role\_config\_suppression\_hadoop\_kms\_proxyuser\_mapred\_groups

**Required**

true

**Suppress Configuration Validator: Mapred Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the Mapred Proxy User Hosts configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_mapred\_hosts

**Required**

true

**Suppress Configuration Validator: Oozie Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the Oozie Proxy User Groups configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_oozie\_groups

**Required**

true

**Suppress Configuration Validator: Oozie Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the Oozie Proxy User Hosts configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_oozie\_hosts

**Required**

true

**Suppress Configuration Validator: YARN Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the YARN Proxy User Groups configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_yarn\_groups

**Required**

true

**Suppress Configuration Validator: YARN Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the YARN Proxy User Hosts configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_yarn\_hosts

**Required**

true

**Suppress Configuration Validator: JavaKeyStoreProvider Directory****Description**

Whether to suppress configuration warnings produced by the JavaKeyStoreProvider Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_security\_key\_provider\_dir

**Required**

true

**Suppress Configuration Validator: Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-acls.xml****Description**

Whether to suppress configuration warnings produced by the Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-acls.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kms-acls.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-site.xml****Description**

Whether to suppress configuration warnings produced by the Key Management Server Advanced Configuration Snippet (Safety Valve) for kms-site.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kms-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: KMS Blacklist Users****Description**

Whether to suppress configuration warnings produced by the KMS Blacklist Users configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_kms_blacklist_users`**Required**`true`**Suppress Configuration Validator: KMS HTTP Port****Description**

Whether to suppress configuration warnings produced by the KMS HTTP Port configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_kms_http_port`**Required**`true`**Suppress Configuration Validator: Additional Java Configuration Options for KMS****Description**

Whether to suppress configuration warnings produced by the Additional Java Configuration Options for KMS configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_kms_java_opts`**Required**`true`**Suppress Configuration Validator: Key Management Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Key Management Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_kms_role_env_safety_valve`**Required**`true`**Suppress Configuration Validator: Key Management Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Key Management Server Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Key Management Server Log Directory****Description**

Whether to suppress configuration warnings produced by the Key Management Server Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

---

true

### Suppress Configuration Validator: Role Triggers

**Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

### Suppress Configuration Validator: Key Management Server Advanced Configuration Snippet (Safety Valve) for ssl-server.xml

**Description**

Whether to suppress configuration warnings produced by the Key Management Server Advanced Configuration Snippet (Safety Valve) for ssl-server.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl-server.xml\_role\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Key Management Server TLS/SSL Trust Store File

**Description**

Whether to suppress configuration warnings produced by the Key Management Server TLS/SSL Trust Store File configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

### Suppress Configuration Validator: Key Management Server TLS/SSL Trust Store Password

**Description**

Whether to suppress configuration warnings produced by the Key Management Server TLS/SSL Trust Store Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Configuration Validator: Key Management Server TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the Key Management Server TLS/SSL Server Keystore Key Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_keypassword

**Required**

true

**Suppress Configuration Validator: Key Management Server TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the Key Management Server TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Configuration Validator: Key Management Server TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the Key Management Server TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Configuration Validator: Key Management Server Count Validator****Description**

Whether to suppress configuration warnings produced by the Key Management Server Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kms\_count\_validator

**Required**

true

**Suppress Parameter Validation: Java KeyStore KMS Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java KeyStore KMS Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kms\_service\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

## Kafka Properties in Cloudera Runtime 7.1.8

Role groups:

## Gateway

### Advanced

#### Deploy Directory

**Description**

The directory where the client configs will be deployed

**Related Name****Default Value**

/etc/kafka

**API Name**

client\_config\_root\_dir

**Required**

true

#### Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-client.conf

**Description**

For advanced use only, a string to be inserted into the client configuration for kafka-conf/kafka-client.conf.

**Related Name****Default Value****API Name**

kafka-conf/kafka-client.conf\_client\_config\_safety\_valve

**Required**

false

#### Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-cluster-configs.properties

**Description**

For advanced use only, a string to be inserted into the client configuration for kafka-conf/kafka-cluster-configs.properties.

**Related Name****Default Value****API Name**

kafka-conf/kafka-cluster-configs.properties\_client\_config\_safety\_valve

**Required**

false

#### Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-ranger-repo.properties

**Description**

For advanced use only, a string to be inserted into the client configuration for kafka-conf/kafka-ranger-repo.properties.

**Related Name****Default Value**

<b>API Name</b>	kafka-conf/kafka-ranger-repo.properties_client_config_safety_valve
<b>Required</b>	false

Gateway Logging Advanced Configuration Snippet (Safety Valve)

<b>Description</b>	For advanced use only, a string to be inserted into log4j.properties for this role only.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	log4j_safety_valve
<b>Required</b>	false

Logs

Gateway Logging Threshold

<b>Description</b>	The minimum log level for Gateway logs
<b>Related Name</b>	
<b>Default Value</b>	INFO
<b>API Name</b>	log_threshold
<b>Required</b>	false

Monitoring

Enable Configuration Change Alerts

<b>Description</b>	When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	enable_config_alerts
<b>Required</b>	false

Other

Alternatives Priority

<b>Description</b>	
--------------------	--

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

**Related Name****Default Value**

50

**API Name**

client\_config\_priority

**Required**

true

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Deploy Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

**Suppress Parameter Validation: Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-client.conf****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-client.conf parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_kafka-conf/kafka-client.conf_client_config_safety_valve`**Required**`true`**Suppress Parameter Validation: Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-cluster-configs.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-cluster-configs.properties parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_kafka-conf/kafka-cluster-configs.properties_client_config_safety_valve`**Required**`true`**Suppress Parameter Validation: Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-ranger-repo.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-ranger-repo.properties parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_kafka-conf/kafka-ranger-repo.properties_client_config_safety_valve`**Required**`true`**Suppress Parameter Validation: Gateway Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_log4j_safety_valve`**Required**`true`

## Kafka Broker

### Advanced

#### Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties

**Description**

For advanced use only. A string to be inserted into kafka-monitoring.properties for this role only.

**Related Name****Default Value****API Name**

kafka-monitoring.properties\_role\_safety\_valve

**Required**

false

#### Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties

**Description**

For advanced use only. A string to be inserted into kafka.properties for this role only.

**Related Name****Default Value****API Name**

kafka.properties\_role\_safety\_valve

**Required**

false

#### Kafka Broker Environment Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

KAFKA\_BROKER\_role\_env\_safety\_valve

**Required**

false

#### Kafka Broker Logging Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

---

false

### Enable auto refresh for metric configurations

#### Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

#### Related Name

#### Default Value

false

#### API Name

metric\_config\_auto\_refresh

#### Required

false

### Heap Dump Directory

#### Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

#### Related Name

oom\_heap\_dump\_dir

#### Default Value

/tmp

#### API Name

oom\_heap\_dump\_dir

#### Required

false

### Dump Heap When Out of Memory

#### Description

When set, generates a heap dump file when when an out-of-memory error occurs.

#### Related Name

#### Default Value

true

#### API Name

oom\_heap\_dump\_enabled

#### Required

true

### Kill When Out of Memory

#### Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

---

false

### Process Start Wait Timeout

#### Description

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

#### Related Name

#### Default Value

20

#### API Name

process\_start\_secs

#### Required

false

### Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml

#### Description

For advanced use only. A string to be inserted into ranger-kafka-audit.xml for this role only.

#### Related Name

#### Default Value

#### API Name

ranger-kafka-audit.xml\_role\_safety\_valve

#### Required

false

### Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml

#### Description

For advanced use only. A string to be inserted into ranger-kafka-policymgr-ssl.xml for this role only.

#### Related Name

#### Default Value

#### API Name

ranger-kafka-policymgr-ssl.xml\_role\_safety\_valve

#### Required

false

### Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml

#### Description

For advanced use only. A string to be inserted into ranger-kafka-security.xml for this role only.

#### Related Name

#### Default Value

#### API Name

ranger-kafka-security.xml\_role\_safety\_valve

#### Required

---

false

### Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties

**Description**

For advanced use only. A string to be inserted into ssl.properties for this role only.

**Related Name****Default Value****API Name**

ssl.properties\_role\_safety\_valve

**Required**

false

### Logs

#### Kafka Broker Log Directory

**Description**

The log directory for log files of the role Kafka Broker.

**Related Name**

kafka.log4j.dir

**Default Value**

/var/log/kafka

**API Name**

log\_dir

**Required**

false

#### Kafka Broker Logging Threshold

**Description**

The minimum log level for Kafka Broker logs

**Related Name****Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

#### Kafka Broker Maximum Log File Backups

**Description**

The maximum number of rolled log files to keep for Kafka Broker logs. Typically used by log4j or logback.

**Related Name****Default Value**

10

<b>API Name</b>
max_log_backup_index
<b>Required</b>
false

**Kafka Broker Max Log Size**

<b>Description</b>
The maximum size, in megabytes, per log file for Kafka Broker logs. Typically used by log4j or logback.
<b>Related Name</b>
<b>Default Value</b>
200 MiB
<b>API Name</b>
max_log_size
<b>Required</b>
false

**Monitoring**

**Enable Health Alerts for this Role**

<b>Description</b>
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
enable_alerts
<b>Required</b>
false

**Enable Configuration Change Alerts**

<b>Description</b>
When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
enable_config_alerts
<b>Required</b>
false

**Enable Lagging Replicas Test**

<b>Description</b>
--------------------

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

**Related Name****Default Value**

true

**API Name**

KAFKA-KAFKA\_BROKER-7.1.0-LAGGING\_REPLICAS\_test\_enable

**Required**

false

**Enable Offline Directory Test****Description**

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

**Related Name****Default Value**

true

**API Name**

KAFKA-KAFKA\_BROKER-7.1.0-OFFLINE\_DIRECTORIES\_test\_enable

**Required**

false

**Enable Offline Partitions Test****Description**

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

**Related Name****Default Value**

true

**API Name**

KAFKA-KAFKA\_BROKER-7.1.0-OFFLINE\_PARTITIONS\_test\_enable

**Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

kafka\_broker\_fd\_thresholds

**Required**

false

**Kafka Broker Host Health Test**

**Description**

When computing the overall Kafka Broker health, consider the host's health.

**Related Name**

**Default Value**

true

**API Name**

kafka\_broker\_host\_health\_enabled

**Required**

false

**Kafka Broker Process Health Test**

**Description**

Enables the health test that the Kafka Broker's process state is consistent with the role configuration

**Related Name**

**Default Value**

true

**API Name**

kafka\_broker\_scm\_health\_enabled

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds**

**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name**

**Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds**

**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name**

**Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

### Role Triggers

**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds**

**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name**

**Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period**

**Description**

The period to review when computing unexpected exits.

**Related Name**

**Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other**

**Advertised Host**

**Description**

If set, this is the hostname given out to producers, consumers, and other brokers to use in establishing connections. Never set this property at the group level; it should always be overridden on instance level.

**Related Name**

advertised.host.name

**Default Value**

**API Name**

advertised.host.name

**Required**

false

### Authenticate Zookeeper Connection

**Description**

Enables authentication of SASL connections with zookeeper, if Kerberos authentication is enabled. It also allows a broker to set SASL ACL on zookeeper nodes, which locks these nodes down so that only a Kafka broker can modify it.

**Related Name**

authenticate.zookeeper.connection

**Default Value**

true

**API Name**

authenticate.zookeeper.connection

**Required**

false

### Broker ID

**Description**

ID uniquely identifying each broker. Never set this property at the group level; it should always be overridden on instance level.

**Related Name**

broker.id

**Default Value****API Name**

broker.id

**Required**

false

### Additional Broker Java Options

**Description**

These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here.

**Related Name**

broker\_java\_opts

**Default Value**

-server -XX:+UseG1GC -XX:MaxGCPauseMillis=20 -XX:InitiatingHeapOccupancyPercent=35  
-XX:G1HeapRegionSize=16M -XX:MinMetaspaceFreeRatio=50 -  
XX:MaxMetaspaceFreeRatio=80 -XX:+DisableExplicitGC -Djava.awt.headless=true -  
Djava.net.preferIPv4Stack=true -Dcom.sun.management.jmxremote.host=127.0.0.1 -  
Dcom.sun.management.jmxremote.local.only=true -Djava.rmi.server.hostname=127.0.0.1

**API Name**

broker\_java\_opts

**Required**

false

### Java Heap Size of Broker

**Description**

Maximum size for the Java process heap memory. Passed to Java -Xmx. Measured in megabytes. Kafka does not generally require setting large heap sizes. It is better to let the file system cache utilize the available memory.

**Related Name**

broker\_max\_heap\_size

**Default Value**

1 GiB

**API Name**

broker\_max\_heap\_size

**Required**

false

**Kafka Broker Diagnostics Collection Timeout****Description**

The timeout in milliseconds to wait for diagnostics collection to complete.

**Related Name****Default Value**

5 minute(s)

**API Name**

csd\_role\_diagnostics\_timeout

**Required**

false

**Graceful Shutdown Timeout****Description**

The timeout in milliseconds to wait for graceful shutdown to complete.

**Related Name****Default Value**

2 minute(s)

**API Name**

graceful\_stop\_timeout

**Required**

false

**Enable Authenticated Communication with the JMX Agent****Description**

Enables Authenticated Communication with the JMX Agent.

**Related Name**

jmx.auth.enabled

**Default Value**

false

**API Name**

jmx.auth.enabled

**Required**

---

false

### Name of User with Read-Write Access to the JMX Agent

#### Description

Specifies the name of the user that has read-write privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

#### Related Name

jmx.control.user

#### Default Value

controlRole

#### API Name

jmx.control.user

#### Required

false

### Password of user with read-write access to the JMX agent

#### Description

Specifies the password of the user that has read-write privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

#### Related Name

jmx.control.user.passwd

#### Default Value

#### API Name

jmx.control.user.passwd

#### Required

false

### Name of User with read-only access to the JMX Agent

#### Description

Specifies the name of the user that has read-only privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

#### Related Name

jmx.monitor.user

#### Default Value

monitorRole

#### API Name

jmx.monitor.user

#### Required

false

### Password of User with read-only Access to the JMX agent

#### Description

Specifies the password of the user that has read-only privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

#### Related Name

`jmx.monitor.user.passwd`**Default Value****API Name**`jmx.monitor.user.passwd`**Required**`false`**Enable TLS client authentication for JMX port****Description**

If enabled, a valid client certificate must be presented by the JMX client in order to connect to the JMX port. Ensure that the trusted CA certificates are present in either the Kafka JMX TLS/SSL Server Trust Store file or the global trust store.

**Related Name**`jmx.ssl.client.auth.enabled`**Default Value**`false`**API Name**`jmx.ssl.client.auth.enabled`**Required**`false`**Enable TLS/SSL for Kafka JMX****Description**

Encrypt communication between clients and Kafka JMX using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**`jmx.ssl.enabled`**Default Value**`false`**API Name**`jmx.ssl.enabled`**Required**`false`**HTTP Metric Report Host****Description**

The host that the HTTP metric reporter binds to.

**Related Name**`kafka.http.metrics.host`**Default Value**`0.0.0.0`**API Name**`kafka.http.metrics.host`**Required**`false`

### Data Directories

**Description**

A list of one or more directories in which Kafka data is stored.. Each new partition created is placed in the directory that currently has the least amount of partitions.. Each directory should be on its own separate drive.

**Related Name**

log.dirs

**Default Value**

/var/local/kafka/data

**API Name**

log.dirs

**Required**

true

### Data Retention Size

**Description**

The amount of data to retain in the log for each topic-partition. This is the limit per partition. Multiply it by the number of partitions to get the total amount of data retained for the topic. This property can take -1 as a value, which is interpreted as unlimited. If both log.retention.ms and log.retention.bytes are set, a segment is deleted when either limit is exceeded.

**Related Name**

log.retention.bytes

**Default Value**

-1 B

**API Name**

log.retention.bytes

**Required**

false

### Data Retention Check Interval

**Description**

The frequency, in milliseconds, that the log cleaner checks whether any log segment is eligible for deletion, per retention policies.

**Related Name**

log.retention.check.interval.ms

**Default Value**

5 minute(s)

**API Name**

log.retention.check.interval.ms

**Required**

false

### Data Retention Time

**Description**

The maximum time before a new log segment is rolled out. If both `log.retention.ms` and `log.retention.bytes` are set, a segment is deleted when either limit is exceeded. This property can take -1 as a value, which is interpreted as unlimited.

**Related Name**

`log.retention.ms`

**Default Value**

7 day(s)

**API Name**

`log.retention.ms`

**Required**

true

**Data Log Roll Time****Description**

The maximum time before a new log segment is rolled out.

**Related Name**

`log.roll.ms`

**Default Value****API Name**

`log.roll.ms`

**Required**

false

**Segment File Size****Description**

The log for a topic partition is stored as a directory of segment files. This setting controls the size to which a segment file can grow before a new segment is rolled over in the log. This value has to be larger than `message.max.bytes`.

**Related Name**

`log.segment.bytes`

**Default Value**

1 GiB

**API Name**

`log.segment.bytes`

**Required**

false

**Maximum Connections per IP Address****Description**

Maximum number of connections allowed from each IP address.

**Related Name**

`max.connections.per.ip`

**Default Value****API Name**

`max.connections.per.ip`

**Required**

false

**Number of I/O Threads****Description**

The number of I/O threads that the server uses for executing requests. You should have at least as many threads as you have disks.

**Related Name**

num.io.threads

**Default Value**

8

**API Name**

num.io.threads

**Required**

false

**Number of Network Threads****Description**

Number of threads that the server uses to handle incoming requests and outgoing responses.

**Related Name**

num.network.threads

**Default Value**

8

**API Name**

num.network.threads

**Required**

false

**Number of Recovery Threads per data directory****Description**

Number of threads per data directory that the server uses for log recovery during startup and log flushing during shutdown. Increasing this value may improve broker startup performance if you have a high number of segments. The total number of recovery threads (number of threads per data dir \* number of data dirs) should not exceed the number of CPU cores. The default value is 1.

**Related Name**

num.recovery.threads.per.data.dir

**Default Value**

1

**API Name**

num.recovery.threads.per.data.dir

**Required**

false

**Number of Alter Log Dir Threads****Description**

Number of threads that the server uses to move data between log directories. The default value of this property is the same as the number of log directories.

**Related Name**

num.replica.alter.log.dirs.threads

**Default Value****API Name**

num.replica.alter.log.dirs.threads

**Required**

false

**Ranger Kafka Plugin Conf Path****Description**

Staging directory for Ranger Kafka Plugin Configuration. This should generally not be changed.

**Related Name**

ranger\_kafka\_plugin\_conf\_path

**Default Value**

/etc/ranger/kafka-plugin

**API Name**

ranger\_kafka\_plugin\_conf\_path

**Required**

true

**Ranger Kafka Plugin Audit Hdfs Spool Directory Path****Description**

Spool directory for Ranger audits being written to DFS.

**Related Name**

xasecure.audit.destination.hdfs.batch.filespool.dir

**Default Value**

/var/log/kafka/audit/hdfs/spool

**API Name**

ranger\_kafka\_plugin\_hdfs\_audit\_spool\_directory

**Required**

true

**Ranger Kafka Plugin Policy Cache Directory Path****Description**

The directory where Ranger security policies are cached locally.

**Related Name**

ranger.plugin.kafka.policy.cache.dir

**Default Value**

/var/lib/ranger/kafka/policy-cache

**API Name**

ranger\_kafka\_plugin\_policy\_cache\_directory

**Required**

---

true

### Ranger Kafka Plugin Audit Solr Spool Directory Path

**Description**

Spool directory for Ranger audits being written to Solr.

**Related Name**

xasecure.audit.destination.solr.batch.filespool.dir

**Default Value**

/var/log/kafka/audit/solr/spool

**API Name**

ranger\_kafka\_plugin\_solr\_audit\_spool\_directory

**Required**

true

### Ranger Plugin Trusted Proxy IP Address

**Description**

Accepts a list of IP addresses of proxy servers for trusting.

**Related Name**

ranger.plugin.kafka.trusted.proxy.ipaddress

**Default Value****API Name**

ranger\_plugin\_trusted\_proxy\_ipaddress

**Required**

false

### Ranger Plugin Use X-Forwarded For IP Address

**Description**

The parameter is used for identifying the originating IP address of a user connecting to a component through proxy for audit logs.

**Related Name**

ranger.plugin.kafka.use.x-forwarded-for.ipaddress

**Default Value**

false

**API Name**

ranger\_plugin\_use\_x\_forwarded\_for\_ipaddress

**Required**

false

### Inter Broker Protocol

**Description**

Protocol to be used for inter-broker communication. INFERRED uses the same protocol that is configured for external clients.

**Related Name**

security.inter.broker.protocol

**Default Value**

INFERRED

**API Name**

security.inter.broker.protocol

**Required**

false

**Socket receive buffer size.****Description**

The SO\_RCVBUF buffer of the socket server sockets. If the value is -1, the OS default will be used.

**Related Name**

socket.receive.buffer.bytes

**Default Value**

100 KiB

**API Name**

socket.receive.buffer.bytes

**Required**

false

**Socket receive buffer size.****Description**

The maximum number of bytes in a socket request

**Related Name**

socket.request.max.bytes

**Default Value**

100 MiB

**API Name**

socket.request.max.bytes

**Required**

false

**Socket send buffer size.****Description**

The SO\_SNDBUF buffer of the socket server sockets. If the value is -1, the OS default will be used.

**Related Name**

socket.send.buffer.bytes

**Default Value**

100 KiB

**API Name**

socket.send.buffer.bytes

**Required**

false

**SSL Client Authentication****Description**

Client authentication mode for SSL connections. This configuration has three valid values, "required", "requested" and "none". If set to "required", client authentication is required. If set to "requested", client authentication is requested and clients without certificates can still connect. If set to "none", which is the default value, no client authentication is required.

**Related Name**

ssl.client.auth

**Default Value**

none

**API Name**

ssl.client.auth

**Required**

false

**Enable Zookeeper ACL****Description**

Enables brokers to set SASL ACL on zookeeper nodes if authenticate.zookeeper.connection is enabled.

**Related Name**

zookeeper.set.acl

**Default Value**

true

**API Name**

zookeeper.set.acl

**Required**

false

**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

**Ports and Addresses****Advertised Port****Description**

The port to give out to producers, consumers, and other brokers to use in establishing connections. This only needs to be set if this port is different from the port the server should bind to.

**Related Name**

advertised.port
<b>Default Value</b>
<b>API Name</b>
advertised.port
<b>Required</b>
false

**JMX Port**

<b>Description</b>
Port for JMX.
<b>Related Name</b>
jmx_port
<b>Default Value</b>
9393
<b>API Name</b>
jmx_port
<b>Required</b>
false

**HTTP Metric Report Port**

<b>Description</b>
The port that the HTTP metric reporter listens on.
<b>Related Name</b>
kafka.http.metrics.port
<b>Default Value</b>
24042
<b>API Name</b>
kafka.http.metrics.port
<b>Required</b>
false

**TCP Port**

<b>Description</b>
Kafka broker port.
<b>Related Name</b>
port
<b>Default Value</b>
9092
<b>API Name</b>
port
<b>Required</b>
false

**TLS/SSL Port****Description**

Kafka broker secure port.

**Related Name**

ssl\_port

**Default Value**

9093

**API Name**

ssl\_port

**Required**

false

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

### Cgroup Memory Hard Limit

**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

### Cgroup Memory Soft Limit

**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

Security

Kafka Broker TLS/SSL Trust Store File

Description	The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Kafka Broker might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.
Related Name	ssl.truststore.location
Default Value	
API Name	ssl_client_truststore_location
Required	false

Kafka Broker TLS/SSL Trust Store Password

Description	The password for the Kafka Broker TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name	ssl.truststore.password.generator
Default Value	
API Name	ssl_client_truststore_password
Required	false

Enable TLS/SSL for Kafka Broker

Description	Encrypt communication between clients and Kafka Broker using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).
Related Name	ssl_enabled
Default Value	false
API Name	ssl_enabled
Required	false

Kafka Broker TLS/SSL Server Keystore Key Password

Description	The password that protects the private key contained in the keystore used when Kafka Broker is acting as a TLS/SSL server.
-------------	--

**Related Name**

ssl.key.password.generator

**Default Value****API Name**

ssl\_server\_keystore\_keypassword

**Required**

false

**Kafka Broker TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Kafka Broker is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

ssl.keystore.location

**Default Value****API Name**

ssl\_server\_keystore\_location

**Required**

false

**Kafka Broker TLS/SSL Server Keystore File Password****Description**

The password for the Kafka Broker keystore file.

**Related Name**

ssl.keystore.password.generator

**Default Value****API Name**

ssl\_server\_keystore\_password

**Required**

false

**Stacks Collection****Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

**Stacks Collection Directory**

**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value**

**API Name**

stacks\_collection\_directory

**Required**

false

**Stacks Collection Enabled**

**Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency**

**Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method**

**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

**Suppressions****Suppress Parameter Validation: Advertised Host****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Advertised Host parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_advertised.host.name

**Required**

true

**Suppress Parameter Validation: Advertised Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Advertised Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_advertised.port

**Required**

true

**Suppress Parameter Validation: Broker ID****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Broker ID parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_broker.id

**Required**

---

true

### Suppress Parameter Validation: Additional Broker Java Options

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional Broker Java Options parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_broker\_java\_opts

**Required**

true

### Suppress Parameter Validation: Java Heap Size of Broker

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of Broker parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_broker\_max\_heap\_size

**Required**

true

### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

### Suppress Parameter Validation: Name of User with Read-Write Access to the JMX Agent

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Name of User with Read-Write Access to the JMX Agent parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx.control.user

**Required**

true

**Suppress Parameter Validation: Password of user with read-write access to the JMX agent****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password of user with read-write access to the JMX agent parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx.control.user.passwd

**Required**

true

**Suppress Parameter Validation: Name of User with read-only access to the JMX Agent****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Name of User with read-only access to the JMX Agent parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx.monitor.user

**Required**

true

**Suppress Parameter Validation: Password of User with read-only Access to the JMX agent****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password of User with read-only Access to the JMX agent parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx.monitor.user.passwd

**Required**

true

**Suppress Parameter Validation: JMX Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx\_port

**Required**

true

**Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka-monitoring.properties\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: HTTP Metric Report Host****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Metric Report Host parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka.http.metrics.host

**Required**

true

**Suppress Parameter Validation: HTTP Metric Report Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Metric Report Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka.http.metrics.port

**Required**

---

true

### Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka.properties\_role\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Kafka Broker Environment Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka\_broker\_role\_env\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Data Directories

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Data Directories parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log.dirs

**Required**

true

### Suppress Parameter Validation: Segment File Size

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Segment File Size parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_log.segment.bytes

**Required**

true

**Suppress Parameter Validation: Kafka Broker Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Kafka Broker Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Number of I/O Threads****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of I/O Threads parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_num.io.threads

**Required**

true

**Suppress Parameter Validation: Number of Network Threads****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Network Threads parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_num.network.threads

**Required**

true

**Suppress Parameter Validation: Number of Recovery Threads per data directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Recovery Threads per data directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_num.recovery.threads.per.data.dir

**Required**

true

**Suppress Parameter Validation: Number of Alter Log Dir Threads****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Alter Log Dir Threads parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_num.replica.alter.log.dirs.threads

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_oom_heap_dump_dir`**Required**`true`**Suppress Parameter Validation: TCP Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the TCP Port parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_port`**Required**`true`**Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger-kafka-audit.xml_role_safety_valve`**Required**`true`**Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger-kafka-policymgr-ssl.xml_role_safety_valve`**Required**`true`

**Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger-kafka-security.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ranger Kafka Plugin Conf Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Conf Path parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_kafka\_plugin\_conf\_path

**Required**

true

**Suppress Parameter Validation: Ranger Kafka Plugin Audit Hdfs Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Audit Hdfs Spool Directory Path parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_kafka\_plugin\_hdfs\_audit\_spool\_directory

**Required**

true

**Suppress Parameter Validation: Ranger Kafka Plugin Policy Cache Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Policy Cache Directory Path parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_ranger_kafka_plugin_policy_cache_directory`**Required**`true`**Suppress Parameter Validation: Ranger Kafka Plugin Audit Solr Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Audit Solr Spool Directory Path parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_kafka_plugin_solr_audit_spool_directory`**Required**`true`**Suppress Parameter Validation: Ranger Plugin Trusted Proxy IP Address****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Plugin Trusted Proxy IP Address parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_plugin_trusted_proxy_ipaddress`**Required**`true`**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_rm_custom_resources`**Required**`true`**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl.properties\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Kafka Broker TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Kafka Broker TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Parameter Validation: TLS/SSL Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the TLS/SSL Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_port

**Required**

true

**Suppress Parameter Validation: Kafka Broker TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Server Keystore Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_keypassword

**Required**

true

**Suppress Parameter Validation: Kafka Broker TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: Kafka Broker TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Broker TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ssl_server_keystore_password`**Required**`true`**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_stacks_collection_directory`**Required**`true`**Suppress Health Test: Lagging Replicas Test****Description**

Whether to suppress the results of the Lagging Replicas Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_kafka-kafka_broker-7.1.0-lagging_replicas`**Required**`true`**Suppress Health Test: Offline Directory Test****Description**

Whether to suppress the results of the Offline Directory Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_kafka-kafka_broker-7.1.0-offline_directories`**Required**`true`**Suppress Health Test: Offline Partitions Test****Description**

Whether to suppress the results of the Offline Partitions Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka-kafka\_broker-7.1.0-offline\_partitions

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_broker\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_broker\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**`role_health_suppression_kafka_kafka_broker_host_health`**Required**`true`**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_kafka_kafka_broker_log_directory_free_space`**Required**`true`**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_kafka_kafka_broker_scm_health`**Required**`true`**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_kafka_kafka_broker_swap_memory_usage`**Required**`true`

### Suppress Health Test: Swap Memory Usage Rate Beta

**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_broker\_swap\_memory\_usage\_rate

**Required**

true

### Suppress Health Test: Unexpected Exits

**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_broker\_unexpected\_exits

**Required**

true

## Kafka Connect

### Advanced

#### Kafka Connect Advanced Configuration Snippet (Safety Valve) for connect-distributed.properties

**Description**

For advanced use only. A string to be inserted into connect-distributed.properties for this role only.

**Related Name****Default Value****API Name**

connect-distributed.properties\_role\_safety\_valve

**Required**

false

#### Kafka Connect Environment Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name**

**Default Value****API Name**

KAFKA\_CONNECT\_role\_env\_safety\_valve

**Required**

false

**Kafka Connect Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

### Dump Heap When Out of Memory

**Description**

When set, generates a heap dump file when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

### Kill When Out of Memory

**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

### Automatically Restart Process

**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

### Enable Metric Collection

**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

`process_should_monitor`**Required**`true`**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**`3`**API Name**`process_start_retries`**Required**`false`**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**`20`**API Name**`process_start_secs`**Required**`false`**Logs****Kafka Connect Log Directory****Description**

The log directory for log files of the role Kafka Connect.

**Related Name**`kafka_connect.log4j.dir`**Default Value**`/var/log/kafka`**API Name**`log_dir`**Required**`false`**Kafka Connect Logging Threshold****Description**

The minimum log level for Kafka Connect logs

**Related Name**

**Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

**Kafka Connect Maximum Log File Backups**

**Description**

The maximum number of rolled log files to keep for Kafka Connect logs. Typically used by log4j or logback.

**Related Name**

**Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

**Kafka Connect Max Log Size**

**Description**

The maximum size, in megabytes, per log file for Kafka Connect logs. Typically used by log4j or logback.

**Related Name**

**Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring**

**Enable Health Alerts for this Role**

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name**

**Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

kafka\_connect\_fd\_thresholds

**Required**

false

**Kafka Connect Host Health Test****Description**

When computing the overall Kafka Connect health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

kafka\_connect\_host\_health\_enabled

**Required**

false

**Kafka Connect Process Health Test****Description**

Enables the health test that the Kafka Connect's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

kafka\_connect\_scm\_health\_enabled

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

### Unexpected Exits Monitoring Period

**Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

### Other

### Broker List for Kafka Connect

**Description**

Comma-separated list of IP:port (or hostname:port) pairs of brokers on source cluster for Kafka Connect to connect. This should be more than one, for high availability.

**Related Name**

bootstrap.servers

**Default Value****API Name**

bootstrap.servers

**Required**

true

### config.storage.replication.factor

**Description**

Default replication factor of Kafka Connect's config storage topic

**Related Name**

config.storage.replication.factor

**Default Value**

1

**API Name**

config.storage.replication.factor

**Required**

true

### config.storage.topic

**Description**

Topic to use for storing connector and task configurations; This should be a single partition, highly replicated and compacted topic. Kafka Connect will attempt to create the topic automatically when needed before starting Kafka Connect.

**Related Name**

config.storage.topic

**Default Value**

connect-configs

**API Name**

config.storage.topic

**Required**

true

**connect.log4j.connector.context****Description**

The ``%X{connector.context}`` parameter in the layout includes connector-specific and task-specific information in the log message, where appropriate. This makes it easier to identify those log messages that apply to a specific connector

**Related Name**

connector.context

**Default Value****API Name**

connector.context

**Required**

false

**group.id****Description**

Unique name for the cluster, used in forming the Connect cluster group. Note that this must not conflict with consumer group IDs.

**Related Name**

group.id

**Default Value**

connect-cluster

**API Name**

group.id

**Required**

true

**Kafka Connect Configuration Directory****Description**

Directory with all configurations for Kafka Connect daemons

**Related Name**

kafka.connect.conf.directory

**Default Value**

\$CONF\_DIR

**API Name**

kafka.connect.conf.directory

**Required**

true

**Java Home Path Override****Description**

Java Home Path Override for Kafka Connect

**Related Name**

kafka.connect.jdk.home

**Default Value****API Name**

kafka.connect.jdk.home

**Required**

false

**KAFKA\_HEAP\_OPTS****Description**

Memory heap params while using Kafka Connect.

**Related Name**

KAFKA\_HEAP\_OPTS

**Default Value**

-Xms256M -Xmx2G

**API Name**

KAFKA\_HEAP\_OPTS

**Required**

false

**key.converter****Description**

The converters specify the format of data in Kafka and how to translate it into Connect data. Every Connect user will need to configure these based on the format they want their data in when loaded from or stored into Kafka

**Related Name**

key.converter

**Default Value**

org.apache.kafka.connect.json.JsonConverter

**API Name**

key.converter

**Required**

true

**key.converter.schemas.enable****Description**

Converter-specific settings can be passed in by prefixing the Converter's setting with the converter we want to apply it to

**Related Name**

key.converter.schemas.enable

**Default Value**

true

**API Name**

key.converter.schemas.enable

**Required**

true

**metrics.jetty.server.port****Description**

Jetty Metrics port to expose JMX Json

**Related Name**

metrics.jetty.server.port

**Default Value**

38084

**API Name**

metrics.jetty.server.port

**Required**

true

**offset.flush.interval.ms****Description**

Offset flush interval in ms.

**Related Name**

offset.flush.interval.ms

**Default Value**

1 minute(s)

**API Name**

offset.flush.interval.ms

**Required**

true

**offset.storage.replication.factor****Description**

Default replication factor of Kafka Connect's offset storage topic

**Related Name**

offset.storage.replication.factor

**Default Value**

1

**API Name**

offset.storage.replication.factor

**Required**

true

**offset.storage.topic****Description**

Topic to use for storing offsets. Kafka Connect will attempt to create the topic automatically when needed, but you can always manually create before starting Kafka Connect.

**Related Name**

offset.storage.topic

**Default Value**

connect-offsets

**API Name**

offset.storage.topic

**Required**

true

**plugin.path****Description**

Path to directories immediately containing jars with plugins and their dependencies, uber-jars with plugins and their dependencies and classes of plugins and their dependencies

**Related Name**

plugin.path

**Default Value**

/var/lib/kafka

**API Name**

plugin.path

**Required**

false

**rest.extension.classes****Description**

JMS Json Rest Extension class

**Related Name**

rest.extension.classes

**Default Value**

com.cloudera.dim.kafka.metrics.JmxJsonMetricsRestExtension

**API Name**

rest.extension.classes

**Required**

true

**kafka.connect.rest.port****Description**

Kafka Connect rest port

**Related Name**

rest.port

**Default Value**

38083

**API Name**

rest.port

**Required**

---

true

### kafka.connect.secure.rest.port

**Description**

Kafka Connect secure rest port

**Related Name**

secure.rest.port

**Default Value**

38085

**API Name**

secure.rest.port

**Required**

true

### SSL Client Authentication

**Description**

Client authentication mode for SSL connections. If set to "required", client authentication is required. If set to "requested", client authentication is requested and clients without certificates can still connect. If set to "none", which is the default value, no client authentication is required.

**Related Name**

ssl.client.auth

**Default Value**

none

**API Name**

ssl.client.auth

**Required**

false

### status.storage.replication.factor

**Description**

Default replication factor of Kafka Connect's status storage topic

**Related Name**

status.storage.replication.factor

**Default Value**

1

**API Name**

status.storage.replication.factor

**Required**

true

### status.storage.topic

**Description**

Topic to use for storing statuses. Kafka Connect will attempt to create the topic automatically when needed, but you can always manually create before starting Kafka Connect.

**Related Name**

status.storage.topic
<b>Default Value</b>
connect-status
<b>API Name</b>
status.storage.topic
<b>Required</b>
true

value.converter

<b>Description</b>
The converters specify the format of data in Kafka and how to translate it into Connect data. Every Connect user will need to configure these based on the format they want their data in when loaded from or stored into Kafka
<b>Related Name</b>
value.converter
<b>Default Value</b>
org.apache.kafka.connect.json.JsonConverter
<b>API Name</b>
value.converter
<b>Required</b>
true

value.converter.schemas.enable

<b>Description</b>
Converter-specific settings can be passed in by prefixing the Converter's setting with the converter we want to apply it to
<b>Related Name</b>
value.converter.schemas.enable
<b>Default Value</b>
true
<b>API Name</b>
value.converter.schemas.enable
<b>Required</b>
true

Performance

Maximum Process File Descriptors

<b>Description</b>
If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
rlimit_fds

**Required**

false

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

---

true

### Cgroup Memory Hard Limit

#### Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

#### Related Name

memory.limit\_in\_bytes

#### Default Value

-1 MiB

#### API Name

rm\_memory\_hard\_limit

#### Required

true

### Cgroup Memory Soft Limit

#### Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

#### Related Name

memory.soft\_limit\_in\_bytes

#### Default Value

-1 MiB

#### API Name

rm\_memory\_soft\_limit

#### Required

true

## Security

### Kafka Connect TLS/SSL Trust Store File

#### Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Kafka Connect might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

#### Related Name

ssl.truststore.location

#### Default Value

#### API Name

`ssl_client_truststore_location`**Required**`false`**Kafka Connect TLS/SSL Trust Store Password****Description**

The password for the Kafka Connect TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**`ssl.truststore.password.generator`**Default Value****API Name**`ssl_client_truststore_password`**Required**`false`**Enable TLS/SSL for Kafka Connect****Description**

Encrypt communication between clients and Kafka Connect using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**`ssl_enabled`**Default Value**`false`**API Name**`ssl_enabled`**Required**`false`**Kafka Connect TLS/SSL Server Keystore Key Password****Description**

The password that protects the private key contained in the keystore used when Kafka Connect is acting as a TLS/SSL server.

**Related Name**`ssl.key.password.generator`**Default Value****API Name**`ssl_server_keystore_keypassword`**Required**`false`**Kafka Connect TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Kafka Connect is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

ssl.keystore.location

**Default Value****API Name**

ssl\_server\_keystore\_location

**Required**

false

**Kafka Connect TLS/SSL Server Keystore File Password****Description**

The password for the Kafka Connect keystore file.

**Related Name**

ssl.keystore.password.generator

**Default Value****API Name**

ssl\_server\_keystore\_password

**Required**

false

**Stacks Collection****Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

**Stacks Collection Directory****Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value**

**API Name**

stacks\_collection\_directory

**Required**

false

**Stacks Collection Enabled****Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

## Suppressions

### Suppress Parameter Validation: Broker List for Kafka Connect

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Broker List for Kafka Connect parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_bootstrap.servers

**Required**

true

### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

### Suppress Parameter Validation: config.storage.replication.factor

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the config.storage.replication.factor parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_config.storage.replication.factor

**Required**

true

### Suppress Parameter Validation: config.storage.topic

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the config.storage.topic parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_config.storage.topic`**Required**`true`**Suppress Parameter Validation: Kafka Connect Advanced Configuration Snippet (Safety Valve) for connect-distributed.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect Advanced Configuration Snippet (Safety Valve) for connect-distributed.properties parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_connect-distributed.properties_role_safety_valve`**Required**`true`**Suppress Parameter Validation: connect.log4j.connector.context****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the connect.log4j.connector.context parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_connector.context`**Required**`true`**Suppress Parameter Validation: group.id****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the group.id parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_group.id`**Required**`true`**Suppress Parameter Validation: Kafka Connect Configuration Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect Configuration Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka.connect.conf.directory

**Required**

true

**Suppress Parameter Validation: Java Home Path Override****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Home Path Override parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka.connect.jdk.home

**Required**

true

**Suppress Parameter Validation: Kafka Connect Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka\_connect\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: KAFKA\_HEAP\_OPTS****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the KAFKA\_HEAP\_OPTS parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka\_heap\_opts

**Required**

true

**Suppress Parameter Validation: key.converter****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the key.converter parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_key.converter

**Required**

true

**Suppress Parameter Validation: Kafka Connect Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Kafka Connect Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: metrics.jetty.server.port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the metrics.jetty.server.port parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_metrics.jetty.server.port

**Required**

true

**Suppress Parameter Validation: offset.storage.replication.factor****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the offset.storage.replication.factor parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_offset.storage.replication.factor

**Required**

true

**Suppress Parameter Validation: offset.storage.topic****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the offset.storage.topic parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_offset.storage.topic

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: plugin.path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the `plugin.path` parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_plugin.path`

**Required**

true

**Suppress Parameter Validation: `rest.extension.classes`****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the `rest.extension.classes` parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_rest.extension.classes`

**Required**

true

**Suppress Parameter Validation: `kafka.connect.rest.port`****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the `kafka.connect.rest.port` parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_rest.port`

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_rm_custom_resources`

**Required**

---

true

### Suppress Parameter Validation: Role Triggers

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

### Suppress Parameter Validation: kafka.connect.secure.rest.port

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the kafka.connect.secure.rest.port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_secure.rest.port

**Required**

true

### Suppress Parameter Validation: Kafka Connect TLS/SSL Trust Store File

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

### Suppress Parameter Validation: Kafka Connect TLS/SSL Trust Store Password

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_ssl_client_truststore_password`**Required**`true`**Suppress Parameter Validation: Kafka Connect TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Server Keystore Key Password parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_keypassword`**Required**`true`**Suppress Parameter Validation: Kafka Connect TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_location`**Required**`true`**Suppress Parameter Validation: Kafka Connect TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Connect TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_password`**Required**`true`**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Parameter Validation: status.storage.replication.factor****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the status.storage.replication.factor parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_status.storage.replication.factor

**Required**

true

**Suppress Parameter Validation: status.storage.topic****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the status.storage.topic parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_status.storage.topic

**Required**

true

**Suppress Parameter Validation: value.converter****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the value.converter parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_value.converter

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_connect\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_connect\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_connect\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_connect\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_connect\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_connect\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_connect\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_connect\_unexpected\_exits

**Required**

true

**Kafka MirrorMaker****Advanced****Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

KAFKA\_MIRROR\_MAKER\_role\_env\_safety\_valve

**Required**

false

**Kafka MirrorMaker Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror\_maker\_consumers.properties****Description**

For advanced use only. A string to be inserted into mirror\_maker\_consumers.properties for this role only.

**Related Name****Default Value****API Name**

mirror\_maker\_consumers.properties\_role\_safety\_valve

**Required**

false

**Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror\_maker\_producers.properties****Description**

For advanced use only. A string to be inserted into mirror\_maker\_producers.properties for this role only.

**Related Name****Default Value****API Name**

mirror\_maker\_producers.properties\_role\_safety\_valve

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

### Dump Heap When Out of Memory

**Description**

When set, generates a heap dump file when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

### Kill When Out of Memory

**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

### Automatically Restart Process

**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

### Enable Metric Collection

**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

`process_should_monitor`**Required**`true`**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**`3`**API Name**`process_start_retries`**Required**`false`**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**`20`**API Name**`process_start_secs`**Required**`false`**Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl\_client.properties****Description**

For advanced use only. A string to be inserted into ssl\_client.properties for this role only.

**Related Name****Default Value****API Name**`ssl_client.properties_role_safety_valve`**Required**`false`**Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl\_server.properties****Description**

For advanced use only. A string to be inserted into ssl\_server.properties for this role only.

**Related Name**

**Default Value****API Name**

ssl\_server.properties\_role\_safety\_valve

**Required**

false

**Logs****Kafka MirrorMaker Log Directory****Description**

The log directory for log files of the role Kafka MirrorMaker.

**Related Name**

kafka\_mirrormaker.log4j.dir

**Default Value**

/var/log/kafka

**API Name**

log\_dir

**Required**

false

**Kafka MirrorMaker Logging Threshold****Description**

The minimum log level for Kafka MirrorMaker logs

**Related Name****Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

**Kafka MirrorMaker Maximum Log File Backups****Description**

The maximum number of rolled log files to keep for Kafka MirrorMaker logs. Typically used by log4j or logback.

**Related Name****Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

**Kafka MirrorMaker Max Log Size****Description**

The maximum size, in megabytes, per log file for Kafka MirrorMaker logs. Typically used by log4j or logback.

**Related Name****Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring****Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

kafka\_mirror\_maker\_fd\_thresholds

**Required**

false

**Kafka MirrorMaker Host Health Test****Description**

When computing the overall Kafka MirrorMaker health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

kafka\_mirror\_maker\_host\_health\_enabled

**Required**

false

**Kafka MirrorMaker Process Health Test****Description**

Enables the health test that the Kafka MirrorMaker's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

kafka\_mirror\_maker\_scm\_health\_enabled

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

### Role Triggers

**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other****Abort on Send Failure****Description**

Stop the entire mirror maker when a send failure occurs.

**Related Name**

abort.on.send.failure

**Default Value**

true

**API Name**

abort.on.send.failure

**Required**

false

**Producer Batch Size****Description**

This configuration controls the batch size in bytes. The producer will attempt to batch records together into fewer requests whenever multiple records are being sent to the same partition. This helps performance on both the client and the server.

**Related Name**

batch.size

**Default Value**

16 KiB

**API Name**

batch.size

**Required**

false

**Destination Broker List****Description**

Comma-separated list of IP:port (or hostname:port) pairs of brokers on destination cluster. This should be more than one, for high availability, but there's no need to list all brokers.

**Related Name**

bootstrap.servers

**Default Value****API Name**

bootstrap.servers

**Required**

true

**Producer Buffer Memory****Description**

The total bytes of memory the producer can use to buffer records waiting to be sent to the server.

**Related Name**

buffer.memory

**Default Value**

32 MiB

**API Name**

buffer.memory

**Required**

false

**Producer Compression Type****Description**

The compression type for all data generated by the producer.

**Related Name**

compression.type

**Default Value**

none

**API Name**

compression.type

**Required**

false

**MirrorMaker Consumer Rebalance Listener****Description**

A consumer rebalance listener of the ConsumerRebalanceListener type. Invoked when MirrorMaker's consumer rebalances.

**Related Name**

consumer.rebalance.listener

**Default Value****API Name**

consumer.rebalance.listener

**Required**

false

**MirrorMaker Consumer Rebalance Listener Arguments****Description**

Arguments used by MirrorMaker consumer rebalance listener.

**Related Name**

consumer.rebalance.listener.args

**Default Value****API Name**

consumer.rebalance.listener.args

**Required**

false

**Consumer Request Timeout****Description**

The maximum amount of time the consumer will wait for the response of a request. If the response is not received before the timeout elapses, the consumer will resend the request if necessary or fail the request if retries are exhausted.

**Related Name**

consumer.request.timeout.ms

**Default Value**

40 second(s)

**API Name**

consumer.request.timeout.ms

**Required**

false

**Destination Kafka Cluster's Security Protocol****Description**

Protocol used for communication with destination Kafka cluster.

**Related Name**

destination.security.protocol

**Default Value**

PLAINTEXT

**API Name**

destination.security.protocol

**Required**

false

**Destination Kafka Cluster's Client Auth****Description**

Only required if destination Kafka cluster requires client authentication.

**Related Name**

destination.ssl.client.auth

**Default Value**

false

**API Name**

destination.ssl.client.auth

**Required**

false

**Consumer Minimum Fetch Size****Description**

The minimum amount of data the server should return for a fetch request. If insufficient data is available, the request will wait for that much data to accumulate before answering the request. Setting this property to something greater than 1 will cause the server to wait for larger amounts of data to accumulate which can improve server throughput a bit at the cost of some additional latency.

**Related Name**

fetch.min.bytes

**Default Value**

1 B

**API Name**

fetch.min.bytes

**Required**

false

**Consumer Group ID****Description**

Name of the consumer group used by MirrorMaker. When multiple role instances are configured with the same topics and same group ID, the role instances load-balance replication for the topics. When multiple role instances are configured with the same topics but different group ID, each role instance replicates all the events for those topics - this can be used to replicate the source cluster into multiple destination clusters.

**Related Name**

group.id

**Default Value**

cloudera\_mirrormaker

**API Name**

group.id

**Required**

false

**Enable Authenticated Communication with the JMX Agent****Description**

Enables Authenticated Communication with the JMX Agent.

**Related Name**

jmx.auth.enabled

**Default Value**

false

**API Name**

jmx.auth.enabled

**Required**

false

**Name of User with Read-Write Access to the JMX Agent****Description**

Specifies the name of the user that has read-write privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

**Related Name**

jmx.control.user

**Default Value**

controlRole

**API Name**

jmx.control.user

**Required**

false

**Password of user with read-write access to the JMX agent****Description**

Specifies the password of the user that has read-write privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

**Related Name**

jmx.control.user.passwd

**Default Value****API Name**

jmx.control.user.passwd

**Required**

false

**Name of User with read-only access to the JMX Agent****Description**

Specifies the name of the user that has read-only privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

**Related Name**

jmx.monitor.user

**Default Value**

monitorRole

**API Name**

jmx.monitor.user

**Required**

false

**Password of User with read-only Access to the JMX agent****Description**

Specifies the password of the user that has read-only privileges when using password file-based authentication for JMX access. JMX authentication must be enabled for this setting to take effect.

**Related Name**

jmx.monitor.user.passwd

**Default Value****API Name**

jmx.monitor.user.passwd

**Required**

false

**Enable TLS client authentication for JMX port****Description**

If enabled, a valid client certificate must be presented by the JMX client in order to connect to the JMX port. Ensure that the trusted CA certificates are present in either the ZooKeeper JMX TLS/SSL Server Trust Store file or the global trust store.

**Related Name**

jmx.ssl.client.auth.enabled

**Default Value**

false

**API Name**

jmx.ssl.client.auth.enabled

**Required**

false

**Enable TLS/SSL for Kafka JMX****Description**

Encrypt communication between clients and Kafka JMX using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

jmx.ssl.enabled

**Default Value**

false

**API Name**

jmx.ssl.enabled

**Required**

false

**Producer Linger Time****Description**

The upper bound on the delay for batching. Once the producer gets a batch.size worth of records for a partition it will be sent immediately regardless of this setting. However, if fewer than this many bytes accumulated for this partition the producer will 'linger' for the specified time waiting for more records to show up.

**Related Name**

linger.ms

**Default Value**

0 second(s)

**API Name**

linger.ms

**Required**

false

**MirrorMaker Message Handler****Description**

A MirrorMaker message handler of the MirrorMakerMessageHandler type that will process every record in-between producer and consumer.

**Related Name**

message.handler

**Default Value****API Name**

message.handler

**Required**

false

**MirrorMaker Message Handler Arguments****Description**

Arguments used by MirrorMaker message handler.

**Related Name**

message.handler.args

**Default Value****API Name**

message.handler.args

**Required**

false

**Additional MirrorMaker Java Options****Description**

These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here.

**Related Name**

mirror\_maker\_java\_opts

**Default Value**

-server -XX:+UseG1GC -XX:MaxGCPauseMillis=20 -XX:InitiatingHeapOccupancyPercent=35  
-XX:G1HeapRegionSize=16M -XX:MinMetaspaceFreeRatio=50 -  
XX:MaxMetaspaceFreeRatio=80 -XX:+DisableExplicitGC -Djava.awt.headless=true -  
Djava.net.preferIPv4Stack=true -Dcom.sun.management.jmxremote.host=127.0.0.1 -  
Dcom.sun.management.jmxremote.local.only=true -Djava.rmi.server.hostname=127.0.0.1

**API Name**

mirror\_maker\_java\_opts

**Required**

false

**Java Heap Size of MirrorMaker****Description**

Maximum size for the Java process heap memory. Passed to Java -Xmx. Measured in megabytes.

**Related Name**

mirror\_maker\_max\_heap\_size

**Default Value**

1 GiB

**API Name**

mirror\_maker\_max\_heap\_size

**Required**

false

**Number of Consumer Threads****Description**

Number of consumer threads.

**Related Name**

num.streams

**Default Value**

1

**API Name**

num.streams

**Required**

false

**Offset Commit Interval****Description**

Offset commit interval in milliseconds.

**Related Name**

offset.commit.interval.ms

**Default Value**

60000

**API Name**

`offset.commit.interval.ms`**Required**`false`**Producer Request Timeout****Description**

The maximum amount of time the producer will wait for the response of a request. If the response is not received before the timeout elapses, the producer will resend the request if necessary or fail the request if retries are exhausted.

**Related Name**`producer.request.timeout.ms`**Default Value**`30 second(s)`**API Name**`producer.request.timeout.ms`**Required**`false`**Consumer Session Timeout****Description**

The timeout used to detect failures when using the group management facilities of Kafka. When the heartbeat of a consumer is not received within the session timeout, the broker will mark the consumer as failed and rebalance the group. Note that the value must be in the allowable range as configured in the broker by `group.min.session.timeout.ms` and `group.max.session.timeout.ms`.

**Related Name**`session.timeout.ms`**Default Value**`30 second(s)`**API Name**`session.timeout.ms`**Required**`false`**Source Broker List****Description**

Comma-separated list of IP:port (or hostname:port) pairs of brokers on source cluster. This should be more than one, for high availability, but there's no need to list all brokers.

**Related Name**`source.bootstrap.servers`**Default Value****API Name**`source.bootstrap.servers`**Required**`true`

### Source Kafka Cluster's Security Protocol

**Description**

Protocol used for communication with source Kafka cluster.

**Related Name**

source.security.protocol

**Default Value**

PLAINTEXT

**API Name**

source.security.protocol

**Required**

false

### Source Kafka Cluster's Client Auth

**Description**

Only required if the source Kafka cluster requires client authentication.

**Related Name**

source.ssl.client.auth

**Default Value**

false

**API Name**

source.ssl.client.auth

**Required**

false

### Topic Whitelist

**Description**

Regular expression that represents a set of topics to mirror.

**Related Name**

whitelist

**Default Value****API Name**

whitelist

**Required**

true

### Performance

#### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

**Ports and Addresses****JMX Port****Description**

Port for JMX.

**Related Name**

jmx\_port

**Default Value**

9394

**API Name**

jmx\_port

**Required**

false

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

`rm_memory_soft_limit`**Required**`true`**Security****Kafka MirrorMaker TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Kafka MirrorMaker might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**`ssl.truststore.location`**Default Value****API Name**`ssl_client_truststore_location`**Required**`false`**Kafka MirrorMaker TLS/SSL Trust Store Password****Description**

The password for the Kafka MirrorMaker TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**`ssl.truststore.password.generator`**Default Value****API Name**`ssl_client_truststore_password`**Required**`false`**Enable TLS/SSL for Kafka MirrorMaker****Description**

Encrypt communication between clients and Kafka MirrorMaker using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**`ssl_enabled`**Default Value**`false`**API Name**`ssl_enabled`**Required**`false`

### Kafka MirrorMaker TLS/SSL Server Keystore Key Password

**Description**

The password that protects the private key contained in the keystore used when Kafka MirrorMaker is acting as a TLS/SSL server.

**Related Name**

ssl.key.password.generator

**Default Value****API Name**

ssl\_server\_keystore\_keypassword

**Required**

false

### Kafka MirrorMaker TLS/SSL Server Keystore File Location

**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Kafka MirrorMaker is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

ssl.keystore.location

**Default Value****API Name**

ssl\_server\_keystore\_location

**Required**

false

### Kafka MirrorMaker TLS/SSL Server Keystore File Password

**Description**

The password for the Kafka MirrorMaker keystore file.

