	none
API Name	ranger.usersync.ldap.username.caseconversion
Required	false

Enable Results to be Paged for User/Group Request

Description	Whether results can be paged for User/Group requests.
Related Name	ranger.usersync.pagedresultsenabled

Default Value	true
API Name	ranger.usersync.pagedresultsenabled
Required	false

User/Group Request Page size.

Description	Enter Page size for User/Group Request.
Related Name	ranger.usersync.pagedresultssize
Default Value	500
API Name	ranger.usersync.pagedresultssize
Required	false

Maximum Records Per API Call

Description	Maximum number of records to be returned per API call.
Related Name	ranger.usersync.policymanager.maxrecordsperapicall
Default Value	1000
API Name	ranger.usersync.policymanager.maxrecordsperapicall
Required	true

Ranger Usersync Policymgr Username

Description	Ranger Usersync username in Ranger Admin.
Related Name	ranger.usersync.policymgr.username
Default Value	rangerusersync
API Name	ranger.usersync.policymgr.username
Required	false

Ranger Usersync Unix Service Port

Description

Port for Unix authentication service.

Related Name

ranger.usersync.port

Default Value

5151

API Name

ranger.usersync.port

Required

true

Ranger Usersync Role Assignment List Delimiter**Description**

The parameter is used to specify delimiter while syncing roles to users and groups in Ranger Admin. It is a delimiter for roles. Example - "ROLE_SYS_ADMIN:u:username1,username2&ROLE_KEY_ADMIN:g:groupname1", where ROLE_SYS_ADMIN and ROLE_KEY_ADMIN are roles in Ranger Admin separated by delimiter &. Note - All the delimiters parameters ranger.usersync.role.assignment.list.delimiter, ranger.usersync.users.groups.assignment.list.delimiter and ranger.usersync.username.groupname.assignment.list.delimiter should have different values. The delimiters should not contain characters that are allowed in username or groupname.

Related Name

ranger.usersync.role.assignment.list.delimiter

Default Value

&

API Name

ranger.usersync.role.assignment.list.delimiter

Required

false

Usersync Sleeptime interval**Description**

Sleep time interval between user sync operations in milliseconds.

Related Name

ranger.usersync.sleeptimeinmillisbetween sync cycle

Default Value

1 minute(s)

API Name

ranger.usersync.sleeptimeinmillisbetween sync cycle

Required

false

Source for Syncing User and Groups**Description**

For syncing from Ldap source, use "org.apache.ranger.ldapusersync.process.LdapUserGroupBuilder". For syncing from Unix source, use "org.apache.ranger.unixusersync.process.UnixUserGroupBuilder". For syncing from File source, use "org.apache.ranger.unixusersync.process.FileSourceUserGroupBuilder"

Related Name	ranger.usersync.source.impl.class
Default Value	org.apache.ranger.unixusersync.process.UnixUserGroupBuilder
API Name	ranger.usersync.source.impl.class
Required	true

Ranger Usersync Unix Backend

Description	The backend mechanism to read users and groups from a UNIX system. The value is applicable only on UNIX-based systems.
Related Name	ranger.usersync.unix.backend
Default Value	nss
API Name	ranger.usersync.unix.backend
Required	false

Usersync UNIX Minimum User ID

Description	Minimum User ID to start syncing. This should be set to avoid syncing of UNIX system-level users in the Ranger Admin.
Related Name	ranger.usersync.unix.minUserId
Default Value	500
API Name	ranger.usersync.unix.minUserId
Required	false

Usersync Enable User Search

Description	Enable User Search, when ranger.usersync.group.search.first.enabled is set to true.
Related Name	ranger.usersync.user.searchenabled
Default Value	false
API Name	ranger.usersync.user.searchenabled
Required	

false

Ranger Usersync Username Groupname Assignment List Delimiter**Description**

The parameter is used to specify a delimiter while syncing users and groups in Ranger Admin. Used as a delimiter to differentiate between two or more users and groups. Example - "ROLE_SYS_ADMIN:u:username1,username2", where username1 and username2 are separated by ,. Note - All the delimiters parameters ranger.usersync.role.assignment.list.delimiter, ranger.usersync.users.groups.assignment.list.delimiter and ranger.usersync.username.groupname.assignment.list.delimiter should have different values. The delimiters should not contain characters that are allowed in username or groupname.

Related Name

ranger.usersync.username.groupname.assignment.list.delimiter

Default Value

,

API Name

ranger.usersync.username.groupname.assignment.list.delimiter

Required

false

Ranger Usersync User Groups Assignment List Delimiter**Description**

The parameter is used to specify delimiter while syncing users and groups along with specified roles in Ranger Admin. It is a delimiter to differentiate between users and groups from respective roles. Example - "ROLE_SYS_ADMIN:u:username1,username2&ROLE_SYS_ADMIN:g:groupname1,groupname2", where ROLE_SYS_ADMIN is a role. "u" is used to denote the list of users followed by actual usernames which are username1 and username2. While "g" is used to denote the list of groups followed by actual groupnames which are groupname1 and groupname2. Note - All the delimiters parameters ranger.usersync.role.assignment.list.delimiter, ranger.usersync.users.groups.assignment.list.delimiter and ranger.usersync.username.groupname.assignment.list.delimiter should have different values. The delimiters should not contain characters that are allowed in username or groupname.

Related Name

ranger.usersync.users.groups.assignment.list.delimiter

Default Value

:

API Name

ranger.usersync.users.groups.assignment.list.delimiter

Required

false

Ranger Usersync Conf Path**Description**

Staging directory for Ranger Usersync Configuration. This should generally not be changed.

Related Name

ranger_usersync_conf_path

Default Value

<code>/etc/ranger/usersync</code>
API Name
<code>ranger_usersync_conf_path</code>
Required
<code>true</code>

Usersync Bind User Password

Description
Password for the LDAP bind user used for searching users.
Related Name
<code>ranger.usersync.ldap.ldapbindpassword</code>
Default Value
API Name
<code>ranger_usersync_ldap_ldapbindpassword</code>
Required
<code>false</code>

Ranger Usersync Max Heapsize

Description
Maximum size for the Java Process heap. Passed to Java -Xmx. Measured in megabytes.
Related Name
<code>ranger_usersync_max_heap_size</code>
Default Value
1 GiB
API Name
<code>ranger_usersync_max_heap_size</code>
Required
<code>true</code>

Enable Ranger Usersync Metrics

Description
Controls whether the Ranger Usersync metrics are enabled.
Related Name
<code>ranger.usersync.metrics.enabled</code>
Default Value
<code>true</code>
API Name
<code>ranger_usersync_metrics_enabled</code>
Required
<code>false</code>

Ranger Usersync Metrics File Name

Description
File name for the metrics exposed by Ranger Usersync. The file is updated at the frequency configured by Ranger Usersync Metrics Frequency.

Related Name

ranger.usersync.metrics.filename

Default Value

metrics.json

API Name

ranger_usersync_metrics_filename

Required

false

Ranger Usersync Metrics File Path**Description**

The location at which the metrics exposed by Ranger Usersync will be written.

Related Name

ranger.usersync.metrics.filepath

Default Value

/var/log/ranger/metrics-usersync

API Name

ranger_usersync_metrics_filepath

Required

false

Ranger Usersync Metrics Frequency**Description**

The frequency at which the metrics are logged at Ranger Usersync Metrics File Path.

