Add ReadyFlow to the Catalog

ReadyFlows are out of box flow definitions, designed to make getting started with Cloudera DataFlow quick and easy. To use them, just add the ReadyFlow to the Catalog.

For UI

Steps

1. From the ReadyFlow Gallery page, identify the ReadyFlow you want to use.
2. Review the ReadyFlow details by clicking View Details.
3. Click Add to Catalog to add the ReadyFlow into the Cloudera DataFlow Catalog and make it ready for deployment.
4. Click Add to confirm that you want to add the ReadyFlow to the Catalog.

For CLI

Before you begin

- You have installed Cloudera CLI.
- Run `cdp df list-ready-flows` to get the crn.

Steps

1. To add a ReadyFlow to the Catalog, enter:

```
cdp df add-readyflow
--crn [ ***CRN*** ]
```

Where:

- `--crn` specifies the ReadyFlow CRN value you retrieved when running `cdp df list-ready-flows`.

Result

The ReadyFlow is added to the Catalog and is ready for deployment.

Deploy a ReadyFlow

Learn how to deploy a ReadyFlow using the information you collected using the prerequisites check list.

Before you begin

- You have added the ReadyFlow you want to deploy to the Cloudera DataFlow Catalog.
- You have met *Prerequisites* and collected values for *Required parameters* of the selected ReadyFlow.

For information on deploying a flow using either the deployment wizard or the CLI, see [Creating flow deployments](#).