**Related Name**

ssl.keystore.password.generator

**Default Value****API Name**

ssl\_server\_keystore\_password

**Required**

false

## Stacks Collection

### Stacks Collection Data Retention

**Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB
<b>API Name</b>
stacks_collection_data_retention
<b>Required</b>
false

Stacks Collection Directory

<b>Description</b>
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
<b>Related Name</b>
stacks_collection_directory
<b>Default Value</b>
<b>API Name</b>
stacks_collection_directory
<b>Required</b>
false

Stacks Collection Enabled

<b>Description</b>
Whether or not periodic stacks collection is enabled.
<b>Related Name</b>
stacks_collection_enabled
<b>Default Value</b>
false
<b>API Name</b>
stacks_collection_enabled
<b>Required</b>
true

Stacks Collection Frequency

<b>Description</b>
The frequency with which stacks are collected.
<b>Related Name</b>
stacks_collection_frequency
<b>Default Value</b>
5.0 second(s)
<b>API Name</b>
stacks_collection_frequency
<b>Required</b>
false

### Stacks Collection Method

**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

### Suppressions

#### Suppress Parameter Validation: Destination Broker List

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Destination Broker List parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_bootstrap.servers

**Required**

true

#### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

#### Suppress Parameter Validation: MirrorMaker Consumer Rebalance Listener

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the MirrorMaker Consumer Rebalance Listener parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_consumer.rebalance.listener

**Required**

true

**Suppress Parameter Validation: MirrorMaker Consumer Rebalance Listener Arguments****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the MirrorMaker Consumer Rebalance Listener Arguments parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_consumer.rebalance.listener.args

**Required**

true

**Suppress Parameter Validation: Consumer Group ID****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Consumer Group ID parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_group.id

**Required**

true

**Suppress Parameter Validation: Name of User with Read-Write Access to the JMX Agent****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Name of User with Read-Write Access to the JMX Agent parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx.control.user

**Required**

true

**Suppress Parameter Validation: Password of user with read-write access to the JMX agent****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password of user with read-write access to the JMX agent parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx.control.user.passwd

**Required**

true

**Suppress Parameter Validation: Name of User with read-only access to the JMX Agent****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Name of User with read-only access to the JMX Agent parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx.monitor.user

**Required**

true

**Suppress Parameter Validation: Password of User with read-only Access to the JMX agent****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password of User with read-only Access to the JMX agent parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx.monitor.user.passwd

**Required**

true

**Suppress Parameter Validation: JMX Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMX Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx\_port

**Required**

---

true
------

### Suppress Parameter Validation: Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka\_mirror\_maker\_role\_env\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Kafka MirrorMaker Logging Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Kafka MirrorMaker Log Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

### Suppress Parameter Validation: MirrorMaker Message Handler

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the MirrorMaker Message Handler parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_message.handler

**Required**

true

**Suppress Parameter Validation: MirrorMaker Message Handler Arguments****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the MirrorMaker Message Handler Arguments parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_message.handler.args

**Required**

true

**Suppress Parameter Validation: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror\_maker\_consumers.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror\_maker\_consumers.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mirror\_maker\_consumers.properties\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Additional MirrorMaker Java Options****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional MirrorMaker Java Options parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mirror\_maker\_java\_opts

**Required**

true

**Suppress Parameter Validation: Java Heap Size of MirrorMaker****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of MirrorMaker parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mirror\_maker\_max\_heap\_size

**Required**

true

**Suppress Parameter Validation: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror\_maker\_producers.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror\_maker\_producers.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mirror\_maker\_producers.properties\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_rm_custom_resources`**Required**`true`**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_role_triggers`**Required**`true`**Suppress Parameter Validation: Source Broker List****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Source Broker List parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_source.bootstrap.servers`**Required**`true`**Suppress Parameter Validation: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for `ssl_client.properties`****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for `ssl_client.properties` parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_client.properties_role_safety_valve`**Required**`true`**Suppress Parameter Validation: Kafka MirrorMaker TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Kafka MirrorMaker TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Parameter Validation: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl\_server.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl\_server.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server.properties\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Kafka MirrorMaker TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker TLS/SSL Server Keystore Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_keypassword

**Required**

true

**Suppress Parameter Validation: Kafka MirrorMaker TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: Kafka MirrorMaker TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka MirrorMaker TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Parameter Validation: Topic Whitelist****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Topic Whitelist parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_whitelist

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_mirror\_maker\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_mirror\_maker\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_mirror\_maker\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_mirror\_maker\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_mirror\_maker\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_mirror\_maker\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_mirror\_maker\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kafka\_kafka\_mirror\_maker\_unexpected\_exits

**Required**

true

**Service-Wide****Advanced****Kafka Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

KAFKA\_service\_env\_safety\_valve

**Required**

false

**System Group****Description**

The group that this service's processes should run as.

**Related Name****Default Value**

kafka

**API Name**

process\_groupname

**Required**

true

### System User

**Description**

The user that this service's processes should run as.

**Related Name****Default Value**

kafka

**API Name**

process\_username

**Required**

true

### Monitoring

#### Enable Service Level Health Alerts

**Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

#### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

#### Healthy Kafka Broker Monitoring Thresholds

**Description**

The health test thresholds of the overall Kafka Broker health. The check returns "Concerning" health if the percentage of "Healthy" Kafka Brokers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Kafka Brokers falls below the critical threshold.

**Related Name****Default Value**

Warning: 94.99 %, Critical: 49.99 %

**API Name**

KAFKA\_KAFKA\_BROKER\_healthy\_thresholds

**Required**

false

**Healthy Kafka Connect Monitoring Thresholds****Description**

The health test thresholds of the overall Kafka Connect health. The check returns "Concerning" health if the percentage of "Healthy" Kafka Connects falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Kafka Connects falls below the critical threshold.

**Related Name****Default Value**

Warning: 94.99 %, Critical: 49.99 %

**API Name**

KAFKA\_KAFKA\_CONNECT\_healthy\_thresholds

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific service.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd\_open WHERE roleType = DataNode and last(fd\_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

**Other****Topic Auto Creation****Description**

Enables auto creation of topics on the server. If set to true, it attempts to produce, consume, or fetch metadata for a non-existent topic automatically create the topic with the default replication factor and number of partitions.

**Related Name**

auto.create.topics.enable

**Default Value**

true

**API Name**

auto.create.topics.enable

**Required**

false

**Enable Automatic Leader Rebalancing****Description**

If automatic leader rebalancing is enabled, the controller tries to balance leadership for partitions among the brokers by periodically returning leadership for each partition to the preferred replica, if that replica is available.

**Related Name**

auto.leader.rebalance.enable

**Default Value**

true

**API Name**

auto.leader.rebalance.enable

**Required**

false

**Enable Controlled Shutdown****Description**

Enables controlled shutdown of the broker. If enabled, the broker moves all leaders on it to other brokers before shutting itself down. This reduces the unavailability window during shutdown.

**Related Name**

`controlled.shutdown.enable`**Default Value**`true`**API Name**`controlled.shutdown.enable`**Required**`false`**Controlled Shutdown Maximum Attempts****Description**

Number of unsuccessful controlled shutdown attempts before executing an unclean shutdown. For example, the default value of 3 means that the system will attempt a controlled shutdown 3 times before executing an unclean shutdown.

**Related Name**`controlled.shutdown.max.retries`**Default Value**`3`**API Name**`controlled.shutdown.max.retries`**Required**`false`**Default Replication Factor****Description**

The default replication factor for automatically created topics.

**Related Name**`default.replication.factor`**Default Value**`1`**API Name**`default.replication.factor`**Required**`false`**Enable Delegation Tokens****Description**

Enables authentication with delegation tokens for this Kafka service. When enabled, a secure password is automatically generated and used as the "delegation.token.master.key" property for Kafka Brokers. Only allowed if Kerberos authentication is enabled.

**Related Name**`delegation.token.enable`**Default Value**`true`**API Name**`delegation.token.enable`

**Required**

false

**Delegation Token Expiry Time****Description**

The expiry time of a delegation token. A delegation token can be renewed before its expiry time to extend its validity up to its maximum lifetime. If it is not renewed, it will expire even if it has time remaining from its maximum lifetime.

**Related Name**

delegation.token.expiry.time.ms

**Default Value**

1 day(s)

**API Name**

delegation.token.expiry.time.ms

**Required**

false

**Delegation Token Maximum Lifetime****Description**

The maximum amount of time that a delegation token can be valid for.

**Related Name**

delegation.token.max.lifetime.ms

**Default Value**

7 day(s)

**API Name**

delegation.token.max.lifetime.ms

**Required**

false

**Enable Delete Topic****Description**

Enables topic deletion using admin tools. When delete topic is disabled, deleting topics through the admin tools has no effect.

**Related Name**

delete.topic.enable

**Default Value**

true

**API Name**

delete.topic.enable

**Required**

false

**Consumer Group Maximum Session Timeout****Description**

The minimum allowed session timeout for registered consumers. Shorter timeouts result in quicker failure detection at the cost of more frequent consumer heartbeating, which can overwhelm broker resources.

**Related Name**

group.max.session.timeout.ms

**Default Value**

30 minute(s)

**API Name**

group.max.session.timeout.ms

**Required**

false

**Consumer Group Minimum Session Timeout****Description**

The minimum allowed session timeout for registered consumers. Shorter timeouts result in quicker failure detection at the cost of more frequent consumer heartbeating, which can overwhelm broker resources.

**Related Name**

group.min.session.timeout.ms

**Default Value**

6 second(s)

**API Name**

group.min.session.timeout.ms

**Required**

false

**HDFS Service****Description**

Name of the HDFS service that this Kafka service instance depends on

**Related Name****Default Value****API Name**

hdfs\_service

**Required**

false

**List of Metric Reporters****Description**

List of metric reporter class names. HTTP reporter is included by default.

**Related Name**

kafka.metrics.reporters

**Default Value**

nl.techop.kafka.KafkaHttpMetricsReporter

**API Name**

kafka.metrics.reporters

**Required**

false

**Enable Kerberos Authentication****Description**

Enables Kerberos authentication for this Kafka service.

**Related Name**

kerberos.auth.enable

**Default Value**

false

**API Name**

kerberos.auth.enable

**Required**

false

**LDAP URL****Description**

The URL of LDAP for authenticating Kafka clients.

**Related Name**

ldap.auth.url

**Default Value****API Name**

ldap.auth.url

**Required**

false

**LDAP User DN Template****Description**

The LDAP user DN template for authenticating Kafka clients.

**Related Name**

ldap.auth.user.dn.template

**Default Value****API Name**

ldap.auth.user.dn.template

**Required**

false

**Leader Imbalance Check Interval****Description**

Defines the frequency of leader imbalance checks.

**Related Name**

leader.imbalance.check.interval.seconds

**Default Value**

5 minute(s)

**API Name**

leader.imbalance.check.interval.seconds

**Required**

false

**Leader Imbalance Allowed Per Broker****Description**

The percentage of leader imbalance allowed per broker. The controller rebalances leadership if the leader imbalance ratio goes above the configured value per broker.

**Related Name**

leader.imbalance.per.broker.percentage

**Default Value**

10 %

**API Name**

leader.imbalance.per.broker.percentage

**Required**

false

**Log Cleaner Deduplication Buffer Size****Description**

The total memory used for log deduplication across all cleaner threads. This memory is statically allocated and will not cause GC problems.

**Related Name**

log.cleaner.dedupe.buffer.size

**Default Value**

128 MiB

**API Name**

log.cleaner.dedupe.buffer.size

**Required**

false

**Log Compaction Delete Record Retention Time****Description**

The amount of time to retain delete messages for log compacted topics. Once a consumer has seen an original message, it has to be ensured that it also sees the delete message. If the delete message is removed too quickly, this might not happen. The configurable delete retention time helps to circumvent this issue.

**Related Name**

log.cleaner.delete.retention.ms

**Default Value**

7 day(s)

**API Name**

log.cleaner.delete.retention.ms

**Required**

false

### Enable Log Compaction

**Description**

Enables the log cleaner to compact topics with `cleanup.policy=compact` on this cluster.

**Related Name**

`log.cleaner.enable`

**Default Value**

`true`

**API Name**

`log.cleaner.enable`

**Required**

`false`

### Log Cleaner Clean Ratio

**Description**

Controls how frequently the log cleaner will attempt to clean the log. This ratio restricts the maximum space wasted by duplicates in the log. For example, if set to 0.5, then at most 50% of the log can be populated by duplicates. A higher ratio results in fewer, more efficient cleaning processes, but more wasted space in the log.

**Related Name**

`log.cleaner.min.cleanable.ratio`

**Default Value**

`0.5`

**API Name**

`log.cleaner.min.cleanable.ratio`

**Required**

`false`

### Number of Log Cleaner Threads

**Description**

The number of background threads used for log cleaning.

**Related Name**

`log.cleaner.threads`

**Default Value**

`1`

**API Name**

`log.cleaner.threads`

**Required**

`false`

### Log Flush Message Interval

**Description**

The number of messages written to a log partition before triggering an `fsync` on the log. Setting this property to a low value results in more frequent data to disk synchronization, but also has major impact on performance. For durability, Cloudera recommends the use of replication rather than depending on a single-server `fsync`. However, this setting can be used as an extra safety measure. If used in conjunction with `log.flush.interval.ms`, the log is flushed when either criteria is met.

**Related Name**

log.flush.interval.messages

**Default Value****API Name**

log.flush.interval.messages

**Required**

false

**Log Flush Time Interval****Description**

The maximum time between fsync calls on the log. If used in conjunction with log.flush.interval.messages, the log is flushed when either criteria is met.

**Related Name**

log.flush.interval.ms

**Default Value****API Name**

log.flush.interval.ms

**Required**

false

**Log Flush Scheduler Interval****Description**

The frequency, in milliseconds, with which the log flusher checks whether any log is eligible to be flushed to disk.

**Related Name**

log.flush.scheduler.interval.ms

**Default Value****API Name**

log.flush.scheduler.interval.ms

**Required**

false

**Maximum Message Size****Description**

The maximum size of a message that the server can receive. This property has to be in sync with the maximum fetch size the consumers use. Otherwise, an unruly producer could publish messages that are too large for consumption.

**Related Name**

message.max.bytes

**Default Value**

1000000 B

**API Name**

message.max.bytes

**Required**

false

Minimum Number of Replicas in ISR

Description

The minimum number of replicas in the in-sync replica needed to satisfy a produce request where required.acks=-1 (that is, all).

Related Name

min.insync.replicas

Default Value

1

API Name

min.insync.replicas

Required

false

Enable Kafka Monitoring

Description

Enables Kafka monitoring.

Related Name

monitoring.enabled

Default Value

true

API Name

monitoring.enabled

Required

false

Default Number of Partitions

Description

The default number of partitions for automatically created topics.

Related Name

num.partitions

Default Value

1

API Name

num.partitions

Required

false

Number of Replica Fetchers

Description

Number of threads used to replicate messages from leaders. Increasing this value increases the degree of I/O parallelism in the follower broker.

Related Name

num.replica.fetchers

**Default Value**

4

**API Name**

num.replica.fetchers

**Required**

false

**Offset Retention Time****Description**

After a consumer group loses all its consumers (i.e. becomes empty) its offsets will be kept for this retention period before getting discarded. For standalone consumers (using manual assignment), offsets will be expired after the time of last commit plus this retention period.

**Related Name**

offsets.retention.minutes

**Default Value**

7 day(s)

**API Name**

offsets.retention.minutes

**Required**

false

**Offset Commit Topic Number of Partitions****Description**

The number of partitions for the offset commit topic. Changing this value after deployment is currently unsupported, therefore, Cloudera recommends using a higher number of partitions (for example, 100-200) for production.

**Related Name**

offsets.topic.num.partitions

**Default Value**

50

**API Name**

offsets.topic.num.partitions

**Required**

false

**Offset Commit Topic Replication Factor****Description**

The replication factor for the offset commit topic. A higher setting (for example, 3 or 4) is recommended in order to ensure higher availability. If the offsets topic is created when there are fewer brokers than the replication factor, then the offsets topic is created with fewer replicas.

**Related Name**

offsets.topic.replication.factor

**Default Value**

3

**API Name**

offsets.topic.replication.factor

**Required**

false

**PAM Service****Description**

The PAM service name for authenticating Kafka clients. This corresponds to the service name in the PAM configuration.

**Related Name**

pam.auth.service

**Default Value**

login

**API Name**

pam.auth.service

**Required**

false

**Enable Producer Metrics****Description**

Enables producer metrics

**Related Name**

producer.metrics.enable

**Default Value**

true

**API Name**

producer.metrics.enable

**Required**

false

**Default Consumer Quota****Description**

Any consumer distinguished by clientId/consumer group will get throttled if it fetches more bytes than this value per-second.

**Related Name**

quota.consumer.default

**Default Value****API Name**

quota.consumer.default

**Required**

false

**Default Producer Quota****Description**

Any producer distinguished by clientId will get throttled if it produces more bytes than this value per-second.

**Related Name**

quota.producer.default
<b>Default Value</b>
<b>API Name</b>
quota.producer.default
<b>Required</b>
false

**Ranger Kafka Plugin Hdfs Audit Directory**

<b>Description</b>
The DFS path on which Ranger audits are written.
<b>Related Name</b>
ranger_kafka_plugin_hdfs_audit_directory
<b>Default Value</b>
\$ranger_base_audit_url/kafka
<b>API Name</b>
ranger_kafka_plugin_hdfs_audit_directory
<b>Required</b>
false

**'Ranger service' name for this Kafka service**

<b>Description</b>
Name of the 'Ranger service', that is used for authorization by this Kafka service. If this parameter is set to the placeholder value '{ {GENERATED_RANGER_SERVICE_NAME}}', a generated service name will be used, and if necessary, created. The generated service name will refer to the name of the cluster and the name of this Kafka service. The name can consist of alphanumeric and '_' characters.
<b>Related Name</b>
ranger.plugin.kafka.service.name
<b>Default Value</b>
cm_kafka
<b>API Name</b>
ranger_plugin_kafka_service_name
<b>Required</b>
false

**RANGER Service**

<b>Description</b>
Name of the RANGER service that this Kafka service instance depends on
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
ranger_service
<b>Required</b>
false

### Replica Maximum Fetch Size

**Description**

The maximum number of bytes to fetch for each partition in fetch requests that replicas send to the leader. This value should be larger than message.max.bytes.

**Related Name**

replica.fetch.max.bytes

**Default Value**

1 MiB

**API Name**

replica.fetch.max.bytes

**Required**

false

### Allowed Replica Time Lag

**Description**

If a follower has not sent any fetch requests, nor has it consumed up to the leader's log end offset during this time, the leader removes the follower from the ISR set.

**Related Name**

replica.lag.time.max.ms

**Default Value**

10 second(s)

**API Name**

replica.lag.time.max.ms

**Required**

false

### SASL/PLAIN Authentication

**Description**

Authentication method that the SASL/PLAIN mechanism uses to authenticate clients.

**Related Name**

sasl.plain.auth

**Default Value**

none

**API Name**

sasl.plain.auth

**Required**

false

### Minimum Number of Replicas in ISR for Transaction State Log

**Description**

Overridden min.insync.replicas config for the transaction topic.

**Related Name**

transaction.state.log.min.isr

**Default Value**

2

**API Name**

transaction.state.log.min.isr

**Required**

false

**Transaction State Log Replication Factor****Description**

The replication factor for the transaction topic (set higher to ensure availability). Internal topic creation will fail until the cluster size meets this replication factor requirement.

**Related Name**

transaction.state.log.replication.factor

**Default Value**

3

**API Name**

transaction.state.log.replication.factor

**Required**

false

**Enable Unclean Leader Election****Description**

Enables replicas not in the ISR set to be elected as leader as a last resort, even though doing so might result in data loss.

**Related Name**

unclean.leader.election.enable

**Default Value**

false

**API Name**

unclean.leader.election.enable

**Required**

false

**ZooKeeper Root****Description**

The znode in ZooKeeper used as a root for this Kafka cluster.

**Related Name**

zookeeper.chroot

**Default Value**

/kafka

**API Name**

zookeeper.chroot

**Required**

false

**Enable Secure Connection to ZooKeeper****Description**

Enables SSL/TLS connection to ZooKeeper for this Kafka service if dependent ZooKeeper service's `zookeeper_tls_enabled` configuration is enabled.

**Related Name**

`zookeeper.secure.connection.enable`

**Default Value**

`true`

**API Name**

`zookeeper.secure.connection.enable`

**Required**

`false`

### ZooKeeper Session Timeout

**Description**

If the server fails to send a heartbeat to ZooKeeper within this period of time, it is considered dead. If set to a too low value, ZooKeeper might falsely consider a server dead. If set to a too high value, ZooKeeper might take too long to recognize a dead server.

**Related Name**

`zookeeper.session.timeout.ms`

**Default Value**

`6 second(s)`

**API Name**

`zookeeper.session.timeout.ms`

**Required**

`false`

### ZooKeeper Service

**Description**

Name of the ZooKeeper service that this Kafka service instance depends on

**Related Name****Default Value****API Name**

`zookeeper_service`

**Required**

`true`

### Suppressions

#### Suppress Configuration Validator: Advertised Host

**Description**

Whether to suppress configuration warnings produced by the Advertised Host configuration validator.

**Related Name****Default Value**

`false`

**API Name**

`role_config_suppression_advertised.host.name`**Required**`true`**Suppress Configuration Validator: Advertised Port****Description**

Whether to suppress configuration warnings produced by the Advertised Port configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_advertised.port`**Required**`true`**Suppress Configuration Validator: Destination Broker List****Description**

Whether to suppress configuration warnings produced by the Destination Broker List configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_bootstrap.servers`**Required**`true`**Suppress Configuration Validator: Broker ID****Description**

Whether to suppress configuration warnings produced by the Broker ID configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_broker.id`**Required**`true`**Suppress Configuration Validator: Additional Broker Java Options****Description**

Whether to suppress configuration warnings produced by the Additional Broker Java Options configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_broker\_java\_opts

**Required**

true

**Suppress Configuration Validator: Java Heap Size of Broker****Description**

Whether to suppress configuration warnings produced by the Java Heap Size of Broker configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_broker\_max\_heap\_size

**Required**

true

**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Configuration Validator: Deploy Directory****Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

**Suppress Configuration Validator: config.storage.replication.factor****Description**

Whether to suppress configuration warnings produced by the `config.storage.replication.factor` configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_config.storage.replication.factor`

**Required**

true

**Suppress Configuration Validator: `config.storage.topic`****Description**

Whether to suppress configuration warnings produced by the `config.storage.topic` configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_config.storage.topic`

**Required**

true

**Suppress Configuration Validator: Kafka Connect Advanced Configuration Snippet (Safety Valve) for `connect-distributed.properties`****Description**

Whether to suppress configuration warnings produced by the Kafka Connect Advanced Configuration Snippet (Safety Valve) for `connect-distributed.properties` configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_connect-distributed.properties_role_safety_valve`

**Required**

true

**Suppress Configuration Validator: `connect.log4j.connector.context`****Description**

Whether to suppress configuration warnings produced by the `connect.log4j.connector.context` configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_connector.context`

**Required**

true

**Suppress Configuration Validator: MirrorMaker Consumer Rebalance Listener****Description**

Whether to suppress configuration warnings produced by the MirrorMaker Consumer Rebalance Listener configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_consumer.rebalance.listener

**Required**

true

**Suppress Configuration Validator: MirrorMaker Consumer Rebalance Listener Arguments****Description**

Whether to suppress configuration warnings produced by the MirrorMaker Consumer Rebalance Listener Arguments configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_consumer.rebalance.listener.args

**Required**

true

**Suppress Configuration Validator: Consumer Group ID****Description**

Whether to suppress configuration warnings produced by the Consumer Group ID configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_group.id

**Required**

true

**Suppress Configuration Validator: Name of User with Read-Write Access to the JMX Agent****Description**

Whether to suppress configuration warnings produced by the Name of User with Read-Write Access to the JMX Agent configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx.control.user

**Required**

true

**Suppress Configuration Validator: Password of user with read-write access to the JMX agent****Description**

Whether to suppress configuration warnings produced by the Password of user with read-write access to the JMX agent configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx.control.user.passwd

**Required**

true

**Suppress Configuration Validator: Name of User with read-only access to the JMX Agent****Description**

Whether to suppress configuration warnings produced by the Name of User with read-only access to the JMX Agent configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx.monitor.user

**Required**

true

**Suppress Configuration Validator: Password of User with read-only Access to the JMX agent****Description**

Whether to suppress configuration warnings produced by the Password of User with read-only Access to the JMX agent configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx.monitor.user.passwd

**Required**

true

**Suppress Configuration Validator: JMX Port****Description**

Whether to suppress configuration warnings produced by the JMX Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jmx\_port

**Required**

true

**Suppress Configuration Validator: Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-client.conf****Description**

Whether to suppress configuration warnings produced by the Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-client.conf configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka-conf/kafka-client.conf\_client\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-cluster-configs.properties****Description**

Whether to suppress configuration warnings produced by the Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-cluster-configs.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka-conf/kafka-cluster-configs.properties\_client\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-ranger-repo.properties****Description**

Whether to suppress configuration warnings produced by the Kafka Client Advanced Configuration Snippet (Safety Valve) for kafka-conf/kafka-ranger-repo.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka-conf/kafka-ranger-repo.properties\_client\_config\_safety\_valve

**Required**

---

true

### Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties

**Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka-monitoring.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka-monitoring.properties\_role\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Kafka Connect Configuration Directory

**Description**

Whether to suppress configuration warnings produced by the Kafka Connect Configuration Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka.connect.conf.directory

**Required**

true

### Suppress Configuration Validator: Java Home Path Override

**Description**

Whether to suppress configuration warnings produced by the Java Home Path Override configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka.connect.jdk.home

**Required**

true

### Suppress Configuration Validator: HTTP Metric Report Host

**Description**

Whether to suppress configuration warnings produced by the HTTP Metric Report Host configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka.http.metrics.host

**Required**

true

**Suppress Configuration Validator: HTTP Metric Report Port****Description**

Whether to suppress configuration warnings produced by the HTTP Metric Report Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka.http.metrics.port

**Required**

true

**Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties****Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for kafka.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka.properties\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Kafka Broker Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Kafka Broker Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka\_broker\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Kafka Connect Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Kafka Connect Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka\_connect\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: KAFKA\_HEAP\_OPTS****Description**

Whether to suppress configuration warnings produced by the KAFKA\_HEAP\_OPTS configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka\_heap\_opts

**Required**

true

**Suppress Configuration Validator: Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kafka\_mirror\_maker\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: key.converter****Description**

Whether to suppress configuration warnings produced by the key.converter configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_key.converter`**Required**`true`**Suppress Configuration Validator: Data Directories****Description**

Whether to suppress configuration warnings produced by the Data Directories configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_log.dirs`**Required**`true`**Suppress Configuration Validator: Segment File Size****Description**

Whether to suppress configuration warnings produced by the Segment File Size configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_log.segment.bytes`**Required**`true`**Suppress Configuration Validator: Kafka Broker Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Kafka Broker Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_log4j_safety_valve`**Required**`true`**Suppress Configuration Validator: Kafka Broker Log Directory****Description**

Whether to suppress configuration warnings produced by the Kafka Broker Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: MirrorMaker Message Handler****Description**

Whether to suppress configuration warnings produced by the MirrorMaker Message Handler configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_message.handler

**Required**

true

**Suppress Configuration Validator: MirrorMaker Message Handler Arguments****Description**

Whether to suppress configuration warnings produced by the MirrorMaker Message Handler Arguments configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_message.handler.args

**Required**

true

**Suppress Configuration Validator: metrics.jetty.server.port****Description**

Whether to suppress configuration warnings produced by the metrics.jetty.server.port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_metrics.jetty.server.port

**Required**

true

**Suppress Configuration Validator: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror\_maker\_consumers.properties****Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror\_maker\_consumers.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mirror\_maker\_consumers.properties\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Additional MirrorMaker Java Options****Description**

Whether to suppress configuration warnings produced by the Additional MirrorMaker Java Options configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mirror\_maker\_java\_opts

**Required**

true

**Suppress Configuration Validator: Java Heap Size of MirrorMaker****Description**

Whether to suppress configuration warnings produced by the Java Heap Size of MirrorMaker configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mirror\_maker\_max\_heap\_size

**Required**

true

**Suppress Configuration Validator: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror\_maker\_producers.properties****Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for mirror\_maker\_producers.properties configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_mirror\_maker\_producers.properties\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Number of I/O Threads****Description**

Whether to suppress configuration warnings produced by the Number of I/O Threads configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_num.io.threads

**Required**

true

**Suppress Configuration Validator: Number of Network Threads****Description**

Whether to suppress configuration warnings produced by the Number of Network Threads configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_num.network.threads

**Required**

true

**Suppress Configuration Validator: Number of Recovery Threads per data directory****Description**

Whether to suppress configuration warnings produced by the Number of Recovery Threads per data directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_num.recovery.threads.per.data.dir

**Required**

true

**Suppress Configuration Validator: Number of Alter Log Dir Threads****Description**

Whether to suppress configuration warnings produced by the Number of Alter Log Dir Threads configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_num.replica.alter.log.dirs.threads

**Required**

true

**Suppress Configuration Validator: offset.storage.replication.factor****Description**

Whether to suppress configuration warnings produced by the offset.storage.replication.factor configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_offset.storage.replication.factor

**Required**

true

**Suppress Configuration Validator: offset.storage.topic****Description**

Whether to suppress configuration warnings produced by the offset.storage.topic configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_offset.storage.topic

**Required**

true

**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: plugin.path****Description**

Whether to suppress configuration warnings produced by the plugin.path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_plugin.path

**Required**

true

**Suppress Configuration Validator: TCP Port****Description**

Whether to suppress configuration warnings produced by the TCP Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_port

**Required**

true

**Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml****Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-audit.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger-kafka-audit.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml****Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-policymgr-ssl.xml configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_ranger-kafka-policymgr-ssl.xml_role_safety_valve`**Required**`true`**Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml****Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ranger-kafka-security.xml configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger-kafka-security.xml_role_safety_valve`**Required**`true`**Suppress Configuration Validator: Ranger Kafka Plugin Conf Path****Description**

Whether to suppress configuration warnings produced by the Ranger Kafka Plugin Conf Path configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_kafka_plugin_conf_path`**Required**`true`**Suppress Configuration Validator: Ranger Kafka Plugin Audit Hdfs Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the Ranger Kafka Plugin Audit Hdfs Spool Directory Path configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_kafka_plugin_hdfs_audit_spool_directory`**Required**`true`**Suppress Configuration Validator: Ranger Kafka Plugin Policy Cache Directory Path****Description**

Whether to suppress configuration warnings produced by the Ranger Kafka Plugin Policy Cache Directory Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_kafka\_plugin\_policy\_cache\_directory

**Required**

true

**Suppress Configuration Validator: Ranger Kafka Plugin Audit Solr Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the Ranger Kafka Plugin Audit Solr Spool Directory Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_kafka\_plugin\_solr\_audit\_spool\_directory

**Required**

true

**Suppress Configuration Validator: Ranger Plugin Trusted Proxy IP Address****Description**

Whether to suppress configuration warnings produced by the Ranger Plugin Trusted Proxy IP Address configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_plugin\_trusted\_proxy\_ipaddress

**Required**

true

**Suppress Configuration Validator: rest.extension.classes****Description**

Whether to suppress configuration warnings produced by the rest.extension.classes configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rest.extension.classes

**Required**

---

true

**Suppress Configuration Validator: kafka.connect.rest.port****Description**

Whether to suppress configuration warnings produced by the kafka.connect.rest.port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rest.port

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: kafka.connect.secure.rest.port****Description**

Whether to suppress configuration warnings produced by the kafka.connect.secure.rest.port configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_secure.rest.port`**Required**`true`**Suppress Configuration Validator: Source Broker List****Description**

Whether to suppress configuration warnings produced by the Source Broker List configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_source.bootstrap.servers`**Required**`true`**Suppress Configuration Validator: Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties****Description**

Whether to suppress configuration warnings produced by the Kafka Broker Advanced Configuration Snippet (Safety Valve) for ssl.properties configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl.properties_role_safety_valve`**Required**`true`**Suppress Configuration Validator: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl\_client.properties****Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl\_client.properties configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_client.properties_role_safety_valve`**Required**`true`**Suppress Configuration Validator: Kafka Broker TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the Kafka Broker TLS/SSL Trust Store File configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Configuration Validator: Kafka Broker TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the Kafka Broker TLS/SSL Trust Store Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Configuration Validator: TLS/SSL Port****Description**

Whether to suppress configuration warnings produced by the TLS/SSL Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_port

**Required**

true

**Suppress Configuration Validator: Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl\_server.properties****Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Advanced Configuration Snippet (Safety Valve) for ssl\_server.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server.properties\_role\_safety\_valve

**Required**

---

true

### Suppress Configuration Validator: Kafka Broker TLS/SSL Server Keystore Key Password

**Description**

Whether to suppress configuration warnings produced by the Kafka Broker TLS/SSL Server Keystore Key Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_keypassword

**Required**

true

### Suppress Configuration Validator: Kafka Broker TLS/SSL Server Keystore File Location

**Description**

Whether to suppress configuration warnings produced by the Kafka Broker TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

### Suppress Configuration Validator: Kafka Broker TLS/SSL Server Keystore File Password

**Description**

Whether to suppress configuration warnings produced by the Kafka Broker TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

### Suppress Configuration Validator: Stacks Collection Directory

**Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_stacks_collection_directory`**Required**`true`**Suppress Configuration Validator: status.storage.replication.factor****Description**

Whether to suppress configuration warnings produced by the status.storage.replication.factor configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_status.storage.replication.factor`**Required**`true`**Suppress Configuration Validator: status.storage.topic****Description**

Whether to suppress configuration warnings produced by the status.storage.topic configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_status.storage.topic`**Required**`true`**Suppress Configuration Validator: value.converter****Description**

Whether to suppress configuration warnings produced by the value.converter configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_value.converter`**Required**`true`**Suppress Configuration Validator: Topic Whitelist****Description**

Whether to suppress configuration warnings produced by the Topic Whitelist configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_whitelist

**Required**

true

**Suppress Parameter Validation: Controlled Shutdown Maximum Attempts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Controlled Shutdown Maximum Attempts parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_controlled.shutdown.max.retries

**Required**

true

**Suppress Parameter Validation: Default Replication Factor****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Replication Factor parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_default.replication.factor

**Required**

true

**Suppress Configuration Validator: Gateway Count Validator****Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_gateway\_count\_validator

**Required**

true

**Suppress Parameter Validation: List of Metric Reporters****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the List of Metric Reporters parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kafka.metrics.reporters

**Required**

true

**Suppress Configuration Validator: Kafka Broker Count Validator****Description**

Whether to suppress configuration warnings produced by the Kafka Broker Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kafka\_broker\_count\_validator

**Required**

true

**Suppress Configuration Validator: Kafka Connect Count Validator****Description**

Whether to suppress configuration warnings produced by the Kafka Connect Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kafka\_connect\_count\_validator

**Required**

true

**Suppress Configuration Validator: Kafka MirrorMaker Count Validator****Description**

Whether to suppress configuration warnings produced by the Kafka MirrorMaker Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kafka\_mirror\_maker\_count\_validator

**Required**

true

**Suppress Parameter Validation: Kafka Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kafka\_service\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: LDAP URL****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP URL parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ldap.auth.url

**Required**

true

**Suppress Parameter Validation: LDAP User DN Template****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP User DN Template parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ldap.auth.user.dn.template

**Required**

true

**Suppress Parameter Validation: Leader Imbalance Check Interval****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Leader Imbalance Check Interval parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_leader.imbalance.check.interval.seconds

**Required**

true

**Suppress Parameter Validation: Leader Imbalance Allowed Per Broker****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Leader Imbalance Allowed Per Broker parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_leader.imbalance.per.broker.percentage

**Required**

true

**Suppress Parameter Validation: Maximum Message Size****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Maximum Message Size parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_message.max.bytes

**Required**

true

**Suppress Parameter Validation: Minimum Number of Replicas in ISR****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Minimum Number of Replicas in ISR parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_min.insync.replicas

**Required**

true

**Suppress Parameter Validation: Default Number of Partitions****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Number of Partitions parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_num.partitions

**Required**

true

**Suppress Parameter Validation: Number of Replica Fetchers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Replica Fetchers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_num.replica.fetchers

**Required**

true

**Suppress Parameter Validation: Offset Commit Topic Number of Partitions****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Offset Commit Topic Number of Partitions parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_offsets.topic.num.partitions

**Required**

true

**Suppress Parameter Validation: Offset Commit Topic Replication Factor****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Offset Commit Topic Replication Factor parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_offsets.topic.replication.factor

**Required**

true

**Suppress Parameter Validation: PAM Service****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the PAM Service parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_pam.auth.service

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Ranger Kafka Plugin Hdfs Audit Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Kafka Plugin Hdfs Audit Directory parameter.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_kafka\_plugin\_hdfs\_audit\_directory

**Required**

true

**Suppress Parameter Validation: 'Ranger service' name for this Kafka service****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the 'Ranger service' name for this Kafka service parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_plugin\_kafka\_service\_name

**Required**

true

**Suppress Parameter Validation: Replica Maximum Fetch Size****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Replica Maximum Fetch Size parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_replica.fetch.max.bytes

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Transaction State Log Replication Factor****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Transaction State Log Replication Factor parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_transaction.state.log.replication.factor

**Required**

true

**Suppress Parameter Validation: ZooKeeper Root****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ZooKeeper Root parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_zookeeper.chroot

**Required**

true

**Suppress Parameter Validation: ZooKeeper Session Timeout****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ZooKeeper Session Timeout parameter.

**Related Name****Default Value**

false

**API Name**

`service_config_suppression_zookeeper.session.timeout.ms`**Required**`true`**Suppress Health Test: Kafka Broker Health****Description**

Whether to suppress the results of the Kafka Broker Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`service_health_suppression_kafka_kafka_broker_healthy`**Required**`true`**Suppress Health Test: Kafka Connect Health****Description**

Whether to suppress the results of the Kafka Connect Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`service_health_suppression_kafka_kafka_connect_healthy`**Required**`true`

## Key Trustee KMS Properties in Cloudera Runtime 7.1.8

Role groups:

### Key Management Server Proxy

**Advanced****Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for core-site.xml****Description**

For advanced use only. A string to be inserted into core-site.xml for this role only.

**Related Name****Default Value****API Name**`core-site.xml_role_safety_valve`

**Required**

false

**Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kms-acls.xml****Description**

For advanced use only. A string to be inserted into kms-acls.xml for this role only.

**Related Name****Default Value****API Name**

kms-acls.xml\_role\_safety\_valve

**Required**

false

**Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kms-site.xml****Description**

For advanced use only. A string to be inserted into kms-site.xml for this role only.

**Related Name****Default Value****API Name**

kms-site.xml\_role\_safety\_valve

**Required**

false

**Key Management Server Proxy Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment.  
Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

KMS\_KEYTRUSTEE\_role\_env\_safety\_valve

**Required**

false

**Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kts-site.xml****Description**

For advanced use only. A string to be inserted into kts-site.xml for this role only.

**Related Name****Default Value****API Name**

kts-site.xml\_role\_safety\_valve

**Required**

false

**Key Management Server Proxy Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for ssl-server.xml****Description**

For advanced use only. A string to be inserted into ssl-server.xml for this role only.

**Related Name****Default Value****API Name**

ssl-server.xml\_role\_safety\_valve

**Required**

false

**Logs****Key Management Server Proxy Log Directory****Description**

The log directory for log files of the role Key Management Server Proxy.

**Related Name**

log.dir

**Default Value**

/var/log/kms-keytrustee

**API Name**

log\_dir

<b>Required</b>
false

**Key Management Server Proxy Logging Threshold**

<b>Description</b>
The minimum log level for Key Management Server Proxy logs
<b>Related Name</b>
<b>Default Value</b>
INFO
<b>API Name</b>
log_threshold
<b>Required</b>
false

**Key Management Server Proxy Maximum Log File Backups**

<b>Description</b>
The maximum number of rolled log files to keep for Key Management Server Proxy logs. Typically used by log4j or logback.
<b>Related Name</b>
<b>Default Value</b>
10
<b>API Name</b>
max_log_backup_index
<b>Required</b>
false

**Key Management Server Proxy Max Log Size**

<b>Description</b>
The maximum size, in megabytes, per log file for Key Management Server Proxy logs. Typically used by log4j or logback.
<b>Related Name</b>
<b>Default Value</b>
200 MiB
<b>API Name</b>
max_log_size
<b>Required</b>
false

**Monitoring**

**Enable Health Alerts for this Role**

<b>Description</b>
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>

<b>Default Value</b>
true
<b>API Name</b>
enable_alerts
<b>Required</b>
false

Enable Configuration Change Alerts

<b>Description</b>
When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
enable_config_alerts
<b>Required</b>
false

File Descriptor Monitoring Thresholds

<b>Description</b>
The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
<b>Related Name</b>
<b>Default Value</b>
Warning: 50.0 %, Critical: 70.0 %
<b>API Name</b>
kms_keytrustee_fd_thresholds
<b>Required</b>
false

Key Management Server Proxy Host Health Test

<b>Description</b>
When computing the overall Key Management Server Proxy health, consider the host's health.
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
kms_keytrustee_host_health_enabled
<b>Required</b>
false

Key Management Server Proxy Process Health Test

<b>Description</b>
--------------------

Enables the health test that the Key Management Server Proxy's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

kms\_keytrustee\_scm\_health\_enabled

**Required**

false

### Log Directory Free Space Monitoring Absolute Thresholds

**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

### Log Directory Free Space Monitoring Percentage Thresholds

**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

### Metric Filter

**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.

- **Metric Name** - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking **View as JSON**. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

`monitoring_metric_filter`

**Required**

`false`

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

`process_swap_memory_rate_thresholds`

**Required**

`false`

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

`common.process.swap_memory_rate_window`

**Default Value**

5 minute(s)

**API Name**

`process_swap_memory_rate_window`

**Required**

`false`

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other****Key Trustee Server Auth Code****Description**

Key Trustee Server auth code used for KMS to authenticate against the server

**Related Name**

cloudera.trustee.keyprovider.auth

**Default Value****API Name**

cloudera\_trustee\_keyprovider\_auth

**Required**

true

**Active Key Trustee Server****Description**

Active Key Trustee Server hostname that backs the KMS.

**Related Name**

cloudera.trustee.keyprovider.hostname-ACTIVE

**Default Value****API Name**

cloudera\_trustee\_keyprovider\_hostname-ACTIVE

**Required**

true

**Passive Key Trustee Server****Description**

Passive Key Trustee Server hostname that backs the KMS. Only needed for Key Trustee Server high availability.

**Related Name**

cloudera.trustee.keyprovider.hostname-PASSIVE

**Default Value****API Name**

cloudera\_trustee\_keyprovider\_hostname-PASSIVE

**Required**

false

**Key Trustee Server Org Name****Description**

Key Trustee Server Organization that keys are stored against.

**Related Name**

cloudera.trustee.keyprovider.org

**Default Value****API Name**

cloudera\_trustee\_keyprovider\_org

**Required**

true

**Key Trustee Server Key Provider Pool Timeout****Description**

Key Trustee key provider pool timeout.

**Related Name**

cloudera.trustee.keyprovider.pool.abandoned.timeout

**Default Value**

5 minute(s)

**API Name**

cloudera\_trustee\_keyprovider\_pool\_abandoned\_timeout

**Required**

true

**Key Trustee Server Key Provider Max Connections****Description**

Key Trustee Server Key Provider Max Connections.

**Related Name**

cloudera.trustee.keyprovider.pool.max

**Default Value**

5

**API Name**

cloudera\_trustee\_keyprovider\_pool\_max

**Required**

true

**Key Trustee Server Key Provider Pool Max Idle****Description**

Key Trustee Server Key Provider Pool Max Idle.

**Related Name**

cloudera.trustee.keyprovider.pool.max.idle

**Default Value**

2

**API Name**

cloudera\_trustee\_keyprovider\_pool\_max\_idle

**Required**

true

**Key Trustee Server Key Provider Pool Min Idle****Description**

Key Trustee Server Key Provider Pool Min Idle.

**Related Name**

cloudera.trustee.keyprovider.pool.min.idle

**Default Value**

1

**API Name**

cloudera\_trustee\_keyprovider\_pool\_min\_idle

**Required**

true

**Key Trustee Server Round Robin Reads****Description**

Distribute read requests amongst the available Key Trustee Servers. Only effective when a passive server is specified.

**Related Name**

cloudera.trustee.keyprovider.roundrobin

**Default Value**

true

**API Name**

cloudera\_trustee\_keyprovider\_roundrobin

**Required**

false

**Flume Proxy User Groups****Description**

Allows the flume superuser to impersonate any members of a comma-delimited list of groups. The default '\*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '\_no\_group\_'.

**Related Name**

hadoop.kms.proxyuser.flume.groups

**Default Value**

\*

**API Name**

`hadoop_kms_proxyuser_flume_groups`**Required**`false`**Flume Proxy User Hosts****Description**

Comma-delimited list of hosts where you want to allow the flume user to impersonate other users. The default '\*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '\_no\_host'.

**Related Name**`hadoop.kms.proxyuser.flume.hosts`**Default Value**`*`**API Name**`hadoop_kms_proxyuser_flume_hosts`**Required**`false`**HDFS Proxy User Groups****Description**

Allows the hdfs superuser to impersonate any members of a comma-delimited list of groups. The default '\*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '\_no\_group\_'.

**Related Name**`hadoop.kms.proxyuser.hdfs.groups`**Default Value**`*`**API Name**`hadoop_kms_proxyuser_hdfs_groups`**Required**`false`**HDFS Proxy User Hosts****Description**

Comma-delimited list of hosts where you want to allow the hdfs user to impersonate other users. The default '\*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '\_no\_host'.

**Related Name**`hadoop.kms.proxyuser.hdfs.hosts`**Default Value**`*`**API Name**`hadoop_kms_proxyuser_hdfs_hosts`**Required**`false`

### Hive Proxy User Groups

**Description**

Allows the hive superuser to impersonate any members of a comma-delimited list of groups. The default '\*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '\_no\_group\_'.

**Related Name**

hadoop.kms.proxyuser.hive.groups

**Default Value**

\*

**API Name**

hadoop\_kms\_proxyuser\_hive\_groups

**Required**

false

### Hive Proxy User Hosts

**Description**

Comma-delimited list of hosts where you want to allow the hive user to impersonate other users. The default '\*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '\_no\_host\_'.

**Related Name**

hadoop.kms.proxyuser.hive.hosts

**Default Value**

\*

**API Name**

hadoop\_kms\_proxyuser\_hive\_hosts

**Required**

false

### HTTP Proxy User Groups

**Description**

Allows the HTTP superuser to impersonate any members of a comma-delimited list of groups. The default '\*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '\_no\_group\_'.

**Related Name**

hadoop.kms.proxyuser.HTTP.groups

**Default Value**

\*

**API Name**

hadoop\_kms\_proxyuser\_HTTP\_groups

**Required**

false

### HTTP Proxy User Hosts

**Description**

Comma-delimited list of hosts where you want to allow the HTTP user to impersonate other users. The default '\*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '\_no\_host'.

**Related Name**

hadoop.kms.proxyuser.HTTP.hosts

**Default Value**

\*

**API Name**

hadoop\_kms\_proxyuser\_HTTP\_hosts

**Required**

false

### HttpFS Proxy User Groups

**Description**

Allows the httpfs superuser to impersonate any members of a comma-delimited list of groups. The default '\*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '\_no\_group\_'.

**Related Name**

hadoop.kms.proxyuser.httpfs.groups

**Default Value**

\*

**API Name**

hadoop\_kms\_proxyuser\_httpfs\_groups

**Required**

false

### HttpFS Proxy User Hosts

**Description**

Comma-delimited list of hosts where you want to allow the httpfs user to impersonate other users. The default '\*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '\_no\_host'.

**Related Name**

hadoop.kms.proxyuser.httpfs.hosts

**Default Value**

\*

**API Name**

hadoop\_kms\_proxyuser\_httpfs\_hosts

**Required**

false

### Hue Proxy User Groups

**Description**

Allows the hue superuser to impersonate any members of a comma-delimited list of groups. The default '\*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '\_no\_group\_'.

**Related Name**

	hadoop.kms.proxyuser.hue.groups
Default Value	*
API Name	
	hadoop_kms_proxyuser_hue_groups
Required	false

Hue Proxy User Hosts

Description	Comma-delimited list of hosts where you want to allow the hue user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host'.
Related Name	hadoop.kms.proxyuser.hue.hosts
Default Value	*
API Name	
	hadoop_kms_proxyuser_hue_hosts
Required	false

Mapred Proxy User Groups

Description	Allows the mapred superuser to impersonate any members of a comma-delimited list of groups. The default '*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '_no_group_'.
Related Name	hadoop.kms.proxyuser.mapred.groups
Default Value	*
API Name	
	hadoop_kms_proxyuser_mapred_groups
Required	false

Mapred Proxy User Hosts

Description	Comma-delimited list of hosts where you want to allow the mapred user to impersonate other users. The default '*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '_no_host'.
Related Name	hadoop.kms.proxyuser.mapred.hosts
Default Value	*

**API Name**

hadoop\_kms\_proxyuser\_mapred\_hosts

**Required**

false

**Oozie Proxy User Groups****Description**

Allows the oozie superuser to impersonate any members of a comma-delimited list of groups. The default '\*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '\_no\_group\_'.

**Related Name**

hadoop.kms.proxyuser.oozie.groups

**Default Value**

\*

**API Name**

hadoop\_kms\_proxyuser\_oozie\_groups

**Required**

false

**Oozie Proxy User Hosts****Description**

Comma-delimited list of hosts where you want to allow the oozie user to impersonate other users. The default '\*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '\_no\_host\_'.

**Related Name**

hadoop.kms.proxyuser.oozie.hosts

**Default Value**

\*

**API Name**

hadoop\_kms\_proxyuser\_oozie\_hosts

**Required**

false

**YARN Proxy User Groups****Description**

Allows the yarn superuser to impersonate any members of a comma-delimited list of groups. The default '\*' allows all groups. To disable entirely, use a string that doesn't correspond to a group name, such as '\_no\_group\_'.

**Related Name**

hadoop.kms.proxyuser.yarn.groups

**Default Value**

\*

**API Name**

hadoop\_kms\_proxyuser\_yarn\_groups

**Required**

false

### YARN Proxy User Hosts

**Description**

Comma-delimited list of hosts where you want to allow the yarn user to impersonate other users. The default '\*' allows all hosts. To disable entirely, use a string that doesn't correspond to a host name, such as '\_no\_host'.

**Related Name**

hadoop.kms.proxyuser.yarn.hosts

**Default Value**

\*

**API Name**

hadoop\_kms\_proxyuser\_yarn\_hosts

**Required**

false

### Key Trustee KeyStoreProvider Directory

**Description**

Directory to the keystore file used by Key Trustee KeyStoreProvider that backs the KMS.

**Related Name**

hadoop.kms.key.provider.uri

**Default Value**

/var/lib/kms-keytrustee

**API Name**

hadoop\_security\_key\_provider\_dir

**Required**

true

### Key Trustee KeyStoreProvider Configuration Directory

**Description**

Directory to store configuration of keystore file used by Key Trustee KeyStoreProvider that backs the KMS.

**Related Name**

keytrustee.kms.key.provider.conf.uri

**Default Value**

/var/lib/kms-keytrustee/keytrustee

**API Name**

keytrustee\_security\_key\_provider\_conf\_dir

**Required**

true

### KMS Accept Count

**Description**

The maximum queue length for incoming connection requests when all possible request processing threads are in use. Any requests received when the queue is full will be refused. This configuration is only supported in CDH 5.11 and up.

**Related Name**

hadoop.http.accept.queue.size

**Default Value**

500

**API Name**

kms\_accept\_count

**Required**

false

**KMS Blacklist Users****Description**

A comma-separated list of users (no spaces) for whom to disallow access to key material. These users can still fetch key metadata and create encrypted encryption keys, but are unable to do any other KMS operations. Typically, HDFS superusers will be specified here.

**Related Name**

kms\_blacklist\_users

**Default Value****API Name**

kms\_blacklist\_users

**Required**

false

**KMS Heap Size****Description**

Maximum heap size of the KMS.

**Related Name**

kms\_heap\_size

**Default Value**

1 GiB

**API Name**

kms\_heap\_size

**Required**

true

**Additional Java Configuration Options for KMS****Description**

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here.

**Related Name**

kms\_java\_opts

**Default Value****API Name**

kms\_java\_opts

**Required**

false

### KMS Max Threads

**Description**

Maximum number of threads used to handle KMS requests.

**Related Name**

hadoop.http.max.threads

**Default Value**

250

**API Name**

kms\_max\_threads

**Required**

false

### Performance

#### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

### Ports and Addresses

#### KMS HTTP Port

**Description**

Port used by clients to interact with the KMS.

**Related Name**

hadoop.kms.http.port

**Default Value**

16000

**API Name**

kms\_http\_port

**Required**

true

### Resource Management

#### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Key Management Server Proxy TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Key Management Server Proxy might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

ssl.truststore.location

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

**Key Management Server Proxy TLS/SSL Trust Store Password****Description**

The password for the Key Management Server Proxy TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**`ssl.truststore.password.generator`**Default Value****API Name**`ssl_client_truststore_password`**Required**`false`**Enable TLS/SSL for Key Management Server Proxy****Description**

Encrypt communication between clients and Key Management Server Proxy using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**`hadoop.kms.ssl.enabled`**Default Value**`false`**API Name**`ssl_enabled`**Required**`false`**Key Management Server Proxy TLS/SSL Server Keystore Key Password****Description**

The password that protects the private key contained in the keystore used when Key Management Server Proxy is acting as a TLS/SSL server.

**Related Name**`ssl.server.keystore.keypassword`**Default Value****API Name**`ssl_server_keystore_keypassword`**Required**`false`**Key Management Server Proxy TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Key Management Server Proxy is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**`ssl.server.keystore.location`**Default Value****API Name**`ssl_server_keystore_location`**Required**

false

**Key Management Server Proxy TLS/SSL Server Keystore File Password**

**Description**

The password for the Key Management Server Proxy keystore file.

**Related Name**

ssl.server.keystore.password

**Default Value**

**API Name**

ssl\_server\_keystore\_password

**Required**

false

**Stacks Collection**

**Stacks Collection Data Retention**

**Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

**Stacks Collection Directory**

**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value**

**API Name**

stacks\_collection\_directory

**Required**

false

**Stacks Collection Enabled**

**Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

	stacks_collection_enabled
Default Value	false
API Name	stacks_collection_enabled
Required	true

Stacks Collection Frequency

Description	The frequency with which stacks are collected.
Related Name	stacks_collection_frequency
Default Value	5.0 second(s)
API Name	stacks_collection_frequency
Required	false

Stacks Collection Method

Description	The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name	stacks_collection_method
Default Value	jstack
API Name	stacks_collection_method
Required	false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	

`role_config_suppression_cdh_version_validator`**Required**`true`**Suppress Parameter Validation: Key Trustee Server Auth Code****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Auth Code parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_cloudera_trustee_keyprovider_auth`**Required**`true`**Suppress Parameter Validation: Active Key Trustee Server****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_cloudera_trustee_keyprovider_hostname-active`**Required**`true`**Suppress Parameter Validation: Passive Key Trustee Server****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_cloudera_trustee_keyprovider_hostname-passive`**Required**`true`**Suppress Parameter Validation: Key Trustee Server Org Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Org Name parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_cloudera\_trustee\_keyprovider\_org

**Required**

true

**Suppress Parameter Validation: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for core-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for core-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_core-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Flume Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Flume Proxy User Groups parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_flume\_groups

**Required**

true

**Suppress Parameter Validation: Flume Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Flume Proxy User Hosts parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_flume\_hosts

**Required**

true

**Suppress Parameter Validation: HDFS Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HDFS Proxy User Groups parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_hdfs\_groups

**Required**

true

**Suppress Parameter Validation: HDFS Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HDFS Proxy User Hosts parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_hdfs\_hosts

**Required**

true

**Suppress Parameter Validation: Hive Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hive Proxy User Groups parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_hive\_groups

**Required**

true

**Suppress Parameter Validation: Hive Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hive Proxy User Hosts parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_hadoop_kms_proxyuser_hive_hosts`**Required**`true`**Suppress Parameter Validation: HTTP Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Proxy User Groups parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_hadoop_kms_proxyuser_http_groups`**Required**`true`**Suppress Parameter Validation: HTTP Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Proxy User Hosts parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_hadoop_kms_proxyuser_http_hosts`**Required**`true`**Suppress Parameter Validation: HttpFS Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HttpFS Proxy User Groups parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_hadoop_kms_proxyuser_httpfs_groups`**Required**`true`**Suppress Parameter Validation: HttpFS Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HttpFS Proxy User Hosts parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_https\_hosts

**Required**

true

**Suppress Parameter Validation: Hue Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hue Proxy User Groups parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_hue\_groups

**Required**

true

**Suppress Parameter Validation: Hue Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hue Proxy User Hosts parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_hue\_hosts

**Required**

true

**Suppress Parameter Validation: Mapred Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Mapred Proxy User Groups parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_mapred\_groups

**Required**

true

**Suppress Parameter Validation: Mapred Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Mapred Proxy User Hosts parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_mapred\_hosts

**Required**

true

**Suppress Parameter Validation: Oozie Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Proxy User Groups parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_oozie\_groups

**Required**

true

**Suppress Parameter Validation: Oozie Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Proxy User Hosts parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_oozie\_hosts

**Required**

true

**Suppress Parameter Validation: YARN Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the YARN Proxy User Groups parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_yarn\_groups

**Required**

---

true

### Suppress Parameter Validation: YARN Proxy User Hosts

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the YARN Proxy User Hosts parameter.