Related Name

ranger.usersync.metrics.frequencytimeinmillis

Default Value

1 minute(s)

API Name

ranger_usersync_metrics_frequency

Required

false

Performance**Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name**Default Value****API Name**

rlimit_fds

Required

false

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' ***These settings override other cgroup settings.***

Related Name

custom.cgroups

Default Value

API Name

rm_custom_resources

Required

false

Cgroup I/O Weight

Description

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

blkio.weight

Default Value

500

API Name

rm_io_weight

Required

true

Cgroup Memory Hard Limit

Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_hard_limit

Required

true

Cgroup Memory Soft Limit

Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Ranger Usersync TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ranger Usersync might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

ranger.usersync.truststore.file

Default Value**API Name**

ssl_client_truststore_location

Required
false

Ranger Usersync TLS/SSL Trust Store Password

Description
The password for the Ranger Usersync TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name
ranger.usersync.truststore.password
Default Value
API Name
ssl_client_truststore_password
Required
false

Stacks Collection

Stacks Collection Data Retention

Description
The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name
stacks_collection_data_retention
Default Value
100 MiB
API Name
stacks_collection_data_retention
Required
false

Stacks Collection Directory

Description
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name
stacks_collection_directory
Default Value
API Name
stacks_collection_directory
Required
false

Stacks Collection Enabled

Description

Whether or not periodic stacks collection is enabled.

Related Name

stacks_collection_enabled

Default Value

false

API Name

stacks_collection_enabled

Required

true

Stacks Collection Frequency

Description

The frequency with which stacks are collected.

Related Name

stacks_collection_frequency

Default Value

5.0 second(s)

API Name

stacks_collection_frequency

Required

false

Stacks Collection Method

Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name

Required	false

Service Triggers

<p>The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:</p> <ul style="list-style-type: none">triggerName (mandatory) - The name of the trigger. This value must be unique for the specific service.triggerExpression (mandatory) - A tsquery expression representing the trigger.streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies. <p>For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]See the trigger rules documentation for more details on how to write triggers using tsquery.The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.</p>

HDFS Service

Description
Name of the HDFS service that this Ranger service instance depends on
Related Name
Default Value
API Name
hdfs_service
Required
true

Ranger KMS Keyadmin User Initial Password

Description
Password for the Ranger administrator, whose login name is "keyadmin". The password should be minimum 8 characters long, with at least one alphabetic and one numeric character. The following characters are invalid: " '\ ` ". Note that this password is only used to setup Ranger in the cluster: any subsequent changes will not be effective. This password can be later changed from the Ranger Admin UI under the user profile page.
Related Name
keyadmin_user_password
Default Value
API Name
keyadmin_user_password
Required
true

Load Balancer Address

Description
Load Balancer Address used by clients to access Ranger Admin. Only required when Ranger Admin is running with High Availability. Example: http://load-balancer-host:load-balancer-port
Related Name

ranger.externalurl
Default Value
API Name
load_balancer_url
Required
false

Ranger Plugin DFS Audit Enabled

Description
Whether DFS audit is enabled.
Related Name
ranger_plugin_hdfs_audit_enabled
Default Value
true
API Name
ranger_plugin_hdfs_audit_enabled
Required
false

Ranger Plugin DFS Audit URL

Description
An absolute URL with no trailing slash should be entered, or leave the value empty. Allows setting up a centralized storage location for Ranger audits. This URL is used as the base for audit directories: all services plugging into Ranger will prepend this URL to their configured path used to store Ranger audits.
Related Name
ranger_plugin_hdfs_audit_url
Default Value
/ranger/audit
API Name
ranger_plugin_hdfs_audit_url
Required
false

Ranger Admin User Initial Password

Description
Password for the Ranger administrator, whose login name is "admin". The password should be minimum 8 characters long, with at least one alphabetic and one numeric character. The following characters are invalid: " '\ ` ". Note that this password is only used to setup Ranger in the cluster: any subsequent changes will not be effective. This password can be later changed from the Ranger Admin UI under the user profile page.
Related Name
rangeradmin_user_password
Default Value
API Name

rangeradmin_user_password
Required
true

Ranger Tagsync User Initial Password

Description
Password for the Ranger administrator, whose login name is "rangertagsync". The password should be minimum 8 characters long, with at least one alphabetic and one numeric character. The following characters are invalid: " '\ ` ´. Note that this password is only used to setup Ranger in the cluster; any subsequent changes will not be effective. This password can be later changed from the Ranger Admin UI under the user profile page.
Related Name
rangertagsync_user_password
Default Value
API Name
rangertagsync_user_password
Required
true

Ranger Usersync User Initial Password

Description
Password for the Ranger administrator, whose login name is "rangerusersync". The password should be minimum 8 characters long, with at least one alphabetic and one numeric character. The following characters are invalid: " '\ ` ´. Note that this password is only used to setup Ranger in the cluster; any subsequent changes will not be effective. This password can be later changed from the Ranger Admin UI under the user profile page.
Related Name
rangerusersync_user_password
Default Value
API Name
rangerusersync_user_password
Required
true

Solr Service

Description
Name of the Solr service that this Ranger service instance depends on
Related Name
Default Value
API Name
solr_service
Required
true

Ports and Addresses

Admin HTTP Port

Description	HTTP Port for Ranger Admin.
Related Name	ranger.service.http.port
Default Value	6080
API Name	ranger_service_http_port
Required	true

Admin HTTPS port

Description	HTTPS Port for Ranger Admin. Only used when SSL is enabled for Ranger Admin.
Related Name	ranger.service.https.port
Default Value	6182
API Name	ranger_service_https_port
Required	true

Suppressions

Suppress Configuration Validator: Atlas Source: Kafka Consumer Group

Description	Whether to suppress configuration warnings produced by the Atlas Source: Kafka Consumer Group configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_atlas.kafka.entities.group.id
Required	true

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	

Default Value

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Configuration Validator: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties**Description**

Whether to suppress configuration warnings produced by the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/atlas-application.properties_role_safety_valve

Required

true

Suppress Configuration Validator: Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml**Description**

Whether to suppress configuration warnings produced by the Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/ranger-admin-site.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml**Description**

Whether to suppress configuration warnings produced by the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/ranger-tagsync-policymgr-ssl.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml

Description

Whether to suppress configuration warnings produced by the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_conf/ranger-tagsync-site.xml_role_safety_valve

Required

true

Suppress Configuration Validator: Ranger Usersync Advanced Configuration Snippet (Safety Valve) for conf/ranger-ugsync-site.xml

Description

Whether to suppress configuration warnings produced by the Ranger Usersync Advanced Configuration Snippet (Safety Valve) for conf/ranger-ugsync-site.xml configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_conf/ranger-ugsync-site.xml_role_safety_valve

Required

true

Suppress Configuration Validator: JMX Exporter Port

Description

Whether to suppress configuration warnings produced by the JMX Exporter Port configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Configuration Validator: JMX Exporter configuration YAML

Description

Whether to suppress configuration warnings produced by the JMX Exporter configuration YAML configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_jmx_exporter_yaml

Required

true

Suppress Configuration Validator: Ranger Admin Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Ranger Admin Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Configuration Validator: Ranger Admin Log Directory**Description**

Whether to suppress configuration warnings produced by the Ranger Admin Log Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Configuration Validator: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Exporters Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Exporters Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_exporters

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Extensions Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Extensions Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_extensions

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Processors Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Processors Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_processors

Required

true

Suppress Configuration Validator: OpenTelemetry Collector Receivers Section**Description**

Whether to suppress configuration warnings produced by the OpenTelemetry Collector Receivers Section configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_receivers
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Password

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Password configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_remote_write_password
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write URL

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write URL configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_remote_write_url
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Remote Write Username

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Remote Write Username configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_remote_write_user
Required
true

Suppress Configuration Validator: OpenTelemetry Collector Service Section

Description
Whether to suppress configuration warnings produced by the OpenTelemetry Collector Service Section configuration validator.
Related Name

Default Value

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Configuration Validator: Exclude Users from Audit Access Tab**Description**

Whether to suppress configuration warnings produced by the Exclude Users from Audit Access Tab configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.accesslogs.exclude.users.list

Required

true

Suppress Configuration Validator: Kerberos Cookie Path**Description**

Whether to suppress configuration warnings produced by the Kerberos Cookie Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.admin.kerberos.cookie.path

Required

true

Suppress Configuration Validator: Default Policy Groups**Description**

Whether to suppress configuration warnings produced by the Default Policy Groups configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.default.policy.groups