#### Related Name

#### Default Value

false

#### API Name

role\_config\_suppression\_hadoop\_kms\_proxyuser\_yarn\_hosts

#### Required

true

### Suppress Parameter Validation: Key Trustee KeyStoreProvider Directory

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee KeyStoreProvider Directory parameter.

#### Related Name

#### Default Value

false

#### API Name

role\_config\_suppression\_hadoop\_security\_key\_provider\_dir

#### Required

true

### Suppress Parameter Validation: Key Trustee KeyStoreProvider Configuration Directory

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee KeyStoreProvider Configuration Directory parameter.

#### Related Name

#### Default Value

false

#### API Name

role\_config\_suppression\_keytrustee\_security\_key\_provider\_conf\_dir

#### Required

true

### Suppress Parameter Validation: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kms-acls.xml

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kms-acls.xml parameter.

#### Related Name

**Default Value**

false

**API Name**

role\_config\_suppression\_kms-acls.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kms-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kms-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kms-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: KMS Blacklist Users****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the KMS Blacklist Users parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kms\_blacklist\_users

**Required**

true

**Suppress Parameter Validation: KMS HTTP Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the KMS HTTP Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kms\_http\_port

**Required**

true

**Suppress Parameter Validation: Additional Java Configuration Options for KMS****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional Java Configuration Options for KMS parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kms\_java\_opts

**Required**

true

**Suppress Parameter Validation: Key Management Server Proxy Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kms\_keytrustee\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kts-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kts-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kts-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Key Management Server Proxy Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Key Management Server Proxy Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for ssl-server.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for ssl-server.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl-server.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Key Management Server Proxy TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Key Management Server Proxy TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_ssl_client_truststore_password`**Required**`true`**Suppress Parameter Validation: Key Management Server Proxy TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy TLS/SSL Server Keystore Key Password parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_keypassword`**Required**`true`**Suppress Parameter Validation: Key Management Server Proxy TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_location`**Required**`true`**Suppress Parameter Validation: Key Management Server Proxy TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Management Server Proxy TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_password`**Required**`true`

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_kms\_keytrustee\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_kms\_keytrustee\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_kms\_keytrustee\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_kms\_keytrustee\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_kms\_keytrustee\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_kms\_keytrustee\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_kms\_keytrustee\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_kms\_keytrustee\_unexpected\_exits

**Required**

true

**Service-Wide****Advanced****Key Trustee KMS Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

KEYTRUSTEE\_service\_env\_safety\_valve

**Required**

false

**System Group****Description**

The group that this service's processes should run as.

**Related Name**

<b>Default Value</b>	kms
<b>API Name</b>	process_groupname
<b>Required</b>	true

System User

<b>Description</b>	The user that this service's processes should run as.
<b>Related Name</b>	
<b>Default Value</b>	kms
<b>API Name</b>	process_username
<b>Required</b>	true

Monitoring

Enable Service Level Health Alerts

<b>Description</b>	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>	
<b>Default Value</b>	true
<b>API Name</b>	enable_alerts
<b>Required</b>	false

Enable Configuration Change Alerts

<b>Description</b>	When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	enable_config_alerts
<b>Required</b>	false

Service Triggers

<b>Description</b>	
--------------------	--

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

`service_triggers`

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

`smon_derived_configs_safety_valve`

**Required**

false

**Other****ZooKeeper Authentication Type for Secret Signer****Description**

ZooKeeper Authentication for Secret Signer. Can be either "none" or "sas1"

**Related Name**

`hadoop.kms.authentication.signer.secret.provider.zookeeper.auth.type`

**Default Value**

none

**API Name**`hadoop_kms_authentication_signer_secret_provider_zookeeper_auth_type`**Required**`true`**Authentication Secret Signer ZooKeeper Path****Description**

Authentication Secret Signer ZooKeeper path. Is required to be set for KMS High Availability deployments

**Related Name**`hadoop.kms.authentication.signer.secret.provider.zookeeper.path`**Default Value**`/kmsZKRoot`**API Name**`hadoop_kms_authentication_signer_secret_provider_zookeeper_path`**Required**`true`**Authentication Type****Description**

Authentication type for the KMS. Can either be "simple" or "kerberos".

**Related Name**`hadoop.kms.authentication.type`**Default Value**`simple`**API Name**`hadoop_kms_authentication_type`**Required**`true`**KMS Load Balancer****Description**

Key Management Store Load Balancer, used with multiple KMS roles (KMS high availability). In CDH 5.4 and higher, this Key Trustee KMS service typically has the ZooKeeper dependency set, and this property is left blank. In this case, the ZooKeeper-based high availability URL is automatically generated for clients. To use an external load balancer, specify the URL to that load balancer. When using the ZooKeeper-based load balancer, all KMS roles must listen on the same port.

**Related Name**`kms_load_balancer`**Default Value****API Name**`kms_load_balancer`**Required**`false`

### ZooKeeper Service

**Description**

Name of the ZooKeeper service that this Key Trustee KMS service instance depends on

**Related Name****Default Value****API Name**

zookeeper\_service

**Required**

false

### Suppressions

#### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

#### Suppress Configuration Validator: Key Trustee Server Auth Code

**Description**

Whether to suppress configuration warnings produced by the Key Trustee Server Auth Code configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cloudera\_trustee\_keyprovider\_auth

**Required**

true

#### Suppress Configuration Validator: Active Key Trustee Server

**Description**

Whether to suppress configuration warnings produced by the Active Key Trustee Server configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_cloudera_trustee_keyprovider_hostname-active`**Required**`true`**Suppress Configuration Validator: Passive Key Trustee Server****Description**

Whether to suppress configuration warnings produced by the Passive Key Trustee Server configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_cloudera_trustee_keyprovider_hostname-passive`**Required**`true`**Suppress Configuration Validator: Key Trustee Server Org Name****Description**

Whether to suppress configuration warnings produced by the Key Trustee Server Org Name configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_cloudera_trustee_keyprovider_org`**Required**`true`**Suppress Configuration Validator: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for core-site.xml****Description**

Whether to suppress configuration warnings produced by the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for core-site.xml configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_core-site.xml_role_safety_valve`**Required**`true`**Suppress Configuration Validator: Flume Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the Flume Proxy User Groups configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_flume\_groups

**Required**

true

**Suppress Configuration Validator: Flume Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the Flume Proxy User Hosts configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_flume\_hosts

**Required**

true

**Suppress Configuration Validator: HDFS Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the HDFS Proxy User Groups configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_hdfs\_groups

**Required**

true

**Suppress Configuration Validator: HDFS Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the HDFS Proxy User Hosts configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_hdfs\_hosts

**Required**

true

**Suppress Configuration Validator: Hive Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the Hive Proxy User Groups configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_hive\_groups

**Required**

true

**Suppress Configuration Validator: Hive Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the Hive Proxy User Hosts configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_hive\_hosts

**Required**

true

**Suppress Configuration Validator: HTTP Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the HTTP Proxy User Groups configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_http\_groups

**Required**

true

**Suppress Configuration Validator: HTTP Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the HTTP Proxy User Hosts configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_hadoop_kms_proxyuser_http_hosts`**Required**`true`**Suppress Configuration Validator: HttpFS Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the HttpFS Proxy User Groups configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_hadoop_kms_proxyuser_httpfs_groups`**Required**`true`**Suppress Configuration Validator: HttpFS Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the HttpFS Proxy User Hosts configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_hadoop_kms_proxyuser_httpfs_hosts`**Required**`true`**Suppress Configuration Validator: Hue Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the Hue Proxy User Groups configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_hadoop_kms_proxyuser_hue_groups`**Required**`true`**Suppress Configuration Validator: Hue Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the Hue Proxy User Hosts configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_hue\_hosts

**Required**

true

**Suppress Configuration Validator: Mapred Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the Mapred Proxy User Groups configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_mapred\_groups

**Required**

true

**Suppress Configuration Validator: Mapred Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the Mapred Proxy User Hosts configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_mapred\_hosts

**Required**

true

**Suppress Configuration Validator: Oozie Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the Oozie Proxy User Groups configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_oozie\_groups

**Required**

true

**Suppress Configuration Validator: Oozie Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the Oozie Proxy User Hosts configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_oozie\_hosts

**Required**

true

**Suppress Configuration Validator: YARN Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the YARN Proxy User Groups configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_yarn\_groups

**Required**

true

**Suppress Configuration Validator: YARN Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the YARN Proxy User Hosts configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_kms\_proxyuser\_yarn\_hosts

**Required**

true

**Suppress Configuration Validator: Key Trustee KeyStoreProvider Directory****Description**

Whether to suppress configuration warnings produced by the Key Trustee KeyStoreProvider Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_security\_key\_provider\_dir

**Required**

---

true

### Suppress Configuration Validator: Key Trustee KeyStoreProvider Configuration Directory

#### Description

Whether to suppress configuration warnings produced by the Key Trustee KeyStoreProvider Configuration Directory configuration validator.

#### Related Name

#### Default Value

false

#### API Name

role\_config\_suppression\_keytrustee\_security\_key\_provider\_conf\_dir

true

**Suppress Configuration Validator: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kts-site.xml****Description**

Whether to suppress configuration warnings produced by the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for kts-site.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kts-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Key Management Server Proxy Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Key Management Server Proxy Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Key Management Server Proxy Log Directory****Description**

Whether to suppress configuration warnings produced by the Key Management Server Proxy Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_oom_heap_dump_dir`**Required**`true`**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_rm_custom_resources`**Required**`true`**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_role_triggers`**Required**`true`**Suppress Configuration Validator: Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for ssl-server.xml****Description**

Whether to suppress configuration warnings produced by the Key Management Server Proxy Advanced Configuration Snippet (Safety Valve) for ssl-server.xml configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl-server.xml_role_safety_valve`**Required**`true`**Suppress Configuration Validator: Key Management Server Proxy TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the Key Management Server Proxy TLS/SSL Trust Store File configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Configuration Validator: Key Management Server Proxy TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the Key Management Server Proxy TLS/SSL Trust Store Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Configuration Validator: Key Management Server Proxy TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the Key Management Server Proxy TLS/SSL Server Keystore Key Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_keypassword

**Required**

true

**Suppress Configuration Validator: Key Management Server Proxy TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the Key Management Server Proxy TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

---

true

### Suppress Configuration Validator: Key Management Server Proxy TLS/SSL Server Keystore File Password

#### Description

Whether to suppress configuration warnings produced by the Key Management Server Proxy TLS/SSL Server Keystore File Password configuration validator.

#### Related Name

#### Default Value

false

#### API Name

role\_config\_suppression\_ssl\_server\_keystore\_password

#### Required

true

### Suppress Configuration Validator: Stacks Collection Directory

#### Description

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

#### Related Name

#### Default Value

false

#### API Name

role\_config\_suppression\_stacks\_collection\_directory

#### Required

true

### Suppress Parameter Validation: Authentication Secret Signer ZooKeeper Path

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Authentication Secret Signer ZooKeeper Path parameter.

#### Related Name

#### Default Value

false

#### API Name

service\_config\_suppression\_hadoop\_kms\_authentication\_signer\_secret\_provider\_zookeeper\_path

#### Required

true

### Suppress Parameter Validation: Key Trustee KMS Service Environment Advanced Configuration Snippet (Safety Valve)

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee KMS Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

#### Related Name

**Default Value**

false

**API Name**

service\_config\_suppression\_keytrustee\_service\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Key Management Server Proxy Count Validator****Description**

Whether to suppress configuration warnings produced by the Key Management Server Proxy Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kms\_keytrustee\_count\_validator

**Required**

true

**Suppress Parameter Validation: KMS Load Balancer****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the KMS Load Balancer parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kms\_load\_balancer

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

	Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_process_username
Required	true

Suppress Parameter Validation: Service Triggers

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_service_triggers
Required	true

Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_smon_derived_configs_safety_valve
Required	true

Key Trustee Server Properties in Cloudera Runtime 7.1.8

Role groups:

Active Database

Advanced

Active Database Environment Advanced Configuration Snippet (Safety Valve)

Description	
-------------	--

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment.  
Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

DB\_ACTIVE\_role\_env\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**Monitoring****File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

db\_active\_fd\_thresholds

**Required**

false

**Active Database Host Health Test****Description**

When computing the overall Active Database health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

db\_active\_host\_health\_enabled

**Required**

false

**Active Database Process Health Test****Description**

Enables the health test that the Active Database's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

db\_active\_scm\_health\_enabled

**Required**

false

**Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

## Metric Filter

### Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

### Related Name

### Default Value

### API Name

`monitoring_metric_filter`

### Required

false

## Swap Memory Usage Rate Thresholds

### Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

### Related Name

### Default Value

Warning: Never, Critical: Never

### API Name

`process_swap_memory_rate_thresholds`

### Required

false

## Swap Memory Usage Rate Window

### Description

The period to review when computing unexpected swap memory usage change of the process.

### Related Name

`common.process.swap_memory_rate_window`

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

### Unexpected Exits Thresholds

**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

### Unexpected Exits Monitoring Period

**Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

### Other

#### Database Storage Directory

**Description**

Directory (local file system) where the Key Trustee Server database will be stored. Changing this value after the service has been started will have no effect.

**Related Name**

db\_root

**Default Value**

/var/lib/keytrustee/db

**API Name**

db\_root

**Required**

false

### Performance

#### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value**

**API Name**

rlimit\_fds

**Required**

false

**Ports and Addresses****Key Trustee Server Database Port****Description**

The Key Trustee Server database server port. Changing this value after the service has been started will have no effect.

**Related Name**

db\_port

**Default Value**

11381

**API Name**

db\_port

**Required**

true

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value**

**API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB
<b>API Name</b>
rm_memory_soft_limit
<b>Required</b>
true

Suppressions

Suppress Configuration Validator: CDH Version Validator

<b>Description</b>
Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_cdh_version_validator
<b>Required</b>
true

Suppress Parameter Validation: Active Database Environment Advanced Configuration Snippet (Safety Valve)

<b>Description</b>
Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Database Environment Advanced Configuration Snippet (Safety Valve) parameter.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_db_active_role_env_safety_valve
<b>Required</b>
true

Suppress Parameter Validation: Key Trustee Server Database Port

<b>Description</b>
Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Database Port parameter.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_db_port
<b>Required</b>
true

**Suppress Parameter Validation: Database Storage Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Database Storage Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_db\_root

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

`role_health_suppression_keytrustee_server_db_active_audit_health`**Required**`true`**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_keytrustee_server_db_active_file_descriptor`**Required**`true`**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_keytrustee_server_db_active_host_health`**Required**`true`**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_keytrustee_server_db_active_scm_health`**Required**`true`**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_db\_active\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_db\_active\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_db\_active\_unexpected\_exits

**Required**

true

**Active Key Trustee Server****Advanced****Active Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name**

**Default Value****API Name**

KEYTRUSTEE\_ACTIVE\_SERVER\_role\_env\_safety\_valve

**Required**

false

**Active Key Trustee Server XML Override****Description**

For advanced use only, replace entire XML in the logback configuration file for Active Key Trustee Server, ignoring all logging configuration.

**Related Name**

logback\_safety\_valve

**Default Value****API Name**

logback\_safety\_valve

**Required**

false

**Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf****Description**

For advanced use only. A string to be inserted into logging.conf for this role only.

**Related Name****Default Value****API Name**

logging.conf\_role\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name**

**Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection**

**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name**

**Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts**

**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name**

**Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout**

**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name**

**Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties****Description**

For advanced use only. A string to be inserted into ssl.properties for this role only.

**Related Name****Default Value****API Name**

ssl.properties\_role\_safety\_valve

**Required**

false

**Logs****Active Key Trustee Server Log Directory****Description**

The log directory for log files of the role Active Key Trustee Server.

**Related Name**

log\_dir

**Default Value**

/var/lib/keytrustee/logs

**API Name**

log\_dir

**Required**

false

**Active Key Trustee Server Logging Threshold****Description**

The minimum log level for Active Key Trustee Server logs

**Related Name****Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

**Active Key Trustee Server Maximum Log File Backups****Description**

The maximum number of rolled log files to keep for Active Key Trustee Server logs. Typically used by log4j or logback.

**Related Name****Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

**Active Key Trustee Server Max Log Size****Description**

The maximum size, in megabytes, per log file for Active Key Trustee Server logs. Typically used by log4j or logback.

**Related Name****Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring****Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

keytrustee\_active\_server\_fd\_thresholds

**Required**

false

**Active Key Trustee Server Host Health Test****Description**

When computing the overall Active Key Trustee Server health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

keytrustee\_active\_server\_host\_health\_enabled

**Required**

false

**Active Key Trustee Server Process Health Test****Description**

Enables the health test that the Active Key Trustee Server's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

keytrustee\_active\_server\_scm\_health\_enabled

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

## Log Directory Free Space Monitoring Percentage Thresholds

### Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

### Related Name

### Default Value

Warning: Never, Critical: Never

### API Name

log\_directory\_free\_space\_percentage\_thresholds

### Required

false

## Metric Filter

### Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

### Required

false

## Swap Memory Usage Rate Thresholds

### Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.
- streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.

- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

`role_triggers`

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

`unexpected_exits_thresholds`

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

`unexpected_exits_window`

**Required**

false

**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name**

**Default Value****API Name**

rlimit\_fds

**Required**

false

**Ports and Addresses****Key Trustee Server Port****Description**

The Key Trustee Server port number.

**Related Name**

keytrustee\_port

**Default Value**

11371

**API Name**

keytrustee\_port

**Required**

true

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value**

**API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Active Key Trustee Server TLS/SSL Server CA Certificate (PEM Format)****Description**

The path to the TLS/SSL file containing the certificate of the certificate authority (CA) and any intermediate certificates used to sign the server certificate. Used when Active Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format, and is usually created by concatenating all of the appropriate root and intermediate certificates.

**Related Name**

ssl.cacert.location

**Default Value****API Name**

ssl\_server\_ca\_certificate\_location

**Required**

false

**Active Key Trustee Server TLS/SSL Server Certificate File (PEM Format)****Description**

The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Active Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

**Related Name**

ssl.cert.location

**Default Value**

/var/lib/keytrustee/.keytrustee/.ssl/ssl-cert-keytrustee.pem

**API Name**

ssl\_server\_certificate\_location

**Required**

false

**Active Key Trustee Server TLS/SSL Server Private Key File (PEM Format)****Description**

The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Active Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

**Related Name**

ssl.privatekey.location

**Default Value**

/var/lib/keytrustee/.keytrustee/.ssl/ssl-cert-keytrustee-pk.pem

**API Name**

ssl\_server\_privatekey\_location

**Required**

false

**Active Key Trustee Server TLS/SSL Private Key Password****Description**

The password for the private key in the Active Key Trustee Server TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.

**Related Name**

ssl.privatekey.password

**Default Value****API Name**

ssl\_server\_privatekey\_password

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Active Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_keytrustee\_active\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Key Trustee Server Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_keytrustee\_port

**Required**

true

**Suppress Parameter Validation: Active Key Trustee Server Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Active Key Trustee Server XML Override****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server XML Override parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_logback\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_logging.conf\_role\_safety\_valve

**Required**

---

true

### Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

### Suppress Parameter Validation: Role Triggers

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

### Suppress Parameter Validation: Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl.properties\_role\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Active Key Trustee Server TLS/SSL Server CA Certificate (PEM Format)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server TLS/SSL Server CA Certificate (PEM Format) parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_ca\_certificate\_location

**Required**

true

**Suppress Parameter Validation: Active Key Trustee Server TLS/SSL Server Certificate File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server TLS/SSL Server Certificate File (PEM Format) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_certificate\_location

**Required**

true

**Suppress Parameter Validation: Active Key Trustee Server TLS/SSL Server Private Key File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server TLS/SSL Server Private Key File (PEM Format) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_location

**Required**

true

**Suppress Parameter Validation: Active Key Trustee Server TLS/SSL Private Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Key Trustee Server TLS/SSL Private Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_password

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_active\_server\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_active\_server\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_active\_server\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_active\_server\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_active\_server\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_active\_server\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_active\_server\_swap\_memory\_usage\_rate

**Required**

true

### Suppress Health Test: Unexpected Exits

**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_active\_server\_unexpected\_exits

**Required**

true

## Passive Database

### Advanced

#### Passive Database Environment Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

DB\_PASSIVE\_role\_env\_safety\_valve

**Required**

false

#### Enable auto refresh for metric configurations

**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

#### Automatically Restart Process

**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name**

**Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

Monitoring

File Descriptor Monitoring Thresholds

Description	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
Related Name	
Default Value	Warning: 50.0 %, Critical: 70.0 %
API Name	db_passive_fd_thresholds
Required	false

Passive Database Host Health Test

Description	When computing the overall Passive Database health, consider the host's health.
Related Name	
Default Value	true
API Name	db_passive_host_health_enabled
Required	false

Passive Database Process Health Test

Description	Enables the health test that the Passive Database's process state is consistent with the role configuration
Related Name	
Default Value	true
API Name	db_passive_scm_health_enabled
Required	false

Enable Health Alerts for this Role

Description	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

### Swap Memory Usage Rate Thresholds

**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

### Role Triggers

**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part of the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.

- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

Other

Database Storage Directory

Description	Directory (local file system) where the Key Trustee Server database will be stored. Changing this value after the service has been started will have no effect.
Related Name	db_root
Default Value	/var/lib/keytrustee/db
API Name	db_root
Required	false

Retry Attempts

Description	Number of times a connection attempt will be made before giving up.
Related Name	retry_attempts
Default Value	30
API Name	retry_attempts
Required	true

Retry Timeout

Description	Number of seconds to wait between retries.
Related Name	retry_timeout
Default Value	1 second(s)
API Name	retry_timeout
Required	true

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	

**Default Value****API Name**

rlimit\_fds

**Required**

false

**Ports and Addresses****Key Trustee Server Database Port****Description**

The Key Trustee Server database server port. Changing this value after the service has been started will have no effect.

**Related Name**

db\_port

**Default Value**

11381

**API Name**

db\_port

**Required**

true

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value**

**API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Passive Database Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Database Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_db\_passive\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Key Trustee Server Database Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Database Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_db\_port

**Required**

true

**Suppress Parameter Validation: Database Storage Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Database Storage Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_db\_root

**Required**

true

**Suppress Parameter Validation: Retry Timeout****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Retry Timeout parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_retry\_timeout

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_role_triggers`**Required**`true`**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_keytrustee_server_db_passive_audit_health`**Required**`true`**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_keytrustee_server_db_passive_file_descriptor`**Required**`true`**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_keytrustee_server_db_passive_host_health`**Required**`true`**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_db\_passive\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_db\_passive\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_db\_passive\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

<b>API Name</b>	role_health_suppression_keytrustee_server_db_passive_unexpected_exits
<b>Required</b>	true

Passive Key Trustee Server

Advanced

Passive Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)

<b>Description</b>	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	KEYTRUSTEE_PASSIVE_SERVER_role_env_safety_valve
<b>Required</b>	false

Passive Key Trustee Server XML Override

<b>Description</b>	For advanced use only, replace entire XML in the logback configuration file for Passive Key Trustee Server, ignoring all logging configuration.
<b>Related Name</b>	logback_safety_valve
<b>Default Value</b>	
<b>API Name</b>	logback_safety_valve
<b>Required</b>	false

Passive Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf

<b>Description</b>	For advanced use only. A string to be inserted into logging.conf for this role only.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	logging.conf_role_safety_valve
<b>Required</b>	false

Enable auto refresh for metric configurations

<b>Description</b>	
--------------------	--

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

### Automatically Restart Process

**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

### Enable Metric Collection

**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

### Process Start Retry Attempts

**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process_start_retries
<b>Required</b>
false

Process Start Wait Timeout

<b>Description</b>
The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
<b>Related Name</b>
<b>Default Value</b>
20
<b>API Name</b>
process_start_secs
<b>Required</b>
false

Passive Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties

<b>Description</b>
For advanced use only. A string to be inserted into ssl.properties for this role only.
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
ssl.properties_role_safety_valve
<b>Required</b>
false

Logs

Passive Key Trustee Server Log Directory

<b>Description</b>
The log directory for log files of the role Passive Key Trustee Server.
<b>Related Name</b>
log_dir
<b>Default Value</b>
/var/lib/keytrustee/logs
<b>API Name</b>
log_dir
<b>Required</b>
false

Passive Key Trustee Server Logging Threshold

<b>Description</b>
The minimum log level for Passive Key Trustee Server logs
<b>Related Name</b>

**Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

**Passive Key Trustee Server Maximum Log File Backups****Description**

The maximum number of rolled log files to keep for Passive Key Trustee Server logs. Typically used by log4j or logback.

**Related Name****Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

**Passive Key Trustee Server Max Log Size****Description**

The maximum size, in megabytes, per log file for Passive Key Trustee Server logs. Typically used by log4j or logback.

**Related Name****Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring****Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

### File Descriptor Monitoring Thresholds

**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

keytrustee\_passive\_server\_fd\_thresholds

**Required**

false

### Passive Key Trustee Server Host Health Test

**Description**

When computing the overall Passive Key Trustee Server health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

keytrustee\_passive\_server\_host\_health\_enabled

**Required**

false

### Passive Key Trustee Server Process Health Test

**Description**

Enables the health test that the Passive Key Trustee Server's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

keytrustee\_passive\_server\_scm\_health\_enabled

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

### Swap Memory Usage Rate Thresholds

**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

## Role Triggers

### Description

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

### Related Name

### Default Value

[]

### API Name

role\_triggers

### Required

true

## Unexpected Exits Thresholds

### Description

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

### Related Name

### Default Value

Warning: Never, Critical: Any

### API Name

unexpected\_exits\_thresholds

### Required

false

## Unexpected Exits Monitoring Period

### Description

The period to review when computing unexpected exits.

### Related Name

**Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

**Ports and Addresses****Key Trustee Server Port****Description**

The Key Trustee Server port number.

**Related Name**

keytrustee\_port

**Default Value**

11371

**API Name**

keytrustee\_port

**Required**

true

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

`rm_cpu_shares`**Required**`true`**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the `cgexec` command: `resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`  
\*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**`custom.cgroups`**Default Value****API Name**`rm_custom_resources`**Required**`false`**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**`blkio.weight`**Default Value**`500`**API Name**`rm_io_weight`**Required**`true`**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**`memory.limit_in_bytes`**Default Value**`-1 MiB`**API Name**`rm_memory_hard_limit`

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Passive Key Trustee Server TLS/SSL Server CA Certificate (PEM Format)****Description**

The path to the TLS/SSL file containing the certificate of the certificate authority (CA) and any intermediate certificates used to sign the server certificate. Used when Passive Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format, and is usually created by concatenating all of the appropriate root and intermediate certificates.

**Related Name**

ssl.cacert.location

**Default Value****API Name**

ssl\_server\_ca\_certificate\_location

**Required**

false

**Passive Key Trustee Server TLS/SSL Server Certificate File (PEM Format)****Description**

The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Passive Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

**Related Name**

ssl.cert.location

**Default Value**

/var/lib/keytrustee/.keytrustee/.ssl/ssl-cert-keytrustee.pem

**API Name**

ssl\_server\_certificate\_location

**Required**

false

**Passive Key Trustee Server TLS/SSL Server Private Key File (PEM Format)****Description**

The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Passive Key Trustee Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

**Related Name**

ssl.privatekey.location

**Default Value**

/var/lib/keytrustee/.keytrustee/.ssl/ssl-cert-keytrustee-pk.pem

**API Name**

ssl\_server\_privatekey\_location

**Required**

false

**Passive Key Trustee Server TLS/SSL Private Key Password****Description**

The password for the private key in the Passive Key Trustee Server TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.

**Related Name**

ssl.privatekey.password

**Default Value****API Name**

ssl\_server\_privatekey\_password

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Passive Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_keytrustee\_passive\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Key Trustee Server Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_keytrustee\_port

**Required**

true

**Suppress Parameter Validation: Passive Key Trustee Server Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Passive Key Trustee Server XML Override****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server XML Override parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_logback\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Passive Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_logging.conf\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Passive Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl.properties\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Passive Key Trustee Server TLS/SSL Server CA Certificate (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server TLS/SSL Server CA Certificate (PEM Format) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_ca\_certificate\_location

**Required**

true

**Suppress Parameter Validation: Passive Key Trustee Server TLS/SSL Server Certificate File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server TLS/SSL Server Certificate File (PEM Format) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_certificate\_location

**Required**

true

**Suppress Parameter Validation: Passive Key Trustee Server TLS/SSL Server Private Key File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server TLS/SSL Server Private Key File (PEM Format) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_location

**Required**

true

**Suppress Parameter Validation: Passive Key Trustee Server TLS/SSL Private Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Passive Key Trustee Server TLS/SSL Private Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_password

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_passive\_server\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_passive\_server\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_passive\_server\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_passive\_server\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_keytrustee\_server\_keytrustee\_passive\_server\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**`role_health_suppression_keytrustee_server_keytrustee_passive_server_swap_memory_usage`**Required**`true`**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_keytrustee_server_keytrustee_passive_server_swap_memory_usage_rate`**Required**`true`**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_keytrustee_server_keytrustee_passive_server_unexpected_exits`**Required**`true`**Service-Wide****Advanced****Key Trustee Server Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**`KEYTRUSTEE_SERVER_service_env_safety_valve`**Required**`false`

**Key Trustee Server Service Advanced Configuration Snippet (Safety Valve) for logging.conf****Description**

For advanced use only, a string to be inserted into logging.conf. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

logging.conf\_service\_safety\_valve

**Required**

false

**System Group****Description**

The group that this service's processes should run as.

**Related Name****Default Value**

keytrustee

**API Name**

process\_groupname

**Required**

true

**System User****Description**

The user that this service's processes should run as.

**Related Name****Default Value**

keytrustee

**API Name**

process\_username

**Required**

true

**Key Trustee Server Service Advanced Configuration Snippet (Safety Valve) for ssl.properties****Description**

For advanced use only, a string to be inserted into ssl.properties. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

ssl.properties\_service\_safety\_valve

**Required**

false

## Monitoring

### Enable Service Level Health Alerts

**Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

### Service Triggers

**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name**

**Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

**Other****Supported Cipher Configuration for SSL****Description**

A list of allowed and disallowed ciphers, colon-separated (':'). Using an exclamation mark (!) in front of the cipher name will disallow the respective cipher. For cipher options check [OpenSSL cipher list](#). If blank then [default ciphers](#) are set.

**Related Name**

ciphers

**Default Value****API Name**

ciphers

**Required**

false

**Key Trustee Home****Description**

Home directory of Key Trustee.

**Related Name**

keytrustee.home

**Default Value**

/var/lib/keytrustee/.keytrustee

**API Name**

keytrustee.home

**Required**

false

### Minimum TLS Support

**Description**

Minimum TLS protocol supported.

**Related Name**

tls.min.protocols

**Default Value**

TLSv1

**API Name**

tls.min.protocols

**Required**

false

### Suppressions

#### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

#### Suppress Configuration Validator: Active Database Environment Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the Active Database Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_db\_active\_role\_env\_safety\_valve

**Required**

true

#### Suppress Configuration Validator: Passive Database Environment Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the Passive Database Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_db\_passive\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Key Trustee Server Database Port****Description**

Whether to suppress configuration warnings produced by the Key Trustee Server Database Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_db\_port

**Required**

true

**Suppress Configuration Validator: Database Storage Directory****Description**

Whether to suppress configuration warnings produced by the Database Storage Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_db\_root

**Required**

true

**Suppress Configuration Validator: Active Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Active Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_keytrustee\_active\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Passive Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Passive Key Trustee Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_keytrustee\_passive\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Key Trustee Server Port****Description**

Whether to suppress configuration warnings produced by the Key Trustee Server Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_keytrustee\_port

**Required**

true

**Suppress Configuration Validator: Active Key Trustee Server Log Directory****Description**

Whether to suppress configuration warnings produced by the Active Key Trustee Server Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Active Key Trustee Server XML Override****Description**

Whether to suppress configuration warnings produced by the Active Key Trustee Server XML Override configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_logback_safety_valve`**Required**`true`**Suppress Configuration Validator: Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf****Description**

Whether to suppress configuration warnings produced by the Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for logging.conf configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_logging.conf_role_safety_valve`**Required**`true`**Suppress Configuration Validator: Retry Timeout****Description**

Whether to suppress configuration warnings produced by the Retry Timeout configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_retry_timeout`**Required**`true`**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_rm_custom_resources`**Required**`true`**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties****Description**

Whether to suppress configuration warnings produced by the Active Key Trustee Server Advanced Configuration Snippet (Safety Valve) for ssl.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl.properties\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Active Key Trustee Server TLS/SSL Server CA Certificate (PEM Format)****Description**

Whether to suppress configuration warnings produced by the Active Key Trustee Server TLS/SSL Server CA Certificate (PEM Format) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_ca\_certificate\_location

**Required**

true

**Suppress Configuration Validator: Active Key Trustee Server TLS/SSL Server Certificate File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the Active Key Trustee Server TLS/SSL Server Certificate File (PEM Format) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_certificate\_location

**Required**

true

**Suppress Configuration Validator: Active Key Trustee Server TLS/SSL Server Private Key File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the Active Key Trustee Server TLS/SSL Server Private Key File (PEM Format) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_location

**Required**

true

**Suppress Configuration Validator: Active Key Trustee Server TLS/SSL Private Key Password****Description**

Whether to suppress configuration warnings produced by the Active Key Trustee Server TLS/SSL Private Key Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_password

**Required**

true

**Suppress Parameter Validation: Supported Cipher Configuration for SSL****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Supported Cipher Configuration for SSL parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ciphers

**Required**

true

**Suppress Configuration Validator: Active Database Count Validator****Description**

Whether to suppress configuration warnings produced by the Active Database Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_db\_active\_count\_validator

**Required**

true

**Suppress Configuration Validator: Passive Database Count Validator****Description**

Whether to suppress configuration warnings produced by the Passive Database Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_db\_passive\_count\_validator

**Required**

true

**Suppress Parameter Validation: Key Trustee Home****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Home parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_keytrustee.home

**Required**

true

**Suppress Configuration Validator: Active Key Trustee Server Count Validator****Description**

Whether to suppress configuration warnings produced by the Active Key Trustee Server Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_keytrustee\_active\_server\_count\_validator

**Required**

true

**Suppress Configuration Validator: Passive Key Trustee Server Count Validator****Description**

Whether to suppress configuration warnings produced by the Passive Key Trustee Server Count Validator configuration validator.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_keytrustee\_passive\_server\_count\_validator

**Required**

true

**Suppress Parameter Validation: Key Trustee Server Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_keytrustee\_server\_service\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Key Trustee Server Service Advanced Configuration Snippet (Safety Valve) for logging.conf****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Service Advanced Configuration Snippet (Safety Valve) for logging.conf parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_logging.conf\_service\_safety\_valve

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

---

true

### Suppress Parameter Validation: System User

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

#### Related Name

#### Default Value

false

#### API Name

service\_config\_suppression\_process\_username

#### Required

true

### Suppress Parameter Validation: Service Triggers

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

#### Related Name

#### Default Value

false

#### API Name

service\_config\_suppression\_service\_triggers

#### Required

true

### Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

#### Related Name

#### Default Value

false

#### API Name

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

#### Required

true

### Suppress Parameter Validation: Key Trustee Server Service Advanced Configuration Snippet (Safety Valve) for ssl.properties

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key Trustee Server Service Advanced Configuration Snippet (Safety Valve) for ssl.properties parameter.

#### Related Name

**Default Value**

false

**API Name**

service\_config\_suppression\_ssl.properties\_service\_safety\_valve

**Required**

true

## Key-Value Store Indexer Properties in Cloudera Runtime 7.1.8

Role groups:

### Lily HBase Indexer

#### Advanced

#### Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for hbase-indexer-site.xml

**Description**

For advanced use only. A string to be inserted into hbase-indexer-site.xml for this role only.

**Related Name****Default Value****API Name**

hbase\_indexer\_config\_safety\_valve

**Required**

false

#### Java Configuration Options for Lily HBase Indexer

**Description**

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here. Note: When CM version is 6.3.0 or greater, {{JAVA\_GC\_ARGS}} will be replaced by JVM Garbage Collection arguments based on the runtime Java JVM version.

**Related Name****Default Value**

JAVA\_GC\_ARGS

**API Name**

hbase\_indexer\_java\_opts

**Required**

false

#### System Group

**Description**

The group that the HBase Indexer process should run as.

**Related Name****Default Value**

	hbase
API Name	
	hbase_indexer_process_groupname
Required	
	true

System User

Description	The user that the HBase Indexer process should run as.
Related Name	
Default Value	
	hbase
API Name	
	hbase_indexer_process_username
Required	
	true

Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
Related Name	
Default Value	
API Name	
	HBASE_INDEXER_role_env_safety_valve
Required	
	false

HBase Indexer ZooKeeper Session Timeout

Description	ZooKeeper session timeout. Controls the amount of time the HBase Indexer will attempt to connect to ZooKeeper before timing out.
Related Name	
	hbaseindexer.zookeeper.session.timeout
Default Value	
	1 minute(s)
API Name	
	hbase_indexer_zk_session_timeout
Required	
	false

Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, a string to be inserted into log4j.properties for this role only.
-------------	--

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

---

true

### Kill When Out of Memory

#### Description

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

#### Related Name

#### Default Value

true

#### API Name

oom\_sigkill\_enabled

#### Required

true

### Automatically Restart Process

#### Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

#### Related Name

#### Default Value

false

#### API Name

process\_auto\_restart

#### Required

true

### Enable Metric Collection

#### Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

#### Related Name

#### Default Value

true

#### API Name

process\_should\_monitor

#### Required

true

### Process Start Retry Attempts

#### Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

#### Related Name

**Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**Logs****HBase Indexer Log Directory****Description**

Directory where HBase Indexer will place its log files.

**Related Name****Default Value**

/var/log/hbase-solr

**API Name**

hbase\_indexer\_log\_dir

**Required**

true

**Lily HBase Indexer Logging Threshold****Description**

The minimum log level for Lily HBase Indexer logs

**Related Name****Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

### Lily HBase Indexer Maximum Log File Backups

**Description**

The maximum number of rolled log files to keep for Lily HBase Indexer logs. Typically used by log4j or logback.

**Related Name****Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

### Lily HBase Indexer Max Log Size

**Description**

The maximum size, in megabytes, per log file for Lily HBase Indexer logs. Typically used by log4j or logback.

**Related Name****Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

## Monitoring

### Enable Health Alerts for this Role

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable_config_alerts
<b>Required</b>
false

File Descriptor Monitoring Thresholds

<b>Description</b>
The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
<b>Related Name</b>
<b>Default Value</b>
Warning: 50.0 %, Critical: 70.0 %
<b>API Name</b>
hbase_indexer_fd_thresholds
<b>Required</b>
false

Lily HBase Indexer Host Health Test

<b>Description</b>
When computing the overall Lily HBase Indexer health, consider the host's health.
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
hbase_indexer_host_health_enabled
<b>Required</b>
false

Lily HBase Indexer Process Health Test

<b>Description</b>
Enables the health test that the Lily HBase Indexer's process state is consistent with the role configuration
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
hbase_indexer_scm_health_enabled
<b>Required</b>
false

Heap Dump Directory Free Space Monitoring Absolute Thresholds

<b>Description</b>
The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory.
<b>Related Name</b>

**Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

heap\_dump\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Heap Dump Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Heap Dump Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

heap\_dump\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

## Metric Filter

### Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

### Related Name

### Default Value

### API Name

`monitoring_metric_filter`

### Required

`false`

## Swap Memory Usage Rate Thresholds

### Description

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

### Related Name

### Default Value

Warning: Never, Critical: Never

### API Name

`process_swap_memory_rate_thresholds`

### Required

`false`

## Swap Memory Usage Rate Window

### Description

The period to review when computing unexpected swap memory usage change of the process.

### Related Name

`common.process.swap_memory_rate_window`

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

### Unexpected Exits Thresholds

**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

`unexpected_exits_thresholds`

**Required**

false

### Unexpected Exits Monitoring Period

**Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

`unexpected_exits_window`

**Required**

false

### Performance

#### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

`rlimit_fds`

**Required**

false

### Ports and Addresses

#### HBase Indexer HTTP Port

**Description**

HTTP port used by HBase Indexer.

**Related Name**

`hbaseindexer.http.port`

**Default Value**

11060

**API Name**

hbase\_indexer\_http\_port

**Required**

true

**Resource Management****Java Heap Size of Lily HBase Indexer in Bytes****Description**

Maximum size in bytes for the Java Process heap memory. Passed to Java -Xmx.

**Related Name****Default Value**

1 GiB

**API Name**

hbase\_indexer\_java\_heapsize

**Required**

false

**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

### Cgroup I/O Weight

**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

### Cgroup Memory Hard Limit

**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

### Cgroup Memory Soft Limit

**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

Security

Role-Specific Kerberos Principal

Description	Kerberos principal used by the Lily HBase Indexer roles.
Related Name	
Default Value	hbase
API Name	kerberos_role_princ_name
Required	true

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	100 MiB
API Name	stacks_collection_data_retention
Required	false

Stacks Collection Directory

Description	The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
Related Name	stacks_collection_directory
Default Value	
API Name	stacks_collection_directory
Required	false

Stacks Collection Enabled

Description	Whether or not periodic stacks collection is enabled.
Related Name	

	stacks_collection_enabled
Default Value	false
API Name	stacks_collection_enabled
Required	true

Stacks Collection Frequency

Description	The frequency with which stacks are collected.
Related Name	stacks_collection_frequency
Default Value	5.0 second(s)
API Name	stacks_collection_frequency
Required	false

Stacks Collection Method

Description	The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name	stacks_collection_method
Default Value	jstack
API Name	stacks_collection_method
Required	false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	

`role_config_suppression_cdh_version_validator`**Required**`true`**Suppress Parameter Validation: Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for hbase-indexer-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for hbase-indexer-site.xml parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_hbase_indexer_config_safety_valve`**Required**`true`**Suppress Parameter Validation: HBase Indexer HTTP Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HBase Indexer HTTP Port parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_hbase_indexer_http_port`**Required**`true`**Suppress Parameter Validation: Java Configuration Options for Lily HBase Indexer****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Configuration Options for Lily HBase Indexer parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_hbase_indexer_java_opts`**Required**`true`**Suppress Parameter Validation: HBase Indexer Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HBase Indexer Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hbase\_indexer\_log\_dir

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hbase\_indexer\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hbase\_indexer\_process\_username

**Required**

true

**Suppress Parameter Validation: Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hbase\_indexer\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Role-Specific Kerberos Principal****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role-Specific Kerberos Principal parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kerberos\_role\_princ\_name

**Required**

true

**Suppress Parameter Validation: Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_hbase\_indexer\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_hbase\_indexer\_file\_descriptor

**Required**

true

**Suppress Health Test: Heap Dump Directory Free Space****Description**

Whether to suppress the results of the Heap Dump Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_hbase\_indexer\_heap\_dump\_directory\_free\_space

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_hbase\_indexer\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_hbase\_indexer\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_hbase\_indexer\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_hbase\_indexer\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_hbase\_indexer\_swap\_memory\_usage\_rate

**Required**

true

### Suppress Health Test: Unexpected Exits

**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_hbase\_indexer\_unexpected\_exits

**Required**

true

## Service-Wide

### Advanced

#### Key-Value Store Indexer Service Environment Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

ks\_indexer\_env\_safety\_valve

**Required**

false

### Monitoring

#### Enable Service Level Health Alerts

**Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

#### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name**

**Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Healthy Lily HBase Indexer Monitoring Thresholds****Description**

The health test thresholds of the overall Lily HBase Indexer health. The check returns "Concerning" health if the percentage of "Healthy" Lily HBase Indexers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Lily HBase Indexers falls below the critical threshold.

**Related Name****Default Value**

Warning: 95.0 %, Critical: 90.0 %

**API Name**

ks\_indexer\_indexers\_healthy\_thresholds

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific service.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.
- streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd\_open WHERE roleType = DataNode and last(fd\_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

**Morphlines****Custom Mime-types File****Description**

Text that goes verbatim into custom-mimetypes.xml file used by HBase Indexers.

**Related Name****Default Value**

```

```

**API Name**

grok\_dictionary\_conf\_file

**Required**

false

### Morphlines File

**Description**

Text that goes into morphlines.conf file used by HBase Indexers. The text goes verbatim into the config file except that \$ZK\_HOST is replaced by the ZooKeeper quorum of the Solr service.

**Related Name****Default Value**

```
SOLR_LOCATOR : # Name of solr collection collection : collection # ZooKeeper ensemble  
zkHost : $ZK_HOST morphlines : [ id : morphline importCommands : [org.kitesdk.**,  
com.ngdata.**] commands : [ extractHBaseCells mappings : [ inputColumn : data:* outputField :  
data type : string source : value ] logDebug format : output record: , args : [ @ ] ] ]
```

**API Name**

morphlines\_conf\_file

**Required**

false

### Other

### HBase Service

**Description**

Name of the HBase service that this Key-Value Store Indexer service instance depends on

**Related Name****Default Value****API Name**

hbase\_service

**Required**

true

### Solr Service

**Description**

Name of the Solr service that this Key-Value Store Indexer service instance depends on

**Related Name****Default Value****API Name**

solr\_service

**Required**

true

### Security

### HBase Indexer Secure Authentication

**Description**

Authentication mechanism used by HBase Indexer.

**Related Name**

hbaseindexer.authentication.type

**Default Value**

	simple
API Name	
	hbase_indexer_security_authentication
Required	
	false

**HBase Indexer TLS/SSL Trust Store File**

Description	The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that HBase Indexer might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.
Related Name	
Default Value	
API Name	
	keystore_indexer_truststore_file
Required	
	false

**HBase Indexer TLS/SSL Trust Store Password**

Description	The password for the HBase Indexer TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name	
Default Value	
API Name	
	keystore_indexer_truststore_password
Required	
	false

**Suppressions**

**Suppress Configuration Validator: CDH Version Validator**

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_cdh_version_validator
Required	
	true

**Suppress Configuration Validator: Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for hbase-indexer-site.xml****Description**

Whether to suppress configuration warnings produced by the Lily HBase Indexer Advanced Configuration Snippet (Safety Valve) for hbase-indexer-site.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hbase\_indexer\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: HBase Indexer HTTP Port****Description**

Whether to suppress configuration warnings produced by the HBase Indexer HTTP Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hbase\_indexer\_http\_port

**Required**

true

**Suppress Configuration Validator: Java Configuration Options for Lily HBase Indexer****Description**

Whether to suppress configuration warnings produced by the Java Configuration Options for Lily HBase Indexer configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hbase\_indexer\_java\_opts

**Required**

true

**Suppress Configuration Validator: HBase Indexer Log Directory****Description**

Whether to suppress configuration warnings produced by the HBase Indexer Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_hbase_indexer_log_dir`**Required**`true`**Suppress Configuration Validator: System Group****Description**

Whether to suppress configuration warnings produced by the System Group configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_hbase_indexer_process_groupname`**Required**`true`**Suppress Configuration Validator: System User****Description**

Whether to suppress configuration warnings produced by the System User configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_hbase_indexer_process_username`**Required**`true`**Suppress Configuration Validator: Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Lily HBase Indexer Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_hbase_indexer_role_env_safety_valve`**Required**`true`**Suppress Configuration Validator: Role-Specific Kerberos Principal****Description**

Whether to suppress configuration warnings produced by the Role-Specific Kerberos Principal configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_kerberos\_role\_princ\_name

**Required**

true

**Suppress Configuration Validator: Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Lily HBase Indexer Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Parameter Validation: Custom Mime-types File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Mime-types File parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_custom\_mimetypes\_file

**Required**

true

**Suppress Parameter Validation: Grok Dictionary File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Grok Dictionary File parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_grok\_dictionary\_conf\_file

**Required**

true

**Suppress Configuration Validator: Lily HBase Indexer Count Validator****Description**

Whether to suppress configuration warnings produced by the Lily HBase Indexer Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_hbase\_indexer\_count\_validator

**Required**

true

**Suppress Parameter Validation: HBase Indexer TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HBase Indexer TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_keystore\_indexer\_truststore\_file

**Required**

true

**Suppress Parameter Validation: HBase Indexer TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HBase Indexer TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_keystore\_indexer\_truststore\_password

**Required**

true

**Suppress Parameter Validation: Key-Value Store Indexer Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Key-Value Store Indexer Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ks\_indexer\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Morphlines File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Morphlines File parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_morphlines\_conf\_file

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

### Suppress Health Test: Lily HBase Indexer Health

**Description**

Whether to suppress the results of the Lily HBase Indexer Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

service\_health\_suppression\_ks\_indexer\_hbase\_indexers\_healthy

**Required**

true

## Knox Properties in Cloudera Runtime 7.1.8

Role groups:

### Gateway

#### Advanced

#### Deploy Directory

**Description**

The directory where the client configs will be deployed

**Related Name****Default Value**

/etc/knox

**API Name**

client\_config\_root\_dir

**Required**

true

#### Monitoring

#### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

Other

Alternatives Priority

Description	The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.
Related Name	
Default Value	50
API Name	client_config_priority
Required	true

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Parameter Validation: Deploy Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_client_config_root_dir
Required	true

## Knox Gateway

### Advanced

#### Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties

**Description**

For advanced use only. A string to be inserted into conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties for this role only.

**Related Name****Default Value****API Name**

conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties\_role\_safety\_valve

**Required**

false

#### Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy.properties

**Description**

For advanced use only. A string to be inserted into conf/auto-discovery-advanced-configuration-cdp-proxy.properties for this role only.

**Related Name****Default Value****API Name**

conf/auto-discovery-advanced-configuration-cdp-proxy.properties\_role\_safety\_valve

**Required**

false

#### Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/cdp-descriptors.xml

**Description**

For advanced use only. A string to be inserted into conf/cdp-descriptors.xml for this role only.

**Related Name****Default Value****API Name**

conf/cdp-descriptors.xml\_role\_safety\_valve

**Required**

false

#### Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml

**Description**

For advanced use only. A string to be inserted into conf/gateway-site.xml for this role only.

**Related Name****Default Value****API Name**

`conf/gateway-site.xml_role_safety_valve`**Required**`false`**Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-audit.xml****Description**

For advanced use only. A string to be inserted into conf/ranger-knox-audit.xml for this role only.

**Related Name****Default Value****API Name**`conf/ranger-knox-audit.xml_role_safety_valve`**Required**`false`**Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-policymgr-ssl.xml****Description**

For advanced use only. A string to be inserted into conf/ranger-knox-policymgr-ssl.xml for this role only.

**Related Name****Default Value****API Name**`conf/ranger-knox-policymgr-ssl.xml_role_safety_valve`**Required**`false`**Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-security.xml****Description**

For advanced use only. A string to be inserted into conf/ranger-knox-security.xml for this role only.

**Related Name****Default Value****API Name**`conf/ranger-knox-security.xml_role_safety_valve`**Required**`false`**Knox Gateway Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

`KNOX_GATEWAY_role_env_safety_valve`**Required**`false`**Knox Gateway Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into `log4j.properties` for this role only.

**Related Name****Default Value****API Name**`log4j_safety_valve`**Required**`false`**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**`false`**API Name**`metric_config_auto_refresh`**Required**`false`**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when `java.lang.OutOfMemoryError` error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**`oom_heap_dump_dir`**Default Value**`/tmp`**API Name**`oom_heap_dump_dir`**Required**`false`**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

<b>Required</b>
true

Process Start Retry Attempts

<b>Description</b>
Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.
<b>Related Name</b>
<b>Default Value</b>
3
<b>API Name</b>
process_start_retries
<b>Required</b>
false

Process Start Wait Timeout

<b>Description</b>
The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
<b>Related Name</b>
<b>Default Value</b>
20
<b>API Name</b>
process_start_secs
<b>Required</b>
false

Logs

Knox Gateway Log Directory

<b>Description</b>
The log directory for log files of the role Knox Gateway.
<b>Related Name</b>
log_dir
<b>Default Value</b>
/var/log/knox/gateway
<b>API Name</b>
log_dir
<b>Required</b>
false

Knox Gateway Logging Threshold

<b>Description</b>
The minimum log level for Knox Gateway logs

<b>Related Name</b>	
<b>Default Value</b>	INFO
<b>API Name</b>	log_threshold
<b>Required</b>	false

**Knox Gateway Maximum Log File Backups**

<b>Description</b>	The maximum number of rolled log files to keep for Knox Gateway logs. Typically used by log4j or logback.
<b>Related Name</b>	
<b>Default Value</b>	10
<b>API Name</b>	max_log_backup_index
<b>Required</b>	false

**Knox Gateway Max Log Size**

<b>Description</b>	The maximum size, in megabytes, per log file for Knox Gateway logs. Typically used by log4j or logback.
<b>Related Name</b>	
<b>Default Value</b>	200 MiB
<b>API Name</b>	max_log_size
<b>Required</b>	false

**Monitoring**

**Enable Health Alerts for this Role**

<b>Description</b>	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>	
<b>Default Value</b>	true
<b>API Name</b>	enable_alerts
<b>Required</b>	

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name

Default Value

false

API Name

enable\_config\_alerts

Required

false

File Descriptor Monitoring Thresholds

Description

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

Related Name

Default Value

Warning: 50.0 %, Critical: 70.0 %

API Name

knox\_gateway\_fd\_thresholds

Required

false

Knox Gateway Host Health Test

Description

When computing the overall Knox Gateway health, consider the host's health.

Related Name

Default Value

true

API Name

knox\_gateway\_host\_health\_enabled

Required

false

Knox Gateway Process Health Test

Description

Enables the health test that the Knox Gateway's process state is consistent with the role configuration

Related Name

Default Value

true

API Name

`knox_gateway_scm_health_enabled`**Required**`false`**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**`log_directory_free_space_absolute_thresholds`**Required**`false`**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**`log_directory_free_space_percentage_thresholds`**Required**`false`**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.

- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

### Swap Memory Usage Rate Thresholds

**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other****Knox Gateway Diagnostics Collection Timeout****Description**

The timeout in milliseconds to wait for diagnostics collection to complete.

**Related Name****Default Value**

5 minute(s)

**API Name**

csd\_role\_diagnostics\_timeout

**Required**

false

**Auto Discovery - Address****Description**

The URL which Knox's service auto-discovery feature uses to connect to

**Related Name**

gateway.auto.discovery.address

**Default Value****API Name**

gateway\_auto\_discovery\_address

**Required**

false

**Auto Discovery - Advanced Configuration Monitoring Interval****Description**

Defines the frequency of Knox's service auto-discovery advanced configuration files (auto-discovery-advanced-configuration-[cdp-proxy|cdp-proxy-api].properties) monitoring.

**Related Name**

gateway.cloudera.manager.advanced.service.discovery.config.monitor.interval

**Default Value**

10 second(s)

**API Name**

gateway\_auto\_discovery\_advanced\_configuration\_monitor\_interval

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - Atlas API****Description**

Enables Knox auto-discovery for the Atlas API in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.atlas-api

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_atlas

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - Avatica****Description**

Enables Knox auto-discovery for the Avatica API in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.avatica

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_avatica

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - Cloudera Manager API****Description**

Enables Knox auto-discovery for the Cloudera Manager API in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.cm-api

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_cm\_api

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - Data Analytics Studio****Description**

Enables Knox auto-discovery for the Data Analytics Studio in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.das

**Default Value**

false

**API Name**

gateway_auto_discovery_cdp_proxy_api_enabled_das
<b>Required</b>
false

Enable Auto Discovery (cdp-proxy-api) - Hive Server

<b>Description</b>
Enables Knox auto-discovery for the Hive Server in the cdp-proxy-api topology.
<b>Related Name</b>
gateway.auto.discovery.cdp-proxy-api.enabled.hive
<b>Default Value</b>
false
<b>API Name</b>
gateway_auto_discovery_cdp_proxy_api_enabled_hive
<b>Required</b>
false

Enable Auto Discovery (cdp-proxy-api) - Hue Server

<b>Description</b>
Enables Knox auto-discovery for the Hue Server in the cdp-proxy-api topology.
<b>Related Name</b>
gateway.auto.discovery.cdp-proxy-api.enabled.hue
<b>Default Value</b>
false
<b>API Name</b>
gateway_auto_discovery_cdp_proxy_api_enabled_hue
<b>Required</b>
false

Enable Auto Discovery (cdp-proxy-api) - Impala Catalog Server

<b>Description</b>
Enables Knox auto-discovery for the Impala Catalog Server in the cdp-proxy-api topology.
<b>Related Name</b>
gateway.auto.discovery.cdp-proxy-api.enabled.impala
<b>Default Value</b>
false
<b>API Name</b>
gateway_auto_discovery_cdp_proxy_api_enabled_impala
<b>Required</b>
false

Enable Auto Discovery (cdp-proxy-api) - NameNode

<b>Description</b>
Enables Knox auto-discovery for the NameNode in the cdp-proxy-api topology.
<b>Related Name</b>
gateway.auto.discovery.cdp-proxy-api.enabled.namenode

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_namenode

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - NiFi****Description**

Enables Knox auto-discovery for the NiFi in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.nifi

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_nifi

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - NiFi Registry****Description**

Enables Knox auto-discovery for the NiFi Registry in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.nifi-registry

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_nifi\_registry

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - Oozie Server****Description**

Enables Knox auto-discovery for the Oozie Server in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.oozie

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_oozie

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - Profiler Admin API****Description**

Enables Knox auto-discovery for the Profiler Admin API in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.profiler-admin-api

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_profiler\_admin\_api

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - Profiler Metrics API****Description**

Enables Knox auto-discovery for the Profiler Metrics API in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.profiler-metrics-api

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_profiler\_metrics\_api

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - Profiler Scheduler API****Description**

Enables Knox auto-discovery for the Profiler Scheduler API in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.profiler-scheduler-api

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_profiler\_scheduler\_api

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - Ranger Admin****Description**

Enables Knox auto-discovery for the Ranger Admin in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.ranger

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_ranger

**Required**

false

### Enable Auto Discovery (cdp-proxy-api) - ResourceManager

**Description**

Enables Knox auto-discovery for the ResourceManager in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.resourcemanager

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_resourcemanager

**Required**

false

### Enable Auto Discovery (cdp-proxy-api) - Schema Registry API

**Description**

Enables Knox auto-discovery for the Schema Registry API in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.schema-registry

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_schema\_registry

**Required**

false

### Enable Auto Discovery (cdp-proxy-api) - Stream Messaging Manager API

**Description**

Enables Knox auto-discovery for the Stream Messaging Manager API in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.smm-api

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_smm

**Required**

false

### Enable Auto Discovery (cdp-proxy-api) - Solr Server

**Description**

Enables Knox auto-discovery for the Solr Server in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.solr

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_solr

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - HBase Master API****Description**

Enables Knox auto-discovery for the HBase Master API in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.webhbase

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_webhbase

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - WebHDFS API****Description**

Enables Knox auto-discovery for the WebHDFS API in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.webhdfs

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_webhdfs

**Required**

false

**Enable Auto Discovery (cdp-proxy-api) - Zeppelin Server****Description**

Enables Knox auto-discovery for the Zeppelin Server in the cdp-proxy-api topology.

**Related Name**

gateway.auto.discovery.cdp-proxy-api.enabled.zeppelinws

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_api\_enabled\_zeppelin\_ws

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Atlas API****Description**

Enables Knox auto-discovery for the Atlas API in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.atlas-api

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_atlas

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Atlas Web UI****Description**

Enables Knox auto-discovery for the Atlas Web UI in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.atlas

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_atlas\_ui

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Cloudera Manager API****Description**

Enables Knox auto-discovery for the Cloudera Manager API in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.cm-api

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_cm\_api

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Cloudera Manager Admin Console****Description**

Enables Knox auto-discovery for the Cloudera Manager Admin Console in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.cm-ui

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_cm\_ui

**Required**

false

**Enable Auto Discovery (cdp-proxy) - HBase Web UI****Description**

Enables Knox auto-discovery for the HBase Web UI in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.hbaseui

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_hbase\_ui

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Namenode Web UI****Description**

Enables Knox auto-discovery for the Namenode Web UI in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.hdfsui

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_hdfs\_ui

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Impala Catalog Server****Description**

Enables Knox auto-discovery for the Impala Catalog Server in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.impala

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_impala

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Impala Catalog Server Web UI****Description**

Enables Knox auto-discovery for the Impala Catalog Server Web UI in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.impalaui

**Default Value**

false

**API Name**

`gateway_auto_discovery_cdp_proxy_enabled_impala_ui`**Required**`false`**Enable Auto Discovery (cdp-proxy) - HistoryServer Web UI****Description**

Enables Knox auto-discovery for the HistoryServer Web UI in the cdp-proxy topology.

**Related Name**`gateway.auto.discovery.cdp-proxy.enabled.jobhistoryui`**Default Value**`false`**API Name**`gateway_auto_discovery_cdp_proxy_enabled_jobhistory_ui`**Required**`false`**Enable Auto Discovery (cdp-proxy) - Kudu Master Web UI****Description**

Enables Knox auto-discovery for the Kudu Master Web UI in the cdp-proxy topology.

**Related Name**`gateway.auto.discovery.cdp-proxy.enabled.kuduui`**Default Value**`false`**API Name**`gateway_auto_discovery_cdp_proxy_enabled_kudu_ui`**Required**`false`**Enable Auto Discovery (cdp-proxy) - Livy Server Web UI****Description**

Enables Knox auto-discovery for the Livy Server Web UI in the cdp-proxy topology.

**Related Name**`gateway.auto.discovery.cdp-proxy.enabled.livyserver`**Default Value**`false`**API Name**`gateway_auto_discovery_cdp_proxy_enabled_livyserver`**Required**`false`**Enable Auto Discovery (cdp-proxy) - NameNode****Description**

Enables Knox auto-discovery for the NameNode in the cdp-proxy topology.

**Related Name**`gateway.auto.discovery.cdp-proxy.enabled.namenode`

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_namenode

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Oozie Server****Description**

Enables Knox auto-discovery for the Oozie Server in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.oozie

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_oozie

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Oozie Web UI****Description**

Enables Knox auto-discovery for the Oozie Web UI in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.oozieui

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_oozie\_ui

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Ranger Admin****Description**

Enables Knox auto-discovery for the Ranger Admin in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.ranger

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_ranger

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Ranger Admin Web UI****Description**

Enables Knox auto-discovery for the Ranger Admin Web UI in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.rangerui

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_ranger\_ui

**Required**

false

**Enable Auto Discovery (cdp-proxy) - ResourceManager****Description**

Enables Knox auto-discovery for the ResourceManager in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.resourcemanager

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_resourcemanager

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Stream Messaging Manager API****Description**

Enables Knox auto-discovery for the Stream Messaging Manager API in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.smm-api

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_smm

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Stream Messaging Manager Web UI****Description**

Enables Knox auto-discovery for the Stream Messaging Manager Web UI in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.smm-ui

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_smm\_ui

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Solr Server****Description**

Enables Knox auto-discovery for the Solr Server in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.solr

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_solr

**Required**

false

**Enable Auto Discovery (cdp-proxy) - Spark History Server Web UI****Description**

Enables Knox auto-discovery for the Spark History Server Web UI in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.sparkhistoryui

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_sparkhistory\_ui

**Required**

false

**Enable Auto Discovery (cdp-proxy) - ResourceManager Web UI****Description**

Enables Knox auto-discovery for the ResourceManager Web UI in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.yarnui

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_cdp\_proxy\_enabled\_yarn\_ui

**Required**

false

**Enable Auto Discovery (cdp-proxy) - ResourceManager Web UI V2****Description**

Enables Knox auto-discovery for the ResourceManager Web UI V2 in the cdp-proxy topology.

**Related Name**

gateway.auto.discovery.cdp-proxy.enabled.yarnuiv2

**Default Value**

	false
API Name	gateway_auto_discovery_cdp_proxy_enabled_yarn_ui_v2
Required	false

Enable Auto Discovery (cdp-proxy) - Zeppelin Server Web UI

Description	Enables Knox auto-discovery for the Zeppelin Server Web UI in the cdp-proxy topology.
Related Name	gateway.auto.discovery.cdp-proxy.enabled.zeppelinui
Default Value	false
API Name	gateway_auto_discovery_cdp_proxy_enabled_zeppelin_ui
Required	false

Enable Auto Discovery (cdp-proxy) - Zeppelin Server

Description	Enables Knox auto-discovery for the Zeppelin Server in the cdp-proxy topology.
Related Name	gateway.auto.discovery.cdp-proxy.enabled.zeppelinws
Default Value	false
API Name	gateway_auto_discovery_cdp_proxy_enabled_zeppelin_ws
Required	false

Auto Discovery - Cluster

Description	The cluster where you would like Knox activates the auto-discovery feature
Related Name	gateway.auto.discovery.cluster
Default Value	
API Name	gateway_auto_discovery_cluster
Required	false

Enable/Disable Service Auto-Discovery

Description	Whether Knox's service auto-discovery feature is enabled
-------------	--

**Related Name**

gateway.auto.discovery.enabled

**Default Value**

false

**API Name**

gateway\_auto\_discovery\_enabled

**Required**

false

**Auto Discovery - Password****Description**

The password which Knox's service auto-discovery feature uses to connect to CM

**Related Name**

gateway.auto.discovery.password

**Default Value****API Name**

gateway\_auto\_discovery\_password

**Required**

false

**Auto Discovery - User****Description**

The user name which Knox's service auto-discovery feature uses to connect to CM

**Related Name**

gateway.auto.discovery.user

**Default Value**

admin

**API Name**

gateway\_auto\_discovery\_user

**Required**

false

**Knox Simplified Topology Management - Monitoring Interval****Description**

Defines the frequency of Cloudera Manager descriptors file (cdp-descriptors.xml) monitoring.

**Related Name**

gateway.cloudera.manager.descriptors.monitor.interval

**Default Value**

10 second(s)

**API Name**

gateway\_cloudera\_manager\_descriptors\_monitor\_interval

**Required**

false

**Knox Gateway Configuration Directory****Description**

Contains configuration files that apply to the gateway globally (i.e. not cluster specific ).

**Related Name**

gateway\_conf\_dir

**Default Value**

/var/lib/knox/gateway/conf

**API Name**

gateway\_conf\_dir

**Required**

false

**Knox Gateway Data Directory****Description**

Contains security and topology specific artifacts as well as important applications for admin-ui

**Related Name**

gateway\_data\_dir

**Default Value**

/var/lib/knox/gateway/data

**API Name**

gateway\_data\_dir

**Required**

false

**Gateway - Default App Topology Name****Description**

When a topology file is deployed with a file name that matches the configured default topology name, a specialized mapping for URLs is installed for that particular topology. This allows the URLs that are expected by the existing Hadoop CLIs for WebHDFS to be used in interacting with the specific Hadoop cluster that is represented by the default topology file.

**Related Name**

default.app.topology.name

**Default Value****API Name**

gateway\_default\_topology\_name

**Required**

false

**Knox Simplified Topology Management - cdp-proxy****Description**

Knox descriptor block for 'cdp-proxy' topology. 'providerConfigRef' indicates the name of shared-provider the given descriptor would like to use. The rest of the entries hold service information. The structure of a service information entry is: \$SERVICE\_NAME[:\$PARAMETER\_NAME=\$PARAMETER\_VALUE]. The 'url' and 'version' parameter names are preserved keywords to set the given service's URL and version. For instance: HIVE:url=http://localhost:123, HIVE:version:3.0.0, HIVE:test.pramameter.name=test.parameter.value

**Related Name**

cdp-proxy

**Default Value**

providerConfigRef=sso CM-API:httpclient.connectionTimeout=5m CM-API:httpclient.socketTimeout=5m IMPALA:httpclient.connectionTimeout=5m IMPALA:httpclient.socketTimeout=5m RANGER:replayBufferSize=65

**API Name**

gateway\_descriptor\_cdp\_proxy

**Required**

false

**Knox Simplified Topology Management - cdp-proxy-api****Description**

Knox descriptor block for 'cdp-proxy-api topology. 'providerConfigRef' indicates the name of shared-provider the given descriptor would like to use. The rest of the entries hold service information. The structure of an service information entry is: \$SERVICE\_NAME[:\$PARAMETER\_NAME=\$PARAMETER\_VALUE]. The 'url' and 'version' parameter names are preserved keywords to set the given service's URL and version. For instance: NIFI, HIVE:url=http://localhost:123, HIVE:version:3.0.0, HIVE:test.pramameter.name=test.parameter.value

**Related Name**

cdp-proxy-api

**Default Value**

providerConfigRef=pam CM-API:httpclient.connectionTimeout=5m CM-API:httpclient.socketTimeout=5m HIVE:httpclient.connectionTimeout=5m HIVE:httpclient.socketTimeout=5m IMPALA:httpclient.connectionTimeout=5m IMPALA:httpclient.socketTimeout=5m NIFI:useTwoWaySsl=true NIFI-REGISTRY:useTwoWaySsl=true RANGER:replayBufferSize=65

**API Name**

gateway\_descriptor\_cdp\_proxy\_api

**Required**

false

**Knox Gateway Dispatch Whitelist****Description**

The whitelist to be applied for dispatches associated with the service roles specified by gateway.dispatch.whitelist.services. By default this is replaced with DEFAULT or HTTPS\_ONLY based on if TLS is enabled.

**Related Name**

gateway.dispatch.whitelist

**Default Value**

WHITELIST\_CONFIG\_REPLACEME

**API Name**

gateway\_dispatch\_whitelist

**Required**

false

### Knox Gateway Dispatch Whitelist Services

**Description**

The comma-delimited list of service roles for which the 'gateway.dispatch.whitelist' should be applied

**Related Name**

gateway.dispatch.whitelist.services

**Default Value**

DATANODE, HBASEUI, HDFSUI, IMPALAUUI, JOBHISTORYUI, KUDUUI, NODEUI, YARNUI, YARNUIV2, knoxauth

**API Name**

gateway\_dispatch\_whitelist\_services

**Required**

false

### Gateway Config Directory

**Description**

The directory within 'gateway\_data\_dir' that contains gateway topology files and deployments.

**Related Name**

gateway.gateway.conf.dir

**Default Value**

deployments

**API Name**

gateway\_gateway\_conf\_dir

**Required**

false

### Knox Gateway Initial/Max Heapsize

**Description**

Initial/Maximum size for the Java Process heap. Passed to Java -Xmx/-Xms. Measured in megabytes.

**Related Name**

gateway\_heap\_size

**Default Value**

1 GiB

**API Name**

gateway\_heap\_size

**Required**

true

### Additional Gateway Java Options

**Description**

These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here. -Xmx/-Xms should not be specified here: to set the heapsize use the 'Knox Gateway Initial/Max Heapsize' parameter

**Related Name**

gateway\_java\_opts

**Default Value****API Name**

gateway\_java\_opts

**Required**

false

**Admin Groups****Description**

Admin groups for Knox

**Related Name**

gateway.knox.admin.groups

**Default Value**

admin

**API Name**

gateway\_knox\_admin\_groups

**Required**

false

**Knox Gateway Log Level****Description**

The logging level of Knox Gateway

**Related Name**

gateway\_log\_level

**Default Value**

ERROR

**API Name**

gateway\_log\_level

**Required**

false

**Knox Master Secret****Description**

The master secret is used to access secured artifacts by the gateway instance. Keystore, trust stores and credential stores are all protected with the master secret. NOTE: changing the master secret will require you to change passwords protecting the keystores for the gateway, identity keystores and all credential stores

**Related Name**

gateway\_master\_secret

**Default Value****API Name**

gateway\_master\_secret

**Required**

true

**Gateway Path****Description**

The default context path for the gateway.

**Related Name**

gateway.path

**Default Value**

gateway

**API Name**

gateway\_path

**Required**

true

**Ranger Knox Plugin Conf Path****Description**

Staging directory for Ranger Knox Plugin Configuration. This should generally not be changed.

**Related Name**

gateway\_ranger\_knox\_plugin\_conf\_path

**Default Value**

/var/lib/knox/ranger-knox-plugin

**API Name**

gateway\_ranger\_knox\_plugin\_conf\_path

**Required**

true

**Ranger Knox Plugin Audit Hdfs Spool Directory Path****Description**

Spool directory for Ranger audits being written to DFS.

**Related Name**

xasecure.audit.destination.hdfs.batch.filespool.dir

**Default Value**

/var/log/knox/gateway/audit/hdfs/spool

**API Name**

gateway\_ranger\_knox\_plugin\_hdfs\_audit\_spool\_directory

**Required**

true

**Ranger Knox Plugin Policy Cache Directory Path****Description**

The directory where Ranger security policies are cached locally.

**Related Name**

ranger.plugin.knox.policy.cache.dir

**Default Value**

/var/lib/ranger/knox/gateway/policy-cache

**API Name**

gateway\_ranger\_knox\_plugin\_policy\_cache\_directory

**Required**

true

**Ranger Knox Plugin Audit Solr Spool Directory Path****Description**

Spool directory for Ranger audits being written to Solr.

**Related Name**

xasecure.audit.destination.solr.batch.filespool.dir

**Default Value**

/var/log/knox/gateway/audit/solr/spool

**API Name**

gateway\_ranger\_knox\_plugin\_solr\_audit\_spool\_directory

**Required**

true

**Ranger Plugin Trusted Proxy IP Address****Description**

Accepts a list of IP addresses of proxy servers for trusting.

**Related Name**

ranger.plugin.knox.trusted.proxy.ipaddress

**Default Value****API Name**

gateway\_ranger\_plugin\_trusted\_proxy\_ipaddress

**Required**

false

**Ranger Plugin Use X-Forwarded For IP Address****Description**

The parameter is used for identifying the originating IP address of a user connecting to a component through proxy for audit logs.

**Related Name**

ranger.plugin.knox.use.x-forwarded-for.ipaddress

**Default Value**

false

**API Name**

gateway\_ranger\_plugin\_use\_x\_forwarded\_for\_ipaddress

**Required**

false

**Cookie Scoping Enabled****Description**

Enable/Disable cookie scoping feature.

**Related Name**

gateway.scope.cookies.feature.enabled

**Default Value**

false

**API Name**

gateway\_scope\_cookies\_feature\_enabled

**Required**

false

**Security - Signing Key Alias****Description**

The alias for the signing keypair within the keystore specified via gateway\_signing\_keystore\_name

**Related Name**

gateway.signing.key.alias

**Default Value****API Name**

gateway\_signing\_key\_alias

**Required**

false

**Security - Signing Keystore Name****Description**

The filename of keystore file that contains the signing keypair

**Related Name**

gateway.signing.keystore.name

**Default Value****API Name**

gateway\_signing\_keystore\_name

**Required**

false

**Security - Signing Keystore Type****Description**

The type of the keystore file where the signing keypair is stored. See gateway\_signing\_keystore\_name

**Related Name**

gateway.signing.keystore.type

**Default Value****API Name**

gateway\_signing\_keystore\_type

**Required**

false

**Security - TLS Certificate Alias (Optional)****Description**

The alias for the Gateway's TLS certificate and keypair within the default keystore or the keystore specified via `gateway.tls.keystore.path`

**Related Name**

`gateway_tls_certificate_alias`

**Default Value****API Name**

`gateway_tls_certificate_alias`

**Required**

`false`

**Security - TLS Certificate Path (Optional)****Description**

The path for the TLS certificate which Knox will import in the CM generated/distributed keystore in case SSL is enabled (if any).

**Related Name**

`gateway_tls_certificate_path`

**Default Value****API Name**

`gateway_tls_certificate_path`

**Required**

`false`

**Websockets Enabled****Description**

Enable/Disable websocket feature.

**Related Name**

`gateway.websocket.feature.enabled`

**Default Value**

`true`

**API Name**

`gateway_websocket_feature_enabled`

**Required**

`false`

**X-Forwarded Header Context Service Name****Description**

The service name to be added in x-forward-context header.

**Related Name**

`gateway.xforwarded.header.context.append.servicename`

**Default Value**

`LIVYSERVER`

**API Name**

`gateway_xforwarded_header_context_append_servicename`

**Required**

false

### Admin Group Mapping - Class Name

**Description**

The class name used for Hadoop admin group mapping

**Related Name**

gateway.group.config.hadoop.security.group.mapping

**Default Value**

org.apache.hadoop.security.ShellBasedUnixGroupsMapping

**API Name**

hadoop\_security\_group\_mapping\_class

**Required**

false

### Hadoop Group Mapping - Negative Cache Expiration

**Description**

The Hadoop group mapping negative cache expiration in seconds

**Related Name**

gateway.group.config.hadoop.security.groups.negative-cache.secs

**Default Value**

5 second(s)

**API Name**

hadoop\_security\_group\_negative\_cache\_expiration\_seconds

**Required**

false

### Hadoop Group Mapping - Positive Cache Expiration

**Description**

The Hadoop group mapping positive cache expiration in seconds

**Related Name**

gateway.group.config.hadoop.security.groups.cache.secs

**Default Value**

10 second(s)

**API Name**

hadoop\_security\_group\_positive\_cache\_expiration\_seconds

**Required**

false

### krb5.conf Location

**Description**

Absolute path to krb5.conf file

**Related Name**

java.security.krb5.conf

**Default Value**

/etc/krb5.conf

**API Name**

java\_security\_krb5\_conf

**Required**

false

**KRB5 Debug****Description**

Boolean flag indicating whether to enable debug messages for krb5 authentication

**Related Name**

sun.security.krb5.debug

**Default Value**

false

**API Name**

sun\_security\_krb5\_debug

**Required**

false

**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

**Ports and Addresses****Gateway HTTP Port****Description**

The HTTP port for the Gateway.

**Related Name**

gateway.port

**Default Value**

8443

**API Name**

gateway\_port

**Required**

true

## Resource Management

### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

### Custom Control Group Resources (overrides Cgroup settings)

**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

### Cgroup I/O Weight

**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

### Cgroup Memory Hard Limit

#### Description

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

#### Related Name

memory.limit\_in\_bytes

#### Default Value

-1 MiB

#### API Name

rm\_memory\_hard\_limit

#### Required

true

### Cgroup Memory Soft Limit

#### Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

#### Related Name

memory.soft\_limit\_in\_bytes

#### Default Value

-1 MiB

#### API Name

rm\_memory\_soft\_limit

#### Required

true

## Security

### Knox Gateway TLS/SSL Trust Store File

#### Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Knox Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

#### Related Name

gateway.httpclient.truststore.path

#### Default Value

#### API Name

ssl\_client\_truststore\_location

**Required**

false

**Knox Gateway TLS/SSL Trust Store Password****Description**

The password for the Knox Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name****Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

**Enable TLS/SSL for Knox Gateway****Description**

Encrypt communication between clients and Knox Gateway using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

knox.enableTLS

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**Knox Gateway TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Knox Gateway is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

gateway.tls.keystore.path

**Default Value****API Name**

ssl\_server\_keystore\_location

**Required**

false

**Knox Gateway TLS/SSL Server Keystore File Password****Description**

The password for the Knox Gateway keystore file.

**Related Name**

<b>Default Value</b>
<b>API Name</b>
ssl_server_keystore_password
<b>Required</b>
false

Stacks Collection

Stacks Collection Data Retention

<b>Description</b>
The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
<b>Related Name</b>
stacks_collection_data_retention
<b>Default Value</b>
100 MiB
<b>API Name</b>
stacks_collection_data_retention
<b>Required</b>
false

Stacks Collection Directory

<b>Description</b>
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
<b>Related Name</b>
stacks_collection_directory
<b>Default Value</b>
<b>API Name</b>
stacks_collection_directory
<b>Required</b>
false

Stacks Collection Enabled

<b>Description</b>
Whether or not periodic stacks collection is enabled.
<b>Related Name</b>
stacks_collection_enabled
<b>Default Value</b>
false
<b>API Name</b>
stacks_collection_enabled
<b>Required</b>

---

true

### Stacks Collection Frequency

#### Description

The frequency with which stacks are collected.

#### Related Name

stacks\_collection\_frequency

#### Default Value

5.0 second(s)

#### API Name

stacks\_collection\_frequency

#### Required

false

### Stacks Collection Method

#### Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

#### Related Name

stacks\_collection\_method

#### Default Value

jstack

#### API Name

stacks\_collection\_method

#### Required

false

### Suppressions

#### Suppress Configuration Validator: CDH Version Validator

##### Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

##### Related Name

##### Default Value

false

##### API Name

role\_config\_suppression\_cdh\_version\_validator

##### Required

true

#### Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties

##### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for `conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties` parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties_role_safety_valve`

**Required**

true

**Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for `conf/auto-discovery-advanced-configuration-cdp-proxy.properties`****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for `conf/auto-discovery-advanced-configuration-cdp-proxy.properties` parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_conf/auto-discovery-advanced-configuration-cdp-proxy.properties_role_safety_valve`

**Required**

true

**Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for `conf/cdp-descriptors.xml`****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for `conf/cdp-descriptors.xml` parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_conf/cdp-descriptors.xml_role_safety_valve`

**Required**

true

**Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for `conf/gateway-site.xml`****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for `conf/gateway-site.xml` parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/gateway-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-audit.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-audit.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/ranger-knox-audit.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-policymgr-ssl.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-policymgr-ssl.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/ranger-knox-policymgr-ssl.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-security.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-security.xml parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_conf/ranger-knox-security.xml_role_safety_valve`**Required**`true`**Suppress Parameter Validation: Auto Discovery - Address****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Auto Discovery - Address parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_auto_discovery_address`**Required**`true`**Suppress Parameter Validation: Auto Discovery - Cluster****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Auto Discovery - Cluster parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_auto_discovery_cluster`**Required**`true`**Suppress Parameter Validation: Auto Discovery - Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Auto Discovery - Password parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_auto_discovery_password`**Required**`true`**Suppress Parameter Validation: Auto Discovery - User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Auto Discovery - User parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_auto\_discovery\_user

**Required**

true

**Suppress Parameter Validation: Knox Gateway Configuration Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Configuration Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_conf\_dir

**Required**

true

**Suppress Parameter Validation: Knox Gateway Data Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Data Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_data\_dir

**Required**

true

**Suppress Parameter Validation: Gateway - Default App Topology Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway - Default App Topology Name parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_default\_topology\_name

**Required**

true

**Suppress Parameter Validation: Knox Simplified Topology Management - cdp-proxy****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Simplified Topology Management - cdp-proxy parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_descriptor\_cdp\_proxy

**Required**

true

**Suppress Parameter Validation: Knox Simplified Topology Management - cdp-proxy-api****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Simplified Topology Management - cdp-proxy-api parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_descriptor\_cdp\_proxy\_api

**Required**

true

**Suppress Parameter Validation: Knox Gateway Dispatch Whitelist****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Dispatch Whitelist parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_dispatch\_whitelist

**Required**

true

**Suppress Parameter Validation: Knox Gateway Dispatch Whitelist Services****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Dispatch Whitelist Services parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_gateway_dispatch_whitelist_services`**Required**`true`**Suppress Parameter Validation: Gateway Config Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Config Directory parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_gateway_conf_dir`**Required**`true`**Suppress Parameter Validation: Knox Gateway Initial/Max Heapsize****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Initial/Max Heapsize parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_heap_size`**Required**`true`**Suppress Parameter Validation: Additional Gateway Java Options****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional Gateway Java Options parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_java_opts`**Required**`true`**Suppress Parameter Validation: Admin Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Groups parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_knox\_admin\_groups

**Required**

true

**Suppress Parameter Validation: Knox Master Secret****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Master Secret parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_master\_secret

**Required**

true

**Suppress Parameter Validation: Gateway Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Path parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_path

**Required**

true

**Suppress Parameter Validation: Gateway HTTP Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway HTTP Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_port

**Required**

true

**Suppress Parameter Validation: Ranger Knox Plugin Conf Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Conf Path parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_ranger\_knox\_plugin\_conf\_path

**Required**

true

**Suppress Parameter Validation: Ranger Knox Plugin Audit Hdfs Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Audit Hdfs Spool Directory Path parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_ranger\_knox\_plugin\_hdfs\_audit\_spool\_directory

**Required**

true

**Suppress Parameter Validation: Ranger Knox Plugin Policy Cache Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Policy Cache Directory Path parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_ranger\_knox\_plugin\_policy\_cache\_directory

**Required**

true

**Suppress Parameter Validation: Ranger Knox Plugin Audit Solr Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Audit Solr Spool Directory Path parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_ranger\_knox\_plugin\_solr\_audit\_spool\_directory

**Required**

---

true

### Suppress Parameter Validation: Ranger Plugin Trusted Proxy IP Address

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Plugin Trusted Proxy IP Address parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_ranger\_plugin\_trusted\_proxy\_ipaddress

**Required**

true

### Suppress Parameter Validation: Security - Signing Key Alias

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Key Alias parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_signing\_key\_alias

**Required**

true

### Suppress Parameter Validation: Security - Signing Keystore Name

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Keystore Name parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_signing\_keystore\_name

**Required**

true

### Suppress Parameter Validation: Security - Signing Keystore Type

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Keystore Type parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_gateway_signing_keystore_type`**Required**`true`**Suppress Parameter Validation: Security - TLS Certificate Alias (Optional)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - TLS Certificate Alias (Optional) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_tls_certificate_alias`**Required**`true`**Suppress Parameter Validation: Security - TLS Certificate Path (Optional)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - TLS Certificate Path (Optional) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_tls_certificate_path`**Required**`true`**Suppress Parameter Validation: X-Forwarded Header Context Service Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the X-Forwarded Header Context Service Name parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_xforwarded_header_context_append_servicename`**Required**`true`**Suppress Parameter Validation: Admin Group Mapping - Class Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Group Mapping - Class Name parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_security\_group\_mapping\_class

**Required**

true

**Suppress Parameter Validation: krb5.conf Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the krb5.conf Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_java\_security\_krb5\_conf

**Required**

true

**Suppress Parameter Validation: Knox Gateway Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_knox\_gateway\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Knox Gateway Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

---

true

### Suppress Parameter Validation: Knox Gateway Log Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

### Suppress Parameter Validation: Heap Dump Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

### Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

### Suppress Parameter Validation: Role Triggers

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Knox Gateway TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Knox Gateway TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Parameter Validation: Knox Gateway TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: Knox Gateway TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Gateway TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_knox\_gateway\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_knox\_gateway\_file\_descriptor

**Required**

---

true

### Suppress Health Test: Host Health

#### Description

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

#### Related Name

#### Default Value

false

#### API Name

role\_health\_suppression\_knox\_knox\_gateway\_host\_health

#### Required

true

### Suppress Health Test: Log Directory Free Space

#### Description

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

#### Related Name

#### Default Value

false

#### API Name

role\_health\_suppression\_knox\_knox\_gateway\_log\_directory\_free\_space

#### Required

true

### Suppress Health Test: Process Status

#### Description

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

#### Related Name

#### Default Value

false

#### API Name

role\_health\_suppression\_knox\_knox\_gateway\_scm\_health

#### Required

true

### Suppress Health Test: Swap Memory Usage

#### Description

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_knox\_gateway\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_knox\_gateway\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_knox\_gateway\_unexpected\_exits

**Required**

true

**Knox IDBroker****Advanced****Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-reloadable.xml****Description**

For advanced use only. A string to be inserted into conf/gateway-reloadable.xml for this role only.

**Related Name****Default Value****API Name**

conf/gateway-reloadable.xml\_role\_safety\_valve

**Required**

false

**Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml****Description**

For advanced use only. A string to be inserted into conf/gateway-site.xml for this role only.

**Related Name****Default Value****API Name**

conf/gateway-site.xml\_role\_safety\_valve

**Required**

false

**Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

IDBROKER\_role\_env\_safety\_valve

**Required**

false

**Knox IDBroker Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

### Enable Metric Collection

**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

### Process Start Retry Attempts

**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

### Process Start Wait Timeout

**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

<b>API Name</b>
process_start_secs
<b>Required</b>
false

Logs

Knox IDBroker Log Directory

<b>Description</b>
The log directory for log files of the role Knox IDBroker.
<b>Related Name</b>
log_dir
<b>Default Value</b>
/var/log/knox/idbroker
<b>API Name</b>
log_dir
<b>Required</b>
false

Knox IDBroker Logging Threshold

<b>Description</b>
The minimum log level for Knox IDBroker logs
<b>Related Name</b>
<b>Default Value</b>
INFO
<b>API Name</b>
log_threshold
<b>Required</b>
false

Knox IDBroker Maximum Log File Backups

<b>Description</b>
The maximum number of rolled log files to keep for Knox IDBroker logs. Typically used by log4j or logback.
<b>Related Name</b>
<b>Default Value</b>
10
<b>API Name</b>
max_log_backup_index
<b>Required</b>
false

Knox IDBroker Max Log Size

<b>Description</b>
--------------------

	The maximum size, in megabytes, per log file for Knox IDBroker logs. Typically used by log4j or logback.
<b>Related Name</b>	
<b>Default Value</b>	200 MiB
<b>API Name</b>	max_log_size
<b>Required</b>	false

Monitoring

Enable Health Alerts for this Role

<b>Description</b>	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>	
<b>Default Value</b>	true
<b>API Name</b>	enable_alerts
<b>Required</b>	false

Enable Configuration Change Alerts

<b>Description</b>	When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	enable_config_alerts
<b>Required</b>	false

File Descriptor Monitoring Thresholds

<b>Description</b>	The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
<b>Related Name</b>	
<b>Default Value</b>	Warning: 50.0 %, Critical: 70.0 %
<b>API Name</b>	idbroker_fd_thresholds

**Required**

false

**Knox IDBroker Host Health Test****Description**

When computing the overall Knox IDBroker health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

idbroker\_host\_health\_enabled

**Required**

false

**Knox IDBroker Process Health Test****Description**

Enables the health test that the Knox IDBroker's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

idbroker\_scm\_health\_enabled

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

### Role Triggers

**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other****Knox IDBroker Diagnostics Collection Timeout****Description**

The timeout in milliseconds to wait for diagnostics collection to complete.

**Related Name****Default Value**

5 minute(s)

**API Name**

csd\_role\_diagnostics\_timeout

**Required**

false

**Knox IDBroker AWS Credentials Key****Description**

The AWS credentials key

**Related Name**

idbroker\_aws\_credentials\_key

**Default Value****API Name**

idbroker\_aws\_credentials\_key

**Required**

false

**Knox IDBroker AWS Credentials Secret****Description**

The AWS credentials secret

**Related Name**

idbroker\_aws\_credentials\_secret

**Default Value****API Name**

idbroker\_aws\_credentials\_secret

**Required**

false

**Knox IDBroker AWS Group Mapping****Description**

The list of AWS group-role mappings in 'group=role[:group=role]...[:group=role]' format. A 'group=role' declaration indicates that all authenticated users that are member of the specified group should be able to assume the specified role. For instance: admin=arn:aws:iam:XYZ:role/s3full;audit=arn:aws:iam:XYZ:role/s3Read

**Related Name**

idbroker.aws.group.role.mapping

**Default Value****API Name**

idbroker\_aws\_group\_mapping

**Required**

false

**Knox IDBroker AWS User Mapping****Description**

The list of AWS user-role mappings in 'user=role[:user=role]...[:user=role]' format. A 'user=role' declaration indicates that this is a mapping of the authenticated user's primary principal to the specified role. For instance: admin=arn:aws:iam:XYZ:role/s3full;guest=arn:aws:iam:XYZ:role/s3Read

**Related Name**

idbroker.aws.user.role.mapping

**Default Value****API Name**

idbroker\_aws\_user\_mapping

**Required**

---

false

### Knox IDBroker AZURE ADLS2 Tenant Name

#### Description

The name of the AZURE AD tenant. A tenant is a representation of an organization. It's a dedicated instance of Azure AD that an organization or application developer receives when the organization or application developer creates a relationship with Microsoft

#### Related Name

idbroker\_azure\_adls2\_tenant\_name

#### Default Value

#### API Name

idbroker\_azure\_adls2\_tenant\_name

#### Required

false

### Knox IDBroker AZURE 'blob-contributor' ClientID

#### Description

The client ID credential for 'blob-contributor' role

#### Related Name

idbroker\_azure\_blob\_contributor\_clientid

#### Default Value

#### API Name

idbroker\_azure\_blob\_contributor\_clientid

#### Required

false

### Knox IDBroker AZURE 'blob-contributor' Secret

#### Description

The secret credential for 'blob-contributor' role

#### Related Name

idbroker\_azure\_blob\_contributor\_secret

#### Default Value

#### API Name

idbroker\_azure\_blob\_contributor\_secret

#### Required

false

### Knox IDBroker AZURE 'blob-reader' ClientID

#### Description

The client ID credential for 'blob-reader' role

#### Related Name

idbroker\_azure\_blob\_reader\_clientid

#### Default Value

#### API Name

`idbroker_azure_blob_reader_clientid`**Required**`false`**Knox IDBroker AZURE 'blob-reader' Secret****Description**

The secret credential for 'blob-reader' role

**Related Name**`idbroker_azure_blob_reader_secret`**Default Value****API Name**`idbroker_azure_blob_reader_secret`**Required**`false`**Knox IDBroker AZURE Group Mapping****Description**

The list of AZURE group-role mappings in 'group=role[;group=role]...[;group=role]' format. A 'group=role' declaration indicates that all authenticated users that are member of the specified group should be able to assume the specified role. For instance: admin=blob-contributor

**Related Name**`idbroker.adls2.group.role.mapping`**Default Value****API Name**`idbroker_azure_group_mapping`**Required**`false`**Knox IDBroker AZURE User Mapping****Description**

The list of AZURE user-role mappings in 'user=role[;user=role]...[;user=role]' format. A 'user=role' declaration indicates that this is a mapping of the authenticated user's primary principal to the specified role. For instance: admin=blob-contributor

**Related Name**`idbroker.adls2.user.role.mapping`**Default Value****API Name**`idbroker_azure_user_mapping`**Required**`false`**Knox IDBroker AZURE VM Assumer Identity****Description**

A user assigned managed identity that has Virtual Machine Contributor and Managed Identity Operator roles scoped at the resource group where IDBroker Virtual Machine is running.

**Related Name**

idbroker\_azure\_vm\_assumer\_identity

**Default Value****API Name**

idbroker\_azure\_vm\_assumer\_identity

**Required**

false

**Knox IDBroker Configuration Directory****Description**

Contains configuration files that apply to the gateway globally (i.e. not cluster specific ).

**Related Name**

idbroker\_conf\_dir

**Default Value**

/var/lib/knox/idbroker/conf

**API Name**

idbroker\_conf\_dir

**Required**

false

**Knox IDBroker Data Directory****Description**

Contains security and topology specific artifacts as well as important applications for admin-ui

**Related Name**

idbroker\_data\_dir

**Default Value**

/var/lib/knox/idbroker/data

**API Name**

idbroker\_data\_dir

**Required**

false

**Gateway Config Directory****Description**

The directory within 'idbroker\_data\_dir' that contains gateway topology files and deployments.

**Related Name**

gateway.gateway.conf.dir

**Default Value**

deployments

**API Name**

idbroker\_gateway\_gateway\_conf\_dir

**Required**

false

### Admin Groups

**Description**

Admin groups for Knox

**Related Name**

gateway.knox.admin.groups

**Default Value**

admin

**API Name**

idbroker\_gateway\_knox\_admin\_groups

**Required**

false

### Gateway Path

**Description**

The default context path for the gateway.

**Related Name**

gateway.path

**Default Value**

gateway

**API Name**

idbroker\_gateway\_path

**Required**

true

### Cookie Scoping Enabled

**Description**

Enable/Disable cookie scoping feature.

**Related Name**

gateway.scope.cookies.feature.enabled

**Default Value**

false

**API Name**

idbroker\_gateway\_scope\_cookies\_feature\_enabled

**Required**

false

### Security - Signing Key Alias

**Description**

The alias for the signing keypair within the keystore specified via  
idbroker\_gateway\_signing\_keystore\_name

**Related Name**

gateway.signing.key.alias

**Default Value****API Name**

idbroker_gateway_signing_key_alias
<b>Required</b>
false

Security - Signing Keystore Name

<b>Description</b>
The filename of keystore file that contains the signing keypair
<b>Related Name</b>
gateway.signing.keystore.name
<b>Default Value</b>
<b>API Name</b>
idbroker_gateway_signing_keystore_name
<b>Required</b>
false

Security - Signing Keystore Type

<b>Description</b>
The type of the keystore file where the signing keypair is stored. See idbroker_gateway_signing_keystore_name
<b>Related Name</b>
gateway.signing.keystore.type
<b>Default Value</b>
<b>API Name</b>
idbroker_gateway_signing_keystore_type
<b>Required</b>
false

Knox IDBroker GCP Credential Key

<b>Description</b>
The GCP Credential Key
<b>Related Name</b>
idbroker_gcp_credential_key
<b>Default Value</b>
<b>API Name</b>
idbroker_gcp_credential_key
<b>Required</b>
false

Knox IDBroker GCP Credential Secret

<b>Description</b>
The GCP Credential Secret
<b>Related Name</b>
idbroker_gcp_credential_secret
<b>Default Value</b>

**API Name**

idbroker\_gcp\_credential\_secret

**Required**

false

**Knox IDBroker GCP Group Mapping****Description**

The list of GCP group-role mappings in 'group=role[:group=role]...[:group=role]' format. A 'group=role' declaration indicates that all authenticated users that are member of the specified group should be able to assume the specified role. For instance: admin=storage-admin@XYZ.iam.gserviceaccount.com;audit=storage-read-only@XYZ.iam.gserviceaccount.com

**Related Name**

idbroker.gcp.group.role.mapping

**Default Value****API Name**

idbroker\_gcp\_group\_mapping

**Required**

false

**Knox IDBroker GCP User Mapping****Description**

The list of GCP user-role mappings in 'user=role[:user=role]...[:user=role]' format. A 'user=role' declaration indicates that this is a mapping of the authenticated user's primary principal to the specified role. For instance: admin=storage-admin@XYZ.iam.gserviceaccount.com;guest=storage-read-only@XYZ.iam.gserviceaccount.com

**Related Name**

idbroker.gcp.user.role.mapping

**Default Value****API Name**

idbroker\_gcp\_user\_mapping

**Required**

false

**Admin Group Mapping - Class Name****Description**

The class name used for Hadoop admin group mapping

**Related Name**

gateway.group.config.hadoop.security.group.mapping

**Default Value**

org.apache.hadoop.security.ShellBasedUnixGroupsMapping

**API Name**

idbroker\_hadoop\_security\_group\_mapping\_class

**Required**

false

**IDBroker Initial/Max Heapsize****Description**

Initial/Maximum size for the Java Process heap. Passed to Java -Xmx/-Xms. Measured in megabytes.

**Related Name**

idbroker\_heap\_size

**Default Value**

1 GiB

**API Name**

idbroker\_heap\_size

**Required**

true

**Additional IDBroker Java Options****Description**

These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here. -Xmx/-Xms should not be specified here: to set the heapsize use the 'Knox Gateway Initial/Max Heapsize' parameter

**Related Name**

idbroker\_java\_opts

**Default Value****API Name**

idbroker\_java\_opts

**Required**

false

**krb5.conf Location****Description**

Absolute path to krb5.conf file

**Related Name**

java.security.krb5.conf

**Default Value**

/etc/krb5.conf

**API Name**

idbroker\_java\_security\_krb5\_conf

**Required**

false

**Kerberos Proxyuser Block****Description**

Proxyuser configuration used in Knox's 'dt' topology in case Kerberos is enabled. Must conform a valid JSON key-value format!

**Related Name**

idbroker\_kerberos\_dt\_proxyuser\_block

**Default Value**

```
hadoop.proxyuser.livy.hosts: * hadoop.proxyuser.livy.groups: * hadoop.proxyuser.hive.hosts: *
hadoop.proxyuser.hive.groups: * hadoop.proxyuser.httpfs.hosts: * hadoop.proxyuser.httpfs.groups:
* hadoop.proxyuser.hue.hosts: * hadoop.proxyuser.hue.groups: * hadoop.proxyuser.oozie.hosts:
* hadoop.proxyuser.oozie.groups: * hadoop.proxyuser.impala.hosts: *
hadoop.proxyuser.impala.groups: *
```

**API Name**

idbroker\_kerberos\_dt\_proxyuser\_block

**Required**

false

**IDBroker Knox Token TTL****Description**

This indicates the lifespan of the token. Once it expires a new token must be acquired from KnoxToken service. This is in milliseconds.

**Related Name**

idbroker\_knox\_token\_ttl\_ms

**Default Value**

7 day(s)

**API Name**

idbroker\_knox\_token\_ttl\_ms

**Required**

false

**Knox IDBroker Log Directory****Description**

The folder where Knox IDBroker puts it's logs

**Related Name**

idbroker\_log\_dir

**Default Value**

/var/log/knox/idbroker

**API Name**

idbroker\_log\_dir

**Required**

false

**IDBroker Log Level****Description**

The logging level of IDBroker

**Related Name**

idbroker\_log\_level

**Default Value**

ERROR

**API Name**

idbroker\_log\_level

**Required**

---

false

### IDBroker Master Secret

#### Description

The master secret is used to access secured artifacts by the gateway instance. Keystore, trust stores and credential stores are all protected with the master secret. NOTE: changing the master secret will require you to change passwords protecting the keystores for the gateway, identity keystores and all credential stores

#### Related Name

idbroker\_master\_secret

#### Default Value

#### API Name

idbroker\_master\_secret

#### Required

true

### Gateway Config Refresh Interval

#### Description

Defines the frequency of gateway configuration refresh.

#### Related Name

gateway.config.refresh.interval

#### Default Value

10 second(s)

#### API Name

idbroker\_relaodable\_refresh\_interval\_ms

#### Required

false

### KRB5 Debug

#### Description

Boolean flag indicating whether to enable debug messages for krb5 authentication

#### Related Name

sun.security.krb5.debug

#### Default Value

false

#### API Name

idbroker\_sun\_security\_krb5\_debug

#### Required

false

### Performance

#### Maximum Process File Descriptors

##### Description

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

**Ports and Addresses****Gateway HTTP Port****Description**

The HTTP port for the Gateway.

**Related Name**

gateway.port

**Default Value**

8444

**API Name**

idbroker\_gateway\_port

**Required**

true

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Knox IDBroker TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Knox IDBroker might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

gateway.httpclient.truststore.path

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

**Knox IDBroker TLS/SSL Trust Store Password****Description**

The password for the Knox IDBroker TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name****Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

**Enable TLS/SSL for Knox IDBroker****Description**

Encrypt communication between clients and Knox IDBroker using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

knox.enableTLS

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**Knox IDBroker TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Knox IDBroker is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

gateway.tls.keystore.path

**Default Value****API Name**

ssl\_server\_keystore\_location

**Required**

false

**Knox IDBroker TLS/SSL Server Keystore File Password****Description**

The password for the Knox IDBroker keystore file.

**Related Name****Default Value****API Name**

ssl\_server\_keystore\_password

**Required**

false

**Stacks Collection****Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

**Stacks Collection Directory****Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user

with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value**

**API Name**

stacks\_collection\_directory

**Required**

false

**Stacks Collection Enabled**

**Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency**

**Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method**

**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

`stacks_collection_method`**Required**`false`**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_cdh_version_validator`**Required**`true`**Suppress Parameter Validation: Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-reloadable.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-reloadable.xml parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_conf/gateway-reloadable.xml_role_safety_valve`**Required**`true`**Suppress Parameter Validation: Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_conf/gateway-site.xml_role_safety_valve`**Required**`true`

**Suppress Parameter Validation: Knox IDBroker AWS Credentials Key****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS Credentials Key parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_aws\_credentials\_key

**Required**

true

**Suppress Parameter Validation: Knox IDBroker AWS Credentials Secret****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS Credentials Secret parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_aws\_credentials\_secret

**Required**

true

**Suppress Parameter Validation: Knox IDBroker AWS Group Mapping****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS Group Mapping parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_aws\_group\_mapping

**Required**

true

**Suppress Parameter Validation: Knox IDBroker AWS User Mapping****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AWS User Mapping parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_idbroker_aws_user_mapping`**Required**`true`**Suppress Parameter Validation: Knox IDBroker AZURE ADLS2 Tenant Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE ADLS2 Tenant Name parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_idbroker_azure_adls2_tenant_name`**Required**`true`**Suppress Parameter Validation: Knox IDBroker AZURE 'blob-contributor' ClientID****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE 'blob-contributor' ClientID parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_idbroker_azure_blob_contributor_clientid`**Required**`true`**Suppress Parameter Validation: Knox IDBroker AZURE 'blob-contributor' Secret****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE 'blob-contributor' Secret parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_idbroker_azure_blob_contributor_secret`**Required**`true`**Suppress Parameter Validation: Knox IDBroker AZURE 'blob-reader' ClientID****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE 'blob-reader' ClientID parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_blob\_reader\_clientid

**Required**

true

**Suppress Parameter Validation: Knox IDBroker AZURE 'blob-reader' Secret****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE 'blob-reader' Secret parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_blob\_reader\_secret

**Required**

true

**Suppress Parameter Validation: Knox IDBroker AZURE Group Mapping****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE Group Mapping parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_group\_mapping

**Required**

true

**Suppress Parameter Validation: Knox IDBroker AZURE User Mapping****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE User Mapping parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_user\_mapping

**Required**

true

**Suppress Parameter Validation: Knox IDBroker AZURE VM Assumer Identity****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker AZURE VM Assumer Identity parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_vm\_assumer\_identity

**Required**

true

**Suppress Parameter Validation: Knox IDBroker Configuration Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Configuration Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_conf\_dir

**Required**

true

**Suppress Parameter Validation: Knox IDBroker Data Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Data Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_data\_dir

**Required**

true

**Suppress Parameter Validation: Gateway Config Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Config Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gateway\_gateway\_conf\_dir

**Required**

---

true

### Suppress Parameter Validation: Admin Groups

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Groups parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gateway\_knox\_admin\_groups

**Required**

true

### Suppress Parameter Validation: Gateway Path

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Path parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gateway\_path

**Required**

true

### Suppress Parameter Validation: Gateway HTTP Port

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway HTTP Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gateway\_port

**Required**

true

### Suppress Parameter Validation: Security - Signing Key Alias

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Key Alias parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gateway\_signing\_key\_alias

**Required**

true

**Suppress Parameter Validation: Security - Signing Keystore Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Keystore Name parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gateway\_signing\_keystore\_name

**Required**

true

**Suppress Parameter Validation: Security - Signing Keystore Type****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Security - Signing Keystore Type parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gateway\_signing\_keystore\_type

**Required**

true

**Suppress Parameter Validation: Knox IDBroker GCP Credential Key****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP Credential Key parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gcp\_credential\_key

**Required**

true

**Suppress Parameter Validation: Knox IDBroker GCP Credential Secret****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP Credential Secret parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gcp\_credential\_secret

**Required**

true

**Suppress Parameter Validation: Knox IDBroker GCP Group Mapping****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP Group Mapping parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gcp\_group\_mapping

**Required**

true

**Suppress Parameter Validation: Knox IDBroker GCP User Mapping****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker GCP User Mapping parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gcp\_user\_mapping

**Required**

true

**Suppress Parameter Validation: Admin Group Mapping - Class Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Group Mapping - Class Name parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_hadoop\_security\_group\_mapping\_class

**Required**

true

**Suppress Parameter Validation: IDBroker Initial/Max Heapsize****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the IDBroker Initial/Max Heapsize parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_heap\_size

**Required**

true

**Suppress Parameter Validation: Additional IDBroker Java Options****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional IDBroker Java Options parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_java\_opts

**Required**

true

**Suppress Parameter Validation: krb5.conf Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the krb5.conf Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_java\_security\_krb5\_conf

**Required**

true

**Suppress Parameter Validation: Kerberos Proxyuser Block****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Proxyuser Block parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_idbroker_kerberos_dt_proxyuser_block`**Required**`true`**Suppress Parameter Validation: Knox IDBroker Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Log Directory parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_idbroker_log_dir`**Required**`true`**Suppress Parameter Validation: IDBroker Master Secret****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the IDBroker Master Secret parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_idbroker_master_secret`**Required**`true`**Suppress Parameter Validation: Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_idbroker_role_env_safety_valve`**Required**`true`**Suppress Parameter Validation: Knox IDBroker Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Knox IDBroker Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

---

true

### Suppress Parameter Validation: Role Triggers

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

### Suppress Parameter Validation: Knox IDBroker TLS/SSL Trust Store File

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

### Suppress Parameter Validation: Knox IDBroker TLS/SSL Trust Store Password

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

### Suppress Parameter Validation: Knox IDBroker TLS/SSL Server Keystore File Location

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: Knox IDBroker TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox IDBroker TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_idbroker\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_idbroker\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_idbroker\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_idbroker\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_idbroker\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_idbroker\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_idbroker\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_knox\_idbroker\_unexpected\_exits

**Required**

true

Service-Wide

Advanced

Knox Service Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml

Description	For advanced use only, a string to be inserted into conf/gateway-site.xml. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	conf/gateway-site.xml_service_safety_valve
Required	false

Knox Service Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	KNOX_service_env_safety_valve
Required	false

System Group

Description	The group that this service's processes should run as.
Related Name	
Default Value	knox
API Name	process_groupname
Required	true

System User

Description	The user that this service's processes should run as.
Related Name	
Default Value	knox
API Name	

process_username
<b>Required</b>
true

Monitoring

Enable Service Level Health Alerts

<b>Description</b>
When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
enable_alerts
<b>Required</b>
false

Enable Configuration Change Alerts

<b>Description</b>
When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
enable_config_alerts
<b>Required</b>
false

Healthy Knox IDBroker Monitoring Thresholds

<b>Description</b>
The health test thresholds of the overall Knox IDBroker health. The check returns "Concerning" health if the percentage of "Healthy" Knox IDBrokers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Knox IDBrokers falls below the critical threshold.
<b>Related Name</b>
<b>Default Value</b>
Warning: 99.0 %, Critical: 49.0 %
<b>API Name</b>
KNOX_IDBROKER_healthy_thresholds
<b>Required</b>
false

Healthy Knox Gateway Monitoring Thresholds

<b>Description</b>
--------------------

The health test thresholds of the overall Knox Gateway health. The check returns "Concerning" health if the percentage of "Healthy" Knox Gateways falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Knox Gateways falls below the critical threshold.