Required

true

Suppress Configuration Validator: Default Policy Users**Description**

Whether to suppress configuration warnings produced by the Default Policy Users configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.default.policy.users

Required

true

Suppress Configuration Validator: Admin AD Auth Base DN**Description**

Whether to suppress configuration warnings produced by the Admin AD Auth Base DN configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.ad.base.dn

Required

true

Suppress Configuration Validator: Admin AD Auth Bind DN**Description**

Whether to suppress configuration warnings produced by the Admin AD Auth Bind DN configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.ad.bind.dn

Required

true

Suppress Configuration Validator: Admin AD Auth Domain Name**Description**

Whether to suppress configuration warnings produced by the Admin AD Auth Domain Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.ad.domain

Required

true

Suppress Configuration Validator: Admin AD Auth URL

Description

Whether to suppress configuration warnings produced by the Admin AD Auth URL configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ranger.ldap.ad.url

Required

true

Suppress Configuration Validator: Admin AD Auth User Search Filter

Description

Whether to suppress configuration warnings produced by the Admin AD Auth User Search Filter configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ranger.ldap.ad.user.searchfilter

Required

true

Suppress Configuration Validator: Admin LDAP Auth Base DN

Description

Whether to suppress configuration warnings produced by the Admin LDAP Auth Base DN configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ranger.ldap.base.dn

Required

true

Suppress Configuration Validator: Admin LDAP Auth Bind User

Description

Whether to suppress configuration warnings produced by the Admin LDAP Auth Bind User configuration validator.

Related Name

Default Value

false

API Name`role_config_suppression_ranger.ldap.bind.dn`**Required**`true`**Suppress Configuration Validator: Admin LDAP Auth Group Role Attribute****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth Group Role Attribute configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.group.roleattribute`**Required**`true`**Suppress Configuration Validator: Admin LDAP Auth Group Search Base****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth Group Search Base configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.group.searchbase`**Required**`true`**Suppress Configuration Validator: Admin LDAP Auth Group Search Filter****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth Group Search Filter configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.group.searchfilter`**Required**`true`**Suppress Configuration Validator: Admin LDAP Auth URL****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth URL configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.url

Required

true

Suppress Configuration Validator: Admin LDAP Auth User DN Pattern**Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth User DN Pattern configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.user.dnpattern

Required

true

Suppress Configuration Validator: Admin LDAP Auth User Search Filter**Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth User Search Filter configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.ldap.user.searchfilter

Required

true

Suppress Configuration Validator: SSO Browser Useragent**Description**

Whether to suppress configuration warnings produced by the SSO Browser Useragent configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.sso.browser.useragent

Required

true

Suppress Configuration Validator: SSO Provider Url**Description**

Whether to suppress configuration warnings produced by the SSO Provider Url configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.sso.providerurl

Required

true

Suppress Configuration Validator: SSO Public Key**Description**

Whether to suppress configuration warnings produced by the SSO Public Key configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.sso.publickey

Required

true

Suppress Configuration Validator: Tag Service Name**Description**

Whether to suppress configuration warnings produced by the Tag Service Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.tagservice.auto.name

Required

true

Suppress Configuration Validator: Capture Cluster name**Description**

Whether to suppress configuration warnings produced by the Capture Cluster name configuration validator.

Related Name**Default Value**

false

API Name

`role_config_suppression_ranger.tagsync.atlas.default.cluster.name`**Required**`true`**Suppress Configuration Validator: Ranger Tagsync Username****Description**

Whether to suppress configuration warnings produced by the Ranger Tagsync Username configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.tagsync.dest.ranger.username`**Required**`true`**Suppress Configuration Validator: File Source: Filename****Description**

Whether to suppress configuration warnings produced by the File Source: Filename configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.tagsync.source.file.filename`**Required**`true`**Suppress Configuration Validator: Admin UNIX Auth Service Hostname****Description**

Whether to suppress configuration warnings produced by the Admin UNIX Auth Service Hostname configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.unixauth.service.hostname`**Required**`true`**Suppress Configuration Validator: Admin Unix Auth Service Port****Description**

Whether to suppress configuration warnings produced by the Admin Unix Auth Service Port configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ranger.unixauth.service.port

Required

true

Suppress Configuration Validator: Usersync Filesource File Name**Description**

Whether to suppress configuration warnings produced by the Usersync Filesource File Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.filesource.file

Required

true

Suppress Configuration Validator: Usersync Filesource Delimiter**Description**

Whether to suppress configuration warnings produced by the Usersync Filesource Delimiter configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.filesource.text.delimiter

Required

true

Suppress Configuration Validator: Ranger Usersync Group Based Role Assignment Rules**Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Group Based Role Assignment Rules configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.group.based.role.assignment.rules

Required

true

Suppress Configuration Validator: Usersync Group Member Attribute**Description**

Whether to suppress configuration warnings produced by the Usersync Group Member Attribute configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.group.memberattributename

Required

true

Suppress Configuration Validator: Usersync Group Name Attribute**Description**

Whether to suppress configuration warnings produced by the Usersync Group Name Attribute configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.group.nameattribute

Required

true

Suppress Configuration Validator: Usersync Group Object Class**Description**

Whether to suppress configuration warnings produced by the Usersync Group Object Class configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.group.objectclass

Required

true

Suppress Configuration Validator: Usersync Group Search Base**Description**

Whether to suppress configuration warnings produced by the Usersync Group Search Base configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.group.searchbase

Required

true

Suppress Configuration Validator: Usersync Group Search Filter

Description

Whether to suppress configuration warnings produced by the Usersync Group Search Filter configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.group.searchfilter

Required

true

Suppress Configuration Validator: Usersync Bind User

Description

Whether to suppress configuration warnings produced by the Usersync Bind User configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.ldap.binddn

Required

true

Suppress Configuration Validator: Usersync Search Base

Description

Whether to suppress configuration warnings produced by the Usersync Search Base configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.ldap.searchbase

Required

true

Suppress Configuration Validator: Usersync LDAP/AD URL

Description

Whether to suppress configuration warnings produced by the Usersync LDAP/AD URL configuration validator.

Related Name**Default Value**

false

API Name`role_config_suppression_ranger.usersync.ldap.url`**Required**`true`**Suppress Configuration Validator: Usersync User Group Name Attribute****Description**

Whether to suppress configuration warnings produced by the Usersync User Group Name Attribute configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.ldap.user.groupnameattribute`**Required**`true`**Suppress Configuration Validator: Usersync User Name Attribute****Description**

Whether to suppress configuration warnings produced by the Usersync User Name Attribute configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.ldap.user.nameattribute`**Required**`true`**Suppress Configuration Validator: Usersync User Object Class****Description**

Whether to suppress configuration warnings produced by the Usersync User Object Class configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.ldap.user.objectclass`**Required**`true`**Suppress Configuration Validator: Usersync User Search Base****Description**

Whether to suppress configuration warnings produced by the Usersync User Search Base configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.ldap.user.searchbase

Required

true

Suppress Configuration Validator: Usersync User Search Filter**Description**

Whether to suppress configuration warnings produced by the Usersync User Search Filter configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.ldap.user.searchfilter

Required

true

Suppress Configuration Validator: Ranger Usersync Polycymgr Username**Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Polycymgr Username configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.policymgr.username

Required

true

Suppress Configuration Validator: Ranger Usersync Unix Service Port**Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Unix Service Port configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.port

Required

true

Suppress Configuration Validator: Ranger Usersync Role Assignment List Delimiter**Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Role Assignment List Delimiter configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.role.assignment.list.delimiter

Required

true

Suppress Configuration Validator: Ranger Usersync Username Groupname Assignment List Delimiter**Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Username Groupname Assignment List Delimiter configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.username.groupname.assignment.list.delimiter

Required

true

Suppress Configuration Validator: Ranger Usersync User Groups Assignment List Delimiter**Description**

Whether to suppress configuration warnings produced by the Ranger Usersync User Groups Assignment List Delimiter configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger.usersync.users.groups.assignment.list.delimiter

Required

true

Suppress Configuration Validator: Ranger Admin Conf Path**Description**

Whether to suppress configuration warnings produced by the Ranger Admin Conf Path configuration validator.