**Related Name****Default Value**

Warning: 99.0 %, Critical: 49.0 %

**API Name**

KNOX\_KNOX\_GATEWAY\_healthy\_thresholds

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value**

<b>API Name</b>	smon_derived_configs_safety_valve
<b>Required</b>	false

Other

Automatic Restart on Stop

<b>Description</b>	Automatically restart the service when a stop is issued.
<b>Related Name</b>	autorestart_on_stop
<b>Default Value</b>	false
<b>API Name</b>	autorestart_on_stop
<b>Required</b>	false

HDFS Service

<b>Description</b>	Name of the HDFS service that this Knox service instance depends on
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	hdfs_service
<b>Required</b>	false

Enable Kerberos Authentication

<b>Description</b>	Boolean flag indicating whether the Hadoop cluster protected by Gateway is secured with Kerberos
<b>Related Name</b>	gateway.hadoop.kerberos.secured
<b>Default Value</b>	false
<b>API Name</b>	kerberos.auth.enabled
<b>Required</b>	false

Ranger Knox Plugin Hdfs Audit Directory

<b>Description</b>	The HDFS path on which Ranger audits are written.
<b>Related Name</b>	

	ranger_knox_plugin_hdfs_audit_directory
Default Value	\$ranger_base_audit_url/knox
API Name	
	ranger_knox_plugin_hdfs_audit_directory
Required	false

**RANGER Service**

Description	Name of the RANGER service that this Knox service instance depends on
Related Name	
Default Value	
API Name	
	ranger_service
Required	false

**Security**

**Kerberos Principal**

Description	Kerberos principal short name used by all roles of this service.
Related Name	
Default Value	knox
API Name	
	kerberos_princ_name
Required	true

**Suppressions**

**Suppress Configuration Validator: CDH Version Validator**

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	
	role_config_suppression_cdh_version_validator
Required	true

**Suppress Configuration Validator: Deploy Directory****Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

**Suppress Configuration Validator: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties****Description**

Whether to suppress configuration warnings produced by the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/auto-discovery-advanced-configuration-cdp-proxy-api.properties\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy.properties****Description**

Whether to suppress configuration warnings produced by the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/auto-discovery-advanced-configuration-cdp-proxy.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/auto-discovery-advanced-configuration-cdp-proxy.properties\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/cdp-descriptors.xml****Description**

Whether to suppress configuration warnings produced by the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/cdp-descriptors.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/cdp-descriptors.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-reloadable.xml****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker Advanced Configuration Snippet (Safety Valve) for conf/gateway-reloadable.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/gateway-reloadable.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml****Description**

Whether to suppress configuration warnings produced by the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/gateway-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-audit.xml****Description**

Whether to suppress configuration warnings produced by the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-audit.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_conf/ranger-knox-audit.xml_role_safety_valve`**Required**`true`**Suppress Configuration Validator: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-policymgr-ssl.xml****Description**

Whether to suppress configuration warnings produced by the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-policymgr-ssl.xml configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_conf/ranger-knox-policymgr-ssl.xml_role_safety_valve`**Required**`true`**Suppress Configuration Validator: Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-security.xml****Description**

Whether to suppress configuration warnings produced by the Knox Gateway Advanced Configuration Snippet (Safety Valve) for conf/ranger-knox-security.xml configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_conf/ranger-knox-security.xml_role_safety_valve`**Required**`true`**Suppress Configuration Validator: Auto Discovery - Address****Description**

Whether to suppress configuration warnings produced by the Auto Discovery - Address configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_auto_discovery_address`**Required**`true`**Suppress Configuration Validator: Auto Discovery - Cluster****Description**

Whether to suppress configuration warnings produced by the Auto Discovery - Cluster configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_auto\_discovery\_cluster

**Required**

true

**Suppress Configuration Validator: Auto Discovery - Password****Description**

Whether to suppress configuration warnings produced by the Auto Discovery - Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_auto\_discovery\_password

**Required**

true

**Suppress Configuration Validator: Auto Discovery - User****Description**

Whether to suppress configuration warnings produced by the Auto Discovery - User configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_auto\_discovery\_user

**Required**

true

**Suppress Configuration Validator: Knox Gateway Configuration Directory****Description**

Whether to suppress configuration warnings produced by the Knox Gateway Configuration Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_conf\_dir

**Required**

---

true

### Suppress Configuration Validator: Knox Gateway Data Directory

**Description**

Whether to suppress configuration warnings produced by the Knox Gateway Data Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_data\_dir

**Required**

true

### Suppress Configuration Validator: Gateway - Default App Topology Name

**Description**

Whether to suppress configuration warnings produced by the Gateway - Default App Topology Name configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_default\_topology\_name

**Required**

true

### Suppress Configuration Validator: Knox Simplified Topology Management - cdp-proxy

**Description**

Whether to suppress configuration warnings produced by the Knox Simplified Topology Management - cdp-proxy configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_descriptor\_cdp\_proxy

**Required**

true

### Suppress Configuration Validator: Knox Simplified Topology Management - cdp-proxy-api

**Description**

Whether to suppress configuration warnings produced by the Knox Simplified Topology Management - cdp-proxy-api configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_gateway_descriptor_cdp_proxy_api`**Required**`true`**Suppress Configuration Validator: Knox Gateway Dispatch Whitelist****Description**

Whether to suppress configuration warnings produced by the Knox Gateway Dispatch Whitelist configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_dispatch_whitelist`**Required**`true`**Suppress Configuration Validator: Knox Gateway Dispatch Whitelist Services****Description**

Whether to suppress configuration warnings produced by the Knox Gateway Dispatch Whitelist Services configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_dispatch_whitelist_services`**Required**`true`**Suppress Configuration Validator: Gateway Config Directory****Description**

Whether to suppress configuration warnings produced by the Gateway Config Directory configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_gateway_gateway_conf_dir`**Required**`true`**Suppress Configuration Validator: Knox Gateway Initial/Max Heapsize****Description**

Whether to suppress configuration warnings produced by the Knox Gateway Initial/Max Heapsize configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_heap\_size

**Required**

true

**Suppress Configuration Validator: Additional Gateway Java Options****Description**

Whether to suppress configuration warnings produced by the Additional Gateway Java Options configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_java\_opts

**Required**

true

**Suppress Configuration Validator: Admin Groups****Description**

Whether to suppress configuration warnings produced by the Admin Groups configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_knox\_admin\_groups

**Required**

true

**Suppress Configuration Validator: Knox Master Secret****Description**

Whether to suppress configuration warnings produced by the Knox Master Secret configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_master\_secret

**Required**

true

**Suppress Configuration Validator: Gateway Path****Description**

Whether to suppress configuration warnings produced by the Gateway Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_path

**Required**

true

**Suppress Configuration Validator: Gateway HTTP Port****Description**

Whether to suppress configuration warnings produced by the Gateway HTTP Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_port

**Required**

true

**Suppress Configuration Validator: Ranger Knox Plugin Conf Path****Description**

Whether to suppress configuration warnings produced by the Ranger Knox Plugin Conf Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_ranger\_knox\_plugin\_conf\_path

**Required**

true

**Suppress Configuration Validator: Ranger Knox Plugin Audit Hdfs Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the Ranger Knox Plugin Audit Hdfs Spool Directory Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_ranger\_knox\_plugin\_hdfs\_audit\_spool\_directory

**Required**

true

**Suppress Configuration Validator: Ranger Knox Plugin Policy Cache Directory Path****Description**

Whether to suppress configuration warnings produced by the Ranger Knox Plugin Policy Cache Directory Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_ranger\_knox\_plugin\_policy\_cache\_directory

**Required**

true

**Suppress Configuration Validator: Ranger Knox Plugin Audit Solr Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the Ranger Knox Plugin Audit Solr Spool Directory Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_ranger\_knox\_plugin\_solr\_audit\_spool\_directory

**Required**

true

**Suppress Configuration Validator: Ranger Plugin Trusted Proxy IP Address****Description**

Whether to suppress configuration warnings produced by the Ranger Plugin Trusted Proxy IP Address configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_ranger\_plugin\_trusted\_proxy\_ipaddress

**Required**

true

**Suppress Configuration Validator: Security - Signing Key Alias****Description**

Whether to suppress configuration warnings produced by the Security - Signing Key Alias configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_signing\_key\_alias

**Required**

true

**Suppress Configuration Validator: Security - Signing Keystore Name****Description**

Whether to suppress configuration warnings produced by the Security - Signing Keystore Name configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_signing\_keystore\_name

**Required**

true

**Suppress Configuration Validator: Security - Signing Keystore Type****Description**

Whether to suppress configuration warnings produced by the Security - Signing Keystore Type configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_signing\_keystore\_type

**Required**

true

**Suppress Configuration Validator: Security - TLS Certificate Alias (Optional)****Description**

Whether to suppress configuration warnings produced by the Security - TLS Certificate Alias (Optional) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_tls\_certificate\_alias

**Required**

true

**Suppress Configuration Validator: Security - TLS Certificate Path (Optional)****Description**

Whether to suppress configuration warnings produced by the Security - TLS Certificate Path (Optional) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_tls\_certificate\_path

**Required**

true

**Suppress Configuration Validator: X-Forwarded Header Context Service Name****Description**

Whether to suppress configuration warnings produced by the X-Forwarded Header Context Service Name configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gateway\_xforwarded\_header\_context\_append\_servicename

**Required**

true

**Suppress Configuration Validator: Admin Group Mapping - Class Name****Description**

Whether to suppress configuration warnings produced by the Admin Group Mapping - Class Name configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_security\_group\_mapping\_class

**Required**

true

**Suppress Configuration Validator: Knox IDBroker AWS Credentials Key****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AWS Credentials Key configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_aws\_credentials\_key

**Required**

---

true

### Suppress Configuration Validator: Knox IDBroker AWS Credentials Secret

**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AWS Credentials Secret configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_aws\_credentials\_secret

**Required**

true

### Suppress Configuration Validator: Knox IDBroker AWS Group Mapping

**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AWS Group Mapping configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_aws\_group\_mapping

**Required**

true

### Suppress Configuration Validator: Knox IDBroker AWS User Mapping

**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AWS User Mapping configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_aws\_user\_mapping

**Required**

true

### Suppress Configuration Validator: Knox IDBroker AZURE ADLS2 Tenant Name

**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE ADLS2 Tenant Name configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_adls2\_tenant\_name

**Required**

true

**Suppress Configuration Validator: Knox IDBroker AZURE 'blob-contributor' ClientID****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE 'blob-contributor' ClientID configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_blob\_contributor\_clientid

**Required**

true

**Suppress Configuration Validator: Knox IDBroker AZURE 'blob-contributor' Secret****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE 'blob-contributor' Secret configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_blob\_contributor\_secret

**Required**

true

**Suppress Configuration Validator: Knox IDBroker AZURE 'blob-reader' ClientID****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE 'blob-reader' ClientID configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_blob\_reader\_clientid

**Required**

true

**Suppress Configuration Validator: Knox IDBroker AZURE 'blob-reader' Secret****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE 'blob-reader' Secret configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_blob\_reader\_secret

**Required**

true

**Suppress Configuration Validator: Knox IDBroker AZURE Group Mapping****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE Group Mapping configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_group\_mapping

**Required**

true

**Suppress Configuration Validator: Knox IDBroker AZURE User Mapping****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE User Mapping configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_user\_mapping

**Required**

true

**Suppress Configuration Validator: Knox IDBroker AZURE VM Assumer Identity****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker AZURE VM Assumer Identity configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_azure\_vm\_assumer\_identity

**Required**

true

**Suppress Configuration Validator: Knox IDBroker Configuration Directory****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker Configuration Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_conf\_dir

**Required**

true

**Suppress Configuration Validator: Knox IDBroker Data Directory****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker Data Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_data\_dir

**Required**

true

**Suppress Configuration Validator: Gateway Config Directory****Description**

Whether to suppress configuration warnings produced by the Gateway Config Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gateway\_gateway\_conf\_dir

**Required**

true

**Suppress Configuration Validator: Admin Groups****Description**

Whether to suppress configuration warnings produced by the Admin Groups configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_idbroker_gateway_knox_admin_groups`**Required**`true`**Suppress Configuration Validator: Gateway Path****Description**

Whether to suppress configuration warnings produced by the Gateway Path configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_idbroker_gateway_path`**Required**`true`**Suppress Configuration Validator: Gateway HTTP Port****Description**

Whether to suppress configuration warnings produced by the Gateway HTTP Port configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_idbroker_gateway_port`**Required**`true`**Suppress Configuration Validator: Security - Signing Key Alias****Description**

Whether to suppress configuration warnings produced by the Security - Signing Key Alias configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_idbroker_gateway_signing_key_alias`**Required**`true`**Suppress Configuration Validator: Security - Signing Keystore Name****Description**

Whether to suppress configuration warnings produced by the Security - Signing Keystore Name configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gateway\_signing\_keystore\_name

**Required**

true

**Suppress Configuration Validator: Security - Signing Keystore Type****Description**

Whether to suppress configuration warnings produced by the Security - Signing Keystore Type configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gateway\_signing\_keystore\_type

**Required**

true

**Suppress Configuration Validator: Knox IDBroker GCP Credential Key****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker GCP Credential Key configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gcp\_credential\_key

**Required**

true

**Suppress Configuration Validator: Knox IDBroker GCP Credential Secret****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker GCP Credential Secret configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gcp\_credential\_secret

**Required**

true

**Suppress Configuration Validator: Knox IDBroker GCP Group Mapping****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker GCP Group Mapping configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gcp\_group\_mapping

**Required**

true

**Suppress Configuration Validator: Knox IDBroker GCP User Mapping****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker GCP User Mapping configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_gcp\_user\_mapping

**Required**

true

**Suppress Configuration Validator: Admin Group Mapping - Class Name****Description**

Whether to suppress configuration warnings produced by the Admin Group Mapping - Class Name configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_hadoop\_security\_group\_mapping\_class

**Required**

true

**Suppress Configuration Validator: IDBroker Initial/Max Heapsize****Description**

Whether to suppress configuration warnings produced by the IDBroker Initial/Max Heapsize configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_heap\_size

**Required**

---

true

### Suppress Configuration Validator: Additional IDBroker Java Options

**Description**

Whether to suppress configuration warnings produced by the Additional IDBroker Java Options configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_java\_opts

**Required**

true

### Suppress Configuration Validator: krb5.conf Location

**Description**

Whether to suppress configuration warnings produced by the krb5.conf Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_java\_security\_krb5\_conf

**Required**

true

### Suppress Configuration Validator: Kerberos Proxyuser Block

**Description**

Whether to suppress configuration warnings produced by the Kerberos Proxyuser Block configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_kerberos\_dt\_proxyuser\_block

**Required**

true

### Suppress Configuration Validator: Knox IDBroker Log Directory

**Description**

Whether to suppress configuration warnings produced by the Knox IDBroker Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_log\_dir

**Required**

true

**Suppress Configuration Validator: IDBroker Master Secret****Description**

Whether to suppress configuration warnings produced by the IDBroker Master Secret configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_master\_secret

**Required**

true

**Suppress Configuration Validator: Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_idbroker\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: krb5.conf Location****Description**

Whether to suppress configuration warnings produced by the krb5.conf Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_java\_security\_krb5\_conf

**Required**

true

**Suppress Configuration Validator: Knox Gateway Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Knox Gateway Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_knox\_gateway\_role\_env\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Knox Gateway Logging Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the Knox Gateway Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Knox Gateway Log Directory

**Description**

Whether to suppress configuration warnings produced by the Knox Gateway Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

### Suppress Configuration Validator: Heap Dump Directory

**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Knox Gateway TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the Knox Gateway TLS/SSL Trust Store File configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Configuration Validator: Knox Gateway TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the Knox Gateway TLS/SSL Trust Store Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Configuration Validator: Knox Gateway TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the Knox Gateway TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Configuration Validator: Knox Gateway TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the Knox Gateway TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Parameter Validation: Knox Service Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Service Advanced Configuration Snippet (Safety Valve) for conf/gateway-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_conf/gateway-site.xml\_service\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Gateway Count Validator****Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_gateway\_count\_validator

**Required**

true

**Suppress Configuration Validator: Knox IDBroker Count Validator****Description**

Whether to suppress configuration warnings produced by the Knox IDBroker Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_idbroker\_count\_validator

**Required**

true

**Suppress Parameter Validation: Kerberos Principal****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kerberos\_princ\_name

**Required**

---

true

### Suppress Configuration Validator: Knox Gateway Count Validator

**Description**

Whether to suppress configuration warnings produced by the Knox Gateway Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_knox\_gateway\_count\_validator

**Required**

true

### Suppress Parameter Validation: Knox Service Environment Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_knox\_service\_env\_safety\_valve

**Required**

true

### Suppress Parameter Validation: System Group

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

### Suppress Parameter Validation: System User

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Ranger Knox Plugin Hdfs Audit Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Knox Plugin Hdfs Audit Directory parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_knox\_plugin\_hdfs\_audit\_directory

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Health Test: Knox IDBroker Health****Description**

Whether to suppress the results of the Knox IDBroker Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

service\_health\_suppression\_knox\_idbroker\_healthy

**Required**

true

**Suppress Health Test: Knox Gateway Health****Description**

Whether to suppress the results of the Knox Gateway Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

service\_health\_suppression\_knox\_knox\_gateway\_healthy

**Required**

true

## Kudu Properties in Cloudera Runtime 7.1.8

Role groups:

### Master

#### Advanced

**Master Advanced Configuration Snippet (Safety Valve) for gflagfile****Description**

For advanced use only. A string to be inserted into gflagfile for this role only.

**Related Name****Default Value****API Name**

gflagfile\_role\_safety\_valve

**Required**

false

**Master Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties****Description**

For advanced use only. A string to be inserted into kudu-monitoring.properties for this role only.

**Related Name****Default Value****API Name**

kudu-monitoring.properties\_role\_safety\_valve

**Required**

false

**Master Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

KUDU\_MASTER\_role\_env\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**Logs****Master Maximum Log Level to Buffer****Description**

Log messages logged at this level or lower are buffered in memory.

**Related Name**

logbuflevel

**Default Value**

0

**API Name**

glog\_logbuflevel

**Required**

false

**Master Maximum Log Size****Description**

Approximate maximum log file size in megabytes before rolling to a new log file.

**Related Name**

max\_log\_size

**Default Value**

1800 MiB

**API Name**

glog\_maxlogsize

**Required**

false

**Master Minimum Log Level****Description**

Messages logged via LOG() at a lower level than this are not logged anywhere.

**Related Name**

minloglevel

**Default Value**

0

**API Name**

glog\_minloglevel

**Required**

false

**Master Minimum Log Verbosity****Description**

Messages logged via VLOG() at a lower verbosity than this are not logged anywhere.

**Related Name**

v

**Default Value**

0

**API Name**

glog\_verbose

**Required**

false

**Master Log Directory****Description**

The log directory for log files of the role Master.

**Related Name**

log\_dir

**Default Value**

/var/log/kudu

**API Name**

log\_dir

**Required**

false

**Monitoring****Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Enable Failed Data Directories****Description**

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

**Related Name****Default Value**

true

**API Name**

KUDU-KUDU\_MASTER-7.1.0-FAILED\_DATA\_DIRS\_test\_enable

**Required**

---

false

### Enable Full Data Directories

**Description**

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

**Related Name****Default Value**

true

**API Name**

KUDU-KUDU\_MASTER-7.1.0-FULL\_DATA\_DIRS\_test\_enable

**Required**

false

### File Descriptor Monitoring Thresholds

**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

kudu\_master\_fd\_thresholds

**Required**

false

### Master Host Health Test

**Description**

When computing the overall Master health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

kudu\_master\_host\_health\_enabled

**Required**

false

### Master Process Health Test

**Description**

Enables the health test that the Master's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

`kudu_master_scm_health_enabled`**Required**`false`**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**`log_directory_free_space_absolute_thresholds`**Required**`false`**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**`log_directory_free_space_percentage_thresholds`**Required**`false`**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.

- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

`monitoring_metric_filter`

**Required**

`false`

### Swap Memory Usage Rate Thresholds

**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

`process_swap_memory_rate_thresholds`

**Required**

`false`

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

`common.process.swap_memory_rate_window`

**Default Value**

5 minute(s)

**API Name**

`process_swap_memory_rate_window`

**Required**

`false`

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

`process_swap_memory_thresholds`

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

<b>Related Name</b>	
<b>Default Value</b>	5 minute(s)
<b>API Name</b>	unexpected_exits_window
<b>Required</b>	false

Other

Master Diagnostics Collection Timeout

<b>Description</b>	The timeout in milliseconds to wait for diagnostics collection to complete.
<b>Related Name</b>	
<b>Default Value</b>	1 minute(s)
<b>API Name</b>	csd_role_diagnostics_timeout
<b>Required</b>	false

Default Number of Replicas

<b>Description</b>	Default number of replicas for each tablet.
<b>Related Name</b>	default_num_replicas
<b>Default Value</b>	3
<b>API Name</b>	default_num_replicas
<b>Required</b>	true

Kudu Master Data Directories

<b>Description</b>	Directories where Kudu masters will store data blocks.
<b>Related Name</b>	fs_data_dirs
<b>Default Value</b>	
<b>API Name</b>	fs_data_dirs
<b>Required</b>	true

### Kudu Master WAL Directory

**Description**

Directory where Kudu masters will store write-ahead logs. It can be the same as one of the data directories, but not a sub-directory of a data directory. Master and tablet servers must use different directories when co-located on the same machine.

**Related Name**

fs\_wal\_dir

**Default Value****API Name**

fs\_wal\_dir

**Required**

true

### Kudu Master WAL Fsyncs All Entries

**Description**

If true, the Master will use the fsync system call to ensure that all modifications to the catalog table are durably written to disk. WARNING: In this release, enabling this option can cause serious issues.

**Related Name**

log\_force\_fsync\_all

**Default Value**

false

**API Name**

log\_force\_fsync\_all

**Required**

true

### Master Address

**Description**

Configuration that's automatically set by Cloudera Manager to propagate the Master's address to the Tablet Servers.

**Related Name**

server.address

**Default Value****API Name**

master\_address

**Required**

false

### Kudu Master Core Dump Directory

**Description**

If Enable Core Dump is set, Kudu masters will dump cores to this location.

**Related Name**

master\_core\_dump\_directory

**Default Value**

`/var/log/kudu`**API Name**`master_core_dump_directory`**Required**`true`**Kudu Metrics URL Parameters****Description**

The URL query parameters to append to the ``/metrics`` URL when collecting Kudu metrics.

**Related Name**`metrics_url_parameters`**Default Value**`compact=1&level=info`**API Name**`metrics_url_parameters`**Required**`true`**Kudu Master Web UI Interface****Description**

The interface of the Kudu Master Web UI. If blank, binds to 0.0.0.0.

**Related Name**`webserver_interface`**Default Value****API Name**`webserver_interface`**Required**`false`**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**`rlimit_fds`**Required**`false`

## Ports and Addresses

### Kudu Master Web UI Port

**Description**

The port of the Kudu Master Web UI.

**Related Name**

webserver\_port

**Default Value**

8051

**API Name**

webserver\_port

**Required**

true

## Resource Management

### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

### Custom Control Group Resources (overrides Cgroup settings)

**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

### Cgroup I/O Weight

**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

### Cgroup Memory Hard Limit

**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

### Cgroup Memory Soft Limit

**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

Security

Enable TLS/SSL for Master

<b>Description</b>	
	Encrypt communication between clients and Master using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).
<b>Related Name</b>	
	ssl_enabled
<b>Default Value</b>	
	false
<b>API Name</b>	
	ssl_enabled
<b>Required</b>	
	false

Master TLS/SSL Server CA Certificate (PEM Format)

<b>Description</b>	
	The path to the TLS/SSL file containing the certificate of the certificate authority (CA) and any intermediate certificates used to sign the server certificate. Used when Master is acting as a TLS/SSL server. The certificate file must be in PEM format, and is usually created by concatenating all of the appropriate root and intermediate certificates.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	
	ssl_server_ca_certificate_location
<b>Required</b>	
	false

Master TLS/SSL Server Certificate File (PEM Format)

<b>Description</b>	
	The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Master is acting as a TLS/SSL server. The certificate file must be in PEM format.
<b>Related Name</b>	
	webserver_certificate_file
<b>Default Value</b>	
<b>API Name</b>	
	ssl_server_certificate_location
<b>Required</b>	
	false

Master TLS/SSL Server Private Key File (PEM Format)

<b>Description</b>	
	The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Master is acting as a TLS/SSL server. The certificate file must be in PEM format.
<b>Related Name</b>	

webserver_private_key_file
<b>Default Value</b>
<b>API Name</b>
ssl_server_privatekey_location
<b>Required</b>
false

**Master TLS/SSL Private Key Password**

<b>Description</b>
The password for the private key in the Master TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.
<b>Related Name</b>
webserver_private_key_password_cmd
<b>Default Value</b>
<b>API Name</b>
ssl_server_privatekey_password
<b>Required</b>
false

**Suppressions**

**Suppress Configuration Validator: CDH Version Validator**

<b>Description</b>
Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_cdh_version_validator
<b>Required</b>
true

**Suppress Parameter Validation: Default Number of Replicas**

<b>Description</b>
Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Number of Replicas parameter.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_default_num_replicas
<b>Required</b>
true

**Suppress Parameter Validation: Kudu Master Data Directories****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Master Data Directories parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_fs\_data\_dirs

**Required**

true

**Suppress Parameter Validation: Kudu Master WAL Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Master WAL Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_fs\_wal\_dir

**Required**

true

**Suppress Parameter Validation: Master Advanced Configuration Snippet (Safety Valve) for gflagfile****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master Advanced Configuration Snippet (Safety Valve) for gflagfile parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gflagfile\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Master Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_kudu-monitoring.properties_role_safety_valve`**Required**`true`**Suppress Parameter Validation: Master Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_kudu_master_role_env_safety_valve`**Required**`true`**Suppress Parameter Validation: Master Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master Log Directory parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_log_dir`**Required**`true`**Suppress Parameter Validation: Master Address****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master Address parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_master_address`**Required**`true`**Suppress Parameter Validation: Kudu Master Core Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Master Core Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_master\_core\_dump\_directory

**Required**

true

**Suppress Parameter Validation: Kudu Metrics URL Parameters****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Metrics URL Parameters parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_metrics\_url\_parameters

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Master TLS/SSL Server CA Certificate (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master TLS/SSL Server CA Certificate (PEM Format) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_ca\_certificate\_location

**Required**

true

**Suppress Parameter Validation: Master TLS/SSL Server Certificate File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master TLS/SSL Server Certificate File (PEM Format) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_certificate\_location

**Required**

true

**Suppress Parameter Validation: Master TLS/SSL Server Private Key File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master TLS/SSL Server Private Key File (PEM Format) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_location

**Required**

true

**Suppress Parameter Validation: Master TLS/SSL Private Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Master TLS/SSL Private Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_password

**Required**

true

**Suppress Parameter Validation: Kudu Master Web UI Interface**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Master Web UI Interface parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_webserver\_interface

**Required**

true

**Suppress Parameter Validation: Kudu Master Web UI Port**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Master Web UI Port parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_webserver\_port

**Required**

true

**Suppress Health Test: Failed Data Directories**

**Description**

Whether to suppress the results of the Failed Data Directories health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_kudu-kudu\_master-7.1.0-failed\_data\_dirs

**Required**

true

**Suppress Health Test: Full Data Directories**

**Description**

Whether to suppress the results of the Full Data Directories health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kudu-kudu\_master-7.1.0-full\_data\_dirs

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kudu\_kudu\_master\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kudu\_kudu\_master\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**`role_health_suppression_kudu_kudu_master_host_health`**Required**`true`**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_kudu_kudu_master_log_directory_free_space`**Required**`true`**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_kudu_kudu_master_scm_health`**Required**`true`**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_kudu_kudu_master_swap_memory_usage`**Required**`true`

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kudu\_kudu\_master\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kudu\_kudu\_master\_unexpected\_exits

**Required**

true

**Service-Wide****Advanced****Kudu Service Advanced Configuration Snippet (Safety Valve) for gflagfile****Description**

For advanced use only, a string to be inserted into gflagfile. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

gflagfile\_service\_safety\_valve

**Required**

false

**Kudu Service Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties****Description**

For advanced use only, a string to be inserted into kudu-monitoring.properties. Applies to configurations of all roles in this service except client configuration.

**Related Name**

<b>Default Value</b>
<b>API Name</b>
kudu-monitoring.properties_service_safety_valve
<b>Required</b>
false

**Kudu Service Environment Advanced Configuration Snippet (Safety Valve)**

<b>Description</b>
For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
KUDU_service_env_safety_valve
<b>Required</b>
false

**System Group**

<b>Description</b>
The group that this service's processes should run as.
<b>Related Name</b>
<b>Default Value</b>
kudu
<b>API Name</b>
process_groupname
<b>Required</b>
true

**System User**

<b>Description</b>
The user that this service's processes should run as.
<b>Related Name</b>
<b>Default Value</b>
kudu
<b>API Name</b>
process_username
<b>Required</b>
true

**Monitoring**

**Enable Service Level Health Alerts**

<b>Description</b>
--------------------

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

### Healthy Master Monitoring Thresholds

**Description**

The health test thresholds of the overall Master health. The check returns "Concerning" health if the percentage of "Healthy" Masters falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Masters falls below the critical threshold.

**Related Name****Default Value**

Warning: 80.1 %, Critical: 60.0 %

**API Name**

KUDU\_KUDU\_MASTER\_healthy\_thresholds

**Required**

false

### Healthy Tablet Server Monitoring Thresholds

**Description**

The health test thresholds of the overall Tablet Server health. The check returns "Concerning" health if the percentage of "Healthy" Tablet Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Tablet Servers falls below the critical threshold.

**Related Name****Default Value**

Warning: 75.0 %, Critical: 50.0 %

**API Name**

KUDU\_KUDU\_TSERVER\_healthy\_thresholds

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

**Other****Enable Core Dump****Description**

Used to generate a core dump to get more information about a Kudu crash. Unless otherwise configured systemwide using `/proc/sys/kernel/core_pattern`, the dump is generated in the configured core dump directory. The core file can be very large.

**Related Name**

`enable_core_dump`

**Default Value**

`false`

**API Name**

`enable_core_dump`

**Required**

`true`

**Enable Secure Authentication, Encryption, And Web UI****Description**

Enable secure authentication and encryption between all Kudu clients and servers as well as between individual servers. Also enables secure authentication in every Kudu server's web UI. Kerberos must be configured.

**Related Name**

`enable_security`

**Default Value**

`false`

**API Name**

`enable_security`

**Required**

`true`

**Maximum Number of Per-tablet-server Replica Moves****Description**

Maximum number of replica moves to perform concurrently on one tablet server: moves of replicas to the server and moves of replicas off of the server count against this limit.

**Related Name**

`rb_max_moves_per_server`

**Default Value**

`5`

**API Name**

`rb_max_moves_per_server`

**Required**

`false`

**Maximum Allowed Runtime of the Rebalancing Tool****Description**

Maximum time to run the rebalancing, in seconds. Specifying 0 means not imposing any limit on the rebalancing run time.

**Related Name**

`rb_max_run_time_sec`

**Default Value**

0

**API Name**

rb\_max\_run\_time\_sec

**Required**

false

**Maximum Allowed Duration Without Rebalancer Progress****Description**

Maximum duration of the 'staleness' interval where the rebalance can not make progress. If this period elapses without the rebalancer making progress, it will exit indicating failure. This may happen in case of a persistent problem with the cluster or when some unexpected concurrent activity is present (such as automatic recovery of failed replicas, etc.)

**Related Name**

rb\_max\_staleness\_interval\_sec

**Default Value**

300

**API Name**

rb\_max\_staleness\_interval\_sec

**Required**

false

**Maximum Allowed Runtime to Rolling Restart a Batch of Servers****Description**

Maximum time to allow for the restart of a batch of servers during a rolling restart. If this period elapses without the cluster becoming healthy, the rolling restart will exit indicating failure. This may happen if there is a persistent problem with the cluster.

**Related Name**

rr\_batch\_time\_limit\_sec

**Default Value**

1800

**API Name**

rr\_batch\_time\_limit\_sec

**Required**

false

**Rolling Restart Health Check Interval****Description**

Interval in seconds with which to check the health of a cluster in waiting for a server or batch of servers to come back online, before moving onto the next server or batch of servers during a rolling restart.

**Related Name**

rr\_health\_check\_interval\_sec

**Default Value**

60

**API Name**

rr\_health\_check\_interval\_sec

**Required**

false

**Sentry Service**

**Description**

Name of the Sentry service that this Kudu service instance depends on

**Related Name**

**Default Value**

**API Name**

sentry\_service

**Required**

false

**Superuser Access Control List**

**Description**

The list of usernames to allow as super users, comma-separated. A '\*' entry indicates that all authenticated users are allowed. If this is left unset or blank, the default behavior is that the identity of the daemon itself determines the superuser. If the daemon is logged in from a Keytab, then the local username from the Kerberos principal is used; otherwise, the local Unix username is used.

**Related Name**

superuser\_acl

**Default Value**

**API Name**

superuser\_acl

**Required**

false

**User Access Control List**

**Description**

The list of usernames who may access the cluster, comma-separated. A '\*' entry indicates that all authenticated users are allowed.

**Related Name**

user\_acl

**Default Value**

\*

**API Name**

user\_acl

**Required**

false

**Security**

**Kerberos Principal**

**Description**

Kerberos principal short name used by all roles of this service.

**Related Name****Default Value**

kudu

**API Name**

kerberos\_princ\_name

**Required**

true

**Suppressions****Suppress Configuration Validator: Kudu Tablet Server Block Cache Capacity****Description**

Whether to suppress configuration warnings produced by the Kudu Tablet Server Block Cache Capacity configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_block\_cache\_capacity\_mb

**Required**

true

**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Configuration Validator: Default Number of Replicas****Description**

Whether to suppress configuration warnings produced by the Default Number of Replicas configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_default\_num\_replicas

**Required**

---

true

### Suppress Configuration Validator: Kudu Master Data Directories

**Description**

Whether to suppress configuration warnings produced by the Kudu Master Data Directories configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_fs\_data\_dirs

**Required**

true

### Suppress Configuration Validator: Kudu Master WAL Directory

**Description**

Whether to suppress configuration warnings produced by the Kudu Master WAL Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_fs\_wal\_dir

**Required**

true

### Suppress Configuration Validator: Master Advanced Configuration Snippet (Safety Valve) for gflagfile

**Description**

Whether to suppress configuration warnings produced by the Master Advanced Configuration Snippet (Safety Valve) for gflagfile configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gflagfile\_role\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Master Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties

**Description**

Whether to suppress configuration warnings produced by the Master Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_kudu-monitoring.properties\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Master Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Master Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kudu\_master\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Tablet Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Tablet Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kudu\_tserver\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Master Log Directory****Description**

Whether to suppress configuration warnings produced by the Master Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Kudu Tablet Server Maintenance Threads****Description**

Whether to suppress configuration warnings produced by the Kudu Tablet Server Maintenance Threads configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_maintenance\_manager\_num\_threads

**Required**

true

**Suppress Configuration Validator: Master Address****Description**

Whether to suppress configuration warnings produced by the Master Address configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_master\_address

**Required**

true

**Suppress Configuration Validator: Kudu Master Core Dump Directory****Description**

Whether to suppress configuration warnings produced by the Kudu Master Core Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_master\_core\_dump\_directory

**Required**

true

**Suppress Configuration Validator: Kudu Tablet Server Hard Memory Limit****Description**

Whether to suppress configuration warnings produced by the Kudu Tablet Server Hard Memory Limit configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_memory_limit_hard_bytes`**Required**`true`**Suppress Configuration Validator: Kudu Metrics URL Parameters****Description**

Whether to suppress configuration warnings produced by the Kudu Metrics URL Parameters configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_metrics_url_parameters`**Required**`true`**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_rm_custom_resources`**Required**`true`**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_role_triggers`**Required**`true`**Suppress Configuration Validator: Master TLS/SSL Server CA Certificate (PEM Format)****Description**

Whether to suppress configuration warnings produced by the Master TLS/SSL Server CA Certificate (PEM Format) configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_ca\_certificate\_location

**Required**

true

**Suppress Configuration Validator: Master TLS/SSL Server Certificate File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the Master TLS/SSL Server Certificate File (PEM Format) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_certificate\_location

**Required**

true

**Suppress Configuration Validator: Master TLS/SSL Server Private Key File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the Master TLS/SSL Server Private Key File (PEM Format) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_location

**Required**

true

**Suppress Configuration Validator: Master TLS/SSL Private Key Password****Description**

Whether to suppress configuration warnings produced by the Master TLS/SSL Private Key Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_password

**Required**

true

**Suppress Configuration Validator: Kudu Tablet Server Core Dump Directory****Description**

Whether to suppress configuration warnings produced by the Kudu Tablet Server Core Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_tserver\_core\_dump\_directory

**Required**

true

**Suppress Configuration Validator: Kudu Master Web UI Interface****Description**

Whether to suppress configuration warnings produced by the Kudu Master Web UI Interface configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_webserver\_interface

**Required**

true

**Suppress Configuration Validator: Kudu Master Web UI Port****Description**

Whether to suppress configuration warnings produced by the Kudu Master Web UI Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_webserver\_port

**Required**

true

**Suppress Parameter Validation: Kudu Service Advanced Configuration Snippet (Safety Valve) for gflagfile****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Service Advanced Configuration Snippet (Safety Valve) for gflagfile parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_gflagfile\_service\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Kerberos Principal****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kerberos\_princ\_name

**Required**

true

**Suppress Parameter Validation: Kudu Service Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Service Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kudu-monitoring.properties\_service\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Master Count Validator****Description**

Whether to suppress configuration warnings produced by the Master Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kudu\_master\_count\_validator

**Required**

true

**Suppress Parameter Validation: Kudu Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kudu\_service\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Tablet Server Count Validator****Description**

Whether to suppress configuration warnings produced by the Tablet Server Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kudu\_tserver\_count\_validator

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Superuser Access Control List****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Superuser Access Control List parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_superuser\_acl

**Required**

true

**Suppress Parameter Validation: User Access Control List****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the User Access Control List parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_user\_acl

**Required**

true

**Suppress Health Test: Master Health**

**Description**

Whether to suppress the results of the Master Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

service\_health\_suppression\_kudu\_kudu\_master\_healthy

**Required**

true

**Suppress Health Test: Tablet Server Health**

**Description**

Whether to suppress the results of the Tablet Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

service\_health\_suppression\_kudu\_kudu\_tserver\_healthy

**Required**

true

**Tablet Server**

**Advanced**

**Tablet Server Advanced Configuration Snippet (Safety Valve) for gflagfile**

**Description**

For advanced use only. A string to be inserted into gflagfile for this role only.

**Related Name**

**Default Value**

**API Name**

gflagfile\_role\_safety\_valve

**Required**

false

**Tablet Server Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties****Description**

For advanced use only. A string to be inserted into kudu-monitoring.properties for this role only.

**Related Name****Default Value****API Name**

kudu-monitoring.properties\_role\_safety\_valve

**Required**

false

**Tablet Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

KUDU\_TSERVER\_role\_env\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

### Enable Metric Collection

**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

### Process Start Retry Attempts

**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

### Process Start Wait Timeout

**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

### Logs

#### Tablet Server Maximum Log Level to Buffer

**Description**

Log messages logged at this level or lower are buffered in memory.

**Related Name**

`logbuflevel`**Default Value**`0`**API Name**`glog_logbuflevel`**Required**`false`**Tablet Server Maximum Log Size****Description**

Approximate maximum log file size in megabytes before rolling to a new log file.

**Related Name**`max_log_size`**Default Value**`1800 MiB`**API Name**`glog_maxlogsize`**Required**`false`**Tablet Server Minimum Log Level****Description**

Messages logged via LOG() at a lower level than this are not logged anywhere.

**Related Name**`minloglevel`**Default Value**`0`**API Name**`glog_minloglevel`**Required**`false`**Tablet Server Minimum Log Verbosity****Description**

Messages logged via VLOG() at a lower verbosity than this are not logged anywhere.

**Related Name**`v`**Default Value**`0`**API Name**`glog_verbose`**Required**`false`

### Tablet Server Log Directory

**Description**

The log directory for log files of the role Tablet Server.

**Related Name**

log\_dir

**Default Value**

/var/log/kudu

**API Name**

log\_dir

**Required**

false

### Monitoring

#### Enable Health Alerts for this Role

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

#### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

#### Enable Failed Data Directories

**Description**

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

**Related Name****Default Value**

true

**API Name**

**KUDU-KUDU\_TSERVER-7.1.0-FAILED\_DATA\_DIRS\_test\_enable****Required**

false

**Enable Full Data Directories****Description**

Enables or disables the health test. When disabled, the test does not run at all, nor generate health history.

**Related Name****Default Value**

true

**API Name****KUDU-KUDU\_TSERVER-7.1.0-FULL\_DATA\_DIRS\_test\_enable****Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

kudu\_tserver\_fd\_thresholds

**Required**

false

**Tablet Server Host Health Test****Description**

When computing the overall Tablet Server health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

kudu\_tserver\_host\_health\_enabled

**Required**

false

**Tablet Server Process Health Test****Description**

Enables the health test that the Tablet Server's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

kudu\_tserver\_scm\_health\_enabled

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

### Unexpected Exits Monitoring Period

**Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

### Other

### Kudu Tablet Server Block Cache Capacity

**Description**

Maximum amount of memory allocated to the Kudu Tablet Server's block cache.

**Related Name**

block\_cache\_capacity\_mb

**Default Value**

512 MiB

**API Name**

block\_cache\_capacity\_mb

**Required**

true

### Tablet Server Diagnostics Collection Timeout

**Description**

The timeout in milliseconds to wait for diagnostics collection to complete.

**Related Name****Default Value**

1 minute(s)

**API Name**

csd\_role\_diagnostics\_timeout

**Required**

false

### Kudu Tablet Server Data Directories

**Description**

Directories where Kudu tablet servers will store data blocks.

**Related Name**

fs\_data\_dirs

**Default Value****API Name**

fs\_data\_dirs

**Required**

true

**Kudu Tablet Server WAL Directory****Description**

Directory where Kudu tablet servers will store write-ahead logs. It can be the same as one of the data directories, but not a sub-directory of a data directory. Master and tablet servers must use different directories when co-located on the same machine.

**Related Name**

fs\_wal\_dir

**Default Value****API Name**

fs\_wal\_dir

**Required**

true

**Kudu Tablet Server WAL Fsyncs All Entries****Description**

If true, the Tablet Server will use the fsync system call to ensure that all writes are durably written to the write-ahead log (WAL) before responding. If false, edits will be written to the Linux buffer cache on a majority of replicas before responding.

**Related Name**

log\_force\_fsync\_all

**Default Value**

false

**API Name**

log\_force\_fsync\_all

**Required**

true

**Kudu Tablet Server Maintenance Threads****Description**

The number of threads devoted to background maintenance operations such as flushes and compactions. If the tablet server appears to be falling behind on write operations (inserts, updates, and deletes) but CPU and disk resources are not saturated, increasing this thread count will devote more resources to these background operations.

**Related Name**

maintenance\_manager\_num\_threads

**Default Value**

1

**API Name**

maintenance\_manager\_num\_threads

**Required**

true

### Kudu Tablet Server Hard Memory Limit

**Description**

Maximum amount of memory that the Kudu Tablet Server will use before it starts rejecting all incoming writes.

**Related Name**

memory\_limit\_hard\_bytes

**Default Value**

4 GiB

**API Name**

memory\_limit\_hard\_bytes

**Required**

true

### Kudu Metrics URL Parameters

**Description**

The URL query parameters to append to the `/metrics` URL when collecting Kudu metrics.

**Related Name**

metrics\_url\_parameters

**Default Value**

compact=1&level=info

**API Name**

metrics\_url\_parameters

**Required**

true

### Tablet History Max Age

**Description**

The maximum amount of time, in seconds, to preserve tablet data history, including history required to perform diff scans and incremental backups. The duration defined by this parameter is also the maximum amount of time it is possible to wait after a full or incremental backup before performing the next incremental backup. Setting the value to -1 disables history removal.

**Related Name**

tablet\_history\_max\_age\_sec

**Default Value**

7 day(s)

**API Name**

tablet\_history\_max\_age\_sec

**Required**

true

### Tablet Server Quiescing Interval

**Description**

Interval in seconds with which to check whether a Tablet Server has fully quiesced

**Related Name**

ts\_quiescing\_retry\_interval\_sec

**Default Value**

30

**API Name**

ts\_quiescing\_retry\_interval\_sec

**Required**

false

**Maximum Allowed Runtime to Quiesce a Tablet Server****Description**

Maximum time to wait for a Tablet Server to fully quiesce, relinquishing leadership of all Tablets and completion of all active scans.

**Related Name**

ts\_quiescing\_time\_limit\_sec

**Default Value**

1800

**API Name**

ts\_quiescing\_time\_limit\_sec

**Required**

false

**Kudu Tablet Server Core Dump Directory****Description**

If Enable Core Dump is set, Kudu Tablet Servers will dump cores to this location.

**Related Name**

tserver\_core\_dump\_directory

**Default Value**

/var/log/kudu

**API Name**

tserver\_core\_dump\_directory

**Required**

true

**Kudu Tablet Server Web UI Interface****Description**

The interface of the Kudu Tablet Server Web UI. If blank, binds to 0.0.0.0.

**Related Name**

webserver\_interface

**Default Value****API Name**

webserver\_interface

**Required**

false

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	rlimit_fds
Required	false

Ports and Addresses

Kudu Tablet Server Web UI Port

Description	The port of the Kudu Tablet Server Web UI.
Related Name	webserver_port
Default Value	8050
API Name	webserver_port
Required	true

Resource Management

Cgroup CPU Shares

Description	Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
Related Name	cpu.shares
Default Value	1024
API Name	rm_cpu_shares
Required	true

Custom Control Group Resources (overrides Cgroup settings)

Description	
-------------	--

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the `cgexec` command: `resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`  
\*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

`custom.cgroups`

**Default Value****API Name**

`rm_custom_resources`

**Required**

`false`

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

`blkio.weight`

**Default Value**

`500`

**API Name**

`rm_io_weight`

**Required**

`true`

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

`memory.limit_in_bytes`

**Default Value**

`-1 MiB`

**API Name**

`rm_memory_hard_limit`

**Required**

`true`

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Enable TLS/SSL for Tablet Server****Description**

Encrypt communication between clients and Tablet Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

ssl\_enabled

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**Tablet Server TLS/SSL Server CA Certificate (PEM Format)****Description**

The path to the TLS/SSL file containing the certificate of the certificate authority (CA) and any intermediate certificates used to sign the server certificate. Used when Tablet Server is acting as a TLS/SSL server. The certificate file must be in PEM format, and is usually created by concatenating all of the appropriate root and intermediate certificates.

**Related Name****Default Value****API Name**

ssl\_server\_ca\_certificate\_location

**Required**

false

**Tablet Server TLS/SSL Server Certificate File (PEM Format)****Description**

The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Tablet Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

**Related Name**

webserver\_certificate\_file

**Default Value****API Name**

ssl\_server\_certificate\_location

**Required**

false

**Tablet Server TLS/SSL Server Private Key File (PEM Format)****Description**

The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Tablet Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

**Related Name**

webserver\_private\_key\_file

**Default Value****API Name**

ssl\_server\_privatekey\_location

**Required**

false

**Tablet Server TLS/SSL Private Key Password****Description**

The password for the private key in the Tablet Server TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.

**Related Name**

webserver\_private\_key\_password\_cmd

**Default Value****API Name**

ssl\_server\_privatekey\_password

**Required**

false

**Suppressions****Suppress Parameter Validation: Kudu Tablet Server Block Cache Capacity****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Block Cache Capacity parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_block\_cache\_capacity\_mb

**Required**

---

true

### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

### Suppress Parameter Validation: Kudu Tablet Server Data Directories

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Data Directories parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_fs\_data\_dirs

**Required**

true

### Suppress Parameter Validation: Kudu Tablet Server WAL Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server WAL Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_fs\_wal\_dir

**Required**

true

### Suppress Parameter Validation: Tablet Server Advanced Configuration Snippet (Safety Valve) for gflagfile

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server Advanced Configuration Snippet (Safety Valve) for gflagfile parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_gflagfile\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Tablet Server Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server Advanced Configuration Snippet (Safety Valve) for kudu-monitoring.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kudu-monitoring.properties\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Tablet Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_kudu\_tserver\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Tablet Server Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Kudu Tablet Server Maintenance Threads****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Maintenance Threads parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_maintenance\_manager\_num\_threads

**Required**

true

**Suppress Parameter Validation: Kudu Tablet Server Hard Memory Limit****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Hard Memory Limit parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_memory\_limit\_hard\_bytes

**Required**

true

**Suppress Parameter Validation: Kudu Metrics URL Parameters****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Metrics URL Parameters parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_metrics\_url\_parameters

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_rm_custom_resources`**Required**`true`**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_role_triggers`**Required**`true`**Suppress Parameter Validation: Tablet Server TLS/SSL Server CA Certificate (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server TLS/SSL Server CA Certificate (PEM Format) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_ca_certificate_location`**Required**`true`**Suppress Parameter Validation: Tablet Server TLS/SSL Server Certificate File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server TLS/SSL Server Certificate File (PEM Format) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_certificate_location`**Required**`true`**Suppress Parameter Validation: Tablet Server TLS/SSL Server Private Key File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server TLS/SSL Server Private Key File (PEM Format) parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_location

**Required**

true

**Suppress Parameter Validation: Tablet Server TLS/SSL Private Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tablet Server TLS/SSL Private Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_password

**Required**

true

**Suppress Parameter Validation: Kudu Tablet Server Core Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Core Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_tserver\_core\_dump\_directory

**Required**

true

**Suppress Parameter Validation: Kudu Tablet Server Web UI Interface****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Web UI Interface parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_webserver\_interface

**Required**

true

**Suppress Parameter Validation: Kudu Tablet Server Web UI Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kudu Tablet Server Web UI Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_webserver\_port

**Required**

true

**Suppress Health Test: Failed Data Directories****Description**

Whether to suppress the results of the Failed Data Directories health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kudu-kudu\_tserver-7.1.0-failed\_data\_dirs

**Required**

true

**Suppress Health Test: Full Data Directories****Description**

Whether to suppress the results of the Full Data Directories health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kudu-kudu\_tserver-7.1.0-full\_data\_dirs

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

`role_health_suppression_kudu_kudu_tserver_audit_health`**Required**`true`**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_kudu_kudu_tserver_file_descriptor`**Required**`true`**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_kudu_kudu_tserver_host_health`**Required**`true`**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_kudu_kudu_tserver_log_directory_free_space`**Required**`true`**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kudu\_kudu\_tserver\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kudu\_kudu\_tserver\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kudu\_kudu\_tserver\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_kudu\_kudu\_tserver\_unexpected\_exits

**Required**

true

## Livy Properties in Cloudera Runtime 7.1.8

Role groups:

### Gateway

#### Advanced

##### Deploy Directory

**Description**

The directory where the client configs will be deployed

**Related Name****Default Value**

/etc/livy

**API Name**

client\_config\_root\_dir

**Required**

true

##### Livy Client Advanced Configuration Snippet (Safety Valve) for livy-conf/livy-client.conf

**Description**

For advanced use only, a string to be inserted into the client configuration for livy-conf/livy-client.conf.

**Related Name****Default Value****API Name**

livy-conf/livy-client.conf\_client\_config\_safety\_valve

**Required**

false

### Monitoring

##### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Other****Alternatives Priority****Description**

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

**Related Name****Default Value**

50

**API Name**

client\_config\_priority

**Required**

true

**Security****Gateway TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

livy.truststore

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

**Gateway TLS/SSL Trust Store Password****Description**

The password for the Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

livy.truststore.password

**Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

## Suppressions

### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

### Suppress Parameter Validation: Deploy Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

### Suppress Parameter Validation: Livy Client Advanced Configuration Snippet (Safety Valve) for livy-conf/livy-client.conf

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Client Advanced Configuration Snippet (Safety Valve) for livy-conf/livy-client.conf parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy-conf/livy-client.conf\_client\_config\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Gateway TLS/SSL Trust Store File

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store File parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Gateway TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

## Livy Server

**Advanced****Livy Server Advanced Configuration Snippet (Safety Valve) for livy-conf/livy.conf****Description**

For advanced use only. A string to be inserted into livy-conf/livy.conf for this role only.

**Related Name****Default Value****API Name**

livy-conf/livy.conf\_role\_safety\_valve

**Required**

false

**Livy Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

LIVY\_SERVER\_role\_env\_safety\_valve

**Required**

false

### Livy Server Logging Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

### Enable auto refresh for metric configurations

**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

### Heap Dump Directory

**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

### Dump Heap When Out of Memory

**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name**

**Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout**

**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name**

**Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**Logs**

**Livy Server Log Directory**

**Description**

The log directory for log files of the role Livy Server.

**Related Name**

log\_dir

**Default Value**

/var/log/livy

**API Name**

log\_dir

**Required**

false

**Livy Server Logging Threshold**

**Description**

The minimum log level for Livy Server logs

**Related Name**

**Default Value**

INFO

**API Name**

log_threshold
<b>Required</b>
false

Livy Server Maximum Log File Backups

<b>Description</b>
The maximum number of rolled log files to keep for Livy Server logs. Typically used by log4j or logback.
<b>Related Name</b>
<b>Default Value</b>
10
<b>API Name</b>
max_log_backup_index
<b>Required</b>
false

Livy Server Max Log Size

<b>Description</b>
The maximum size, in megabytes, per log file for Livy Server logs. Typically used by log4j or logback.
<b>Related Name</b>
<b>Default Value</b>
200 MiB
<b>API Name</b>
max_log_size
<b>Required</b>
false

Monitoring

Enable Health Alerts for this Role

<b>Description</b>
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
enable_alerts
<b>Required</b>
false

Enable Configuration Change Alerts

<b>Description</b>
When set, Cloudera Manager will send alerts when this entity's configuration changes.

<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
enable_config_alerts
<b>Required</b>
false

**File Descriptor Monitoring Thresholds**

<b>Description</b>
The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
<b>Related Name</b>
<b>Default Value</b>
Warning: 50.0 %, Critical: 70.0 %
<b>API Name</b>
livy_server_fd_thresholds
<b>Required</b>
false

**Livy Server Host Health Test**

<b>Description</b>
When computing the overall Livy Server health, consider the host's health.
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
livy_server_host_health_enabled
<b>Required</b>
false

**Livy Server Process Health Test**

<b>Description</b>
Enables the health test that the Livy Server's process state is consistent with the role configuration
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
livy_server_scm_health_enabled
<b>Required</b>
false

**Log Directory Free Space Monitoring Absolute Thresholds**

<b>Description</b>
--------------------

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name**

**Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a `DataNode` fires if the `DataNode` has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

`role_triggers`

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

`unexpected_exits_thresholds`

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected_exits_window
<b>Required</b>
false

Other

Enable Access Control

<b>Description</b>
Perform access control when processing user requests.
<b>Related Name</b>
livy.server.access-control.enabled
<b>Default Value</b>
true
<b>API Name</b>
livy_access_control_enabled
<b>Required</b>
false

Admin Users

<b>Description</b>
List of users with admin permissions (can view and modify any session).
<b>Related Name</b>
livy.superusers
<b>Default Value</b>
knox zeppelin
<b>API Name</b>
livy_admin_users
<b>Required</b>
false

Extra JVM Options

<b>Description</b>
Command line options to add to the Livy Server JVM. May be used also to override options automatically added by CM.
<b>Related Name</b>
livy_extra_java_opts
<b>Default Value</b>
<b>API Name</b>
livy_extra_java_opts
<b>Required</b>
false

Enable User Impersonation

<b>Description</b>
Start applications as the requesting user, instead of using the Livy account.

**Related Name**

livy.impersonation.enabled

**Default Value**

true

**API Name**

livy\_impersonation\_enabled

**Required**

false

**Max Header Size****Description**

Maximum size of a header field accepted by the Livy server. May need to be increased in certain environments where SPNEGO is enabled.

**Related Name**

livy.server.request-header.size

**Default Value**

128 KiB

**API Name**

livy\_max\_header\_size

**Required**

false

**Java Heap Size of Livy Server****Description**

Maximum size for the Java process heap memory.

**Related Name**

livy\_max\_heapsize

**Default Value**

512 MiB

**API Name**

livy\_max\_heapsize

**Required**

false

**Enable RPC Encryption****Description**

Enable encryption of communication between the Livy session and managed Spark sessions.

**Related Name**

livy\_rpc\_encryption\_enabled

**Default Value**

true

**API Name**

livy\_rpc\_encryption\_enabled

**Required**

false

**Enable Livy Thrift Server**

<b>Description</b>	Enables the Livy Thrift server
<b>Related Name</b>	livy.server.thrift.enabled
<b>Default Value</b>	false
<b>API Name</b>	livy_server_thrift_enabled
<b>Required</b>	false

**Livy Thrift Server Transport Mode**

<b>Description</b>	Transport mode used by the Livy Thrift server
<b>Related Name</b>	livy.server.thrift.transport.mode
<b>Default Value</b>	binary
<b>API Name</b>	livy_server_thrift_transport_mode
<b>Required</b>	false

**Enable Session Recovery**

<b>Description</b>	Enable recovery of live sessions when the Livy server restarts. Uses HDFS to store recovery information.
<b>Related Name</b>	livy_session_recovery_enabled
<b>Default Value</b>	true
<b>API Name</b>	livy_session_recovery_enabled
<b>Required</b>	false

**Enable User Authentication**

<b>Description</b>	Enables user authentication using SPNEGO when Kerberos is enabled.
<b>Related Name</b>	livy_spnego_enabled
<b>Default Value</b>	

	true
API Name	
	livy_spnego_enabled
Required	
	false

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	
	rlimit_fds
Required	
	false

Ports and Addresses

Livy Server Port

Description	The port of the Livy server
Related Name	
	livy.server.port
Default Value	
	8998
API Name	
	livy_server_port
Required	
	false

Livy Thrift Server Port

Description	The port of the Livy Thrift server
Related Name	
	livy.server.thrift.port
Default Value	
	10090
API Name	
	livy_server_thrift_port
Required	
	false

## Resource Management

### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

### Custom Control Group Resources (overrides Cgroup settings)

**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

### Cgroup I/O Weight

**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

### Cgroup Memory Hard Limit

**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

### Cgroup Memory Soft Limit

**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

## Security

### Enable TLS/SSL for Livy Server

**Description**

Encrypt communication between clients and Livy Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

livy.tls.enabled

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**Livy Server TLS/SSL Server Keystore File Location**

**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Livy Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

livy.keystore

**Default Value**

**API Name**

ssl\_server\_keystore\_location

**Required**

false

**Livy Server TLS/SSL Server Keystore File Password**

**Description**

The password for the Livy Server keystore file.

**Related Name**

livy.keystore.password

**Default Value**

**API Name**

ssl\_server\_keystore\_password

**Required**

false

**Stacks Collection**

**Stacks Collection Data Retention**

**Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

**Stacks Collection Directory**

**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user

with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value****API Name**

stacks\_collection\_directory

**Required**

false

**Stacks Collection Enabled****Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

`stacks_collection_method`**Required**`false`**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_cdh_version_validator`**Required**`true`**Suppress Parameter Validation: Livy Server Advanced Configuration Snippet (Safety Valve) for livy-conf/livy.conf****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server Advanced Configuration Snippet (Safety Valve) for livy-conf/livy.conf parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_livy-conf/livy.conf_role_safety_valve`**Required**`true`**Suppress Parameter Validation: Admin Users****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Users parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_livy_admin_users`**Required**`true`**Suppress Parameter Validation: Extra JVM Options****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Extra JVM Options parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy\_extra\_java\_opts

**Required**

true

**Suppress Parameter Validation: Livy Server Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy\_server\_port

**Required**

true

**Suppress Parameter Validation: Livy Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Livy Thrift Server Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Thrift Server Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy\_server\_thrift\_port

**Required**

true

**Suppress Parameter Validation: Livy Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Livy Server Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Livy Server TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: Livy Server TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_livy\_livy\_server\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_livy\_livy\_server\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

`role_health_suppression_livy_livy_server_host_health`**Required**`true`**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_livy_livy_server_log_directory_free_space`**Required**`true`**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_livy_livy_server_scm_health`**Required**`true`**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_livy_livy_server_swap_memory_usage`**Required**`true`**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_livy\_livy\_server\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_livy\_livy\_server\_unexpected\_exits

**Required**

true

**Service-Wide****Advanced****Livy Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

LIVY\_service\_env\_safety\_valve

**Required**

false

**System Group****Description**

The group that this service's processes should run as.