Related Name**Default Value**

false

API Name

`role_config_suppression_ranger_admin_conf_path`**Required**`true`**Suppress Configuration Validator: Ranger Admin Max Heapsize****Description**

Whether to suppress configuration warnings produced by the Ranger Admin Max Heapsize configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger_admin_max_heap_size`**Required**`true`**Suppress Configuration Validator: Ranger Admin Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Ranger Admin Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger_admin_role_env_safety_valve`**Required**`true`**Suppress Configuration Validator: Ranger Database Host****Description**

Whether to suppress configuration warnings produced by the Ranger Database Host configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger_database_host`**Required**`true`**Suppress Configuration Validator: Ranger Database Name****Description**

Whether to suppress configuration warnings produced by the Ranger Database Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_database_name

Required

true

Suppress Configuration Validator: Ranger Database User Password**Description**

Whether to suppress configuration warnings produced by the Ranger Database User Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_database_password

Required

true

Suppress Configuration Validator: Ranger Database User**Description**

Whether to suppress configuration warnings produced by the Ranger Database User configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_database_user

Required

true

Suppress Configuration Validator: Admin AD Auth Bind Password**Description**

Whether to suppress configuration warnings produced by the Admin AD Auth Bind Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ldap_ad_bind_password

Required

true

Suppress Configuration Validator: Admin LDAP Auth Bind User Password**Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth Bind User Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_ldap_bind_password

Required

true

Suppress Configuration Validator: Knox Proxy User Groups**Description**

Whether to suppress configuration warnings produced by the Knox Proxy User Groups configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_proxyuser_knox_groups

Required

true

Suppress Configuration Validator: Knox Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the Knox Proxy User Hosts configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_proxyuser_knox_hosts

Required

true

Suppress Configuration Validator: Knox Proxy User Users**Description**

Whether to suppress configuration warnings produced by the Knox Proxy User Users configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_proxyuser_knox_users
Required
true

Suppress Configuration Validator: Ranger Tagsync Conf Path

Description
Whether to suppress configuration warnings produced by the Ranger Tagsync Conf Path configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_ranger_tagsync_conf_path
Required
true

Suppress Configuration Validator: Ranger Tagsync Max Heapsize

Description
Whether to suppress configuration warnings produced by the Ranger Tagsync Max Heapsize configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_ranger_tagsync_max_heap_size
Required
true

Suppress Configuration Validator: Ranger Tagsync Metrics File Name

Description
Whether to suppress configuration warnings produced by the Ranger Tagsync Metrics File Name configuration validator.
Related Name
Default Value
false
API Name
role_config_suppression_ranger_tagsync_metrics_filename
Required
true

Suppress Configuration Validator: Ranger Tagsync Metrics File Path

Description
Whether to suppress configuration warnings produced by the Ranger Tagsync Metrics File Path configuration validator.
Related Name

Default Value

false

API Name

role_config_suppression_ranger_tagsync_metrics_filepath

Required

true

Suppress Configuration Validator: Ranger Tagsync Environment Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the Ranger Tagsync Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_tagsync_role_env_safety_valve

Required

true

Suppress Configuration Validator: Ranger Tomcat Work Dir**Description**

Whether to suppress configuration warnings produced by the Ranger Tomcat Work Dir configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_tomcat_work_dir

Required

true

Suppress Configuration Validator: Ranger Usersync Conf Path**Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Conf Path configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_usersync_conf_path

Required

true

Suppress Configuration Validator: Usersync Bind User Password**Description**

Whether to suppress configuration warnings produced by the Usersync Bind User Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_usersync_ldap_ldapbindpassword

Required

true

Suppress Configuration Validator: Ranger Usersync Max Heapsize**Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Max Heapsize configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_usersync_max_heap_size

Required

true

Suppress Configuration Validator: Ranger Usersync Metrics File Name**Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Metrics File Name configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_usersync_metrics_filename

Required

true

Suppress Configuration Validator: Ranger Usersync Metrics File Path**Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Metrics File Path configuration validator.

Related Name**Default Value**

false

API Name

`role_config_suppression_ranger_usersync_metrics_filepath`**Required**`true`**Suppress Configuration Validator: Ranger Usersync Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_ranger_usersync_role_env_safety_valve`**Required**`true`**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_rm_custom_resources`**Required**`true`**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

Related Name**Default Value**`false`**API Name**`role_config_suppression_role_triggers`**Required**`true`**Suppress Configuration Validator: Ranger Admin TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the Ranger Admin TLS/SSL Trust Store File configuration validator.

Related Name

Default Value

false

API Name

role_config_suppression_ssl_client_truststore_location

Required

true

Suppress Configuration Validator: Ranger Admin TLS/SSL Trust Store Password**Description**

Whether to suppress configuration warnings produced by the Ranger Admin TLS/SSL Trust Store Password configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_client_truststore_password

Required

true

Suppress Configuration Validator: Ranger Admin TLS/SSL Server Keystore File Location**Description**

Whether to suppress configuration warnings produced by the Ranger Admin TLS/SSL Server Keystore File Location configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_ssl_server_keystore_location

Required

true

Suppress Configuration Validator: Ranger Admin TLS/SSL Server Keystore File Password**Description**

Whether to suppress configuration warnings produced by the Ranger Admin TLS/SSL Server Keystore File Password configuration validator.

Related Name**Default Value**

false

Ranger KMS Properties in Cloudera Runtime 7.2.18

Role groups:

Ranger KMS Server

Advanced

Ranger KMS Server Advanced Configuration Snippet (Safety Valve) for conf/core-site.xml

Description	For advanced use only. A string to be inserted into conf/core-site.xml for this role only.
Related Name	
Default Value	
API Name	conf/core-site.xml_role_safety_valve
Required	false

Ranger KMS Server Advanced Configuration Snippet (Safety Valve) for conf/dbks-site.xml

Description	For advanced use only. A string to be inserted into conf/dbks-site.xml for this role only.
Related Name	
Default Value	
API Name	

`conf/dbks-site.xml_role_safety_valve`**Required**`false`**Ranger KMS Server Advanced Configuration Snippet (Safety Valve) for conf/hdfs-site.xml****Description**

For advanced use only. A string to be inserted into conf/hdfs-site.xml for this role only.

Related Name**Default Value****API Name**`conf/hdfs-site.xml_role_safety_valve`**Required**`false`**Ranger KMS Server Advanced Configuration Snippet (Safety Valve) for conf/kms-site.xml****Description**

For advanced use only. A string to be inserted into conf/kms-site.xml for this role only.

Related Name**Default Value****API Name**`conf/kms-site.xml_role_safety_valve`**Required**`false`**Ranger KMS Server Advanced Configuration Snippet (Safety Valve) for conf/ranger-kms-audit.xml****Description**

For advanced use only. A string to be inserted into conf/ranger-kms-audit.xml for this role only.

Related Name**Default Value****API Name**`conf/ranger-kms-audit.xml_role_safety_valve`**Required**`false`**Ranger KMS Server Advanced Configuration Snippet (Safety Valve) for conf/ranger-kms-policymgr-ssl.xml****Description**

For advanced use only. A string to be inserted into conf/ranger-kms-policymgr-ssl.xml for this role only.

Related Name**Default Value****API Name**`conf/ranger-kms-policymgr-ssl.xml_role_safety_valve`

Required

false

Ranger KMS Server Advanced Configuration Snippet (Safety Valve) for conf/ranger-kms-security.xml**Description**

For advanced use only. A string to be inserted into conf/ranger-kms-security.xml for this role only.

Related Name**Default Value****API Name**

conf/ranger-kms-security.xml_role_safety_valve

Required

false

Ranger KMS Server Advanced Configuration Snippet (Safety Valve) for conf/ranger-kms-site.xml**Description**

For advanced use only. A string to be inserted into conf/ranger-kms-site.xml for this role only.

Related Name**Default Value****API Name**

conf/ranger-kms-site.xml_role_safety_valve

Required

false

Ranger KMS Server Logging Advanced Configuration Snippet (Safety Valve)**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

Related Name**Default Value****API Name**

log4j_safety_valve

Required

false

Enable auto refresh for metric configurations**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

Related Name**Default Value**

false

API Name

metric_config_auto_refresh

Required
false

Heap Dump Directory

Description
Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.
Related Name
oom_heap_dump_dir
Default Value
/tmp
API Name
oom_heap_dump_dir
Required
false

Dump Heap When Out of Memory

Description
When set, generates a heap dump file when when an out-of-memory error occurs.
Related Name
Default Value
true
API Name
oom_heap_dump_enabled
Required
true

Kill When Out of Memory

Description
When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.
Related Name
Default Value
true
API Name
oom_sigkill_enabled
Required
true

Automatically Restart Process

Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

Related Name

Default Value

false

API Name

process_auto_restart

Required

true

Enable Metric Collection

Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

Related Name

Default Value

true

API Name

process_should_monitor

Required

true

Process Start Retry Attempts

Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

Related Name

Default Value

3

API Name

process_start_retries

Required

false

Process Start Wait Timeout

Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/ crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

Related Name

Default Value

20

API Name	process_start_secs
Required	false

Ranger KMS Server Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
Related Name	
Default Value	
API Name	RANGER_KMS_SERVER_role_env_safety_valve
Required	false

Logs

Ranger KMS Server Log Directory

Description	The log directory for log files of the role Ranger KMS Server.
Related Name	log_dir
Default Value	/var/log/ranger/kms
API Name	log_dir
Required	false

Ranger KMS Server Logging Threshold

Description	The minimum log level for Ranger KMS Server logs
Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

Ranger KMS Server Maximum Log File Backups

Description	The maximum number of rolled log files to keep for Ranger KMS Server logs. Typically used by log4j or logback.
--------------------	--

Related Name	
Default Value	10
API Name	max_log_backup_index
Required	false

Ranger KMS Server Max Log Size

Description	The maximum size, in megabytes, per log file for Ranger KMS Server logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB
API Name	max_log_size
Required	false

Monitoring

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	true
API Name	enable_alerts
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts
Required	false

Enable JMX Exporter (beta)

Description

JMX Exporter support is a beta feature. If enabled, CM configures the role to run JMX Exporter in agent mode with the provided port and YAML configuration. This exporter then can be used with the OpenTelemetry Collector feature. [See the JMX Exporter documentation.](#)

Related Name

Default Value

false

API Name

jmx_exporter_enabled

Required

true

JMX Exporter Port

Description

JMX Exporter needs a port to implement a Prometheus exporter.

Related Name

Default Value

API Name

jmx_exporter_port

Required

false

JMX Exporter configuration YAML

Description

This configuration is passed to JMX Exporter as it is. [See the JMX Exporter documentation.](#)

Related Name

Default Value

API Name

jmx_exporter_yaml

Required

false

Log Directory Free Space Monitoring Absolute Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

Related Name

Default Value

Warning: 10 GiB, Critical: 5 GiB

API Name

log_directory_free_space_absolute_thresholds

Required

false

Log Directory Free Space Monitoring Percentage Thresholds

Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

Related Name

Default Value

Warning: Never, Critical: Never

API Name

log_directory_free_space_percentage_thresholds

Required

false

Metric Filter

Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm_heap_used_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm_heap_used_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }

Related Name

Default Value

API Name

monitoring_metric_filter

Required

false

OpenTelemetry Collector Exporters Section

Description

Define the exporters settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value**

exporters: prometheusremotewrite/\$ROLE_NAME: endpoint:
\$ROLE_PARAM(otelcol_remote_write_url) auth: authenticator: basicauth/common tls:

OpenTelemetry Collector Remote Write Password

Description

Remote write password for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_password) expression. Specify \$INFRA(cdp_request_signer_password) when forwarding to Cloudera Observability central monitoring. (This is the default.)

Related Name

Default Value

API Name

otelcol_remote_write_password

Required

false

OpenTelemetry Collector Remote Write URL

Description

Remote write URL for the OpenTelemetry Collector. This param is for convenience and intended to be used at the exporters section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_url) expression. Specify \$INFRA(cdp_request_signer_url) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_url)

API Name

otelcol_remote_write_url

Required

false

OpenTelemetry Collector Remote Write Username

Description

Remote write username for the OpenTelemetry Collector. This param is for convenience and intended to be used at the extensions section of Otelcol settings using the \$ROLE_PARAM(otelcol_remote_write_user) expression. Specify \$INFRA(cdp_request_signer_username) when forwarding to Cloudera Observability central monitoring.

Related Name

Default Value

\$INFRA(cdp_request_signer_username)

API Name

otelcol_remote_write_user

Required

false

OpenTelemetry Collector Service Section**Description**

Define the service settings as a yaml snippet according to the OpenTelemetry Collector standards. Variable substitution available, see the receivers' help.

Related Name**Default Value****API Name**

otelcol_service

Required

false

Enable OpenTelemetry Collector (beta)**Description**

OpenTelemetry Collector support is a new beta feature (will change without notice) which can run OpenTelemetry Collector as an agent together with the CM Agent to forward metrics to a Prometheus like storage.

Related Name**Default Value**

false

API Name

otelcol_should_collect

Required

true

Swap Memory Usage Rate Thresholds**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

Related Name**Default Value**

Warning: Never, Critical: Never

API Name

process_swap_memory_rate_thresholds

Required

false

Swap Memory Usage Rate Window**Description**

The period to review when computing unexpected swap memory usage change of the process.

Related Name

	common.process.swap_memory_rate_window
Default Value	5 minute(s)
API Name	process_swap_memory_rate_window
Required	false

Process Swap Memory Thresholds

Description	The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.
Related Name	
Default Value	Warning: 200 B, Critical: Never
API Name	process_swap_memory_thresholds
Required	false

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	ranger_kms_server_fd_thresholds
Required	false

Ranger KMS Server Host Health Test

Description	When computing the overall Ranger KMS Server health, consider the host's health.
Related Name	
Default Value	true
API Name	ranger_kms_server_host_health_enabled
Required	false

Ranger KMS Server Process Health Test

Description

Enables the health test that the Ranger KMS Server's process state is consistent with the role configuration

Related Name**Default Value**

true

API Name

ranger_kms_server_scm_health_enabled

Required

false

Role Triggers

Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=\$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

Related Name**Default Value**

[]

API Name

role_triggers

Required

true

Unexpected Exits Thresholds

Description

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.

Related Name**Default Value**

Warning: Never, Critical: Any

API Name

unexpected_exits_thresholds

Required

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name

Default Value

5 minute(s)

API Name

unexpected_exits_window

Required

false

Other

Ranger KMS Server Diagnostics Collection Timeout

Description

The timeout in milliseconds to wait for diagnostics collection to complete.

Related Name

Default Value

5 minute(s)

API Name

csd_role_diagnostics_timeout

Required

false

Graceful Shutdown Timeout

Description

The timeout in milliseconds to wait for graceful shutdown to complete.

Related Name

Default Value

18 second(s)

API Name

graceful_stop_timeout

Required

false

Hadoop KMS Audit Aggregation Window In Milliseconds

Description

Duplicate audit log events within the aggregation window (specified in ms) are quashed to reduce log traffic. A single message for aggregated events is printed at the end of the window, along with a count of the number of aggregated events.

Related Name

hadoop.kms.audit.aggregation.window.ms

Default Value

10 second(s)

API Name

hadoop_kms_audit_aggregation_window_ms

Required

false

Hadoop KMS Authentication Signer Secret Provider**Description**

Indicates how the secret to sign the authentication cookies will be stored. Options are 'random' (default), 'string' and 'zookeeper'. If using a setup with multiple KMS instances, 'zookeeper' should be used.