**Related Name****Default Value**

livy

**API Name**

process\_groupname

**Required**

true

**System User****Description**

The user that this service's processes should run as.

**Related Name****Default Value**

livy

**API Name**

process\_username

**Required**

true

**Monitoring****Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Livy Server Role Health Test****Description**

When computing the overall LIVY health, consider Livy Server's health

**Related Name**

**Default Value**

true

**API Name**

LIVY\_LIVY\_SERVER\_health\_enabled

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd\_open WHERE roleType = DataNode and last(fd\_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

## Other

### HMS Service

**Description**

Name of the HMS service that this Livy service instance depends on

**Related Name****Default Value****API Name**

hms\_service

**Required**

false

### Recovery Directory (HDFS)

**Description**

Location where to store recovery metadata.

**Related Name**

livy.server.recovery.state-store.url

**Default Value**

/user/livy/recovery

**API Name**

livy\_recovery\_dir

**Required**

false

### SPARK\_ON\_YARN Service

**Description**

Name of the SPARK\_ON\_YARN service that this Livy service instance depends on

**Related Name****Default Value****API Name**

spark\_on\_yarn\_service

**Required**

true

### YARN Service

**Description**

Name of the YARN service that this Livy service instance depends on

**Related Name****Default Value****API Name**

yarn\_service

**Required**

true

## Security

### Kerberos Principal

**Description**

Kerberos principal short name used by all roles of this service.

**Related Name****Default Value**

livy

**API Name**

kerberos\_princ\_name

**Required**

true

## Suppressions

### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

### Suppress Configuration Validator: Deploy Directory

**Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

### Suppress Configuration Validator: Livy Client Advanced Configuration Snippet (Safety Valve) for livy-conf/livy-client.conf

**Description**

Whether to suppress configuration warnings produced by the Livy Client Advanced Configuration Snippet (Safety Valve) for livy-conf/livy-client.conf configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_livy-conf/livy-client.conf\_client\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Livy Server Advanced Configuration Snippet (Safety Valve) for livy-conf/livy.conf****Description**

Whether to suppress configuration warnings produced by the Livy Server Advanced Configuration Snippet (Safety Valve) for livy-conf/livy.conf configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy-conf/livy.conf\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Admin Users****Description**

Whether to suppress configuration warnings produced by the Admin Users configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy\_admin\_users

**Required**

true

**Suppress Configuration Validator: Extra JVM Options****Description**

Whether to suppress configuration warnings produced by the Extra JVM Options configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy\_extra\_java\_opts

**Required**

true

**Suppress Configuration Validator: Livy Server Port****Description**

Whether to suppress configuration warnings produced by the Livy Server Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy\_server\_port

**Required**

true

**Suppress Configuration Validator: Livy Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Livy Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Livy Thrift Server Port****Description**

Whether to suppress configuration warnings produced by the Livy Thrift Server Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy\_server\_thrift\_port

**Required**

true

**Suppress Configuration Validator: Livy Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Livy Server Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Livy Server Log Directory****Description**

Whether to suppress configuration warnings produced by the Livy Server Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Gateway TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the Gateway TLS/SSL Trust Store File configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Configuration Validator: Gateway TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the Gateway TLS/SSL Trust Store Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Configuration Validator: Livy Server TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the Livy Server TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Configuration Validator: Livy Server TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the Livy Server TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Configuration Validator: Gateway Count Validator****Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_gateway\_count\_validator

**Required**

true

**Suppress Parameter Validation: Kerberos Principal****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kerberos\_princ\_name

**Required**

---

true

### Suppress Parameter Validation: Recovery Directory (HDFS)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recovery Directory (HDFS) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_livy\_recovery\_dir

**Required**

true

### Suppress Configuration Validator: Livy Server Count Validator

**Description**

Whether to suppress configuration warnings produced by the Livy Server Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_livy\_server\_count\_validator

**Required**

true

### Suppress Parameter Validation: Livy Service Environment Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_livy\_service\_env\_safety\_valve

**Required**

true

### Suppress Parameter Validation: System Group

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Health Test: Livy Server Health****Description**

Whether to suppress the results of the Livy Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

service\_health\_suppression\_livy\_livy\_livy\_server\_health

**Required**

true

## Livy for Spark 3 Properties in Cloudera Runtime 7.1.8

Role groups:

### Gateway

#### Advanced

#### Deploy Directory

**Description**

The directory where the client configs will be deployed

**Related Name****Default Value**

/etc/livy3

**API Name**

client\_config\_root\_dir

**Required**

true

#### Livy for Spark 3 Client Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy-client.conf

**Description**

For advanced use only, a string to be inserted into the client configuration for livy3-conf/livy-client.conf.

**Related Name****Default Value****API Name**

livy3-conf/livy-client.conf\_client\_config\_safety\_valve

**Required**

false

#### Monitoring

#### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Other****Alternatives Priority****Description**

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

**Related Name****Default Value**

50

**API Name**

client\_config\_priority

**Required**

true

**Security****Gateway TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

livy.truststore

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

**Gateway TLS/SSL Trust Store Password****Description**

The password for the Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

livy.truststore.password

**Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Deploy Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

**Suppress Parameter Validation: Livy for Spark 3 Client Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy-client.conf****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy for Spark 3 Client Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy-client.conf parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy3-conf/livy-client.conf\_client\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Gateway TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Gateway TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Livy Server for Spark 3****Advanced****Livy Server for Spark 3 Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy.conf****Description**

For advanced use only. A string to be inserted into livy3-conf/livy.conf for this role only.

**Related Name****Default Value****API Name**

livy3-conf/livy.conf\_role\_safety\_valve

**Required**

false

**Livy Server for Spark 3 Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value**

**API Name**

LIVY\_SERVER\_FOR\_SPARK3\_role\_env\_safety\_valve

**Required**

false

**Livy Server for Spark 3 Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

### Dump Heap When Out of Memory

**Description**

When set, generates a heap dump file when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

### Kill When Out of Memory

**Description**

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

### Automatically Restart Process

**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

### Enable Metric Collection

**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

`process_should_monitor`**Required**`true`**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**`3`**API Name**`process_start_retries`**Required**`false`**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**`20`**API Name**`process_start_secs`**Required**`false`**Logs****Livy Server for Spark 3 Log Directory****Description**

The log directory for log files of the role Livy Server for Spark 3.

**Related Name**`log_dir`**Default Value**`/var/log/livy3`**API Name**`log_dir`**Required**`false`**Livy Server for Spark 3 Logging Threshold****Description**

The minimum log level for Livy Server for Spark 3 logs

**Related Name****Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

### Livy Server for Spark 3 Maximum Log File Backups

**Description**

The maximum number of rolled log files to keep for Livy Server for Spark 3 logs. Typically used by log4j or logback.

**Related Name****Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

### Livy Server for Spark 3 Max Log Size

**Description**

The maximum size, in megabytes, per log file for Livy Server for Spark 3 logs. Typically used by log4j or logback.

**Related Name****Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

## Monitoring

### Enable Health Alerts for this Role

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

livy\_server\_for\_spark3\_fd\_thresholds

**Required**

false

**Livy Server for Spark 3 Host Health Test****Description**

When computing the overall Livy Server for Spark 3 health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

livy\_server\_for\_spark3\_host\_health\_enabled

**Required**

false

**Livy Server for Spark 3 Process Health Test****Description**

Enables the health test that the Livy Server for Spark 3's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**`livy_server_for_spark3_scm_health_enabled`**Required**`false`**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**`Warning: 10 GiB, Critical: 5 GiB`**API Name**`log_directory_free_space_absolute_thresholds`**Required**`false`**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**`Warning: Never, Critical: Never`**API Name**`log_directory_free_space_percentage_thresholds`**Required**`false`**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

Unexpected Exits Monitoring Period

Description	The period to review when computing unexpected exits.
Related Name	
Default Value	5 minute(s)
API Name	unexpected_exits_window
Required	false

Other

Enable Access Control

Description	Perform access control when processing user requests.
Related Name	livy.server.access-control.enabled
Default Value	true
API Name	livy_access_control_enabled
Required	false

Admin Users

Description	List of users with admin permissions (can view and modify any session).
Related Name	livy.superusers
Default Value	knox zeppelin
API Name	livy_admin_users
Required	false

Extra JVM Options

Description	Command line options to add to the Livy Server JVM. May be used also to override options automatically added by CM.
Related Name	livy_extra_java_opts
Default Value	
API Name	

`livy_extra_java_opts`**Required**`false`**Enable User Impersonation****Description**

Start applications as the requesting user, instead of using the Livy account.

**Related Name**`livy.impersonation.enabled`**Default Value**`true`**API Name**`livy_impersonation_enabled`**Required**`false`**Max Header Size****Description**

Maximum size of a header field accepted by the Livy server. May need to be increased in certain environments where SPNEGO is enabled.

**Related Name**`livy.server.request-header.size`**Default Value**`128 KiB`**API Name**`livy_max_header_size`**Required**`false`**Java Heap Size of Livy Server****Description**

Maximum size for the Java process heap memory.

**Related Name**`livy_max_heapsize`**Default Value**`512 MiB`**API Name**`livy_max_heapsize`**Required**`false`**Enable RPC Encryption****Description**

Enable encryption of communication between the Livy session and managed Spark sessions.

**Related Name**

	livy_rpc_encryption_enabled
Default Value	true
API Name	
	livy_rpc_encryption_enabled
Required	false

Enable Livy Thrift Server

Description	Enables the Livy Thrift server
Related Name	
	livy.server.thrift.enabled
Default Value	false
API Name	
	livy_server_thrift_enabled
Required	false

Livy Thrift Server Transport Mode

Description	Transport mode used by the Livy Thrift server
Related Name	
	livy.server.thrift.transport.mode
Default Value	binary
API Name	
	livy_server_thrift_transport_mode
Required	false

Enable Session Recovery

Description	Enable recovery of live sessions when the Livy server restarts. Uses HDFS to store recovery information.
Related Name	
	livy_session_recovery_enabled
Default Value	true
API Name	
	livy_session_recovery_enabled
Required	false

### Enable User Authentication

**Description**

Enables user authentication using SPNEGO when Kerberos is enabled.

**Related Name**

livy\_spnego\_enabled

**Default Value**

true

**API Name**

livy\_spnego\_enabled

**Required**

false

### Performance

#### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

### Ports and Addresses

#### Livy Server Port

**Description**

The port of the Livy server

**Related Name**

livy.server.port

**Default Value**

28998

**API Name**

livy\_server\_port

**Required**

false

#### Livy Thrift Server Port

**Description**

The port of the Livy Thrift server

**Related Name**

livy.server.thrift.port

**Default Value**

20091

**API Name**

livy\_server\_thrift\_port

**Required**

false

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Enable TLS/SSL for Livy Server for Spark 3****Description**

Encrypt communication between clients and Livy Server for Spark 3 using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

livy.tls.enabled

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**Livy Server for Spark 3 TLS/SSL Server Keystore File Location**

**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Livy Server for Spark 3 is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

livy.keystore

**Default Value**

**API Name**

ssl\_server\_keystore\_location

**Required**

false

**Livy Server for Spark 3 TLS/SSL Server Keystore File Password**

**Description**

The password for the Livy Server for Spark 3 keystore file.

**Related Name**

livy.keystore.password

**Default Value**

**API Name**

ssl\_server\_keystore\_password

**Required**

false

**Stacks Collection**

**Stacks Collection Data Retention**

**Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

### Stacks Collection Directory

**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value****API Name**

stacks\_collection\_directory

**Required**

false

### Stacks Collection Enabled

**Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

### Stacks Collection Frequency

**Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

### Stacks Collection Method

**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Livy Server for Spark 3 Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy.conf****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server for Spark 3 Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy.conf parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy3-conf/livy.conf\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Admin Users****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Users parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy\_admin\_users

**Required**

---

true

### Suppress Parameter Validation: Extra JVM Options

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Extra JVM Options parameter.

#### Related Name

#### Default Value

false

#### API Name

role\_config\_suppression\_livy\_extra\_java\_opts

#### Required

true

### Suppress Parameter Validation: Livy Server for Spark 3 Environment Advanced Configuration Snippet (Safety Valve)

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server for Spark 3 Environment Advanced Configuration Snippet (Safety Valve) parameter.

#### Related Name

#### Default Value

false

#### API Name

role\_config\_suppression\_livy\_server\_for\_spark3\_role\_env\_safety\_valve

#### Required

true

### Suppress Parameter Validation: Livy Server Port

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server Port parameter.

#### Related Name

#### Default Value

false

#### API Name

role\_config\_suppression\_livy\_server\_port

#### Required

true

### Suppress Parameter Validation: Livy Thrift Server Port

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Thrift Server Port parameter.

#### Related Name

#### Default Value

false

**API Name**

role\_config\_suppression\_livy\_server\_thrift\_port

**Required**

true

**Suppress Parameter Validation: Livy Server for Spark 3 Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server for Spark 3 Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Livy Server for Spark 3 Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server for Spark 3 Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Livy Server for Spark 3 TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server for Spark 3 TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: Livy Server for Spark 3 TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy Server for Spark 3 TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

---

true

### Suppress Parameter Validation: Stacks Collection Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

### Suppress Health Test: Audit Pipeline Test

**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_livy\_for\_spark3\_livy\_server\_for\_spark3\_audit\_health

**Required**

true

### Suppress Health Test: File Descriptors

**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_livy\_for\_spark3\_livy\_server\_for\_spark3\_file\_descriptor

**Required**

true

### Suppress Health Test: Host Health

**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_livy\_for\_spark3\_livy\_server\_for\_spark3\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_livy\_for\_spark3\_livy\_server\_for\_spark3\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_livy\_for\_spark3\_livy\_server\_for\_spark3\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_livy\_for\_spark3\_livy\_server\_for\_spark3\_swap\_memory\_usage

**Required**

true

### Suppress Health Test: Swap Memory Usage Rate Beta

**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_livy\_for\_spark3\_livy\_server\_for\_spark3\_swap\_memory\_usage\_rate

**Required**

true

### Suppress Health Test: Unexpected Exits

**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_livy\_for\_spark3\_livy\_server\_for\_spark3\_unexpected\_exits

**Required**

true

## Service-Wide

### Advanced

#### Livy for Spark 3 Service Environment Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

LIVY\_FOR\_SPARK3\_service\_env\_safety\_valve

**Required**

false

### System Group

**Description**

The group that this service's processes should run as.

**Related Name**

<b>Default Value</b>
livy
<b>API Name</b>
process_groupname
<b>Required</b>
true

System User

<b>Description</b>
The user that this service's processes should run as.
<b>Related Name</b>
<b>Default Value</b>
livy
<b>API Name</b>
process_username
<b>Required</b>
true

Monitoring

Enable Service Level Health Alerts

<b>Description</b>
When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
enable_alerts
<b>Required</b>
false

Enable Configuration Change Alerts

<b>Description</b>
When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
enable_config_alerts
<b>Required</b>
false

Livy Server for Spark 3 Role Health Test

<b>Description</b>
--------------------

When computing the overall LIVY\_FOR\_SPARK3 health, consider Livy Server for Spark 3's health

**Related Name****Default Value**

true

**API Name**

LIVY\_FOR\_SPARK3\_LIVY\_SERVER\_FOR\_SPARK3\_health\_enabled

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific service.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd\_open WHERE roleType = DataNode and last(fd\_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

Other

HMS Service

**Description**

Name of the HMS service that this Livy for Spark 3 service instance depends on

**Related Name**

**Default Value**

**API Name**

hms\_service

**Required**

false

Recovery Directory (HDFS)

**Description**

Location where to store recovery metadata.

**Related Name**

livy.server.recovery.state-store.url

**Default Value**

/user/livy/recovery\_for\_livy3

**API Name**

livy\_recovery\_dir

**Required**

false

SPARK3\_ON\_YARN Service

**Description**

Name of the SPARK3\_ON\_YARN service that this Livy for Spark 3 service instance depends on

**Related Name**

**Default Value**

**API Name**

spark3\_on\_yarn\_service

**Required**

true

YARN Service

**Description**

Name of the YARN service that this Livy for Spark 3 service instance depends on

**Related Name**

**Default Value**

**API Name**

`yarn_service`**Required**`true`**Security****Kerberos Principal****Description**

Kerberos principal short name used by all roles of this service.

**Related Name****Default Value**`livy`**API Name**`kerberos_princ_name`**Required**`true`**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_cdh_version_validator`**Required**`true`**Suppress Configuration Validator: Deploy Directory****Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_client_config_root_dir`**Required**`true`**Suppress Configuration Validator: Livy for Spark 3 Client Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy-client.conf****Description**

Whether to suppress configuration warnings produced by the Livy for Spark 3 Client Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy-client.conf configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy3-conf/livy-client.conf\_client\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Livy Server for Spark 3 Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy.conf****Description**

Whether to suppress configuration warnings produced by the Livy Server for Spark 3 Advanced Configuration Snippet (Safety Valve) for livy3-conf/livy.conf configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy3-conf/livy.conf\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Admin Users****Description**

Whether to suppress configuration warnings produced by the Admin Users configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy\_admin\_users

**Required**

true

**Suppress Configuration Validator: Extra JVM Options****Description**

Whether to suppress configuration warnings produced by the Extra JVM Options configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_livy\_extra\_java\_opts

**Required**

true

**Suppress Configuration Validator: Livy Server for Spark 3 Environment Advanced Configuration Snippet (Safety Valve)**

**Description**

Whether to suppress configuration warnings produced by the Livy Server for Spark 3 Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_livy\_server\_for\_spark3\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Livy Server Port**

**Description**

Whether to suppress configuration warnings produced by the Livy Server Port configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_livy\_server\_port

**Required**

true

**Suppress Configuration Validator: Livy Thrift Server Port**

**Description**

Whether to suppress configuration warnings produced by the Livy Thrift Server Port configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_livy\_server\_thrift\_port

**Required**

true

**Suppress Configuration Validator: Livy Server for Spark 3 Logging Advanced Configuration Snippet (Safety Valve)**

**Description**

Whether to suppress configuration warnings produced by the Livy Server for Spark 3 Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Livy Server for Spark 3 Log Directory****Description**

Whether to suppress configuration warnings produced by the Livy Server for Spark 3 Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Gateway TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the Gateway TLS/SSL Trust Store File configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Configuration Validator: Gateway TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the Gateway TLS/SSL Trust Store Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Configuration Validator: Livy Server for Spark 3 TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the Livy Server for Spark 3 TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Configuration Validator: Livy Server for Spark 3 TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the Livy Server for Spark 3 TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Configuration Validator: Gateway Count Validator****Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_gateway\_count\_validator

**Required**

true

**Suppress Parameter Validation: Kerberos Principal****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

**Related Name****Default Value**

false

**API Name**

`service_config_suppression_kerberos_princ_name`**Required**`true`**Suppress Parameter Validation: Livy for Spark 3 Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Livy for Spark 3 Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_livy_for_spark3_service_env_safety_valve`**Required**`true`**Suppress Parameter Validation: Recovery Directory (HDFS)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recovery Directory (HDFS) parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_livy_recovery_dir`**Required**`true`**Suppress Configuration Validator: Livy Server for Spark 3 Count Validator****Description**

Whether to suppress configuration warnings produced by the Livy Server for Spark 3 Count Validator configuration validator.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_livy_server_for_spark3_count_validator`**Required**`true`**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Health Test: Livy Server for Spark 3 Health****Description**

Whether to suppress the results of the Livy Server for Spark 3 Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

service\_health\_suppression\_livy\_for\_spark3\_livy\_for\_spark3\_livy\_server\_for\_spark3\_health

**Required**

true

**Oozie Properties in Cloudera Runtime 7.1.8**

Role groups:

**Oozie Server****Advanced****Oozie Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when `java.lang.OutOfMemoryError` error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

`oom_heap_dump_dir`

**Default Value**

`/tmp`

**API Name**

`oom_heap_dump_dir`

**Required**

`false`

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

`true`

**API Name**

`oom_heap_dump_enabled`

**Required**

`true`

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

**Related Name****Default Value**

`true`

**API Name**

`oom_sigkill_enabled`

**Required**

`true`

**Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml****Description**

For advanced use only. A string to be inserted into `action-conf/default.xml` for this role only.

**Related Name****Default Value****API Name**

`oozie_action_config_default_safety_valve`

**Required**

false

**Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml****Description**

For advanced use only. A string to be inserted into oozie-site.xml for this role only.

**Related Name****Default Value****API Name**

oozie\_config\_safety\_valve

**Required**

false

**Oozie ActionService Executor Extension Classes****Description**

Comma-separated list of ActionService executor extension classes. Only action types with associated executors can be used in workflows. For CDH 5.4 and higher, this parameter is used only to specify additional classes for workflows. All executor extension classes included in that release will be added automatically and do not need to be specified.

**Related Name**

oozie.service.ActionService.executor.ext.classes

**Default Value****API Name**

oozie\_executor\_extension\_classes

**Required**

false

**Java Configuration Options for Oozie Server****Description**

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here. Note: When CM version is 6.3.0 or greater, {{JAVA\_GC\_ARGS}} will be replaced by JVM Garbage Collection arguments based on the runtime Java JVM version.

**Related Name****Default Value**

-XX:+UseG1GC -XX:MaxGCPauseMillis=20 -XX:InitiatingHeapOccupancyPercent=35 -  
XX:G1HeapRegionSize=16M -XX:MinMetaspaceFreeRatio=50 -XX:MaxMetaspaceFreeRatio=80  
-XX:+DisableExplicitGC

**API Name**

oozie\_java\_opts

**Required**

false

**Directory For JSP Temp Files****Description**

Directory to use to for temporary JSP file storage.

**Related Name**

oozie.jsp.tmp.dir

**Default Value**

/tmp

**API Name**

oozie\_jsp\_tmp\_dir

**Required**

false

**Default Launcher Max Attempts****Description**

The default YARN maximal attempt count of the Launcher ApplicationMaster.

**Related Name**

oozie.launcher.default.max.attempts

**Default Value**

2

**API Name**

oozie\_launcher\_default\_max\_attempts

**Required**

false

**Default Launcher Memory****Description**

The default amount of memory in MiB that is allocated for the Launcher ApplicationMasters.

**Related Name**

oozie.launcher.default.memory.mb

**Default Value**

2 GiB

**API Name**

oozie\_launcher\_default\_memory

**Required**

false

**Default Launcher Queue****Description**

The default YARN pool where the Launcher ApplicationMaster is placed.

**Related Name**

oozie.launcher.default.queue

**Default Value**

default

**API Name**

oozie\_launcher\_default\_queue

**Required**

false

**Oozie Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

OOZIE\_SERVER\_role\_env\_safety\_valve

**Required**

false

**Oozie HTTP Request Header Size****Description**

Controls the size of the HTTP request header.

**Related Name**

oozie.http.request.header.size

**Default Value**

64 KiB

**API Name**

oozie\_service\_http\_request\_header\_size

**Required**

false

**Oozie HTTP Response Header Size****Description**

Controls the size of the HTTP response header.

**Related Name**

oozie.http.response.header.size

**Default Value**

64 KiB

**API Name**

oozie\_service\_http\_response\_header\_size

**Required**

false

**Oozie SchemaService Workflow Extension Schemas****Description**

Comma-separated list of SchemaService workflow extension schemas for additional action types. From CDH 5.4 and higher, this parameter is used only to specify additional schemas for workflows. All schemas included in that release will be added automatically and do not need to be specified.

**Related Name**

oozie.service.SchemaService.wf.ext.schemas

**Default Value****API Name**

`oozie_workflow_extension_schemas`**Required**`false`**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**`false`**API Name**`process_auto_restart`**Required**`true`**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**`true`**API Name**`process_should_monitor`**Required**`true`**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**`3`**API Name**`process_start_retries`**Required**`false`**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name**

**Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**Database**

**Oozie Server Data Directory**

**Description**

Directory where the Oozie Server places its data. Only applicable when using Derby as the database type.

**Related Name**

**Default Value**

/var/lib/oozie/data

**API Name**

oozie\_data\_dir

**Required**

false

**Oozie Server Database Host**

**Description**

Hostname of the database used by Oozie Server. If the port is non-default for your database type, use host:port notation. Does not apply if you are using Derby as the database type.

**Related Name**

**Default Value**

localhost

**API Name**

oozie\_database\_host

**Required**

false

**Oozie Server Database Name**

**Description**

Name of the database used by Oozie Server.

**Related Name**

**Default Value**

oozie

**API Name**

oozie\_database\_name

**Required**

false

**Oozie Server Database Password****Description**

Password for connecting to the database used by Oozie Server. Does not apply if you are using Derby as the database type.

**Related Name**

oozie.service.JPAService.jdbc.password

**Default Value****API Name**

oozie\_database\_password

**Required**

false

**Oozie Server Database Type****Description**

Type of the database used by Oozie Server.

**Related Name****Default Value**

derby

**API Name**

oozie\_database\_type

**Required**

false

**Oozie Server Database User****Description**

Username for connecting to the database used by Oozie Server. Does not apply if you are using Derby as the database type.

**Related Name**

oozie.service.JPAService.jdbc.username

**Default Value**

sa

**API Name**

oozie\_database\_user

**Required**

false

**Logs****Oozie Server Logging Threshold****Description**

The minimum log level for Oozie Server logs

**Related Name**

<b>Default Value</b>	INFO
<b>API Name</b>	log_threshold
<b>Required</b>	false

Oozie Server Maximum Log File Backups

<b>Description</b>	The maximum number of rolled log files to keep for Oozie Server logs. Typically used by log4j or logback.
<b>Related Name</b>	
<b>Default Value</b>	720
<b>API Name</b>	max_log_backup_index
<b>Required</b>	false

Oozie Server Log Directory

<b>Description</b>	Directory where Oozie Server will place its log files.
<b>Related Name</b>	
<b>Default Value</b>	/var/log/oozie
<b>API Name</b>	oozie_log_dir
<b>Required</b>	false

Monitoring

Enable Health Alerts for this Role

<b>Description</b>	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>	
<b>Default Value</b>	true
<b>API Name</b>	enable_alerts
<b>Required</b>	false

### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

### Heap Dump Directory Free Space Monitoring Absolute Thresholds

**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

heap\_dump\_directory\_free\_space\_absolute\_thresholds

**Required**

false

### Heap Dump Directory Free Space Monitoring Percentage Thresholds

**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Heap Dump Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

heap\_dump\_directory\_free\_space\_percentage\_thresholds

**Required**

false

### Log Directory Free Space Monitoring Absolute Thresholds

**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

`log_directory_free_space_absolute_thresholds`**Required**`false`**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**`Warning: Never, Critical: Never`**API Name**`log_directory_free_space_percentage_thresholds`**Required**`false`**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: `{ "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm_heap_used_mb"] }`

**Related Name****Default Value****API Name**`monitoring_metric_filter`**Required**`false`

### Workflow Status Metrics Collection Interval

**Description**

Workflow Status metrics collection interval.

**Related Name**

oozie.service.DBLiteWorkflowStoreService.status.metrics.collection.interval

**Default Value**

1 minute(s)

**API Name**

oozie\_job\_metric\_collection\_interval

**Required**

false

### Oozie Server Callable Queue Monitoring Threshold

**Description**

The health test thresholds of the weighted average size of the Oozie Server callable queue over a recent period. See also Oozie Server Callable Queue Monitoring Period.

**Related Name****Default Value**

Warning: 80.0 %, Critical: 95.0 %

**API Name**

oozie\_server\_callable\_queue\_threshold

**Required**

false

### Oozie Server Callable Queue Monitoring Period

**Description**

The period over which to compute the moving average of the callable queue size.

**Related Name****Default Value**

5 minute(s)

**API Name**

oozie\_server\_callable\_queue\_window

**Required**

false

### File Descriptor Monitoring Thresholds

**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

oozie\_server\_fd\_thresholds

**Required**

false

**Oozie Server Host Health Test****Description**

When computing the overall Oozie Server health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

oozie\_server\_host\_health\_enabled

**Required**

false

**Pause Duration Thresholds****Description**

The health test thresholds for the weighted average extra time the pause monitor spent paused. Specified as a percentage of elapsed wall clock time.

**Related Name****Default Value**

Warning: 30.0, Critical: 60.0

**API Name**

oozie\_server\_pause\_duration\_thresholds

**Required**

false

**Pause Duration Monitoring Period****Description**

The period to review when computing the moving average of extra time the pause monitor spent paused.

**Related Name****Default Value**

5 minute(s)

**API Name**

oozie\_server\_pause\_duration\_window

**Required**

false

**Oozie Server Process Health Test****Description**

Enables the health test that the Oozie Server's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

oozie\_server\_scm\_health\_enabled

**Required**

false

**Enable Oozie Server Shared Libraries Version Check****Description**

If true, enables version check for Oozie Server and installed shared libraries.

**Related Name****Default Value**

true

**API Name**

oozie\_server\_shared\_lib\_version\_check\_enabled

**Required**

false

**Web Metric Collection****Description**

Enables the health test that the Cloudera Manager Agent can successfully contact and gather metrics from the web server.

**Related Name****Default Value**

true

**API Name**

oozie\_server\_web\_metric\_collection\_enabled

**Required**

false

**Web Metric Collection Duration****Description**

The health test thresholds on the duration of the metrics request to the web server.

**Related Name****Default Value**

Warning: 10 second(s), Critical: Never

**API Name**

oozie\_server\_web\_metric\_collection\_thresholds

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name**

**Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other****Oozie Email Action From Address****Description**

The from address to be used for mailing all emails for Oozie email action

**Related Name**

oozie.email.from.address

**Default Value**

	oozie@localhost
API Name	
	oozie_email_from_address
Required	
	false

Oozie Email Action SMTP Authentication Enabled

Description	Enable SMTP authentication for Oozie email action
Related Name	
	oozie.email.smtp.auth
Default Value	
	false
API Name	
	oozie_email_smtp_auth
Required	
	false

Oozie Email Action SMTP Host

Description	The SMTP server host to use for Oozie email action
Related Name	
	oozie.email.smtp.host
Default Value	
	localhost
API Name	
	oozie_email_smtp_host
Required	
	false

Oozie Email Action SMTP Authentication Password

Description	SMTP password for Oozie email action
Related Name	
	oozie.email.smtp.password
Default Value	
API Name	
	oozie_email_smtp_password
Required	
	false

Oozie Email Action SMTP Authentication Username

Description	SMTP username for Oozie email action
-------------	--------------------------------------

**Related Name**

oozie.email.smtp.username

**Default Value****API Name**

oozie\_email\_smtp\_username

**Required**

false

**Oozie Server Plugins****Description**

Comma-separated list of Oozie plug-ins to be activated. If one plugin cannot be loaded, all the plugins are ignored.

**Related Name**

oozie.services.ext

**Default Value****API Name**

oozie\_plugins\_list

**Required**

false

**Maximum concurrency for a given callable type****Description**

Maximum concurrency for a given callable type.. Each command is a callable type: submit, start, run, etc.. Each action type is a callable type: MapReduce, SSH, sub-workflow, etc. All commands that use action executors (action-start, action-end. etc.) use the action type as the callable type.

**Related Name**

oozie.service.CallableQueueService.callable.concurrency

**Default Value**

10

**API Name**

oozie\_service\_callablequeueservice\_callable\_concurrency

**Required**

false

**Maximum Callable Queue Size****Description**

Maximum callable queue size

**Related Name**

oozie.service.CallableQueueService.queue.size

**Default Value**

10000

**API Name**

oozie\_service\_callablequeueservice\_queue\_size

**Required**

---

false

### Number Threads For Executing Callables

#### Description

Number of threads used for executing callables

#### Related Name

oozie.service.CallableQueueService.threads

#### Default Value

50

#### API Name

oozie\_service\_callablequeueservice\_threads

#### Required

false

### Enable The Metrics Instrumentation Service

#### Description

Whether to use the Codehale-based metrics for instrumentation. Enabling this disables the 'instrumentation' REST endpoint and enables the 'metrics' REST endpoint (\*hostname:port\*/v2/admin/metrics).

#### Related Name

#### Default Value

true

#### API Name

oozie\_use\_metric\_instrumentation

#### Required

false

### Enable Oozie Server Web Console

#### Description

If true, enables the Oozie Server web console. ExtJS 2.2 zip archive must be extracted to /var/lib/oozie on the same host as the Oozie Server.

#### Related Name

#### Default Value

false

#### API Name

oozie\_web\_console

#### Required

false

### Days to Keep Completed Bundle Jobs

#### Description

Completed bundle jobs older than this value, in days, will be purged by the PurgeService.

#### Related Name

oozie.service.PurgeService.bundle.older.than

#### Default Value

7 day(s)

**API Name**

purgeservice\_bundle\_older\_than

**Required**

false

**Days to Keep Completed Coordinator Jobs****Description**

Completed coordinator jobs older than this value, in days, will be purged by the PurgeService.

**Related Name**

oozie.service.PurgeService.coord.older.than

**Default Value**

7 day(s)

**API Name**

purgeservice\_coord\_older\_than

**Required**

false

**Days to Keep Completed Workflow Jobs****Description**

Completed workflow jobs older than this value, in days, will be purged by the PurgeService.

**Related Name**

oozie.service.PurgeService.older.than

**Default Value**

30 day(s)

**API Name**

purgeservice\_older\_than

**Required**

false

**Enable Purge for Long-Running Coordinator Jobs****Description**

Whether to purge completed workflows and their corresponding coordinator actions of long-running coordinator jobs if the completed workflow jobs are older than the value specified in oozie.service.PurgeService.older.than.

**Related Name**

oozie.service.PurgeService.purge.old.coord.action

**Default Value**

true

**API Name**

purgeservice\_purge\_old\_coord\_action

**Required**

false

Performance

Default Launcher Virtual CPU Cores

Description	The default number of Virtual CPU Cores that are allocated for the Launcher ApplicationMasters.
Related Name	oozie.launcher.default.vcores
Default Value	1
API Name	oozie_launcher_default_vcores
Required	false

Oozie Server Threadpool Size

Description	Controls the threadpool size for the Oozie Server (both Jetty and Tomcat).
Related Name	oozie.server.threadpool.max.threads
Default Value	150
API Name	oozie_service_threadpool_max_threads
Required	false

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	rlimit_fds
Required	false

Ports and Addresses

Oozie Email Action SMTP Port

Description	The SMTP server port to use for Oozie email action
Related Name	oozie.email.smtp.port
Default Value	

25
<b>API Name</b>
oozie_email_smtp_prt
<b>Required</b>
false

Oozie HTTP Port

<b>Description</b>
Port of Oozie Server
<b>Related Name</b>
oozie.http.port
<b>Default Value</b>
11000
<b>API Name</b>
oozie_http_port
<b>Required</b>
false

Oozie HTTPS Port

<b>Description</b>
Port of the Oozie Server when using TLS/SSL.
<b>Related Name</b>
oozie.https.port
<b>Default Value</b>
11443
<b>API Name</b>
oozie_https_port
<b>Required</b>
false

Resource Management

Java Heap Size of Oozie Server in Bytes

<b>Description</b>
Maximum size in bytes for the Java Process heap memory. Passed to Java -Xmx.
<b>Related Name</b>
<b>Default Value</b>
1 GiB
<b>API Name</b>
oozie_java_heapsize
<b>Required</b>
false

Cgroup CPU Shares

<b>Description</b>
--------------------

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the

value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Excluded Cipher Suites****Description**

List of cipher suite names that should be excluded.

**Related Name**

oozie.https.exclude.cipher.suites

**Default Value**

TLS\_ECDHE\_RSA\_WITH\_RC4\_128\_SHA  
SSL\_DHE\_RSA\_EXPORT\_WITH\_DES40\_CBC\_SHA SSL\_RSA\_WITH\_DES\_CBC\_SHA  
SSL\_DHE\_RSA\_WITH\_DES\_CBC\_SHA SSL\_RSA\_EXPORT\_WITH\_RC4\_40\_MD5  
SSL\_RSA\_EXPORT\_WITH\_DES40\_CBC\_SHA SSL\_RSA\_WITH\_RC4\_128\_MD5

**API Name**

oozie\_https\_exclude\_cipher\_suites

**Required**

false

**Enabled TLS Protocols****Description**

TLS protocols accepted by the Oozie Server.

**Related Name**

oozie.https.include.protocols

**Default Value**

SSLv2Hello, TLSv1, TLSv1.1, TLSv1.2

**API Name**

oozie\_https\_include\_protocols

**Required**

false

**Oozie TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Oozie is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

oozie.https.keystore.file

**Default Value**

/var/lib/oozie/.keystore

**API Name**

oozie\_https\_keystore\_file

**Required**

false

**Oozie TLS/SSL Server Keystore File Password****Description**

The password for the Oozie keystore file.

**Related Name**

oozie.https.keystore.pass

**Default Value****API Name**

oozie\_https\_keystore\_password

**Required**

false

**Oozie TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Oozie might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

oozie.https.truststore.file

**Default Value****API Name**

oozie\_https\_truststore\_file

**Required**

false

**Oozie TLS/SSL Trust Store Password**

**Description**

The password for the Oozie TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

oozie.https.truststore.pass

**Default Value**

**API Name**

oozie\_https\_truststore\_password

**Required**

false

**Stacks Collection**

**Stacks Collection Data Retention**

**Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

**Stacks Collection Directory**

**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value**

**API Name**

stacks\_collection\_directory

**Required**

false

### Stacks Collection Enabled

**Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

### Stacks Collection Frequency

**Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

### Stacks Collection Method

**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

### Suppressions

#### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Oozie Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_action\_config\_default\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Oozie Server Data Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Data Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_data\_dir

**Required**

true

**Suppress Parameter Validation: Oozie Server Database Host****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Database Host parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_database\_host

**Required**

true

**Suppress Parameter Validation: Oozie Server Database Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Database Name parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_oozie_database_name`**Required**`true`**Suppress Parameter Validation: Oozie Server Database Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Database Password parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_oozie_database_password`**Required**`true`**Suppress Parameter Validation: Oozie Server Database User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Database User parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_oozie_database_user`**Required**`true`**Suppress Parameter Validation: Oozie Email Action From Address****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action From Address parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_oozie_email_from_address`**Required**`true`**Suppress Parameter Validation: Oozie Email Action SMTP Host****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action SMTP Host parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_email\_smtp\_host

**Required**

true

**Suppress Parameter Validation: Oozie Email Action SMTP Authentication Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action SMTP Authentication Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_email\_smtp\_password

**Required**

true

**Suppress Parameter Validation: Oozie Email Action SMTP Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action SMTP Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_email\_smtp\_prt

**Required**

true

**Suppress Parameter Validation: Oozie Email Action SMTP Authentication Username****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Email Action SMTP Authentication Username parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_email\_smtp\_username

**Required**

true

**Suppress Parameter Validation: Oozie ActionService Executor Extension Classes****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie ActionService Executor Extension Classes parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_executor\_extension\_classes

**Required**

true

**Suppress Parameter Validation: Oozie HTTP Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie HTTP Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_http\_port

**Required**

true

**Suppress Parameter Validation: Excluded Cipher Suites****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Excluded Cipher Suites parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_https\_exclude\_cipher\_suites

**Required**

true

**Suppress Parameter Validation: Oozie TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_https\_keystore\_file

**Required**

---

true

### Suppress Parameter Validation: Oozie TLS/SSL Server Keystore File Password

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_https\_keystore\_password

**Required**

true

### Suppress Parameter Validation: Oozie HTTPS Port

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie HTTPS Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_https\_port

**Required**

true

### Suppress Parameter Validation: Oozie TLS/SSL Trust Store File

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_https\_truststore\_file

**Required**

true

### Suppress Parameter Validation: Oozie TLS/SSL Trust Store Password

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_oozie_https_truststore_password`**Required**`true`**Suppress Parameter Validation: Java Configuration Options for Oozie Server****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Configuration Options for Oozie Server parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_oozie_java_opts`**Required**`true`**Suppress Parameter Validation: Directory For JSP Temp Files****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Directory For JSP Temp Files parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_oozie_jsp_tmp_dir`**Required**`true`**Suppress Parameter Validation: Default Launcher Queue****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Launcher Queue parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_oozie_launcher_default_queue`**Required**`true`**Suppress Parameter Validation: Oozie Server Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_log\_dir

**Required**

true

**Suppress Parameter Validation: Oozie Server Plugins****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Plugins parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_plugins\_list

**Required**

true

**Suppress Parameter Validation: Oozie Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Oozie SchemaService Workflow Extension Schemas****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie SchemaService Workflow Extension Schemas parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_workflow\_extension\_schemas

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

`role_health_suppression_oozie_server_audit_health`**Required**`true`**Suppress Health Test: Callable Queue Size****Description**

Whether to suppress the results of the Callable Queue Size health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_oozie_server_callablequeue_size_health`**Required**`true`**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_oozie_server_file_descriptor`**Required**`true`**Suppress Health Test: Heap Dump Directory Free Space****Description**

Whether to suppress the results of the Heap Dump Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_oozie_server_heap_dump_directory_free_space`**Required**`true`**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_oozie\_server\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_oozie\_server\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Pause Duration****Description**

Whether to suppress the results of the Pause Duration health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_oozie\_server\_pause\_duration

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_oozie\_server\_scm\_health

**Required**

true

**Suppress Health Test: Oozie Server Shared Library Check****Description**

Whether to suppress the results of the Oozie Server Shared Library Check health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_oozie\_server\_shared\_lib\_version\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_oozie\_server\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_oozie\_server\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits**

**Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_oozie\_server\_unexpected\_exits

**Required**

true

**Suppress Health Test: Web Server Status**

**Description**

Whether to suppress the results of the Web Server Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_oozie\_server\_web\_metric\_collection

**Required**

true

**Service-Wide**

**Advanced**

**Oozie Service Environment Advanced Configuration Snippet (Safety Valve)**

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name**

**Default Value**

**API Name**

oozie\_env\_safety\_valve

**Required**

false

**System Group**

**Description**

The group that this service's processes should run as.

**Related Name**

<b>Default Value</b>	oozie
<b>API Name</b>	process_groupname
<b>Required</b>	true

System User

<b>Description</b>	The user that this service's processes should run as.
<b>Related Name</b>	
<b>Default Value</b>	oozie
<b>API Name</b>	process_username
<b>Required</b>	true

Database

Database Dump File

<b>Description</b>	File where the database gets dumped to or loaded from.
<b>Related Name</b>	
<b>Default Value</b>	/tmp/oozie_database_dump.zip
<b>API Name</b>	database_dump_file
<b>Required</b>	false

Monitoring

Enable Service Level Health Alerts

<b>Description</b>	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>	
<b>Default Value</b>	true
<b>API Name</b>	enable_alerts
<b>Required</b>	false

### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

### Healthy Oozie Server Monitoring Thresholds

**Description**

The health test thresholds of the overall Oozie Server health. The check returns "Concerning" health if the percentage of "Healthy" Oozie Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Oozie Servers falls below the critical threshold.

**Related Name****Default Value**

Warning: 99.0 %, Critical: 51.0 %

**API Name**

oozie\_servers\_healthy\_thresholds

**Required**

false

### Service Triggers

**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific service.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.
- streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd\_open WHERE roleType = DataNode and last(fd\_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name**

**Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

**Other****Hive Service****Description**

Name of the Hive service that this Oozie service instance depends on. This is used to configure Oozie HCat integration.

**Related Name****Default Value****API Name**

hive\_service

**Required**

false

**MapReduce Service****Description**

Service to run MapReduce jobs against

**Related Name****Default Value****API Name**

mapreduce\_yarn\_service

**Required**

true

**Oozie Event Listeners****Description**

List of event listeners used by the Oozie service. Listeners needed for JMS or SLA integration are automatically emitted if they are enabled.

**Related Name**`oozie.service.EventHandlerService.event.listeners`**Default Value****API Name**`oozie_event_listeners`**Required**`false`**JMS Broker****Description**

URL of the JMS Broker used by the Oozie service in JMS integration is enabled.

**Related Name**`oozie.jms.producer.connection.properties`**Default Value**`tcp://localhost:61616`**API Name**`oozie_jms_broker`**Required**`false`**Oozie Load Balancer Hostname****Description**

Hostname of the load balancer used if Oozie HA is enabled.

**Related Name****Default Value****API Name**`oozie_load_balancer`**Required**`false`**Coordinator Job Lookup Interval****Description**

Coordinator Job Lookup trigger command is scheduled at this interval (in seconds).

**Related Name**`oozie.service.CoordMaterializeTriggerService.lookup.interval`**Default Value**`5 minute(s)`**API Name**`oozie_service_coord_lookup_interval`**Required**`false`**Coordinator Action Input Check Default Timeout****Description**

Default timeout for a Coordinator Action input check (in minutes) for a Coordinator Job.

**Related Name**

oozie.service.coord.normal.default.timeout

**Default Value**

2 hour(s)

**API Name**

oozie\_service\_coord\_normal\_default\_timeout

**Required**

false

### ShareLib Root Directory

**Description**

Root of the directory in HDFS where the Oozie ShareLibs are stored. The libraries are stored in the share/lib subdirectory under the specified root directory.

**Related Name**

oozie.service.WorkflowAppService.system.libpath

**Default Value**

/user/oozie

**API Name**

oozie\_sharelib\_rootdir

**Required**

true

### Oozie Upload ShareLib Command Timeout

**Description**

The timeout in seconds used for the Oozie Upload ShareLib command. When the value is zero, there is no timeout for the command.

**Related Name****Default Value**

270

**API Name**

oozie\_upload\_sharelib\_cmd\_timeout

**Required**

false

### Oozie Upload ShareLib Command Concurrency Level

**Description**

The number of threads that Oozie will use for the Upload ShareLib command.

**Related Name****Default Value**

8

**API Name**

oozie\_upload\_sharelib\_concurrency

**Required**

false

Enable JMS Integration

Description

Whether to configure Oozie properties needed for JMS integration

Related Name

Default Value

false

API Name

oozie\_use\_jms

Required

false

Enable SLA Integration

Description

Whether to configure Oozie properties needed for SLA integration

Related Name

Default Value

false

API Name

oozie\_use\_sla

Required

false

Use ACLs on Znode

Description

Use ACLs on Znode while a secure ZooKeeper is used for Oozie High Availability. Note: This config is not emitted if ZooKeeper is not secure.

Related Name

oozie.zookeeper.secure

Default Value

true

API Name

oozie\_zk\_secure

Required

false

ZooKeeper Namespace

Description

Namespace used by this Oozie service in ZooKeeper when High Availability is enabled.

Related Name

oozie.zookeeper.namespace

Default Value

oozie

<b>API Name</b>	oozie_zookeeper_namespace
<b>Required</b>	false

Spark on Yarn Service

<b>Description</b>	Name of the Spark on Yarn service that this Oozie service instance depends on
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	spark_on_yarn_service
<b>Required</b>	false

ZooKeeper Service

<b>Description</b>	Name of the ZooKeeper service that this Oozie service instance depends on
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	zookeeper_service
<b>Required</b>	false

Ports and Addresses

Oozie Load Balancer HTTP Port

<b>Description</b>	HTTP port of the load balancer used if Oozie HA is enabled and SSL is disabled.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	oozie_load_balancer_http_port
<b>Required</b>	false

Oozie Load Balancer HTTPS Port

<b>Description</b>	HTTPS port of the load balancer used if Oozie HA is enabled and SSL is enabled.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	

oozie_load_balancer_https_port
<b>Required</b>
false

Security

Kerberos Principal

<b>Description</b>
Kerberos principal short name used by all roles of this service.
<b>Related Name</b>
<b>Default Value</b>
oozie
<b>API Name</b>
kerberos_princ_name
<b>Required</b>
true

Oozie Credential Classes

<b>Description</b>
A list of credential class mappings for CredentialsProvider.
<b>Related Name</b>
oozie.credentials.credentialclasses
<b>Default Value</b>
hcat=org.apache.oozie.action.hadoop.HCatCredentials hbase=org.apache.oozie.action.hadoop.HbaseCredentials hive2=org.apache.oozie.action.hadoop.Hive2Credentials
<b>API Name</b>
oozie_credential_classes
<b>Required</b>
false

Enable TLS/SSL for Oozie

<b>Description</b>
Encrypt communication between clients and Oozie using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).
<b>Related Name</b>
oozie.https.enabled
<b>Default Value</b>
false
<b>API Name</b>
oozie_use_ssl
<b>Required</b>
false

## Suppressions

### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

### Suppress Configuration Validator: Oozie Server Logging Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the Oozie Server Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Heap Dump Directory

**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

### Suppress Configuration Validator: Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml

**Description**

Whether to suppress configuration warnings produced by the Oozie Server Advanced Configuration Snippet (Safety Valve) for action-conf/default.xml configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_action\_config\_default\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml****Description**

Whether to suppress configuration warnings produced by the Oozie Server Advanced Configuration Snippet (Safety Valve) for oozie-site.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Oozie Server Data Directory****Description**

Whether to suppress configuration warnings produced by the Oozie Server Data Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_data\_dir

**Required**

true

**Suppress Configuration Validator: Oozie Server Database Host****Description**

Whether to suppress configuration warnings produced by the Oozie Server Database Host configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_database\_host

**Required**

true

**Suppress Configuration Validator: Oozie Server Database Name****Description**

Whether to suppress configuration warnings produced by the Oozie Server Database Name configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_database\_name

**Required**

true

**Suppress Configuration Validator: Oozie Server Database Password****Description**

Whether to suppress configuration warnings produced by the Oozie Server Database Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_database\_password

**Required**

true

**Suppress Configuration Validator: Oozie Server Database User****Description**

Whether to suppress configuration warnings produced by the Oozie Server Database User configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_database\_user

**Required**

true

**Suppress Configuration Validator: Oozie Email Action From Address****Description**

Whether to suppress configuration warnings produced by the Oozie Email Action From Address configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_oozie_email_from_address`**Required**`true`**Suppress Configuration Validator: Oozie Email Action SMTP Host****Description**

Whether to suppress configuration warnings produced by the Oozie Email Action SMTP Host configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_oozie_email_smtp_host`**Required**`true`**Suppress Configuration Validator: Oozie Email Action SMTP Authentication Password****Description**

Whether to suppress configuration warnings produced by the Oozie Email Action SMTP Authentication Password configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_oozie_email_smtp_password`**Required**`true`**Suppress Configuration Validator: Oozie Email Action SMTP Port****Description**

Whether to suppress configuration warnings produced by the Oozie Email Action SMTP Port configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_oozie_email_smtp_prt`**Required**`true`**Suppress Configuration Validator: Oozie Email Action SMTP Authentication Username****Description**

Whether to suppress configuration warnings produced by the Oozie Email Action SMTP Authentication Username configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_email\_smtp\_username

**Required**

true

**Suppress Configuration Validator: Oozie ActionService Executor Extension Classes****Description**

Whether to suppress configuration warnings produced by the Oozie ActionService Executor Extension Classes configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_executor\_extension\_classes

**Required**

true

**Suppress Configuration Validator: Oozie HTTP Port****Description**

Whether to suppress configuration warnings produced by the Oozie HTTP Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_http\_port

**Required**

true

**Suppress Configuration Validator: Excluded Cipher Suites****Description**

Whether to suppress configuration warnings produced by the Excluded Cipher Suites configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_https\_exclude\_cipher\_suites

**Required**

true

**Suppress Configuration Validator: Oozie TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the Oozie TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_https\_keystore\_file

**Required**

true

**Suppress Configuration Validator: Oozie TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the Oozie TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_https\_keystore\_password

**Required**

true

**Suppress Configuration Validator: Oozie HTTPS Port****Description**

Whether to suppress configuration warnings produced by the Oozie HTTPS Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_https\_port

**Required**

true

**Suppress Configuration Validator: Oozie TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the Oozie TLS/SSL Trust Store File configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_https\_truststore\_file

**Required**

---

true

### Suppress Configuration Validator: Oozie TLS/SSL Trust Store Password

**Description**

Whether to suppress configuration warnings produced by the Oozie TLS/SSL Trust Store Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_https\_truststore\_password

**Required**

true

### Suppress Configuration Validator: Java Configuration Options for Oozie Server

**Description**

Whether to suppress configuration warnings produced by the Java Configuration Options for Oozie Server configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_java\_opts

**Required**

true

### Suppress Configuration Validator: Directory For JSP Temp Files

**Description**

Whether to suppress configuration warnings produced by the Directory For JSP Temp Files configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_jsp\_tmp\_dir

**Required**

true

### Suppress Configuration Validator: Default Launcher Queue

**Description**

Whether to suppress configuration warnings produced by the Default Launcher Queue configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_launcher\_default\_queue

**Required**

true

**Suppress Configuration Validator: Oozie Server Log Directory****Description**

Whether to suppress configuration warnings produced by the Oozie Server Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_log\_dir

**Required**

true

**Suppress Configuration Validator: Oozie Server Plugins****Description**

Whether to suppress configuration warnings produced by the Oozie Server Plugins configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_plugins\_list

**Required**

true

**Suppress Configuration Validator: Oozie Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Oozie Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Oozie SchemaService Workflow Extension Schemas****Description**

Whether to suppress configuration warnings produced by the Oozie SchemaService Workflow Extension Schemas configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oozie\_workflow\_extension\_schemas

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Parameter Validation: Database Dump File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Database Dump File parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_database\_dump\_file

**Required**

true

**Suppress Parameter Validation: Kerberos Principal****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kerberos\_princ\_name

**Required**

true

**Suppress Parameter Validation: Oozie Credential Classes****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Credential Classes parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_oozie\_credential\_classes

**Required**

true

**Suppress Parameter Validation: Oozie Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

`service_config_suppression_oozie_env_safety_valve`**Required**`true`**Suppress Parameter Validation: Oozie Event Listeners****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Event Listeners parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_oozie_event_listeners`**Required**`true`**Suppress Parameter Validation: JMS Broker****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JMS Broker parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_oozie_jms_broker`**Required**`true`**Suppress Parameter Validation: Oozie Load Balancer Hostname****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Load Balancer Hostname parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_oozie_load_balancer`**Required**`true`**Suppress Parameter Validation: Oozie Load Balancer HTTP Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Load Balancer HTTP Port parameter.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_oozie\_load\_balancer\_http\_port

**Required**

true

**Suppress Parameter Validation: Oozie Load Balancer HTTPS Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Oozie Load Balancer HTTPS Port parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_oozie\_load\_balancer\_https\_port

**Required**

true

**Suppress Configuration Validator: Oozie Server Count Validator****Description**

Whether to suppress configuration warnings produced by the Oozie Server Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_oozie\_server\_count\_validator

**Required**

true

**Suppress Parameter Validation: ShareLib Root Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ShareLib Root Directory parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_oozie\_sharelib\_rootdir

**Required**

true

**Suppress Parameter Validation: ZooKeeper Namespace****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ZooKeeper Namespace parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_oozie\_zookeeper\_namespace

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Health Test: Oozie Server Health**

**Description**

Whether to suppress the results of the Oozie Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

service\_health\_suppression\_oozie\_oozie\_servers\_healthy

**Required**

true

**Ozone Properties in Cloudera Runtime 7.1.8**

Role groups:

**Gateway**

**Advanced**

**Deploy Directory**

**Description**

The directory where the client configs will be deployed

**Related Name**

**Default Value**

/etc/ozone

**API Name**

client\_config\_root\_dir

**Required**

true

**Gateway Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

For advanced use only, a string to be inserted into the client configuration for ozone-conf/ozone-site.xml.

**Related Name****Default Value****API Name**

ozone-conf/ozone-site.xml\_client\_config\_safety\_valve

**Required**

false

**Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

For advanced use only, a string to be inserted into the client configuration for ozone-conf/ssl-client.xml.

**Related Name****Default Value****API Name**

ozone-conf/ssl-client.xml\_client\_config\_safety\_valve

**Required**

false

**Logs****Gateway Logging Threshold****Description**

The minimum log level for Gateway logs

**Related Name****Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

**Monitoring****Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Other****Alternatives Priority****Description**

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

**Related Name****Default Value**

50

**API Name**

client\_config\_priority

**Required**

true

**Security****Gateway TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

ssl.client.truststore.location

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

### Gateway TLS/SSL Trust Store Password

**Description**

The password for the Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

ssl.client.truststore.password

**Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

### Suppressions

#### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

#### Suppress Parameter Validation: Deploy Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

#### Suppress Parameter Validation: Gateway Logging Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ozone-site.xml\_client\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-client.xml\_client\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Gateway TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Gateway TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Ozone DataNode****Advanced****Ozone DataNode Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties****Description**

For advanced use only. A string to be inserted into ozone-conf/dn-audit-log4j2.properties for this role only.