Related Name

hadoop.kms.authentication.signer.secret.provider

Default Value

random

API Name

hadoop_kms_authentication_signer_secret_provider

Required

false

Hadoop KMS Authentication Signer Secret Provider Zookeeper Auth Type**Description**

The Zookeeper authentication type, 'none' or kerberos.

Related Name

hadoop.kms.authentication.signer.secret.provider.zookeeper.auth.type

Default Value

none

API Name

hadoop_kms_authentication_signer_secret_provider_zookeeper_auth_type

Required

false

Hadoop KMS Authentication Signer Secret Provider Zookeeper Path**Description**

The Zookeeper ZNode path where the KMS instances will store and retrieve the secret from.

Related Name

hadoop.kms.authentication.signer.secret.provider.zookeeper.path

Default Value

/hadoop-kms/hadoop-auth-signature-secret

API Name`hadoop_kms_authentication_signer_secret_provider_zookeeper_path`**Required**`false`**Hadoop KMS Blacklist Decrypt EEK****Description**

Add user which is needed to be blacklist for decrypt EncryptedKey CryptoExtension operations. Multiple list of user's can be added with comma separated.

Related Name`hadoop.kms.blacklist.DECRYPT_EEK`**Default Value**`hdfs`**API Name**`hadoop_kms_blacklist_decrypt_eeek`**Required**`false`**Hadoop KMS Cache Enable****Description**

Whether the KMS will act as a cache for the backing KeyProvider. When the cache is enabled, operations like `getKeyVersion`, `getMetadata`, and `getCurrentKey` will sometimes return cached data without consulting the backing KeyProvider. Cached values are flushed when keys are deleted or modified.

Related Name`hadoop.kms.cache.enable`**Default Value**`true`**API Name**`hadoop_kms_cache_enable`**Required**`false`**Hadoop Kms Cache Timeout In Milliseconds****Description**

Expiry time for the KMS key version and key metadata cache, in milliseconds. This affects `getKeyVersion` and `getMetadata`.

Related Name`hadoop.kms.cache.timeout.ms`**Default Value**`10 minute(s)`**API Name**`hadoop_kms_cache_timeout_ms`**Required**`false`

Hadoop KMS Current Key Cache Timeout In Milliseconds

Description

Expiry time for the KMS current key cache, in milliseconds. This affects getCurrentKey operations.

Related Name

hadoop.kms.current.key.cache.timeout.ms

Default Value

30 second(s)

API Name

hadoop_kms_current_key_cache_timeout_ms

Required

false

HDFS Proxy User Groups

Description

Allows the hdfs superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.

Related Name

hadoop.kms.proxyuser.hdfs.groups

Default Value

*

API Name

hadoop_kms_proxyuser_hdfs_groups

Required

false

HDFS Proxy User Hosts

Description

Comma-delimited list of hosts where you want to allow the hdfs user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host_'.

Related Name

hadoop.kms.proxyuser.hdfs.hosts

Default Value

Required

false

Hue Proxy User Groups**Description**

Allows the hue superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.

Related Name

hadoop.kms.proxyuser.hue.groups

Default Value

*

API Name

hadoop_kms_proxyuser_hue_groups

Required

false

Hue Proxy User Hosts

Description

Comma-delimited list of hosts where you want to allow the hue user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host'.

Related Name

hadoop.kms.proxyuser.hue.hosts

Default Value

*

API Name

hadoop_kms_proxyuser_hue_hosts

Required

false

Livy Proxy User Groups

Description

Allows the livy superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.

Related Name

hadoop.kms.proxyuser.livy.groups

Default Value

*

API Name

hadoop_kms_proxyuser_livy_groups

Required

false

Livy Proxy User Hosts

Description

Comma-delimited list of hosts where you want to allow the livy user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host'.

Related Name

hadoop.kms.proxyuser.livy.hosts

Default Value

*

API Name

hadoop_kms_proxyuser_livy_hosts

Required

false

Mapred Proxy User Groups

Description

Allows the mapped superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.

Related Name

hadoop.kms.proxyuser.mapred.groups

Default Value

*

API Name

hadoop_kms_proxyuser_mapred_groups

Required

false

Mapred Proxy User Hosts**Description**

Comma-delimited list of hosts where you want to allow the mapred user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host_'.

Related Name

hadoop.kms.proxyuser.mapred.hosts

Default Value

*

API Name

hadoop_kms_proxyuser_mapred_hosts

Required

false

Oozie Proxy User Groups**Description**

Allows the oozie superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.

Related Name

hadoop.kms.proxyuser.oozie.groups

Default Value

*

API Name

hadoop_kms_proxyuser_oozie_groups

Required

false

Oozie Proxy User Hosts**Description**

Comma-delimited list of hosts where you want to allow the oozie user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host_'.

Related Name

	hadoop.kms.proxyuser.oozie.hosts
Default Value	*
API Name	
	hadoop_kms_proxyuser_oozie_hosts
Required	false

Ranger Proxy User Groups

Description	Allows the ranger superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.
Related Name	hadoop.kms.proxyuser.ranger.groups
Default Value	*
API Name	
	hadoop_kms_proxyuser_ranger_groups
Required	false

Ranger Proxy User Hosts

Description	Comma-delimited list of hosts where you want to allow the ranger user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host_'.
Related Name	hadoop.kms.proxyuser.ranger.hosts
Default Value	*
API Name	
	hadoop_kms_proxyuser_ranger_hosts
Required	false

YARN Proxy User Groups

Description	Allows the yarn superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.
Related Name	hadoop.kms.proxyuser.yarn.groups
Default Value	*

API Name

hadoop_kms_proxyuser_yarn_groups

Required

false

YARN Proxy User Hosts**Description**

Comma-delimited list of hosts where you want to allow the yarn user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host'.

Related Name

hadoop.kms.proxyuser.yarn.hosts

Default Value

*

API Name

hadoop_kms_proxyuser_yarn_hosts

Required

false

Zeppelin Proxy User Groups**Description**

Allows the zeppelin superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.

Related Name

hadoop.kms.proxyuser.zeppelin.groups

Default Value

*

API Name

hadoop_kms_proxyuser_zeppelin_groups

Required

false

Zeppelin Proxy User Hosts**Description**

Comma-delimited list of hosts where you want to allow the zeppelin user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host'.

Related Name

hadoop.kms.proxyuser.zeppelin.hosts

Default Value

*

API Name

hadoop_kms_proxyuser_zeppelin_hosts

Required

false

Hadoop Security Keystore JavaKeyStoreProvider Password**Description**

If using the JavaKeyStoreProvider, the password for the keystore file.

Related Name

hadoop.security.keystore.JavaKeyStoreProvider.password

Default Value**API Name**

hadoop_security_keystore_javakeystoreprovider_password

Required

false

Azure Client ID**Description**

Azure client id is a unique identifier generated by Azure AD that is tied to an application and service principal during its initial provisioning.

Related Name

ranger.kms.azure.client.id

Default Value**API Name**

ranger_kms_azure_client_id

Required

false

Azure Client Secret**Description**

Azure client secret to authenticate to key vault.

Related Name

ranger.kms.azure.client.secret

Default Value**API Name**

ranger_kms_azure_client_secret

Required

false

Azure key vault certificate password**Description**

Azure key vault certificate password.

Related Name

ranger.kms.azure.keyvault.certificate.password

Default Value**API Name**

ranger_kms_azure_keyvault_certificate_password

Required

false

Azure Key Vault Certificate Path

Description

Azure key vault certificate path.

Related Name

ranger.kms.azure.keyvault.certificate.path

Default Value**API Name**

ranger_kms_azure_keyvault_certificate_path

Required

false

Enable Azure Key Vault SSL

Description

Azure authentication via certificate or password.

Related Name

ranger.kms.azure.keyvault.ssl.enabled

Default Value

false

API Name

ranger_kms_azure_keyvault_ssl_enabled

Required

false

Azure Master Key Name

Description

Azure master key name.