**Related Name****Default Value****API Name**

ozone-conf/dn-audit-log4j2.properties\_role\_safety\_valve

**Required**

false

**Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ozone-site.xml\_role\_safety\_valve

**Required**

false

**Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ssl-client.xml\_role\_safety\_valve

**Required**

false

**Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ssl-server.xml\_role\_safety\_valve

**Required**

false

**Ozone DataNode Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

OZONE\_DATANODE\_role\_env\_safety\_valve

**Required**

false

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

### Enable Metric Collection

**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

### Process Start Retry Attempts

**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

### Process Start Wait Timeout

**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

<b>API Name</b>
process_start_secs
<b>Required</b>
false

Logs

Ozone DataNode Log Directory

<b>Description</b>
The log directory for log files of the role Ozone DataNode.
<b>Related Name</b>
log.dir
<b>Default Value</b>
/var/log/hadoop-ozone
<b>API Name</b>
log_dir
<b>Required</b>
false

Ozone DataNode Logging Threshold

<b>Description</b>
The minimum log level for Ozone DataNode logs
<b>Related Name</b>
<b>Default Value</b>
INFO
<b>API Name</b>
log_threshold
<b>Required</b>
false

Ozone DataNode Maximum Log File Backups

<b>Description</b>
The maximum number of rolled log files to keep for Ozone DataNode logs. Typically used by log4j or logback.
<b>Related Name</b>
<b>Default Value</b>
10
<b>API Name</b>
max_log_backup_index
<b>Required</b>
false

Ozone DataNode Max Log Size

<b>Description</b>
--------------------

The maximum size, in megabytes, per log file for Ozone DataNode logs. Typically used by log4j or logback.

**Related Name**

**Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring**

**Enable Health Alerts for this Role**

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name**

**Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts**

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name**

**Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds**

**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name**

**Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

ozone\_datanode\_fd\_thresholds

**Required**

false

**Ozone DataNode Host Health Test****Description**

When computing the overall Ozone DataNode health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

ozone\_datanode\_host\_health\_enabled

**Required**

false

**Ozone DataNode Process Health Test****Description**

Enables the health test that the Ozone DataNode's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

ozone\_datanode\_scm\_health\_enabled

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

### Role Triggers

**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds**

**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name**

**Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period**

**Description**

The period to review when computing unexpected exits.

**Related Name**

**Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other**

**Datanode Ratis Metadata Directory**

**Description**

This directory is used for storing Datanode Ratis metadata. Ideally, this should be mapped to a fast disk like an SSD.

**Related Name**

dfs.container.ratis.datanode.storage.dir

**Default Value**

/var/lib/hadoop-ozone/datanode/ratis/data

**API Name**

dfs.container.ratis.datanode.storage.dir

**Required**

true

**Datanode Data Directory****Description**

Determines where on the local filesystem HDDS data will be stored.

**Related Name**

hdds.datanode.dir

**Default Value**

/var/lib/hadoop-ozone/datanode/data

**API Name**

hdds.datanode.dir

**Required**

true

**Ozone Log Directory****Description**

Directory where Ozone DataNode logs will be written to

**Related Name**

ozone.log.dir

**Default Value**

/var/log/hadoop-ozone

**API Name**

ozone.log.dir

**Required**

false

**Datanode Metadata Directory****Description**

Determines where on the local filesystem datanode security certificates will be stored.

**Related Name**

ozone.metadata.dirs

**Default Value**

/var/lib/hadoop-ozone/datanode/ozone-metadata

**API Name**

ozone.metadata.dirs

**Required**

true

**Datanode ID Directory****Description**

Ozone Datanode ID Directory

**Related Name**

ozone.scm.datanode.id.dir

**Default Value**

/var/lib/hadoop-ozone/datanode

**API Name**

`ozone.scm.datanode.id.dir`**Required**`true`**Java Heap Size of DataNode****Description**

Maximum size for the Java process heap memory.

**Related Name**`ozone_datanode_heap_size`**Default Value**`4 GiB`**API Name**`ozone_datanode_heap_size`**Required**`false`**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**`rlimit_fds`**Required**`false`**Ports and Addresses****Ozone Datanode HTTP Web UI Port****Description**

The base port that the Ozone Datanode web user interface listens on. The host name is combined with this port to form the 'hdds.datanode.http-address'.

**Related Name**`ozone.datanode.http-port`**Default Value**`9882`**API Name**`ozone.datanode.http-port`**Required**`true`**Ozone Datanode Port (TLS/SSL)****Description**

The base port that the Ozone Datanode web user interface listens on when using HTTPS. The host name is combined with this port to form the 'hdds.datanode.https-address'.

**Related Name**

ozone.datanode.https-port

**Default Value**

9883

**API Name**

ozone.datanode.https-port

**Required**

false

## Resource Management

### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

### Custom Control Group Resources (overrides Cgroup settings)

**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

### Cgroup I/O Weight

**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Ozone DataNode TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ozone DataNode might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

ssl.client.truststore.location

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

**Ozone DataNode TLS/SSL Trust Store Password****Description**

The password for the Ozone DataNode TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

ssl.client.truststore.password

**Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

**Enable TLS/SSL for Ozone DataNode****Description**

Encrypt communication between clients and Ozone DataNode using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

ozone.ssl.enabled

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**Ozone DataNode TLS/SSL Server Keystore Key Password****Description**

The password that protects the private key contained in the keystore used when Ozone DataNode is acting as a TLS/SSL server.

**Related Name**

ssl.server.keystore.keypassword

**Default Value**

<b>API Name</b>
ssl_server_keystore_keypassword
<b>Required</b>
false

**Ozone DataNode TLS/SSL Server Keystore File Location**

<b>Description</b>
The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ozone DataNode is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.
<b>Related Name</b>
ssl.server.keystore.location
<b>Default Value</b>
<b>API Name</b>
ssl_server_keystore_location
<b>Required</b>
false

**Ozone DataNode TLS/SSL Server Keystore File Password**

<b>Description</b>
The password for the Ozone DataNode keystore file.
<b>Related Name</b>
ssl.server.keystore.password
<b>Default Value</b>
<b>API Name</b>
ssl_server_keystore_password
<b>Required</b>
false

**Stacks Collection**

**Stacks Collection Data Retention**

<b>Description</b>
The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
<b>Related Name</b>
stacks_collection_data_retention
<b>Default Value</b>
100 MiB
<b>API Name</b>
stacks_collection_data_retention
<b>Required</b>
false

**Stacks Collection Directory**

<b>Description</b>
--------------------

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value****API Name**

stacks\_collection\_directory

**Required**

false

**Stacks Collection Enabled****Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack
<b>API Name</b>
stacks_collection_method
<b>Required</b>
false

Suppressions

Suppress Configuration Validator: CDH Version Validator

<b>Description</b>
Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_cdh_version_validator
<b>Required</b>
true

Suppress Parameter Validation: Datanode Ratis Metadata Directory

<b>Description</b>
Whether to suppress configuration warnings produced by the built-in parameter validation for the Datanode Ratis Metadata Directory parameter.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_dfs.container.ratis.datanode.storage.dir
<b>Required</b>
true

Suppress Parameter Validation: Datanode Data Directory

<b>Description</b>
Whether to suppress configuration warnings produced by the built-in parameter validation for the Datanode Data Directory parameter.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_hdds.datanode.dir
<b>Required</b>
true

**Suppress Parameter Validation: Ozone DataNode Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone DataNode Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/dn-audit-log4j2.properties\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ozone-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-client.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-server.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Datanode HTTP Web UI Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Datanode HTTP Web UI Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.datanode.http-port

**Required**

true

**Suppress Parameter Validation: Ozone Datanode Port (TLS/SSL)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Datanode Port (TLS/SSL) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.datanode.https-port

**Required**

true

**Suppress Parameter Validation: Ozone Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.log.dir

**Required**

true

**Suppress Parameter Validation: Datanode Metadata Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Datanode Metadata Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.metadata.dirs

**Required**

true

**Suppress Parameter Validation: Datanode ID Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Datanode ID Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.scm.datanode.id.dir

**Required**

true

**Suppress Parameter Validation: Java Heap Size of DataNode****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of DataNode parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone\_datanode\_heap\_size

**Required**

true

**Suppress Parameter Validation: Ozone DataNode Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone\_datanode\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Ozone DataNode TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Ozone DataNode TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

---

true

### Suppress Parameter Validation: Ozone DataNode TLS/SSL Server Keystore Key Password

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode TLS/SSL Server Keystore Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_keypassword

**Required**

true

### Suppress Parameter Validation: Ozone DataNode TLS/SSL Server Keystore File Location

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

### Suppress Parameter Validation: Ozone DataNode TLS/SSL Server Keystore File Password

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone DataNode TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

### Suppress Parameter Validation: Stacks Collection Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_stacks_collection_directory`**Required**`true`**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_ozon_ozon_datanode_audit_health`**Required**`true`**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_ozon_ozon_datanode_file_descriptor`**Required**`true`**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_ozon_ozon_datanode_host_health`**Required**`true`

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_datanode\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_datanode\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_datanode\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_datanode\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_datanode\_unexpected\_exits

**Required**

true

**Ozone Manager****Advanced****Ozone Manager Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

### Heap Dump Directory

**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

### Dump Heap When Out of Memory

**Description**

When set, generates a heap dump file when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

### Kill When Out of Memory

**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

### Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/om-audit-log4j2.properties

**Description**

For advanced use only. A string to be inserted into ozone-conf/om-audit-log4j2.properties for this role only.

**Related Name**

**Default Value****API Name**

ozone-conf/om-audit-log4j2.properties\_role\_safety\_valve

**Required**

false

**Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ozone-site.xml\_role\_safety\_valve

**Required**

false

**Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ranger-ozone-audit.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ranger-ozone-audit.xml\_role\_safety\_valve

**Required**

false

**Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-policymgr-ssl.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ranger-ozone-policymgr-ssl.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ranger-ozone-policymgr-ssl.xml\_role\_safety\_valve

**Required**

false

**Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ranger-ozone-security.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ranger-ozone-security.xml\_role\_safety\_valve

**Required**

false

**Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ssl-client.xml\_role\_safety\_valve

**Required**

false

**Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ssl-server.xml\_role\_safety\_valve

**Required**

false

**Ozone Manager Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

OZONE\_MANAGER\_role\_env\_safety\_valve

**Required**

false

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

### Enable Metric Collection

**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

### Process Start Retry Attempts

**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

### Process Start Wait Timeout

**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

<b>API Name</b>	process_start_secs
<b>Required</b>	false

Logs

Ozone Manager Log Directory

<b>Description</b>	The log directory for log files of the role Ozone Manager.
<b>Related Name</b>	log.dir
<b>Default Value</b>	/var/log/hadoop-ozone
<b>API Name</b>	log_dir
<b>Required</b>	false

Ozone Manager Logging Threshold

<b>Description</b>	The minimum log level for Ozone Manager logs
<b>Related Name</b>	
<b>Default Value</b>	INFO
<b>API Name</b>	log_threshold
<b>Required</b>	false

Ozone Manager Maximum Log File Backups

<b>Description</b>	The maximum number of rolled log files to keep for Ozone Manager logs. Typically used by log4j or logback.
<b>Related Name</b>	
<b>Default Value</b>	10
<b>API Name</b>	max_log_backup_index
<b>Required</b>	false

Ozone Manager Max Log Size

<b>Description</b>	
--------------------	--

The maximum size, in megabytes, per log file for Ozone Manager logs. Typically used by log4j or logback.

**Related Name**

**Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring**

**Enable Health Alerts for this Role**

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name**

**Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts**

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name**

**Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds**

**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name**

**Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

ozone\_manager\_fd\_thresholds

**Required**

false

### Ozone Manager Host Health Test

**Description**

When computing the overall Ozone Manager health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

ozone\_manager\_host\_health\_enabled

**Required**

false

### Ozone Manager Process Health Test

**Description**

Enables the health test that the Ozone Manager's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

ozone\_manager\_scm\_health\_enabled

**Required**

false

### Swap Memory Usage Rate Thresholds

**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

### Role Triggers

**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds**

**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name**

**Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period**

**Description**

The period to review when computing unexpected exits.

**Related Name**

**Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other**

**Java Heap Size of Ozone Manager**

**Description**

Maximum size for the Java process heap memory.

**Related Name**

om\_max\_heap\_size

**Default Value**

4 GiB

**API Name**

om\_max\_heap\_size

**Required**

false

**Ozone Log Directory**

**Description**

Directory where Ozone Manager logs will be written to

**Related Name**

ozone.log.dir

**Default Value**

/var/log/hadoop-ozone

**API Name**

ozone.log.dir

**Required**

false

### Ozone Manager Metadata Directory

**Description**

Determines where on the local filesystem Ozone Manager security certificates will be stored.

**Related Name**

ozone.metadata.dirs

**Default Value**

/var/lib/hadoop-ozone/om/ozone-metadata

**API Name**

ozone.metadata.dirs

**Required**

true

### Ozone Manager Data Directory

**Description**

Directory where the OzoneManager stores its metadata.

**Related Name**

ozone.om.db.dirs

**Default Value**

/var/lib/hadoop-ozone/om/data

**API Name**

ozone.om.db.dirs

**Required**

true

### Ozone Manager HTTP Bind Hostname

**Description**

The actual address the OM web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.om.http-address'.

**Related Name**

ozone.om.http-bind-host

**Default Value**

0.0.0.0

**API Name**

ozone.om.http-bind-host

**Required**

false

**Secure Ozone Manager HTTPS Bind Hostname****Description**

The actual address the OM web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.om.https-address'.

**Related Name**

ozone.om.https-bind-host

**Default Value**

0.0.0.0

**API Name**

ozone.om.https-bind-host

**Required**

false

**Ozone Manager Ratis Storage Directory****Description**

This directory is used for storing Ozone Manager's Ratis metadata like logs. Ideally, this should be mapped to a fast disk like an SSD.

**Related Name**

ozone.om.ratis.storage.dir

**Default Value**

/var/lib/hadoop-ozone/om/ratis

**API Name**

ozone.om.ratis.storage.dir

**Required**

true

**Ranger Ozone Plugin Conf Path****Description**

Staging directory for Ranger Ozone Plugin Configuration. This should generally not be changed.

**Related Name**

ranger\_ozone\_plugin\_conf\_path

**Default Value**

/etc/ranger/ozone-plugin

**API Name**

ranger\_ozone\_plugin\_conf\_path

**Required**

true

**Ranger Ozone Plugin Policy Cache Directory Path****Description**

The directory where Ranger security policies are cached locally.

**Related Name**

`ranger.plugin.ozone.policy.cache.dir`**Default Value**`/var/lib/ranger/ozone/policy-cache`**API Name**`ranger_ozone_plugin_policy_cache_directory`**Required**`true`**Ranger Ozone Plugin Audit Solr Spool Directory Path****Description**

Spool directory for Ranger audits being written to Solr.

**Related Name**`xasecure.audit.destination.solr.batch.filespool.dir`**Default Value**`/var/log/hadoop-ozone/ranger-audit/solr/spool`**API Name**`ranger_ozone_plugin_solr_audit_spool_directory`**Required**`true`**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**`rlimit_fds`**Required**`false`**Ports and Addresses****Ozone Manager HTTP Web UI Port****Description**

The base port that the Ozone Manager HTTP web user interface listens on. The host name of the Ozone Manager is combined with this port to form the 'ozone.om.http-address'.

**Related Name**`ozone.om.http-port`**Default Value**`9874`**API Name**`ozone.om.http-port`

**Required**

true

**Secure Ozone Manager Web UI Port (TLS/SSL)****Description**

The base port that the Ozone Manager HTTP web user interface listens on when using HTTPS. The host name of the Ozone Manager is combined with this port to form the 'ozone.om.https-address'.

**Related Name**

ozone.om.https-port

**Default Value**

9875

**API Name**

ozone.om.https-port

**Required**

false

**Ozone Manager Ratis port****Description**

The base port that Ozone Manager's Ratis Server listens on if multiple Ozone Manager's are configured.

**Related Name**

ozone.om.ratis-port

**Default Value**

9872

**API Name**

ozone.om.ratis-port

**Required**

false

**Ozone Manager RPC port****Description**

The base port that Ozone Manager listens on when serving RPCs. The host name of the Ozone Manager is combined with this port to form the 'ozone.om.address'.

**Related Name**

ozone.om.rpc-port

**Default Value**

9862

**API Name**

ozone.om.rpc-port

**Required**

false

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the

value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

### Cgroup Memory Soft Limit

**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

### Security

#### Ozone Manager TLS/SSL Trust Store File

**Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ozone Manager might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

ssl.client.truststore.location

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

#### Ozone Manager TLS/SSL Trust Store Password

**Description**

The password for the Ozone Manager TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

ssl.client.truststore.password

**Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

**Enable TLS/SSL for Ozone Manager****Description**

Encrypt communication between clients and Ozone Manager using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

ozone.ssl.enabled

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**Ozone Manager TLS/SSL Server Keystore Key Password****Description**

The password that protects the private key contained in the keystore used when Ozone Manager is acting as a TLS/SSL server.

**Related Name**

ssl.server.keystore.keypassword

**Default Value****API Name**

ssl\_server\_keystore\_keypassword

**Required**

false

**Ozone Manager TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ozone Manager is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

ssl.server.keystore.location

**Default Value****API Name**

ssl_server_keystore_location
<b>Required</b>
false

Ozone Manager TLS/SSL Server Keystore File Password

<b>Description</b>
The password for the Ozone Manager keystore file.
<b>Related Name</b>
ssl.server.keystore.password
<b>Default Value</b>
<b>API Name</b>
ssl_server_keystore_password
<b>Required</b>
false

Stacks Collection

Stacks Collection Data Retention

<b>Description</b>
The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
<b>Related Name</b>
stacks_collection_data_retention
<b>Default Value</b>
100 MiB
<b>API Name</b>
stacks_collection_data_retention
<b>Required</b>
false

Stacks Collection Directory

<b>Description</b>
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
<b>Related Name</b>
stacks_collection_directory
<b>Default Value</b>
<b>API Name</b>
stacks_collection_directory
<b>Required</b>
false

Stacks Collection Enabled

<b>Description</b>
--------------------

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

### Stacks Collection Frequency

**Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

### Stacks Collection Method

**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

### Suppressions

#### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Ozone Manager Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Manager Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Java Heap Size of Ozone Manager****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of Ozone Manager parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_om\_max\_heap\_size

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/om-audit-log4j2.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/om-audit-log4j2.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/om-audit-log4j2.properties\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ozone-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ranger-ozone-audit.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-policymgr-ssl.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-policymgr-ssl.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ranger-ozone-policymgr-ssl.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ranger-ozone-security.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-client.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-server.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.log.dir

**Required**

true

**Suppress Parameter Validation: Ozone Manager Metadata Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Metadata Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.metadata.dirs

**Required**

true

**Suppress Parameter Validation: Ozone Manager Data Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Data Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.db.dirs

**Required**

true

**Suppress Parameter Validation: Ozone Manager HTTP Bind Hostname****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager HTTP Bind Hostname parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.http-bind-host

**Required**

true

**Suppress Parameter Validation: Ozone Manager HTTP Web UI Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager HTTP Web UI Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.http-port

**Required**

true

**Suppress Parameter Validation: Secure Ozone Manager HTTPS Bind Hostname****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Ozone Manager HTTPS Bind Hostname parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.https-bind-host

**Required**

true

**Suppress Parameter Validation: Secure Ozone Manager Web UI Port (TLS/SSL)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Ozone Manager Web UI Port (TLS/SSL) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.https-port

**Required**

true

**Suppress Parameter Validation: Ozone Manager Ratis port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Ratis port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.ratis-port

**Required**

true

**Suppress Parameter Validation: Ozone Manager Ratis Storage Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Ratis Storage Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.ratis.storage.dir

**Required**

true

**Suppress Parameter Validation: Ozone Manager RPC port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager RPC port parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ozone.om.rpc-port`**Required**`true`**Suppress Parameter Validation: Ozone Manager Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone_manager_role_env_safety_valve`**Required**`true`**Suppress Parameter Validation: Ranger Ozone Plugin Conf Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Ozone Plugin Conf Path parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_ozone_plugin_conf_path`**Required**`true`**Suppress Parameter Validation: Ranger Ozone Plugin Policy Cache Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Ozone Plugin Policy Cache Directory Path parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_ozone_plugin_policy_cache_directory`**Required**`true`**Suppress Parameter Validation: Ranger Ozone Plugin Audit Solr Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Ozone Plugin Audit Solr Spool Directory Path parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_ozone\_plugin\_solr\_audit\_spool\_directory

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Ozone Manager TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Ozone Manager TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Parameter Validation: Ozone Manager TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Server Keystore Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_keypassword

**Required**

true

**Suppress Parameter Validation: Ozone Manager TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: Ozone Manager TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Manager TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role_config_suppression_ssl_server_keystore_password
<b>Required</b>
true

Suppress Parameter Validation: Stacks Collection Directory

<b>Description</b>
Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_stacks_collection_directory
<b>Required</b>
true

Suppress Health Test: Audit Pipeline Test

<b>Description</b>
Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_health_suppression_ozone_ozone_manager_audit_health
<b>Required</b>
true

Suppress Health Test: File Descriptors

<b>Description</b>
Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_health_suppression_ozone_ozone_manager_file_descriptor
<b>Required</b>
true

Suppress Health Test: Host Health

<b>Description</b>
--------------------

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_manager\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_manager\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_manager\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**`role_health_suppression_ozone_ozone_manager_swap_memory_usage`**Required**`true`**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_ozone_ozone_manager_swap_memory_usage_rate`**Required**`true`**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_ozone_ozone_manager_unexpected_exits`**Required**`true`**Ozone Prometheus****Advanced****Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**`false`**API Name**`metric_config_auto_refresh`**Required**

---

false

### Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml

**Description**

For advanced use only. A string to be inserted into ozone-conf/ozone-prometheus.yml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ozone-prometheus.yml\_role\_safety\_valve

**Required**

false

### Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/prometheus-token

**Description**

For advanced use only. A string to be inserted into ozone-conf/prometheus-token for this role only.

**Related Name****Default Value****API Name**

ozone-conf/prometheus-token\_role\_safety\_valve

**Required**

false

### Ozone Prometheus Environment Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

OZONE\_PROMETHEUS\_role\_env\_safety\_valve

**Required**

false

### Automatically Restart Process

**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

`process_auto_restart`**Required**`true`**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**`true`**API Name**`process_should_monitor`**Required**`true`**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**`3`**API Name**`process_start_retries`**Required**`false`**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**`20`**API Name**`process_start_secs`**Required**`false`

## Monitoring

### Enable Health Alerts for this Role

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

### Metric Filter

**Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
monitoring_metric_filter
<b>Required</b>
false

**File Descriptor Monitoring Thresholds**

<b>Description</b>
The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
<b>Related Name</b>
<b>Default Value</b>
Warning: 50.0 %, Critical: 70.0 %
<b>API Name</b>
ozone_prometheus_fd_thresholds
<b>Required</b>
false

**Ozone Prometheus Host Health Test**

<b>Description</b>
When computing the overall Ozone Prometheus health, consider the host's health.
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
ozone_prometheus_host_health_enabled
<b>Required</b>
false

**Ozone Prometheus Process Health Test**

<b>Description</b>
Enables the health test that the Ozone Prometheus's process state is consistent with the role configuration
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
ozone_prometheus_scm_health_enabled
<b>Required</b>
false

**Swap Memory Usage Rate Thresholds**

<b>Description</b>
--------------------

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

### Role Triggers

**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.

- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other****Ozone Log Directory****Description**

Directory where Prometheus logs will be written to

**Related Name**

`ozone.log.dir`**Default Value**`/var/log/hadoop-ozone`**API Name**`ozone.log.dir`**Required**`false`**Prometheus Data Retention time.****Description**

How long to retain samples in storage. Units Supported: y, w, d, h, m, s, ms.

**Related Name**`ozone.prometheus.data.retention.time`**Default Value**`15d`**API Name**`ozone.prometheus.data.retention.time`**Required**`false`**Prometheus Data Directory****Description**

Directory where the Prometheus Server stores its metadata.

**Related Name**`ozone.prometheus.db.dir`**Default Value**`/var/lib/hadoop-ozone/prometheus/data`**API Name**`ozone.prometheus.db.dir`**Required**`true`**Prometheus server extra flags.****Description**

Extra command line flags that can be used while starting up the server. For example, '--query.timeout=2m --query.max-samples=5000'

**Related Name**`ozone.prometheus.extra.flags`**Default Value****API Name**`ozone.prometheus.extra.flags`**Required**`false`

### Prometheus server log level.

**Description**

Only log messages with the given severity or above. One of: [debug, info, warn, error]

**Related Name**

ozone.prometheus.log.level

**Default Value**

info

**API Name**

ozone.prometheus.log.level

**Required**

false

### Prometheus Binary Location

**Description**

Location of the unarchived Prometheus binary.

**Related Name**

prometheus.location

**Default Value****API Name**

prometheus.location

**Required**

false

### Performance

#### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

### Ports and Addresses

#### Prometheus HTTP Port

**Description**

The base port that the prometheus web user interface listens on.

**Related Name**

ozone.prometheus.http-port

**Default Value**

9090

**API Name**

ozone.prometheus.http-port

**Required**

true

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

`rm_io_weight`**Required**`true`**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**`memory.limit_in_bytes`**Default Value**`-1 MiB`**API Name**`rm_memory_hard_limit`**Required**`true`**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**`memory.soft_limit_in_bytes`**Default Value**`-1 MiB`**API Name**`rm_memory_soft_limit`**Required**`true`**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**`false`

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ozone-prometheus.yml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/prometheus-token****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/prometheus-token parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/prometheus-token\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.log.dir

**Required**

true

**Suppress Parameter Validation: Prometheus Data Retention time.****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Prometheus Data Retention time. parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.prometheus.data.retention.time

**Required**

true

**Suppress Parameter Validation: Prometheus Data Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Prometheus Data Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.prometheus.db.dir

**Required**

true

**Suppress Parameter Validation: Prometheus server extra flags.****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Prometheus server extra flags. parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.prometheus.extra.flags

**Required**

true

**Suppress Parameter Validation: Prometheus HTTP Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Prometheus HTTP Port parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ozone.prometheus.http-port`**Required**`true`**Suppress Parameter Validation: Prometheus server log level.****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Prometheus server log level. parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.prometheus.log.level`**Required**`true`**Suppress Parameter Validation: Ozone Prometheus Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Prometheus Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone_prometheus_role_env_safety_valve`**Required**`true`**Suppress Parameter Validation: Prometheus Binary Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Prometheus Binary Location parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_prometheus.location`**Required**`true`**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozon\_ozon\_prometheus\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozon\_ozon\_prometheus\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health**

**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_prometheus\_host\_health

**Required**

true

**Suppress Health Test: Process Status**

**Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_prometheus\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage**

**Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_prometheus\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta**

**Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_prometheus\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_prometheus\_unexpected\_exits

**Required**

true

**Ozone Recon****Advanced****Ozone Recon Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ozone-site.xml\_role\_safety\_valve

**Required**

false

**Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ssl-client.xml\_role\_safety\_valve

**Required**

false

**Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ssl-server.xml\_role\_safety\_valve

**Required**

false

**Ozone Recon Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

OZONE\_RECON\_role\_env\_safety\_valve

**Required**

false

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name**

**Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

Logs

Ozone Recon Log Directory

Description	The log directory for log files of the role Ozone Recon.
Related Name	log.dir
Default Value	/var/log/hadoop-ozone
API Name	log_dir
Required	false

Ozone Recon Logging Threshold

Description	The minimum log level for Ozone Recon logs
Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

Ozone Recon Maximum Log File Backups

Description	The maximum number of rolled log files to keep for Ozone Recon logs. Typically used by log4j or logback.
Related Name	
Default Value	10
API Name	max_log_backup_index
Required	false

Ozone Recon Max Log Size

Description	The maximum size, in megabytes, per log file for Ozone Recon logs. Typically used by log4j or logback.
Related Name	
Default Value	

200 MiB
<b>API Name</b>
max_log_size
<b>Required</b>
false

Monitoring

Enable Health Alerts for this Role

<b>Description</b>
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
enable_alerts
<b>Required</b>
false

Enable Configuration Change Alerts

<b>Description</b>
When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
enable_config_alerts
<b>Required</b>
false

Log Directory Free Space Monitoring Absolute Thresholds

<b>Description</b>
The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
<b>Related Name</b>
<b>Default Value</b>
Warning: 10 GiB, Critical: 5 GiB
<b>API Name</b>
log_directory_free_space_absolute_thresholds
<b>Required</b>
false

Log Directory Free Space Monitoring Percentage Thresholds

<b>Description</b>
--------------------

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

ozone\_recon\_fd\_thresholds

**Required**

false

**Ozone Recon Host Health Test****Description**

When computing the overall Ozone Recon health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

ozone\_recon\_host\_health\_enabled

**Required**

false

**Ozone Recon Process Health Test****Description**

Enables the health test that the Ozone Recon's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

ozone\_recon\_scm\_health\_enabled

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other****Ozone Log Directory****Description**

Directory where Recon logs will be written to

**Related Name**

ozone.log.dir

**Default Value**

/var/log/hadoop-ozone

**API Name**

ozone.log.dir

**Required**

false

**Recon Metadata Directory****Description**

Determines where on the local filesystem recon security certificates will be stored.

**Related Name**

ozone.metadata.dirs

**Default Value**`/var/lib/hadoop-ozone/recon/ozone-metadata`**API Name**`ozone.metadata.dirs`**Required**`true`**Recon Data Directory****Description**

Directory where the Recon Server stores its metadata.

**Related Name**`ozone.recon.db.dir`**Default Value**`/var/lib/hadoop-ozone/recon/data`**API Name**`ozone.recon.db.dir`**Required**`true`**Recon HTTP Bind Hostname****Description**

The actual address the Recon web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.recon.http-address'.

**Related Name**`ozone.recon.http-bind-host`**Default Value**`0.0.0.0`**API Name**`ozone.recon.http-bind-host`**Required**`false`**Secure Recon HTTPS Bind Hostname****Description**

The actual address the Recon web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.recon.https-address'.

**Related Name**`ozone.recon.https-bind-host`**Default Value**`0.0.0.0`**API Name**`ozone.recon.https-bind-host`**Required**`false`

### Recon OzoneManager Data Directory

**Description**

Directory where the Recon Server stores OzoneManager's metadata

**Related Name**

ozone.recon.om.db.dir

**Default Value**

/var/lib/hadoop-ozone/recon/om/data

**API Name**

ozone.recon.om.db.dir

**Required**

true

### Recon StorageContainerManager Data Directory

**Description**

Directory where the Recon Server stores StorageContainerManager's metadata

**Related Name**

ozone.recon.scm.db.dirs

**Default Value**

/var/lib/hadoop-ozone/recon/scm/data

**API Name**

ozone.recon.scm.db.dirs

**Required**

true

### Java Heap Size of Recon

**Description**

Maximum size for the Java process heap memory.

**Related Name**

ozone\_recon\_max\_heap\_size

**Default Value**

1 GiB

**API Name**

ozone\_recon\_max\_heap\_size

**Required**

false

### Performance

#### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

`rlimit_fds`**Required**`false`**Ports and Addresses****Recon HTTP Web UI Port****Description**

The base port that the Recon web user interface listens on. The host name of the Recon web user interface is combined with this port to form the 'ozone.recon.http-address'.

**Related Name**`ozone.recon.http-port`**Default Value**`9888`**API Name**`ozone.recon.http-port`**Required**`true`**Secure Recon Web UI Port (TLS/SSL)****Description**

The base port that the Recon web user interface listens on when using HTTPS. The host name of the Recon web user interface is combined with this port to form the 'ozone.recon.https-address'.

**Related Name**`ozone.recon.https-port`**Default Value**`9889`**API Name**`ozone.recon.https-port`**Required**`false`**Recon RPC Port****Description**

The base port that Recon listens on when serving RPCs. The host name of Recon is combined with this port to form the 'ozone.recon.address'.

**Related Name**`ozone.recon.rpc-port`**Default Value**`9891`**API Name**`ozone.recon.rpc-port`**Required**`true`

## Resource Management

### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

### Custom Control Group Resources (overrides Cgroup settings)

**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

### Cgroup I/O Weight

**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

### Cgroup Memory Hard Limit

**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

### Cgroup Memory Soft Limit

**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

## Security

### Ozone Recon TLS/SSL Trust Store File

**Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ozone Recon might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

ssl.client.truststore.location

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

**Ozone Recon TLS/SSL Trust Store Password****Description**

The password for the Ozone Recon TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

ssl.client.truststore.password

**Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

**Enable TLS/SSL for Ozone Recon****Description**

Encrypt communication between clients and Ozone Recon using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

ozone.ssl.enabled

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**Ozone Recon TLS/SSL Server Keystore Key Password****Description**

The password that protects the private key contained in the keystore used when Ozone Recon is acting as a TLS/SSL server.

**Related Name**

ssl.server.keystore.keypassword

**Default Value****API Name**

ssl\_server\_keystore\_keypassword

**Required**

false

**Ozone Recon TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ozone Recon is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

ssl.server.keystore.location

**Default Value****API Name**

ssl\_server\_keystore\_location

**Required**

false

**Ozone Recon TLS/SSL Server Keystore File Password****Description**

The password for the Ozone Recon keystore file.

**Related Name**

ssl.server.keystore.password

**Default Value****API Name**

ssl\_server\_keystore\_password

**Required**

false

**Stacks Collection****Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

**Stacks Collection Directory****Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value****API Name**

stacks\_collection\_directory

**Required**

false

**Stacks Collection Enabled****Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

### Suppress Parameter Validation: Ozone Recon Logging Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Ozone Recon Log Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

### Suppress Parameter Validation: Heap Dump Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ozone-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-client.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-server.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.log.dir

**Required**

true

**Suppress Parameter Validation: Recon Metadata Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon Metadata Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.metadata.dirs

**Required**

true

**Suppress Parameter Validation: Recon Data Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon Data Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.recon.db.dir

**Required**

true

**Suppress Parameter Validation: Recon HTTP Bind Hostname****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon HTTP Bind Hostname parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ozone.recon.http-bind-host`**Required**`true`**Suppress Parameter Validation: Recon HTTP Web UI Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon HTTP Web UI Port parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.recon.http-port`**Required**`true`**Suppress Parameter Validation: Secure Recon HTTPS Bind Hostname****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Recon HTTPS Bind Hostname parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.recon.https-bind-host`**Required**`true`**Suppress Parameter Validation: Secure Recon Web UI Port (TLS/SSL)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Recon Web UI Port (TLS/SSL) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.recon.https-port`**Required**`true`**Suppress Parameter Validation: Recon OzoneManager Data Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon OzoneManager Data Directory parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ozone.recon.om.db.dir

**Required**

true

**Suppress Parameter Validation: Recon RPC Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon RPC Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.recon.rpc-port

**Required**

true

**Suppress Parameter Validation: Recon StorageContainerManager Data Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Recon StorageContainerManager Data Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.recon.scm.db.dirs

**Required**

true

**Suppress Parameter Validation: Java Heap Size of Recon****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of Recon parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone\_recon\_max\_heap\_size

**Required**

true

**Suppress Parameter Validation: Ozone Recon Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone\_recon\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Ozone Recon TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ssl_client_truststore_location`**Required**`true`**Suppress Parameter Validation: Ozone Recon TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_client_truststore_password`**Required**`true`**Suppress Parameter Validation: Ozone Recon TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Server Keystore Key Password parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_keypassword`**Required**`true`**Suppress Parameter Validation: Ozone Recon TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_location`**Required**`true`**Suppress Parameter Validation: Ozone Recon TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Recon TLS/SSL Server Keystore File Password parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozon\_ozon\_recon\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozon\_ozon\_recon\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_recon\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_recon\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_ozone\_recon\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_ozzone\_ozzone\_recon\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozzone\_ozzone\_recon\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozzone\_ozzone\_recon\_unexpected\_exits

**Required**

true

**S3 Gateway****Advanced****S3 Gateway Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

---

false

### Enable auto refresh for metric configurations

#### Description

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

#### Related Name

#### Default Value

false

#### API Name

metric\_config\_auto\_refresh

#### Required

false

### Heap Dump Directory

#### Description

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

#### Related Name

oom\_heap\_dump\_dir

#### Default Value

/tmp

#### API Name

oom\_heap\_dump\_dir

#### Required

false

### Dump Heap When Out of Memory

#### Description

When set, generates a heap dump file when when an out-of-memory error occurs.

#### Related Name

#### Default Value

true

#### API Name

oom\_heap\_dump\_enabled

#### Required

true

### Kill When Out of Memory

#### Description

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ozone-site.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ozone-site.xml\_role\_safety\_valve

**Required**

false

**S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ssl-client.xml\_role\_safety\_valve

**Required**

false

**S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ssl-server.xml\_role\_safety\_valve

**Required**

false

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name**

**Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**S3 Gateway Environment Advanced Configuration Snippet (Safety Valve)**

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name**

**Default Value**

**API Name**

S3\_GATEWAY\_role\_env\_safety\_valve

**Required**

false

**Logs**

**S3 Gateway Log Directory**

**Description**

The log directory for log files of the role S3 Gateway.

**Related Name**

log.dir

**Default Value**

/var/log/hadoop-ozone

**API Name**

log\_dir

**Required**

false

**S3 Gateway Logging Threshold**

**Description**

The minimum log level for S3 Gateway logs

**Related Name**

**Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

**S3 Gateway Maximum Log File Backups**

**Description**

The maximum number of rolled log files to keep for S3 Gateway logs. Typically used by log4j or logback.

**Related Name**

**Default Value**

10

<b>API Name</b>
max_log_backup_index
<b>Required</b>
false

**S3 Gateway Max Log Size**

<b>Description</b>
The maximum size, in megabytes, per log file for S3 Gateway logs. Typically used by log4j or logback.
<b>Related Name</b>
<b>Default Value</b>
200 MiB
<b>API Name</b>
max_log_size
<b>Required</b>
false

**Monitoring**

**Enable Health Alerts for this Role**

<b>Description</b>
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
enable_alerts
<b>Required</b>
false

**Enable Configuration Change Alerts**

<b>Description</b>
When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
enable_config_alerts
<b>Required</b>
false

**Log Directory Free Space Monitoring Absolute Thresholds**

<b>Description</b>
--------------------

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name**

**Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

`role_triggers`

**Required**

true

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

`s3_gateway_fd_thresholds`

**Required**

false

**S3 Gateway Host Health Test****Description**

When computing the overall S3 Gateway health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

s3\_gateway\_host\_health\_enabled

**Required**

false

### S3 Gateway Process Health Test

**Description**

Enables the health test that the S3 Gateway's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

s3\_gateway\_scm\_health\_enabled

**Required**

false

### Unexpected Exits Thresholds

**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

### Unexpected Exits Monitoring Period

**Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

### Other

### Ozone S3 Gateway HTTP Bind Hostname

**Description**

The actual address the S3 Gateway web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.s3g.http-address'.

**Related Name**

ozone.s3g.http-bind-host
<b>Default Value</b>
0.0.0.0
<b>API Name</b>
ozone.s3g.http-bind-host
<b>Required</b>
false

**Secure Ozone S3 Gateway HTTPS Bind Hostname**

<b>Description</b>
The actual address the S3 Gateway web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.s3g.https-address'.
<b>Related Name</b>
ozone.s3g.https-bind-host
<b>Default Value</b>
0.0.0.0
<b>API Name</b>
ozone.s3g.https-bind-host
<b>Required</b>
false

**Java Heap Size of S3 Gateway**

<b>Description</b>
Maximum size for the Java process heap memory.
<b>Related Name</b>
ozone_S3_gateway_max_heap_size
<b>Default Value</b>
1 GiB
<b>API Name</b>
ozone_S3_gateway_max_heap_size
<b>Required</b>
false

**Performance**

**Maximum Process File Descriptors**

<b>Description</b>
If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
rlimit_fds
<b>Required</b>
false

## Ports and Addresses

### Ozone S3 Gateway HTTP Web UI Port

**Description**

The base port that the S3 Gateway web user interface listens on. The host name of the S3 Gateway is combined with this port to form the 'ozone.s3g.http-address'.

**Related Name**

ozone.s3g.http-port

**Default Value**

9878

**API Name**

ozone.s3g.http-port

**Required**

true

### Secure Ozone S3 Gateway Web UI Port (TLS/SSL)

**Description**

The base port that the S3 Gateway web user interface listens on when using HTTPS. The host name of the S3 Gateway is combined with this port to form the 'ozone.s3g.https-address'.

**Related Name**

ozone.s3g.https-port

**Default Value**

9879

**API Name**

ozone.s3g.https-port

**Required**

false

## Resource Management

### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

### Custom Control Group Resources (overrides Cgroup settings)

**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the `cgroupexec` command: `resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`  
\*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

`custom.cgroups`

**Default Value****API Name**

`rm_custom_resources`

**Required**

`false`

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

`blkio.weight`

**Default Value**

`500`

**API Name**

`rm_io_weight`

**Required**

`true`

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

`memory.limit_in_bytes`

**Default Value**

`-1 MiB`

**API Name**

`rm_memory_hard_limit`

**Required**

`true`

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****S3 Gateway TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that S3 Gateway might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

ssl.client.truststore.location

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

**S3 Gateway TLS/SSL Trust Store Password****Description**

The password for the S3 Gateway TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

ssl.client.truststore.password

**Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

**Enable TLS/SSL for S3 Gateway****Description**

Encrypt communication between clients and S3 Gateway using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

ozone.ssl.enabled

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**S3 Gateway TLS/SSL Server Keystore Key Password****Description**

The password that protects the private key contained in the keystore used when S3 Gateway is acting as a TLS/SSL server.

**Related Name**

ssl.server.keystore.keypassword

**Default Value****API Name**

ssl\_server\_keystore\_keypassword

**Required**

false

**S3 Gateway TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when S3 Gateway is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

ssl.server.keystore.location

**Default Value****API Name**

ssl\_server\_keystore\_location

**Required**

false

**S3 Gateway TLS/SSL Server Keystore File Password****Description**

The password for the S3 Gateway keystore file.

**Related Name**

ssl.server.keystore.password

**Default Value****API Name**

ssl\_server\_keystore\_password

<b>Required</b>
false

Stacks Collection

Stacks Collection Data Retention

<b>Description</b>
The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
<b>Related Name</b>
stacks_collection_data_retention
<b>Default Value</b>
100 MiB
<b>API Name</b>
stacks_collection_data_retention
<b>Required</b>
false

Stacks Collection Directory

<b>Description</b>
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
<b>Related Name</b>
stacks_collection_directory
<b>Default Value</b>
<b>API Name</b>
stacks_collection_directory
<b>Required</b>
false

Stacks Collection Enabled

<b>Description</b>
Whether or not periodic stacks collection is enabled.
<b>Related Name</b>
stacks_collection_enabled
<b>Default Value</b>
false
<b>API Name</b>
stacks_collection_enabled
<b>Required</b>
true

Stacks Collection Frequency

<b>Description</b>
--------------------

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

### Stacks Collection Method

**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

### Suppressions

#### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

#### Suppress Parameter Validation: S3 Gateway Logging Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: S3 Gateway Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ozone-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-client.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-server.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone S3 Gateway HTTP Bind Hostname****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone S3 Gateway HTTP Bind Hostname parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.s3g.http-bind-host

**Required**

true

**Suppress Parameter Validation: Ozone S3 Gateway HTTP Web UI Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone S3 Gateway HTTP Web UI Port parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ozone.s3g.http-port

**Required**

true

**Suppress Parameter Validation: Secure Ozone S3 Gateway HTTPS Bind Hostname****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Ozone S3 Gateway HTTPS Bind Hostname parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.s3g.https-bind-host

**Required**

true

**Suppress Parameter Validation: Secure Ozone S3 Gateway Web UI Port (TLS/SSL)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Ozone S3 Gateway Web UI Port (TLS/SSL) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.s3g.https-port

**Required**

true

**Suppress Parameter Validation: Java Heap Size of S3 Gateway****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of S3 Gateway parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone\_s3\_gateway\_max\_heap\_size

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: S3 Gateway Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_s3\_gateway\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: S3 Gateway TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: S3 Gateway TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Parameter Validation: S3 Gateway TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway TLS/SSL Server Keystore Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_keypassword

**Required**

true

**Suppress Parameter Validation: S3 Gateway TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: S3 Gateway TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Gateway TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozon\_s3\_gateway\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozon\_s3\_gateway\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_s3\_gateway\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_s3\_gateway\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_s3\_gateway\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_s3\_gateway\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_s3\_gateway\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_s3\_gateway\_unexpected\_exits

**Required**

true

**Service-Wide****Advanced****Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

For advanced use only, a string to be inserted into ozone-conf/ozone-site.xml. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

ozone-conf/ozone-site.xml\_service\_safety\_valve

**Required**

false

**Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

For advanced use only, a string to be inserted into ozone-conf/ssl-client.xml. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

ozone-conf/ssl-client.xml\_service\_safety\_valve

**Required**

false

**Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml****Description**

For advanced use only, a string to be inserted into ozone-conf/ssl-server.xml. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

ozone-conf/ssl-server.xml\_service\_safety\_valve

**Required**

false

**Ozone Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

OZONE\_service\_env\_safety\_valve

**Required**

false

**System Group****Description**

The group that this service's processes should run as.

**Related Name****Default Value**

hdfs

**API Name**

process\_groupname

**Required**

true

**System User****Description**

The user that this service's processes should run as.

**Related Name****Default Value**

hdfs

**API Name**

process\_username

**Required**

true

**Monitoring****Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

`service_triggers`

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

`smon_derived_configs_safety_valve`

**Required**

false

**Other****Ozone Prometheus Endpoint Token****Description**

Enables token based authentication for Prometheus servlet endpoints. This will disable SPNEGO based authentication on the endpoints.

**Related Name**

`hdds.prometheus.endpoint.token`

**Default Value****API Name**

`hdds.prometheus.endpoint.token`

**Required**

false

**HDFS Service**

**Description**

Name of the HDFS service that this Ozone service instance depends on

**Related Name**

**Default Value**

**API Name**

hdfs\_service

**Required**

false

**Ozone Replication Factor**

**Description**

Default replication factor value for keys stored in Ozone. The actual number of replications can be specified when writing the key. The default is used if replication value is not specified. Supported values: 1 and 3.

**Related Name**

ozone.replication

**Default Value**

3

**API Name**

ozone.replication

**Required**

true

**Enable Kerberos Authentication**

**Description**

Enables Kerberos authentication for Ozone.

**Related Name**

ozone.security.enabled

**Default Value**

false

**API Name**

ozone.security.enabled

**Required**

false

**Enable Kerberos Authentication for HTTP web consoles**

**Description**

Enables Kerberos authentication for Ozone HTTP web consoles for all roles of this service using the SPNEGO protocol. Note: This is effective only if Kerberos is enabled for the Ozone service.

**Related Name**

ozone.security.http.kerberos.enabled

**Default Value**

	false
API Name	ozone.security.http.kerberos.enabled
Required	false

Ozone Service ID

Description	A logical name for this Ozone service. Note: No special characters.
Related Name	ozone.service.id
Default Value	
API Name	ozone.service.id
Required	true

Ozone Java Options

Description	These arguments will be passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags would be passed here.
Related Name	ozone_java_opts
Default Value	java_args
API Name	ozone_java_opts
Required	false

Ranger Ozone Plugin Hdfs Audit Directory

Description	The DFS path on which Ranger audits are written.
Related Name	ranger_ozone_plugin_hdfs_audit_directory
Default Value	\$ranger_base_audit_url/ozone
API Name	ranger_ozone_plugin_hdfs_audit_directory
Required	false

RANGER Service

Description	Name of the RANGER service that this Ozone service instance depends on
-------------	--

<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
ranger_service
<b>Required</b>
false

Suppressions

Suppress Configuration Validator: CDH Version Validator

<b>Description</b>
Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_cdh_version_validator
<b>Required</b>
true

Suppress Configuration Validator: Deploy Directory

<b>Description</b>
Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_client_config_root_dir
<b>Required</b>
true

Suppress Configuration Validator: Datanode Ratis Metadata Directory

<b>Description</b>
Whether to suppress configuration warnings produced by the Datanode Ratis Metadata Directory configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_dfs.container.ratis.datanode.storage.dir
<b>Required</b>
true

**Suppress Configuration Validator: Datanode Data Directory****Description**

Whether to suppress configuration warnings produced by the Datanode Data Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hdds.datanode.dir

**Required**

true

**Suppress Configuration Validator: Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Storage Container Manager Log Directory****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Topology Script File Name****Description**

Whether to suppress configuration warnings produced by the Topology Script File Name configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_net.topology.script.file.name`**Required**`true`**Suppress Configuration Validator: Java Heap Size of Ozone Manager****Description**

Whether to suppress configuration warnings produced by the Java Heap Size of Ozone Manager configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_om_max_heap_size`**Required**`true`**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_oom_heap_dump_dir`**Required**`true`**Suppress Configuration Validator: Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties****Description**

Whether to suppress configuration warnings produced by the Ozone DataNode Advanced Configuration Snippet (Safety Valve) for ozone-conf/dn-audit-log4j2.properties configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone-conf/dn-audit-log4j2.properties_role_safety_valve`**Required**`true`**Suppress Configuration Validator: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/om-audit-log4j2.properties****Description**

Whether to suppress configuration warnings produced by the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/om-audit-log4j2.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/om-audit-log4j2.properties\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml****Description**

Whether to suppress configuration warnings produced by the Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-prometheus.yml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ozone-prometheus.yml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

Whether to suppress configuration warnings produced by the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ozone-site.xml\_client\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ozone-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/prometheus-token****Description**

Whether to suppress configuration warnings produced by the Ozone Prometheus Advanced Configuration Snippet (Safety Valve) for ozone-conf/prometheus-token configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/prometheus-token\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml****Description**

Whether to suppress configuration warnings produced by the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-audit.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ranger-ozone-audit.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-policymgr-ssl.xml****Description**

Whether to suppress configuration warnings produced by the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-policymgr-ssl.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ranger-ozone-policymgr-ssl.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml****Description**

Whether to suppress configuration warnings produced by the Ozone Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ranger-ozone-security.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ranger-ozone-security.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/scm-audit-log4j2.properties\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

Whether to suppress configuration warnings produced by the Ozone Client Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-client.xml\_client\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-client.xml\_role\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml

**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-server.xml\_role\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Ozone Datanode HTTP Web UI Port

**Description**

Whether to suppress configuration warnings produced by the Ozone Datanode HTTP Web UI Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.datanode.http-port

**Required**

true

### Suppress Configuration Validator: Ozone Datanode Port (TLS/SSL)

**Description**

Whether to suppress configuration warnings produced by the Ozone Datanode Port (TLS/SSL) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.datanode.https-port

**Required**

true

**Suppress Configuration Validator: Ozone Log Directory****Description**

Whether to suppress configuration warnings produced by the Ozone Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.log.dir

**Required**

true

**Suppress Configuration Validator: Storage Container Manager Metadata Directory****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Metadata Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.metadata.dirs

**Required**

true

**Suppress Configuration Validator: Ozone Manager Data Directory****Description**

Whether to suppress configuration warnings produced by the Ozone Manager Data Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.db.dirs

**Required**

true

**Suppress Configuration Validator: Ozone Manager HTTP Bind Hostname****Description**

Whether to suppress configuration warnings produced by the Ozone Manager HTTP Bind Hostname configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.http-bind-host

**Required**

true

**Suppress Configuration Validator: Ozone Manager HTTP Web UI Port****Description**

Whether to suppress configuration warnings produced by the Ozone Manager HTTP Web UI Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.http-port

**Required**

true

**Suppress Configuration Validator: Secure Ozone Manager HTTPS Bind Hostname****Description**

Whether to suppress configuration warnings produced by the Secure Ozone Manager HTTPS Bind Hostname configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.https-bind-host

**Required**

true

**Suppress Configuration Validator: Secure Ozone Manager Web UI Port (TLS/SSL)****Description**

Whether to suppress configuration warnings produced by the Secure Ozone Manager Web UI Port (TLS/SSL) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.https-port

**Required**

true

**Suppress Configuration Validator: Ozone Manager Ratis port****Description**

Whether to suppress configuration warnings produced by the Ozone Manager Ratis port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.ratis-port

**Required**

true

**Suppress Configuration Validator: Ozone Manager Ratis Storage Directory****Description**

Whether to suppress configuration warnings produced by the Ozone Manager Ratis Storage Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.ratis.storage.dir

**Required**

true

**Suppress Configuration Validator: Ozone Manager RPC port****Description**

Whether to suppress configuration warnings produced by the Ozone Manager RPC port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.om.rpc-port

**Required**

true

**Suppress Configuration Validator: Prometheus Data Retention time.****Description**

Whether to suppress configuration warnings produced by the Prometheus Data Retention time. configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.prometheus.data.retention.time

**Required**

---

true

### Suppress Configuration Validator: Prometheus Data Directory

**Description**

Whether to suppress configuration warnings produced by the Prometheus Data Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.prometheus.db.dir

**Required**

true

### Suppress Configuration Validator: Prometheus server extra flags.

**Description**

Whether to suppress configuration warnings produced by the Prometheus server extra flags configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.prometheus.extra.flags

**Required**

true

### Suppress Configuration Validator: Prometheus HTTP Port

**Description**

Whether to suppress configuration warnings produced by the Prometheus HTTP Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.prometheus.http-port

**Required**

true

### Suppress Configuration Validator: Prometheus server log level.

**Description**

Whether to suppress configuration warnings produced by the Prometheus server log level configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_ozone.prometheus.log.level`**Required**`true`**Suppress Configuration Validator: Recon Data Directory****Description**

Whether to suppress configuration warnings produced by the Recon Data Directory configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.recon.db.dir`**Required**`true`**Suppress Configuration Validator: Recon HTTP Bind Hostname****Description**

Whether to suppress configuration warnings produced by the Recon HTTP Bind Hostname configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.recon.http-bind-host`**Required**`true`**Suppress Configuration Validator: Recon HTTP Web UI Port****Description**

Whether to suppress configuration warnings produced by the Recon HTTP Web UI Port configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.recon.http-port`**Required**`true`**Suppress Configuration Validator: Secure Recon HTTPS Bind Hostname****Description**

Whether to suppress configuration warnings produced by the Secure Recon HTTPS Bind Hostname configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.recon.https-bind-host

**Required**

true

**Suppress Configuration Validator: Secure Recon Web UI Port (TLS/SSL)****Description**

Whether to suppress configuration warnings produced by the Secure Recon Web UI Port (TLS/SSL) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.recon.https-port

**Required**

true

**Suppress Configuration Validator: Recon OzoneManager Data Directory****Description**

Whether to suppress configuration warnings produced by the Recon OzoneManager Data Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.recon.om.db.dir

**Required**

true

**Suppress Configuration Validator: Recon RPC Port****Description**

Whether to suppress configuration warnings produced by the Recon RPC Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.recon.rpc-port

**Required**

true

**Suppress Configuration Validator: Recon StorageContainerManager Data Directory****Description**

Whether to suppress configuration warnings produced by the Recon StorageContainerManager Data Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.recon.scm.db.dirs

**Required**

true

**Suppress Configuration Validator: Ozone S3 Gateway HTTP Bind Hostname****Description**

Whether to suppress configuration warnings produced by the Ozone S3 Gateway HTTP Bind Hostname configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.s3g.http-bind-host

**Required**

true

**Suppress Configuration Validator: Ozone S3 Gateway HTTP Web UI Port****Description**

Whether to suppress configuration warnings produced by the Ozone S3 Gateway HTTP Web UI Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.s3g.http-port

**Required**

true

**Suppress Configuration Validator: Secure Ozone S3 Gateway HTTPS Bind Hostname****Description**

Whether to suppress configuration warnings produced by the Secure Ozone S3 Gateway HTTPS Bind Hostname configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ozone.s3g.https-bind-host`**Required**`true`**Suppress Configuration Validator: Secure Ozone S3 Gateway Web UI Port (TLS/SSL)****Description**

Whether to suppress configuration warnings produced by the Secure Ozone S3 Gateway Web UI Port (TLS/SSL) configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.s3g.https-port`**Required**`true`**Suppress Configuration Validator: Datanode ID Directory****Description**

Whether to suppress configuration warnings produced by the Datanode ID Directory configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.scm.datanode.id.dir`**Required**`true`**Suppress Configuration Validator: Storage Container Manager Data Directory****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Data Directory configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.scm.db.dirs`**Required**`true`**Suppress Configuration Validator: Storage Container Manager HTTP Bind Hostname****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager HTTP Bind Hostname configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ozone.scm.http-bind-host

**Required**

true

**Suppress Configuration Validator: Storage Container Manager HTTP Web UI Port****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager HTTP Web UI Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.scm.http-port

**Required**

true

**Suppress Configuration Validator: Secure Storage Container Manager HTTPS Bind Hostname****Description**

Whether to suppress configuration warnings produced by the Secure Storage Container Manager HTTPS Bind Hostname configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.scm.https-bind-host

**Required**

true

**Suppress Configuration Validator: Secure Storage Container Manager Web UI Port (TLS/SSL)****Description**

Whether to suppress configuration warnings produced by the Secure Storage Container Manager Web UI Port (TLS/SSL) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.scm.https-port

**Required**

true

**Suppress Configuration Validator: Java Heap Size of DataNode****Description**

Whether to suppress configuration warnings produced by the Java Heap Size of DataNode configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone\_datanode\_heap\_size

**Required**

true

**Suppress Configuration Validator: Ozone DataNode Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Ozone DataNode Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone\_datanode\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ozone Manager Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Ozone Manager Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone\_manager\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ozone Prometheus Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Ozone Prometheus Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ozone_prometheus_role_env_safety_valve`**Required**`true`**Suppress Configuration Validator: Java Heap Size of Recon****Description**

Whether to suppress configuration warnings produced by the Java Heap Size of Recon configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone_recon_max_heap_size`**Required**`true`**Suppress Configuration Validator: Ozone Recon Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Ozone Recon Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone_recon_role_env_safety_valve`**Required**`true`**Suppress Configuration Validator: Java Heap Size of S3 Gateway****Description**

Whether to suppress configuration warnings produced by the Java Heap Size of S3 Gateway configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone_s3_gateway_max_heap_size`**Required**`true`**Suppress Configuration Validator: Prometheus Binary Location****Description**

Whether to suppress configuration warnings produced by the Prometheus Binary Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_prometheus.location

**Required**

true

**Suppress Configuration Validator: Ranger Ozone Plugin Conf Path****Description**

Whether to suppress configuration warnings produced by the Ranger Ozone Plugin Conf Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_ozone\_plugin\_conf\_path

**Required**

true

**Suppress Configuration Validator: Ranger Ozone Plugin Policy Cache Directory Path****Description**

Whether to suppress configuration warnings produced by the Ranger Ozone Plugin Policy Cache Directory Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_ozone\_plugin\_policy\_cache\_directory

**Required**

true

**Suppress Configuration Validator: Ranger Ozone Plugin Audit Solr Spool Directory Path****Description**

Whether to suppress configuration warnings produced by the Ranger Ozone Plugin Audit Solr Spool Directory Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_ozone\_plugin\_solr\_audit\_spool\_directory

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: S3 Gateway Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the S3 Gateway Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_s3\_gateway\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Java Heap Size of Storage Container Manager****Description**

Whether to suppress configuration warnings produced by the Java Heap Size of Storage Container Manager configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_scm_max_heap_size`**Required**`true`**Suppress Configuration Validator: Storage Container Manager TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager TLS/SSL Trust Store File configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_client_truststore_location`**Required**`true`**Suppress Configuration Validator: Storage Container Manager TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager TLS/SSL Trust Store Password configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_client_truststore_password`**Required**`true`**Suppress Configuration Validator: Storage Container Manager TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager TLS/SSL Server Keystore Key Password configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_keypassword`**Required**`true`**Suppress Configuration Validator: Storage Container Manager TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

### Suppress Configuration Validator: Storage Container Manager TLS/SSL Server Keystore File Password

**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

### Suppress Configuration Validator: Stacks Collection Directory

**Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

### Suppress Configuration Validator: Storage Container Manager Environment Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_storage\_container\_manager\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Gateway Count Validator****Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_gateway\_count\_validator

**Required**

true

**Suppress Parameter Validation: Ozone Prometheus Endpoint Token****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Prometheus Endpoint Token parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_hdds.prometheus.endpoint.token

**Required**

true

**Suppress Parameter Validation: Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ozone-conf/ozone-site.xml\_service\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ozone-conf/ssl-client.xml\_service\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Service Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ozone-conf/ssl-server.xml\_service\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Ozone Service ID

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Service ID parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ozone.service.id

**Required**

true

### Suppress Configuration Validator: Ozone DataNode Count Validator

**Description**

Whether to suppress configuration warnings produced by the Ozone DataNode Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ozone\_datanode\_count\_validator

**Required**

true

**Suppress Parameter Validation: Ozone Java Options****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Java Options parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ozone\_java\_opts

**Required**

true

**Suppress Configuration Validator: Ozone Manager Count Validator****Description**

Whether to suppress configuration warnings produced by the Ozone Manager Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ozone\_manager\_count\_validator

**Required**

true

**Suppress Configuration Validator: Ozone Prometheus Count Validator****Description**

Whether to suppress configuration warnings produced by the Ozone Prometheus Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ozone\_prometheus\_count\_validator

**Required**

true

**Suppress Configuration Validator: Ozone Recon Count Validator****Description**

Whether to suppress configuration warnings produced by the Ozone Recon Count Validator configuration validator.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_ozone\_recon\_count\_validator

**Required**

true

**Suppress Parameter Validation: Ozone Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ozone\_service\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Ranger Ozone Plugin Hdfs Audit Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Ozone Plugin Hdfs Audit Directory parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_ozone\_plugin\_hdfs\_audit\_directory

**Required**

true

**Suppress Configuration Validator: S3 Gateway Count Validator****Description**

Whether to suppress configuration warnings produced by the S3 Gateway Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_s3\_gateway\_count\_validator

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Storage Container Manager Count Validator****Description**

Whether to suppress configuration warnings produced by the Storage Container Manager Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_storage\_container\_manager\_count\_validator

**Required**

true

**Storage Container Manager****Advanced****Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when `java.lang.OutOfMemoryError` error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

`oom_heap_dump_dir`

**Default Value**

`/tmp`

**API Name**

`oom_heap_dump_dir`

**Required**

`false`

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

`true`

**API Name**

`oom_heap_dump_enabled`

**Required**

`true`

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

**Related Name****Default Value**

`true`

**API Name**

`oom_sigkill_enabled`

**Required**

`true`

**Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml****Description**

For advanced use only. A string to be inserted into `ozone-conf/ozone-site.xml` for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ozone-site.xml\_role\_safety\_valve

**Required**

false

**Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties****Description**

For advanced use only. A string to be inserted into ozone-conf/scm-audit-log4j2.properties for this role only.