Related Name

ranger.kms.azure.masterkey.name

Default Value**API Name**

ranger_kms_azure_masterkey_name

Required

false

Azure Master Key Type

Description

Select the type for the Master key. Key Vault supports RSA and Elliptic Curve keys.

Related Name

ranger.kms.azure.masterkey.type

Default Value

RSA

API Name

ranger_kms_azure_masterkey_type

Required

false

Azure Zonekey Encryption Algorithm

Description

A supported algorithm for a encryption zone key operation.

Related Name

ranger.kms.azure.zonekey.encryption.algorithm

Default Value

RSA1_5

API Name

ranger_kms_azure_zonekey_encryption_algorithm

Required

false

Enable Azure Key Vault

Description

Whether to enable Azure key vault for secure key management.

Related Name

ranger.kms.azurekeyvault.enabled

Default Value

false

API Name

ranger_kms_azurekeyvault_enabled

Required

false

Azure Key Vault Url

Description

Azure Key Vault url of format "https://{keyvault-name}.vault.azure.net/", where keyvault-name is the name for a key vault in the Microsoft Azure Key Vault service.

Related Name

ranger.kms.azurekeyvault.url

Default Value**API Name**

ranger_kms_azurekeyvault_url

Required

false

Enable Hardware Security Module (HSM) For Ranger KMS (Luna)

Description

Whether to enable HSM for protection of cryptographic keys.

Related Name

ranger.ks.hsm.enabled

Default Value

false

API Name

ranger_kms_hsm_enabled

Required

false

HSM Partition Name**Description**

Independent logical HSM partition that resides within Luna SA appliance's physical K6 HSM appliances. It manage access controls, security policies and administration access. In case of high availability enter the group name.

Related Name

ranger.ks.hsm.partition.name

Default Value**API Name**

ranger_kms_hsm_partition_name

Required

false

HSM partition password**Description**

Password for securing HSM partition.

Related Name

ranger.ks.hsm.partition.password

Default Value**API Name**

ranger_kms_hsm_partition_password

Required

false

HSM Type**Description**

Select HSM type.

Related Name

ranger.ks.hsm.type

Default Value

LunaProvider

API Name

ranger_kms_hsm_type

Required

false

Enable SafeNet Keysecure For Ranger KMS**Description**

Whether to enable Keysecure for secure and centralized key management.

Related Name

	ranger.kms.keysecure.enabled
Default Value	false
API Name	
	ranger_kms_keysecure_enabled
Required	
	false

SafeNet Keysecure Hostname

Description	Hostname of SafeNet Keysecure.
Related Name	
	ranger.kms.keysecure.hostname
Default Value	
API Name	
	ranger_kms_keysecure_hostname
Required	
	false

SafeNet Keysecure Login Password

Description	Login Password for accessing SafeNet Keysecure.
Related Name	
	ranger.kms.keysecure.login.password
Default Value	
API Name	
	ranger_kms_keysecure_login_password
Required	
	false

SafeNet Keysecure Login Username

Description	Login Username for accessing SafeNet Keysecure.
Related Name	
	ranger.kms.keysecure.login.username
Default Value	
API Name	
	ranger_kms_keysecure_login_username
Required	
	false

SafeNet Keysecure MasterKey Name

Description	Enter Keysecure masterkey Name. It is used for encrypting/decrypting zone keys.
-------------	---

Related Name

ranger.kms.keysecure.masterkey.name

Default Value**API Name**

ranger_kms_keysecure_masterkey_name

Required

false

SafeNet Keysecure Masterkey Size**Description**

SafeNet Keysecure Masterkey Size.

Related Name

ranger.kms.keysecure.masterkey.size

Default Value

256

API Name

ranger_kms_keysecure_masterkey_size

Required

false

SafeNet Keysecure Sunpkcs11 cfg Filepath**Description**

SafeNet Keysecure sunpkcs11 cfg filepath.

Related Name

ranger.kms.keysecure.sunpkcs11.cfg.filepath

Default Value**API Name**

ranger_kms_keysecure_sunpkcs11_cfg_filepath

Required

false

Enable SafeNet Keysecure User Password Authentication**Description**

Whether to enable SafeNet Keysecure user password authentication.

Related Name

ranger.kms.keysecure.UserPassword.Authentication

Default Value

false

API Name

ranger_kms_keysecure_userpassword_authentication

Required

false

Ranger KMS Master Key Password**Description**

Password for Ranger KMS Master Key.

Related Name

ranger.db.encrypt.key.password

Default Value**API Name**

ranger_kms_master_key_password

Required

true

Ranger KMS Max Heapsize**Description**

Maximum size for the Java Process heap. Passed to Java -Xmx. Measured in megabytes.

Related Name

ranger_kms_max_heap_size

Default Value

1 GiB

API Name

ranger_kms_max_heap_size

Required

true

Ranger KMS Plugin Audit Hdfs Spool Directory Path**Description**

Spool directory for Ranger audits being written to DFS.

Related Name

xasecure.audit.destination.hdfs.batch.filespool.dir

Default Value

/var/log/kms/audit/hdfs/spool

API Name

ranger_kms_plugin_hdfs_audit_spool_directory

Required

true

Ranger KMS Plugin Policy Cache Directory Path**Description**

The directory where Ranger security policies are cached locally.

Related Name

ranger.plugin.kms.policy.cache.dir

Default Value

/var/lib/ranger/kms/policy-cache

API Name

ranger_kms_plugin_policy_cache_directory

Required

true

Ranger KMS Plugin Audit Solr Spool Directory Path**Description**

Spool directory for Ranger audits being written to Solr.

Related Name

xasecure.audit.destination.solr.batch.filespool.dir

Default Value

/var/log/kms/audit/solr/spool

API Name

ranger_kms_plugin_solr_audit_spool_directory

Required

true

Ranger Kms Server Canary Health Enabled**Description**

Ranger Kms Server Canary is enabled/disabled

Related Name

ranger_kms_server_canary_health_enabled

Default Value

true

API Name

ranger_kms_server_canary_health_enabled

Required

false

Ranger Kms Server Canary Health Timeout**Description**

Timeout for Ranger Kms Server Canary health check.

Related Name

ranger_kms_server_canary_health_timeout

Default Value

30 second(s)

API Name

ranger_kms_server_canary_health_timeout

Required

false

Ranger KMS Tomcat Work Dir**Description**

Tomcat work directory for Ranger KMS. This should generally not be changed.

Related Name

ranger_kms_tomcat_work_dir

Default Value

/var/lib/ranger/kms

API Name

ranger_kms_tomcat_work_dir

Required

true

Ranger Plugin Trusted Proxy IP Address

Description

Accepts a list of IP addresses of proxy servers for trusting.

Related Name

ranger.plugin.kms.trusted.proxy.ipaddress

Default Value

API Name

ranger_plugin_trusted_proxy_ipaddress

Required

false

Ranger Plugin Use X-Forwarded For IP Address

Description

The parameter is used for identifying the originating IP address of a user connecting to a component through proxy for audit logs.

Related Name

ranger.plugin.kms.use.x-forwarded-for.ipaddress

Default Value

false

API Name

ranger_plugin_use_x_forwarded_for_ipaddress

Required

false

Performance

Maximum Process File Descriptors

Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

Related Name

Default Value

API Name

rlimit_fds

Required

false

Ports and Addresses

Ranger KMS HTTP Port

Description

HTTP Port for Ranger KMS.

Related Name

ranger.service.http.port

Default Value

9292

API Name

ranger_kms_http_port

Required

false

Ranger KMS HTTPS Port

Description

HTTPS Port for Ranger KMS. Only used when SSL is enabled for Ranger KMS.

Related Name

ranger.service.https.port

Default Value

9494

API Name

ranger_kms_https_port

Required

false

Resource Management

Cgroup CPU Shares

Description

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

Related Name

cpu.shares

Default Value

1024

API Name

rm_cpu_shares

Required

true

Custom Control Group Resources (overrides Cgroup settings)

Description

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when

the process starts. Use the same format as used for arguments to the `cgexec` command:
`resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`
These settings override other `cgroup` settings.

Related Name

`custom.cgroups`

Default Value**API Name**

`rm_custom_resources`

Required

`false`

Cgroup I/O Weight**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

Related Name

`blkio.weight`

Default Value

`500`

API Name

`rm_io_weight`

Required

`true`

Cgroup Memory Hard Limit**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

`memory.limit_in_bytes`

Default Value

`-1 MiB`

API Name

`rm_memory_hard_limit`

Required

`true`

Cgroup Memory Soft Limit**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page

cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

Related Name

memory.soft_limit_in_bytes

Default Value

-1 MiB

API Name

rm_memory_soft_limit

Required

true

Security

Ranger KMS Server TLS/SSL Trust Store File

Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ranger KMS Server might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

Related Name

xasecure.policymgr.clientssl.truststore

Default Value

API Name

ssl_client_truststore_location

Required

false

Ranger KMS Server TLS/SSL Trust Store Password

Description

The password for the Ranger KMS Server TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

Related Name

xasecure.policymgr.clientssl.truststore.password

Default Value

API Name

ssl_client_truststore_password

Required

false

Enable TLS/SSL for Ranger KMS Server

Description

Encrypt communication between clients and Ranger KMS Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name	ranger.service.https.attrib.ssl.enabled
Default Value	false
API Name	ssl_enabled
Required	false

Ranger KMS Server TLS/SSL Server Keystore File Location

Description	The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ranger KMS Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.
Related Name	ranger.service.https.attrib.keystore.file
Default Value	
API Name	ssl_server_keystore_location
Required	false

Ranger KMS Server TLS/SSL Server Keystore File Password

Description	The password for the Ranger KMS Server keystore file.
Related Name	ranger.service.https.attrib.keystore.pass
Default Value	
API Name	ssl_server_keystore_password
Required	false

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	100 MiB
API Name	stacks_collection_data_retention

Required
false

Stacks Collection Directory

Description
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name
stacks_collection_directory
Default Value
API Name
stacks_collection_directory
Required
false

Stacks Collection Enabled

Description
Whether or not periodic stacks collection is enabled.
Related Name
stacks_collection_enabled
Default Value
false
API Name
stacks_collection_enabled
Required
true

Stacks Collection Frequency

Description
The frequency with which stacks are collected.
Related Name
stacks_collection_frequency
Default Value
5.0 second(s)
API Name
stacks_collection_frequency
Required
false

Stacks Collection Method

Description
The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that

have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

Related Name

stacks_collection_method

Default Value

jstack

API Name

stacks_collection_method

Required

false

Suppressions**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

Related Name**Default Value**

false

API Name

role_config_suppression_cdh_version_validator

Required

true

Suppress Parameter Validation: Ranger KMS Server Advanced Configuration Snippet (Safety Valve) for conf/core-site.xml**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger KMS Server Advanced Configuration Snippet (Safety Valve) for conf/core-site.xml parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_conf/core-site.xml_role_safety_valve

Required

Required
true

Suppress Parameter Validation: HTTP Proxy User Groups

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Proxy User Groups parameter.
Related Name
Default Value
false
API Name
role_config_suppression_hadoop_kms_proxyuser_http_groups
Required
true

Suppress Parameter Validation: HTTP Proxy User Hosts

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Proxy User Hosts parameter.
Related Name

Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_http_hosts
Required	true

Suppress Parameter Validation: HttpFS Proxy User Groups

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the HttpFS Proxy User Groups parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_httpfs_groups
Required	true

Suppress Parameter Validation: HttpFS Proxy User Hosts

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the HttpFS Proxy User Hosts parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_httpfs_hosts
Required	true

Suppress Parameter Validation: Hue Proxy User Groups

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Hue Proxy User Groups parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_hue_groups
Required	true

Suppress Parameter Validation: Hue Proxy User Hosts

Description	
--------------------	--

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Hue Proxy User Hosts parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_hue_hosts
Required	true

Suppress Parameter Validation: Livy Proxy User Groups

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Proxy User Groups parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_livy_groups
Required	true

Suppress Parameter Validation: Livy Proxy User Hosts

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Proxy User Hosts parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_livy_hosts
Required	true

Suppress Parameter Validation: Mapred Proxy User Groups

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Mapred Proxy User Groups parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_mapred_groups
Required	

true

Suppress Parameter Validation: Mapred Proxy User Hosts

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Mapred Proxy User Hosts parameter.

Default Value

false

API Name

role_config_suppression_hadoop_kms_proxyuser_mapred_hosts

Required

true

Suppress Parameter Validation: Oozie Proxy User Groups

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Proxy User Groups parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hadoop_kms_proxyuser_oozie_groups

Required

true

Suppress Parameter Validation: Oozie Proxy User Hosts

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Proxy User Hosts parameter.

Related Name

Default Value

false

API Name

role_config_suppression_hadoop_kms_proxyuser_oozie_hosts

Required

true

Suppress Parameter Validation: Ranger Proxy User Groups

Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Proxy User Groups parameter.

Related Name

Default Value

false

API Name	role_config_suppression_hadoop_kms_proxyuser_ranger_groups
Required	true

Suppress Parameter Validation: Ranger Proxy User Hosts

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Proxy User Hosts parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_ranger_hosts
Required	true

Suppress Parameter Validation: YARN Proxy User Groups

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the YARN Proxy User Groups parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_yarn_groups
Required	true

Suppress Parameter Validation: YARN Proxy User Hosts

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the YARN Proxy User Hosts parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_hadoop_kms_proxyuser_yarn_hosts
Required	true

Suppress Parameter Validation: Zeppelin Proxy User Groups

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Zeppelin Proxy User Groups parameter.
--------------------	--

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_zeppelin_groups

Required

true

Suppress Parameter Validation: Zeppelin Proxy User Hosts**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Zeppelin Proxy User Hosts parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_kms_proxyuser_zeppelin_hosts

Required

true

Suppress Parameter Validation: Hadoop Security Keystore JavaKeyStoreProvider Password**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hadoop Security Keystore JavaKeyStoreProvider Password parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_hadoop_security_keystore_javakeystoreprovider_password

Required

true

Suppress Parameter Validation: JMX Exporter Port**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter Port parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_port

Required

true

Suppress Parameter Validation: JMX Exporter configuration YAML**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Exporter configuration YAML parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_jmx_exporter_yaml

Required

true

Suppress Parameter Validation: Ranger KMS Server Logging Advanced Configuration Snippet (Safety Valve)**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger KMS Server Logging Advanced Configuration Snippet (Safety Valve) parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log4j_safety_valve

Required

true

Suppress Parameter Validation: Ranger KMS Server Log Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger KMS Server Log Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_log_dir

Required

true

Suppress Parameter Validation: Heap Dump Directory**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_oom_heap_dump_dir
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Exporters Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Exporters Section parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_exporters
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Extensions Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Extensions Section parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_extensions
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Processors Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Processors Section parameter.
Related Name
Default Value
false
API Name
role_config_suppression_otelcol_processors
Required
true

Suppress Parameter Validation: OpenTelemetry Collector Receivers Section

Description
Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Receivers Section parameter.
Related Name

Default Value	false
API Name	role_config_suppression_otelcol_receivers
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Password

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Password parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_password
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write URL

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write URL parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_url
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Remote Write Username

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Remote Write Username parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_otelcol_remote_write_user
Required	true

Suppress Parameter Validation: OpenTelemetry Collector Service Section

Description	
--------------------	--

Whether to suppress configuration warnings produced by the built-in parameter validation for the OpenTelemetry Collector Service Section parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_otelcol_service

Required

true

Suppress Parameter Validation: Azure Client ID**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Azure Client ID parameter.

Related Name**Default Value**

false

API Name

role_config_suppression_ranger_kms_azure_client_id

Required

true

Suppress Parameter Validation: Azure Client Secret**Description**