**Related Name****Default Value****API Name**

ozone-conf/scm-audit-log4j2.properties\_role\_safety\_valve

**Required**

false

**Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-client.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ssl-client.xml\_role\_safety\_valve

**Required**

false

**Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml****Description**

For advanced use only. A string to be inserted into ozone-conf/ssl-server.xml for this role only.

**Related Name****Default Value****API Name**

ozone-conf/ssl-server.xml\_role\_safety\_valve

**Required**

false

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

	false
API Name	
	process_auto_restart
Required	
	true

Enable Metric Collection

Description	Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.
Related Name	
Default Value	true
API Name	process_should_monitor
Required	true

Process Start Retry Attempts

Description	Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.
Related Name	
Default Value	3
API Name	process_start_retries
Required	false

Process Start Wait Timeout

Description	The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
Related Name	
Default Value	20
API Name	process_start_secs
Required	false

**Storage Container Manager Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

STORAGE\_CONTAINER\_MANAGER\_role\_env\_safety\_valve

**Required**

false

**Logs****Storage Container Manager Log Directory****Description**

The log directory for log files of the role Storage Container Manager.

**Related Name**

log.dir

**Default Value**

/var/log/hadoop-ozone

**API Name**

log\_dir

**Required**

false

**Storage Container Manager Logging Threshold****Description**

The minimum log level for Storage Container Manager logs

**Related Name****Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

**Storage Container Manager Maximum Log File Backups****Description**

The maximum number of rolled log files to keep for Storage Container Manager logs. Typically used by log4j or logback.

**Related Name****Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

**Storage Container Manager Max Log Size****Description**

The maximum size, in megabytes, per log file for Storage Container Manager logs. Typically used by log4j or logback.

**Related Name****Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring****Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring_metric_filter
<b>Required</b>
false

Swap Memory Usage Rate Thresholds

<b>Description</b>
The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.
<b>Related Name</b>
<b>Default Value</b>
Warning: Never, Critical: Never
<b>API Name</b>
process_swap_memory_rate_thresholds
<b>Required</b>
false

Swap Memory Usage Rate Window

<b>Description</b>
The period to review when computing unexpected swap memory usage change of the process.
<b>Related Name</b>
common.process.swap_memory_rate_window
<b>Default Value</b>
5 minute(s)
<b>API Name</b>
process_swap_memory_rate_window
<b>Required</b>
false

Process Swap Memory Thresholds

<b>Description</b>
The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.
<b>Related Name</b>
<b>Default Value</b>
Warning: 200 B, Critical: Never
<b>API Name</b>
process_swap_memory_thresholds
<b>Required</b>
false

Role Triggers

<b>Description</b>
The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger

condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

`role_triggers`

**Required**

true

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

`storage_container_manager_fd_thresholds`

**Required**

false

**Storage Container Manager Host Health Test****Description**

When computing the overall Storage Container Manager health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

`storage_container_manager_host_health_enabled`

**Required**

false

### Storage Container Manager Process Health Test

#### Description

Enables the health test that the Storage Container Manager's process state is consistent with the role configuration

#### Related Name

#### Default Value

true

#### API Name

storage\_container\_manager\_scm\_health\_enabled

#### Required

false

### Unexpected Exits Thresholds

#### Description

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

#### Related Name

#### Default Value

Warning: Never, Critical: Any

#### API Name

unexpected\_exits\_thresholds

#### Required

false

### Unexpected Exits Monitoring Period

#### Description

The period to review when computing unexpected exits.

#### Related Name

#### Default Value

5 minute(s)

#### API Name

unexpected\_exits\_window

#### Required

false

### Other

### Topology Script File Name

#### Description

Full path to a custom topology script on the host file system. The topology script is used to determine the rack location of nodes. If left with "{DEFAULT\_TOPOLOGY\_SCRIPT}", a topology script will be provided that uses your hosts' rack information, visible in the "Hosts" page.

#### Related Name

net.topology.script.file.name

**Default Value**

DEFAULT\_TOPOLOGY\_SCRIPT

**API Name**

net.topology.script.file.name

**Required**

false

**Ozone Log Directory****Description**

Directory where Storage Container Manager logs will be written to

**Related Name**

ozone.log.dir

**Default Value**

/var/log/hadoop-ozone

**API Name**

ozone.log.dir

**Required**

false

**Storage Container Manager Metadata Directory****Description**

Determines where on the local filesystem SCM security certificates will be stored.

**Related Name**

ozone.metadata.dirs

**Default Value**

/var/lib/hadoop-ozone/scm/ozone-metadata

**API Name**

ozone.metadata.dirs

**Required**

true

**Storage Container Manager Data Directory****Description**

Directory where the StorageContainerManager stores its metadata

**Related Name**

ozone.scm.db.dirs

**Default Value**

/var/lib/hadoop-ozone/scm/data

**API Name**

ozone.scm.db.dirs

**Required**

true

**Storage Container Manager HTTP Bind Hostname****Description**

The actual address the SCM web server will bind to. If this optional address is set, it overrides only the hostname portion of 'ozone.scm.http-address'.

**Related Name**

ozone.scm.http-bind-host

**Default Value**

0.0.0.0

**API Name**

ozone.scm.http-bind-host

**Required**

false

**Secure Storage Container Manager HTTPS Bind Hostname****Description**

The actual address the SCM web server will bind to using HTTPS. If this optional address is set, it overrides only the hostname portion of 'ozone.scm.https-address'.

**Related Name**

ozone.scm.https-bind-host

**Default Value**

0.0.0.0

**API Name**

ozone.scm.https-bind-host

**Required**

false

**Java Heap Size of Storage Container Manager****Description**

Maximum size for the Java process heap memory.

**Related Name**

scm\_max\_heap\_size

**Default Value**

4 GiB

**API Name**

scm\_max\_heap\_size

**Required**

false

**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit_fds
<b>Required</b>
false

Ports and Addresses

Storage Container Manager HTTP Web UI Port

<b>Description</b>
The base port that the Storage Container Manager web user interface listens on. The host name of the Storage Container Manager is combined with this port to form the 'ozone.scm.http-address'.
<b>Related Name</b>
ozone.scm.http-port
<b>Default Value</b>
9876
<b>API Name</b>
ozone.scm.http-port
<b>Required</b>
true

Secure Storage Container Manager Web UI Port (TLS/SSL)

<b>Description</b>
The base port that the Storage Container Manager web user interface listens on when using HTTPS. The host name of the Storage Container Manager is combined with this port to form the 'ozone.scm.https-address'.
<b>Related Name</b>
ozone.scm.https-port
<b>Default Value</b>
9877
<b>API Name</b>
ozone.scm.https-port
<b>Required</b>
false

Resource Management

Cgroup CPU Shares

<b>Description</b>
Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
<b>Related Name</b>
cpu.shares
<b>Default Value</b>
1024
<b>API Name</b>
rm_cpu_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

### Cgroup Memory Soft Limit

#### Description

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

#### Related Name

memory.soft\_limit\_in\_bytes

#### Default Value

-1 MiB

#### API Name

rm\_memory\_soft\_limit

#### Required

true

### Security

### Storage Container Manager TLS/SSL Trust Store File

#### Description

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Storage Container Manager might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

#### Related Name

ssl.client.truststore.location

#### Default Value

#### API Name

ssl\_client\_truststore\_location

#### Required

false

### Storage Container Manager TLS/SSL Trust Store Password

#### Description

The password for the Storage Container Manager TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

#### Related Name

ssl.client.truststore.password

#### Default Value

#### API Name

ssl\_client\_truststore\_password

#### Required

false

Enable TLS/SSL for Storage Container Manager

Description

Encrypt communication between clients and Storage Container Manager using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

Related Name

ozone.ssl.enabled

Default Value

false

API Name

ssl\_enabled

Required

false

Storage Container Manager TLS/SSL Server Keystore Key Password

Description

The password that protects the private key contained in the keystore used when Storage Container Manager is acting as a TLS/SSL server.

Related Name

ssl.server.keystore.keypassword

Default Value

API Name

ssl\_server\_keystore\_keypassword

Required

false

Storage Container Manager TLS/SSL Server Keystore File Location

Description

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Storage Container Manager is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

Related Name

ssl.server.keystore.location

Default Value

API Name

ssl\_server\_keystore\_location

Required

false

Storage Container Manager TLS/SSL Server Keystore File Password

Description

The password for the Storage Container Manager keystore file.

Related Name

ssl.server.keystore.password

<b>Default Value</b>
<b>API Name</b>
ssl_server_keystore_password
<b>Required</b>
false

Stacks Collection

Stacks Collection Data Retention

<b>Description</b>
The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
<b>Related Name</b>
stacks_collection_data_retention
<b>Default Value</b>
100 MiB
<b>API Name</b>
stacks_collection_data_retention
<b>Required</b>
false

Stacks Collection Directory

<b>Description</b>
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
<b>Related Name</b>
stacks_collection_directory
<b>Default Value</b>
<b>API Name</b>
stacks_collection_directory
<b>Required</b>
false

Stacks Collection Enabled

<b>Description</b>
Whether or not periodic stacks collection is enabled.
<b>Related Name</b>
stacks_collection_enabled
<b>Default Value</b>
false
<b>API Name</b>
stacks_collection_enabled
<b>Required</b>

---

true

### Stacks Collection Frequency

#### Description

The frequency with which stacks are collected.

#### Related Name

stacks\_collection\_frequency

#### Default Value

5.0 second(s)

#### API Name

stacks\_collection\_frequency

#### Required

false

### Stacks Collection Method

#### Description

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

#### Related Name

stacks\_collection\_method

#### Default Value

jstack

#### API Name

stacks\_collection\_method

#### Required

false

### Suppressions

#### Suppress Configuration Validator: CDH Version Validator

##### Description

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

##### Related Name

##### Default Value

false

##### API Name

role\_config\_suppression\_cdh\_version\_validator

##### Required

true

#### Suppress Parameter Validation: Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve)

##### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Storage Container Manager Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Topology Script File Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Topology Script File Name parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_net.topology.script.file.name

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

---

true

### Suppress Parameter Validation: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ozone-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ozone-site.xml\_role\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/scm-audit-log4j2.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/scm-audit-log4j2.properties\_role\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-client.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-client.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Advanced Configuration Snippet (Safety Valve) for ozone-conf/ssl-server.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone-conf/ssl-server.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ozone Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ozone Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.log.dir

**Required**

true

**Suppress Parameter Validation: Storage Container Manager Metadata Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Metadata Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.metadata.dirs

**Required**

true

**Suppress Parameter Validation: Storage Container Manager Data Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Data Directory parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_ozone.scm.db.dirs`**Required**`true`**Suppress Parameter Validation: Storage Container Manager HTTP Bind Hostname****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager HTTP Bind Hostname parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.scm.http-bind-host`**Required**`true`**Suppress Parameter Validation: Storage Container Manager HTTP Web UI Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager HTTP Web UI Port parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.scm.http-port`**Required**`true`**Suppress Parameter Validation: Secure Storage Container Manager HTTPS Bind Hostname****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Storage Container Manager HTTPS Bind Hostname parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ozone.scm.https-bind-host`**Required**`true`**Suppress Parameter Validation: Secure Storage Container Manager Web UI Port (TLS/SSL)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Secure Storage Container Manager Web UI Port (TLS/SSL) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ozone.scm.https-port

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Java Heap Size of Storage Container Manager****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of Storage Container Manager parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_scm\_max\_heap\_size

**Required**

true

**Suppress Parameter Validation: Storage Container Manager TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Storage Container Manager TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Parameter Validation: Storage Container Manager TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager TLS/SSL Server Keystore Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_keypassword

**Required**

true

**Suppress Parameter Validation: Storage Container Manager TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ssl_server_keystore_location`**Required**`true`**Suppress Parameter Validation: Storage Container Manager TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_password`**Required**`true`**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_stacks_collection_directory`**Required**`true`**Suppress Parameter Validation: Storage Container Manager Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Container Manager Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_storage_container_manager_role_env_safety_valve`**Required**`true`**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_storage\_container\_manager\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_storage\_container\_manager\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_storage\_container\_manager\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**`role_health_suppression_ozone_storage_container_manager_log_directory_free_space`**Required**`true`**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_ozone_storage_container_manager_scm_health`**Required**`true`**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_ozone_storage_container_manager_swap_memory_usage`**Required**`true`**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_ozone_storage_container_manager_swap_memory_usage_rate`**Required**`true`

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ozone\_storage\_container\_manager\_unexpected\_exits

**Required**

true

**Phoenix Properties in Cloudera Runtime 7.1.8**

Role groups:

**Query Server****Advanced****Query Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when `java.lang.OutOfMemoryError` error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

`oom_heap_dump_dir`

**Default Value**

`/tmp`

**API Name**

`oom_heap_dump_dir`

**Required**

`false`

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

`true`

**API Name**

`oom_heap_dump_enabled`

**Required**

`true`

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

**Related Name****Default Value**

`true`

**API Name**

`oom_sigkill_enabled`

**Required**

`true`

**Query Server Advanced Configuration Snippet (Safety Valve) for phoenix-site.xml****Description**

For advanced use only. A string to be inserted into `phoenix-site.xml` for this role only.

**Related Name****Default Value****API Name**

`phoenix-site.xml_role_safety_valve`

**Required**

false

**Query Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

PHOENIX\_QUERY\_SERVER\_role\_env\_safety\_valve

**Required**

false

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

<b>Related Name</b>	
<b>Default Value</b>	3
<b>API Name</b>	process_start_retries
<b>Required</b>	false

Process Start Wait Timeout

<b>Description</b>	The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
<b>Related Name</b>	
<b>Default Value</b>	20
<b>API Name</b>	process_start_secs
<b>Required</b>	false

Logs

Query Server Log Directory

<b>Description</b>	The log directory for log files of the role Query Server.
<b>Related Name</b>	log_dir
<b>Default Value</b>	/var/log/phoenix
<b>API Name</b>	log_dir
<b>Required</b>	false

Query Server Logging Threshold

<b>Description</b>	The minimum log level for Query Server logs
<b>Related Name</b>	
<b>Default Value</b>	INFO
<b>API Name</b>	log_threshold
<b>Required</b>	

false

Query Server Maximum Log File Backups

Description

The maximum number of rolled log files to keep for Query Server logs. Typically used by log4j or logback.

Related Name

Default Value

10

API Name

max\_log\_backup\_index

Required

false

Query Server Max Log Size

Description

The maximum size, in megabytes, per log file for Query Server logs. Typically used by log4j or logback.

Related Name

Default Value

200 MiB

API Name

max\_log\_size

Required

false

Monitoring

Enable Health Alerts for this Role

Description

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

Related Name

Default Value

true

API Name

enable\_alerts

Required

false

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name

Default Value

false

**API Name**

enable\_config\_alerts

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

phoenix\_query\_server\_fd\_thresholds

**Required**

false

**Query Server Host Health Test****Description**

When computing the overall Query Server health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

phoenix\_query\_server\_host\_health\_enabled

**Required**

false

**Query Server Process Health Test****Description**

Enables the health test that the Query Server's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

phoenix\_query\_server\_scm\_health\_enabled

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a `DataNode` fires if the `DataNode` has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

`role_triggers`

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

`unexpected_exits_thresholds`

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

`unexpected_exits_window`

**Required**

false

## Other

### Enable Remote User Extractor

**Description**

Boolean which controls if a remote user to impersonate should be extracted from the HTTP request parameter made by that user instead of the HTTP-authenticated user name (which is the default). Required for accessing Phoenix Query Server via Knox.

**Related Name**

phoenix.queryserver.withRemoteUserExtractor

**Default Value**

true

**API Name**

phoenix\_query\_server\_with\_remote\_user\_extractor

**Required**

false

### Additional Phoenix Query Server Options

**Description**

These arguments are passed as part of the Java command line. Commonly, garbage collection flags or extra debugging flags are passed here.

**Related Name**

phoenix\_queryserver\_java\_opts

**Default Value****API Name**

phoenix\_queryserver\_java\_opts

**Required**

false

### Phoenix Query Server Max Heapsize

**Description**

Maximum size for the Phoenix Query Server Java Process heap. Passed to Java -Xmx.

**Related Name**

phoenix\_queryserver\_max\_heap\_size

**Default Value**

2 GiB

**API Name**

phoenix\_queryserver\_max\_heap\_size

**Required**

true

## Performance

### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

**Ports and Addresses****Phoenix Query Server Port****Description**

The port Phoenix Query Server will listen on

**Related Name**

phoenix.queryserver.http.port

**Default Value**

8765

**API Name**

phoenix\_query\_server\_port

**Required**

false

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Stacks Collection****Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

**Stacks Collection Directory****Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value****API Name**

stacks\_collection\_directory

**Required**

false

**Stacks Collection Enabled****Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Query Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Query Server Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Query Server Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Query Server Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Query Server Advanced Configuration Snippet (Safety Valve) for phoenix-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Query Server Advanced Configuration Snippet (Safety Valve) for phoenix-site.xml parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_phoenix-site.xml_role_safety_valve`**Required**`true`**Suppress Parameter Validation: Phoenix Query Server Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Phoenix Query Server Port parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_phoenix_query_server_port`**Required**`true`**Suppress Parameter Validation: Query Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Query Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_phoenix_query_server_role_env_safety_valve`**Required**`true`**Suppress Parameter Validation: Additional Phoenix Query Server Options****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Additional Phoenix Query Server Options parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_phoenix_queryserver_java_opts`**Required**`true`**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_phoenix\_phoenix\_query\_server\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_phoenix\_phoenix\_query\_server\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_phoenix\_phoenix\_query\_server\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_phoenix\_phoenix\_query\_server\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_phoenix\_phoenix\_query\_server\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_phoenix\_phoenix\_query\_server\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_phoenix\_phoenix\_query\_server\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**`role_health_suppression_phoenix_phoenix_query_server_unexpected_exits`**Required**`true`

## Service-Wide

### Advanced

#### Phoenix Service Environment Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**`PHOENIX_service_env_safety_valve`**Required**`false`

### System Group

**Description**

The group that this service's processes should run as.

**Related Name****Default Value**`phoenix`**API Name**`process_groupname`**Required**`true`

### System User

**Description**

The user that this service's processes should run as.

**Related Name****Default Value**`phoenix`**API Name**`process_username`**Required**`true`

## Monitoring

### Enable Service Level Health Alerts

**Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

### Healthy Query Server Monitoring Thresholds

**Description**

The health test thresholds of the overall Query Server health. The check returns "Concerning" health if the percentage of "Healthy" Query Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Query Servers falls below the critical threshold.

**Related Name****Default Value**

Warning: 99.0 %, Critical: 90.0 %

**API Name**

PHOENIX\_PHOENIX\_QUERY\_SERVER\_healthy\_thresholds

**Required**

false

### Service Triggers

**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific service.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd\_open WHERE roleType = DataNode and last(fd\_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

**Other****HBase Service****Description**

Name of the HBase service that this Phoenix service instance depends on

**Related Name****Default Value****API Name**

hbase\_service

**Required**

true

**HDFS Service**

<b>Description</b>	Name of the HDFS service that this Phoenix service instance depends on
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	hdfs_service
<b>Required</b>	true

**ZooKeeper Service**

<b>Description</b>	Name of the ZooKeeper service that this Phoenix service instance depends on
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	zookeeper_service
<b>Required</b>	true

**Security**

**Kerberos Principal**

<b>Description</b>	Kerberos principal short name used by all roles of this service.
<b>Related Name</b>	
<b>Default Value</b>	phoenix
<b>API Name</b>	kerberos_princ_name
<b>Required</b>	true

**Suppressions**

**Suppress Configuration Validator: CDH Version Validator**

<b>Description</b>	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	role_config_suppression_cdh_version_validator

**Required**

true

**Suppress Configuration Validator: Query Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Query Server Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Query Server Log Directory****Description**

Whether to suppress configuration warnings produced by the Query Server Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: Query Server Advanced Configuration Snippet (Safety Valve) for phoenix-site.xml****Description**

Whether to suppress configuration warnings produced by the Query Server Advanced Configuration Snippet (Safety Valve) for phoenix-site.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_phoenix-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Phoenix Query Server Port****Description**

Whether to suppress configuration warnings produced by the Phoenix Query Server Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_phoenix\_query\_server\_port

**Required**

true

**Suppress Configuration Validator: Query Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Query Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_phoenix\_query\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Additional Phoenix Query Server Options****Description**

Whether to suppress configuration warnings produced by the Additional Phoenix Query Server Options configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_phoenix\_queryserver\_java\_opts

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Parameter Validation: Kerberos Principal****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kerberos\_princ\_name

**Required**

true

**Suppress Configuration Validator: Phoenix HBase Dependency Write-Ahead Log (WAL) Codec Class Validator****Description**

Whether to suppress configuration warnings produced by the Phoenix HBase Dependency Write-Ahead Log (WAL) Codec Class Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_phoenix\_hbase\_regionserver\_wal\_codec\_validator

**Required**

true

**Suppress Configuration Validator: Query Server Count Validator****Description**

Whether to suppress configuration warnings produced by the Query Server Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_phoenix\_query\_server\_count\_validator

**Required**

true

**Suppress Parameter Validation: Phoenix Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Phoenix Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_phoenix\_service\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

### Suppress Health Test: Query Server Health

**Description**

Whether to suppress the results of the Query Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

service\_health\_suppression\_phoenix\_phoenix\_query\_server\_healthy

**Required**

true

## Ranger Properties in Cloudera Runtime 7.1.8

Role groups:

### Ranger Admin

**Advanced**

#### Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml

**Description**

For advanced use only. A string to be inserted into conf/ranger-admin-site.xml for this role only.

**Related Name****Default Value****API Name**

conf/ranger-admin-site.xml\_role\_safety\_valve

**Required**

false

#### Ranger Admin Logging Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

#### Enable auto refresh for metric configurations

**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name**

**Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**Ranger Admin Environment Advanced Configuration Snippet (Safety Valve)**

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name**

**Default Value**

**API Name**

RANGER\_ADMIN\_role\_env\_safety\_valve

**Required**

false

**Logs**

**Ranger Admin Log Directory**

**Description**

The log directory for log files of the role Ranger Admin.

**Related Name**

ranger.logs.base.dir

**Default Value**

/var/log/ranger/admin

**API Name**

log\_dir

**Required**

false

**Ranger Admin Logging Threshold**

**Description**

The minimum log level for Ranger Admin logs

**Related Name**

**Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

**Ranger Admin Maximum Log File Backups****Description**

The maximum number of rolled log files to keep for Ranger Admin logs. Typically used by log4j or logback.

**Related Name****Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

**Ranger Admin Max Log Size****Description**

The maximum size, in megabytes, per log file for Ranger Admin logs. Typically used by log4j or logback.

**Related Name****Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring****Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name**

**Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following

configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

`monitoring_metric_filter`

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

`process_swap_memory_rate_thresholds`

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

`common.process.swap_memory_rate_window`

**Default Value**

5 minute(s)

**API Name**

`process_swap_memory_rate_window`

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name**

**Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

ranger\_admin\_fd\_thresholds

**Required**

false

**Ranger Admin Host Health Test****Description**

When computing the overall Ranger Admin health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

ranger\_admin\_host\_health\_enabled

**Required**

false

**Ranger Admin Process Health Test****Description**

Enables the health test that the Ranger Admin's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

ranger\_admin\_scm\_health\_enabled

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a `DataNode` fires if the `DataNode` has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

`role_triggers`

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the `unexpected_exits_window` configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

`unexpected_exits_thresholds`

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected_exits_window
<b>Required</b>
false

Other

Ranger Admin Diagnostics Collection Timeout

<b>Description</b>
The timeout in milliseconds to wait for diagnostics collection to complete.
<b>Related Name</b>
<b>Default Value</b>
5 minute(s)
<b>API Name</b>
csd_role_diagnostics_timeout
<b>Required</b>
false

Graceful Shutdown Timeout

<b>Description</b>
The timeout in milliseconds to wait for graceful shutdown to complete.
<b>Related Name</b>
<b>Default Value</b>
18 second(s)
<b>API Name</b>
graceful_stop_timeout
<b>Required</b>
false

Exclude Users from Audit Access Tab

<b>Description</b>
A single user, or a comma-separated list of multiple users that are excluded from Ranger audits when the Exclude Service Users checkbox is selected on the Ranger Audit Access tab in the Ranger Admin Web UI.
<b>Related Name</b>
ranger.accesslogs.exclude.users.list
<b>Default Value</b>
rangertagsync
<b>API Name</b>
ranger.accesslogs.exclude.users.list
<b>Required</b>
false

Kerberos Cookie Path

<b>Description</b>
Kerberos Cookie path

**Related Name**

ranger.admin.kerberos.cookie.path

**Default Value**

/

**API Name**

ranger.admin.kerberos.cookie.path

**Required**

false

**Kerberos Token Valid Seconds****Description**

Kerberos token validity

**Related Name**

ranger.admin.kerberos.token.valid.seconds

**Default Value**

30

**API Name**

ranger.admin.kerberos.token.valid.seconds

**Required**

false

**Maximum Shards for Solr Collection of Ranger Audits****Description**

Maximum number of shards for the Ranger Audit Solr collection. The recommended value is, number of replica given multiple by number of shards given for the collection.

**Related Name**

ranger.audit.solr.max.shards.per.node

**Default Value**

1

**API Name**

ranger.audit.solr.max.shards.per.node

**Required**

true

**Replicas for Solr Collection of Ranger Audits****Description**

Number of replicas for Ranger Audit Solr collection. The recommended value is, number of Solr servers running in the current cluster divided by number of shards for the collection.

**Related Name**

ranger.audit.solr.no.replica

**Default Value**

1

**API Name**

ranger.audit.solr.no.replica

**Required**

true

Shards for Solr Collection of Ranger Audits

Description

Number of shards required for Ranger Audit Solr collection. The recommended number of shards is equal or less than the number of Solr Server running in the current cluster.

Related Name

ranger.audit.solr.no.shards

Default Value

1

API Name

ranger.audit.solr.no.shards

Required

true

Enable Knox Trusted Proxy Support

Description

Determine if the Ranger service should allow authentication using Knox trusted proxy.

Related Name

ranger.authentication.allow.trustedproxy

Default Value

false

API Name

ranger.authentication.allow.trustedproxy

Required

false

Default Policy Groups

Description

Single or comma separated list of groups that are required in default policies for Ranger plugin services. The groups will be added for any new Ranger Plugin services created in Ranger Admin after setting value to this parameter.

Related Name

ranger.default.policy.groups

Default Value

API Name

ranger.default.policy.groups

Required

false

Default Policy Users

Description

Single or comma separated list of users that are required in default policies for Ranger plugin services. The users will be added for any new Ranger Plugin services created in Ranger Admin after setting value to this parameter.

Related Name

ranger.default.policy.users
<b>Default Value</b>
<b>API Name</b>
ranger.default.policy.users
<b>Required</b>
false

Admin AD Auth Base DN

<b>Description</b>
This parameter is only used if Authentication method is AD. The Distinguished Name (DN) of the starting point for directory server searches.
<b>Related Name</b>
ranger.ldap.ad.base.dn
<b>Default Value</b>
<b>API Name</b>
ranger.ldap.ad.base.dn
<b>Required</b>
false

Admin AD Auth Bind DN

<b>Description</b>
Full distinguished name (DN), including common name (CN), of an AD user account that has privileges to search for users. Only used if Authentication method is AD
<b>Related Name</b>
ranger.ldap.ad.bind.dn
<b>Default Value</b>
<b>API Name</b>
ranger.ldap.ad.bind.dn
<b>Required</b>
false

Admin AD Auth Domain Name

<b>Description</b>
AD domain. Only used if Authentication method is AD.
<b>Related Name</b>
ranger.ldap.ad.domain
<b>Default Value</b>
<b>API Name</b>
ranger.ldap.ad.domain
<b>Required</b>
false

Admin AD Auth Referral

<b>Description</b>
--------------------

This parameter is only used if Authentication method is AD. Set to follow if multiple AD servers are configured to return continuation references for results. Set to ignore (default) if no referrals should be followed.

**Related Name**

ranger.ldap.ad.referral

**Default Value**

ignore

**API Name**

ranger.ldap.ad.referral

**Required**

false

**Admin AD Auth URL****Description**

AD URL. Only used if Authentication method is AD

**Related Name**

ranger.ldap.ad.url

**Default Value****API Name**

ranger.ldap.ad.url

**Required**

false

**Admin AD Auth User Search Filter****Description**

AD user search filter. Only used if Authentication method is AD.

**Related Name**

ranger.ldap.ad.user.searchfilter

**Default Value****API Name**

ranger.ldap.ad.user.searchfilter

**Required**

false

**Admin LDAP Auth Base DN****Description**

The Distinguished Name (DN) of the starting point for directory server searches. Only used if Authentication method is LDAP.

**Related Name**

ranger.ldap.base.dn

**Default Value****API Name**

ranger.ldap.base.dn

**Required**

---

false

### Admin LDAP Auth Bind User

#### Description

Full distinguished name (DN), including common name (CN), of an LDAP user account that has privileges to search for users. This user is used for searching the users. This could be read-only LDAP user. Example: cn=admin,dc=example,dc=com

#### Related Name

ranger.ldap.bind.dn

#### Default Value

#### API Name

ranger.ldap.bind.dn

#### Required

false

### Admin LDAP Auth Group Role Attribute

#### Description

LDAP group role attribute. Only used if Authentication method is LDAP.

#### Related Name

ranger.ldap.group.roleattribute

#### Default Value

#### API Name

ranger.ldap.group.roleattribute

#### Required

false

### Admin LDAP Auth Group Search Base

#### Description

LDAP group searchbase. Only used if Authentication method is LDAP.

#### Related Name

ranger.ldap.group.searchbase

#### Default Value

#### API Name

ranger.ldap.group.searchbase

#### Required

false

### Admin LDAP Auth Group Search Filter

#### Description

LDAP group search filter. Only used if Authentication method is LDAP.

#### Related Name

ranger.ldap.group.searchfilter

#### Default Value

#### API Name

`ranger.ldap.group.searchfilter`**Required**`false`**Admin LDAP Auth Referral****Description**

This parameter is only used if Authentication method is LDAP. Set to follow if multiple LDAP servers are configured to return continuation references for results. Set to ignore (default) if no referrals should be followed. When this parameter is set to throw, all of the normal entries are returned in the enumeration first, before the `ReferralException` is thrown.

**Related Name**`ranger.ldap.referral`**Default Value**`ignore`**API Name**`ranger.ldap.referral`**Required**`false`**Admin LDAP Auth URL****Description**

LDAP server URL. Example: value = `ldap://localhost:389` or `ldaps://localhost:636`

**Related Name**`ranger.ldap.url`**Default Value****API Name**`ranger.ldap.url`**Required**`false`**Admin LDAP Auth User DN Pattern****Description**

LDAP user DN. Only used if Authentication method is LDAP.

**Related Name**`ranger.ldap.user.dnpattern`**Default Value****API Name**`ranger.ldap.user.dnpattern`**Required**`false`**Admin LDAP Auth User Search Filter****Description**

LDAP user search filter. Only used if Authentication method is LDAP.

**Related Name**

ranger.ldap.user.searchfilter
<b>Default Value</b>
<b>API Name</b>
ranger.ldap.user.searchfilter
<b>Required</b>
false

SSO Browser Useragent

<b>Description</b>
Comma seperated values of browser agent
<b>Related Name</b>
ranger.sso.browser.useragent
<b>Default Value</b>
Mozilla, chrome
<b>API Name</b>
ranger.sso.browser.useragent
<b>Required</b>
false

Enable Ranger SSO

<b>Description</b>
Determine if Ranger is Knox SSO enabled or not ?
<b>Related Name</b>
ranger.sso.enabled
<b>Default Value</b>
false
<b>API Name</b>
ranger.sso.enabled
<b>Required</b>
false

SSO Provider Url

<b>Description</b>
SSO provider url Example: https://KNOX_HOST:KNOX_PORT/gateway/ KNOXSSO_TOPOLOGY_NAME/api/v1/websso
<b>Related Name</b>
ranger.sso.providerurl
<b>Default Value</b>
<b>API Name</b>
ranger.sso.providerurl
<b>Required</b>
false

**SSO Public Key****Description**

Public key for SSO cookie verification

**Related Name**

ranger.sso.publicKey

**Default Value****API Name**

ranger.sso.publicKey

**Required**

false

**Enable Auto Create Tag Service****Description**

Whether to create tag service in Ranger Admin.

**Related Name**

ranger.tagservice.auto.create

**Default Value**

true

**API Name**

ranger.tagservice.auto.create

**Required**

false

**Enable Tag Service Auto Link****Description**

Whether to link the Tag service set in "Tag Service Name" parameter to all available services in Ranger Admin.

**Related Name**

ranger.tagservice.auto.link

**Default Value**

true

**API Name**

ranger.tagservice.auto.link

**Required**

false

**Tag Service Name****Description**

Name of the tag service that will be created in Ranger Admin when "Enable Auto Create Tag Service" parameter is enabled.

**Related Name**

ranger.tagservice.auto.name

**Default Value**

cm\_tag

**API Name**

`ranger.tagservice.auto.name`**Required**`false`**Admin UNIX Auth Remote Login****Description**

Whether remote login is enabled. Only used if Authentication method is UNIX.

**Related Name**`ranger.unixauth.remote.login.enabled`**Default Value**`true`**API Name**`ranger.unixauth.remote.login.enabled`**Required**`false`**Admin UNIX Auth Service Hostname****Description**

Host where unix authentication service is running. Only used if Authentication method is UNIX. `{{RANGER_USERSYNC_HOST}}` is a placeholder value which will be replaced with the host where Ranger Usersync will be installed in the current cluster.

**Related Name**`ranger.unixauth.service.hostname`**Default Value**`RANGER_USERSYNC_HOST`**API Name**`ranger.unixauth.service.hostname`**Required**`false`**Ranger Admin Conf Path****Description**

Staging directory for Ranger Admin Configuration. This should generally not be changed.

**Related Name**`ranger_admin_conf_path`**Default Value**`/etc/ranger/admin`**API Name**`ranger_admin_conf_path`**Required**`true`**Ranger Admin Max Heapsize****Description**

Maximum size for the Java Process heap. Passed to Java -Xmx. Measured in megabytes.

<b>Related Name</b>	ranger_admin_max_heap_size
<b>Default Value</b>	1 GiB
<b>API Name</b>	ranger_admin_max_heap_size
<b>Required</b>	true

**Admin Authentication Method**

<b>Description</b>	Authentication Method for login to Ranger Admin.
<b>Related Name</b>	ranger.authentication.method
<b>Default Value</b>	UNIX
<b>API Name</b>	ranger_authentication_method
<b>Required</b>	false

**Ranger Database Host**

<b>Description</b>	Hostname of the database used by Ranger Admin. If the port is non-default for your database type, use host:port notation.
<b>Related Name</b>	ranger_database_host
<b>Default Value</b>	
<b>API Name</b>	ranger_database_host
<b>Required</b>	true

**Ranger Database Name**

<b>Description</b>	Name of Ranger Admin database.
<b>Related Name</b>	ranger_database_name
<b>Default Value</b>	ranger
<b>API Name</b>	ranger_database_name
<b>Required</b>	true

### Ranger Database User Password

**Description**

Password for Ranger Admin database.

**Related Name**

ranger.jpa.jdbc.password

**Default Value****API Name**

ranger\_database\_password

**Required**

true

### Ranger Database Type

**Description**

Database type to be used.

**Related Name**

ranger\_database\_type

**Default Value**

PostgreSQL

**API Name**

ranger\_database\_type

**Required**

true

### Ranger Database User

**Description**

User for Ranger Admin database.

**Related Name**

ranger.jpa.jdbc.user

**Default Value**

rangeradmin

**API Name**

ranger\_database\_user

**Required**

true

### Admin AD Auth Bind Password

**Description**

Password for the account that can search for users. Only used if Authentication method is AD

**Related Name**

ranger.ldap.ad.bind.password

**Default Value****API Name**

ranger\_ldap\_ad\_bind\_password

**Required**

false

Admin LDAP Auth Bind User Password

Description

Password for the account that can search for users.

Related Name

ranger.ldap.bind.password

Default Value

API Name

ranger\_ldap\_bind\_password

Required

false

Knox Proxy User Groups

Description

Accepts a list of group names. The Knox user can impersonate only the users that belong to the groups specified in the list. The wildcard value \* may be used to allow impersonation of any user belonging to any group.

Related Name

ranger.proxyuser.knox.groups

Default Value

\*

API Name

ranger\_proxyuser\_knox\_groups

Required

false

Knox Proxy User Hosts

Description

Accepts a list of IP addresses, IP address ranges in CIDR format and/or host names. The Knox user can impersonate only the requests coming from hosts specified in the list. The wildcard value \* may be used to allow impersonation from any host.

Related Name

ranger.proxyuser.knox.hosts

Default Value

\*

API Name

ranger\_proxyuser\_knox\_hosts

Required

false

Knox Proxy User Users

Description

Accepts a list of usernames. The Knox user can impersonate only the users specified in the list. The wildcard value \* may be used to allow impersonation of any user.

Related Name

	ranger.proxyuser.knox.users
Default Value	*
API Name	
	ranger_proxyuser_knox_users
Required	false

Ranger Tomcat Work Dir

Description	Tomcat work directory for Ranger Admin. This should generally not be changed.
Related Name	
	ranger_tomcat_work_dir
Default Value	/var/lib/ranger/admin
API Name	
	ranger_tomcat_work_dir
Required	true

Performance

Maximum Process File Descriptors

Description	If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
Related Name	
Default Value	
API Name	
	rlimit_fds
Required	false

Ports and Addresses

Admin Unix Auth Service Port

Description	Port for unix authentication service. Only used if Authentication method is UNIX.
Related Name	
	ranger.unixauth.service.port
Default Value	5151
API Name	
	ranger.unixauth.service.port
Required	

---

false

## Resource Management

### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

### Custom Control Group Resources (overrides Cgroup settings)

**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

### Cgroup I/O Weight

**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

### Cgroup Memory Hard Limit

**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

### Cgroup Memory Soft Limit

**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

## Security

### Ranger Admin TLS/SSL Trust Store File

**Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ranger Admin might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

ranger.truststore.file

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

**Ranger Admin TLS/SSL Trust Store Password****Description**

The password for the Ranger Admin TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

ranger.truststore.password

**Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

**Enable TLS/SSL for Ranger Admin****Description**

Encrypt communication between clients and Ranger Admin using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

ranger.service.https.attrib.ssl.enabled

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**Ranger Admin TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ranger Admin is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

ranger.https.attrib.keystore.file

**Default Value****API Name**

ssl\_server\_keystore\_location

**Required**

false

**Ranger Admin TLS/SSL Server Keystore File Password****Description**

The password for the Ranger Admin keystore file.

<b>Related Name</b>	ranger.service.https.attrib.keystore.pass
<b>Default Value</b>	
<b>API Name</b>	ssl_server_keystore_password
<b>Required</b>	false

Stacks Collection

Stacks Collection Data Retention

<b>Description</b>	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
<b>Related Name</b>	stacks_collection_data_retention
<b>Default Value</b>	100 MiB
<b>API Name</b>	stacks_collection_data_retention
<b>Required</b>	false

Stacks Collection Directory

<b>Description</b>	The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
<b>Related Name</b>	stacks_collection_directory
<b>Default Value</b>	
<b>API Name</b>	stacks_collection_directory
<b>Required</b>	false

Stacks Collection Enabled

<b>Description</b>	Whether or not periodic stacks collection is enabled.
<b>Related Name</b>	stacks_collection_enabled
<b>Default Value</b>	false
<b>API Name</b>	

`stacks_collection_enabled`**Required**`true`**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**`stacks_collection_frequency`**Default Value**`5.0 second(s)`**API Name**`stacks_collection_frequency`**Required**`false`**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**`stacks_collection_method`**Default Value**`jstack`**API Name**`stacks_collection_method`**Required**`false`**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_cdh_version_validator`**Required**`true`

**Suppress Parameter Validation: Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/ranger-admin-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ranger Admin Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ranger Admin Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Exclude Users from Audit Access Tab****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Exclude Users from Audit Access Tab parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.accesslogs.exclude.users.list

**Required**

true

**Suppress Parameter Validation: Kerberos Cookie Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Cookie Path parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.admin.kerberos.cookie.path

**Required**

true

**Suppress Parameter Validation: Default Policy Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Policy Groups parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.default.policy.groups

**Required**

true

**Suppress Parameter Validation: Default Policy Users****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Default Policy Users parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.default.policy.users

**Required**

true

**Suppress Parameter Validation: Admin AD Auth Base DN****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth Base DN parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.ad.base.dn

**Required**

true

**Suppress Parameter Validation: Admin AD Auth Bind DN****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth Bind DN parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.ad.bind.dn

**Required**

true

**Suppress Parameter Validation: Admin AD Auth Domain Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth Domain Name parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.ad.domain

**Required**

---

true

### Suppress Parameter Validation: Admin AD Auth URL

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth URL parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.ad.url

**Required**

true

### Suppress Parameter Validation: Admin AD Auth User Search Filter

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth User Search Filter parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.ad.user.searchfilter

**Required**

true

### Suppress Parameter Validation: Admin LDAP Auth Base DN

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth Base DN parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.base.dn

**Required**

true

### Suppress Parameter Validation: Admin LDAP Auth Bind User

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth Bind User parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_ranger.ldap.bind.dn`**Required**`true`**Suppress Parameter Validation: Admin LDAP Auth Group Role Attribute****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth Group Role Attribute parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.group.roleattribute`**Required**`true`**Suppress Parameter Validation: Admin LDAP Auth Group Search Base****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth Group Search Base parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.group.searchbase`**Required**`true`**Suppress Parameter Validation: Admin LDAP Auth Group Search Filter****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth Group Search Filter parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.group.searchfilter`**Required**`true`**Suppress Parameter Validation: Admin LDAP Auth URL****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth URL parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.url

**Required**

true

**Suppress Parameter Validation: Admin LDAP Auth User DN Pattern****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth User DN Pattern parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.user.dnpattern

**Required**

true

**Suppress Parameter Validation: Admin LDAP Auth User Search Filter****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth User Search Filter parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.user.searchfilter

**Required**

true

**Suppress Parameter Validation: SSO Browser Useragent****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSO Browser Useragent parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.sso.browser.useragent

**Required**

true

**Suppress Parameter Validation: SSO Provider Url****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSO Provider Url parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.sso.providerurl

**Required**

true

**Suppress Parameter Validation: SSO Public Key****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSO Public Key parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.sso.publickey

**Required**

true

**Suppress Parameter Validation: Tag Service Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tag Service Name parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.tagservice.auto.name

**Required**

true

**Suppress Parameter Validation: Admin UNIX Auth Service Hostname****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin UNIX Auth Service Hostname parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ranger.unixauth.service.hostname`**Required**`true`**Suppress Parameter Validation: Admin Unix Auth Service Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Unix Auth Service Port parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.unixauth.service.port`**Required**`true`**Suppress Parameter Validation: Ranger Admin Conf Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Conf Path parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_admin_conf_path`**Required**`true`**Suppress Parameter Validation: Ranger Admin Max Heapsize****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Max Heapsize parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_admin_max_heap_size`**Required**`true`**Suppress Parameter Validation: Ranger Admin Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_admin\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ranger Database Host****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Database Host parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_database\_host

**Required**

true

**Suppress Parameter Validation: Ranger Database Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Database Name parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_database\_name

**Required**

true

**Suppress Parameter Validation: Ranger Database User Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Database User Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_database\_password

**Required**

true

**Suppress Parameter Validation: Ranger Database User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Database User parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_database\_user

**Required**

true

**Suppress Parameter Validation: Admin AD Auth Bind Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin AD Auth Bind Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_ldap\_ad\_bind\_password

**Required**

true

**Suppress Parameter Validation: Admin LDAP Auth Bind User Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin LDAP Auth Bind User Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_ldap\_bind\_password

**Required**

true

**Suppress Parameter Validation: Knox Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Proxy User Groups parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ranger_proxyuser_knox_groups`**Required**`true`**Suppress Parameter Validation: Knox Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Proxy User Hosts parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_proxyuser_knox_hosts`**Required**`true`**Suppress Parameter Validation: Knox Proxy User Users****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Knox Proxy User Users parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_proxyuser_knox_users`**Required**`true`**Suppress Parameter Validation: Ranger Tomcat Work Dir****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tomcat Work Dir parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_tomcat_work_dir`**Required**`true`**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Ranger Admin TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Ranger Admin TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Parameter Validation: Ranger Admin TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: Ranger Admin TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_admin\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_admin\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_admin\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_admin\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_admin\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_admin\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_admin\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_admin\_unexpected\_exits

**Required**

true

## Ranger Tagsync

### Advanced

#### Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties

**Description**

For advanced use only. A string to be inserted into conf/atlas-application.properties for this role only.

**Related Name****Default Value****API Name**

conf/atlas-application.properties\_role\_safety\_valve

**Required**

false

#### Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml

**Description**

For advanced use only. A string to be inserted into conf/ranger-tagsync-policymgr-ssl.xml for this role only.

**Related Name****Default Value****API Name**

conf/ranger-tagsync-policymgr-ssl.xml\_role\_safety\_valve

**Required**

false

#### Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml

**Description**

For advanced use only. A string to be inserted into conf/ranger-tagsync-site.xml for this role only.

**Related Name****Default Value****API Name**

conf/ranger-tagsync-site.xml\_role\_safety\_valve

**Required**

false

#### Ranger Tagsync Logging Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

<b>Related Name</b>	
<b>Default Value</b>	3
<b>API Name</b>	process_start_retries
<b>Required</b>	false

**Process Start Wait Timeout**

<b>Description</b>	The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
<b>Related Name</b>	
<b>Default Value</b>	20
<b>API Name</b>	process_start_secs
<b>Required</b>	false

**Ranger Tagsync Environment Advanced Configuration Snippet (Safety Valve)**

<b>Description</b>	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	RANGER_TAGSYNC_role_env_safety_valve
<b>Required</b>	false

**Logs**

**Ranger Tagsync Log Directory**

<b>Description</b>	The log directory for log files of the role Ranger Tagsync.
<b>Related Name</b>	ranger.tagsync.logdir
<b>Default Value</b>	/var/log/ranger/tagsync
<b>API Name</b>	log_dir
<b>Required</b>	

false

**Ranger Tagsync Logging Threshold**

**Description**

The minimum log level for Ranger Tagsync logs

**Related Name**

**Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

**Ranger Tagsync Maximum Log File Backups**

**Description**

The maximum number of rolled log files to keep for Ranger Tagsync logs. Typically used by log4j or logback.

**Related Name**

**Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

**Ranger Tagsync Max Log Size**

**Description**

The maximum size, in megabytes, per log file for Ranger Tagsync logs. Typically used by log4j or logback.

**Related Name**

**Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring**

**Enable Health Alerts for this Role**

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name**

**Default Value**

	true
API Name	
	enable_alerts
Required	
	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	
	enable_config_alerts
Required	
	false

Log Directory Free Space Monitoring Absolute Thresholds

Description	The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
Related Name	
Default Value	Warning: 10 GiB, Critical: 5 GiB
API Name	
	log_directory_free_space_absolute_thresholds
Required	
	false

Log Directory Free Space Monitoring Percentage Thresholds

Description	The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.
Related Name	
Default Value	Warning: Never, Critical: Never
API Name	
	log_directory_free_space_percentage_thresholds
Required	
	false

Metric Filter

Description	
-------------	--

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- **Health Test Metric Set** - Select this parameter to collect only metrics required for health tests.
- **Default Dashboard Metric Set** - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- **Include/Exclude Custom Metrics** - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- **Metric Name** - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- **Include only Health Test Metric Set:** Selected.
- **Include/Exclude Custom Metrics:** Set to Include.
- **Metric Name:** `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

`monitoring_metric_filter`

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

`process_swap_memory_rate_thresholds`

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

`common.process.swap_memory_rate_window`

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

ranger\_tagsync\_fd\_thresholds

**Required**

false

**Ranger Tagsync Host Health Test****Description**

When computing the overall Ranger Tagsync health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

ranger\_tagsync\_host\_health\_enabled

**Required**

false

**Ranger Tagsync Process Health Test****Description**

Enables the health test that the Ranger Tagsync's process state is consistent with the role configuration

**Related Name**

**Default Value**

true

**API Name**

ranger\_tagsync\_scm\_health\_enabled

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name

Default Value

5 minute(s)

API Name

unexpected\_exits\_window

Required

false

Other

Atlas Source: Kafka Consumer Group

Description

Kafka consumer group.

Related Name

atlas.kafka.entities.group.id

Default Value

ranger\_entities\_consumer

API Name

atlas.kafka.entities.group.id

Required

false

Graceful Shutdown Timeout

Description

The timeout in milliseconds to wait for graceful shutdown to complete.

Related Name

Default Value

18 second(s)

API Name

graceful\_stop\_timeout

Required

false

Capture Cluster name

Description

Capture cluster name.

Related Name

ranger.tagsync.atlas.default.cluster.name

Default Value

**API Name**

ranger.tagsync.atlas.default.cluster.name

**Required**

false

**Enable Ranger Tagsync Cookie Authentication****Description**

Enable cookie-based authentication for requests going from Ranger Tagsync to Ranger Admin.

**Related Name**

ranger.tagsync.cookie.enabled

**Default Value**

true

**API Name**

ranger.tagsync.cookie.enabled

**Required**

false

**Ranger Tagsync Username****Description**

Ranger Tagsync username in Ranger Admin.

**Related Name**

ranger.tagsync.dest.ranger.username

**Default Value**

rangertagsync

**API Name**

ranger.tagsync.dest.ranger.username

**Required**

false

**Enable File Tag Source****Description**

Whether to sync tags from file.

**Related Name**

ranger.tagsync.source.file

**Default Value**

false

**API Name**

ranger.tagsync.source.file

**Required**

false

**File Source: File Update Polling Interval****Description**

Sync Interval for updating tags from file.

**Related Name**

	ranger.tagsync.source.file.check.interval.millis
Default Value	1 minute(s)
API Name	
	ranger.tagsync.source.file.check.interval.millis
Required	false

**File Source: Filename**

Description	Filename containing tags.
Related Name	
	ranger.tagsync.source.file.filename
Default Value	
API Name	
	ranger.tagsync.source.file.filename
Required	false

**Ranger Tagsync Conf Path**

Description	Staging directory for Ranger Tagsync Configuration. This should generally not be changed.
Related Name	
	ranger_tagsync_conf_path
Default Value	/etc/ranger/tagsync
API Name	
	ranger_tagsync_conf_path
Required	true

**Ranger Tagsync Max Heapsize**

Description	Maximum size for the Java Process heap. Passed to Java -Xmx. Measured in megabytes.
Related Name	
	ranger_tagsync_max_heap_size
Default Value	1 GiB
API Name	
	ranger_tagsync_max_heap_size
Required	true

## Performance

### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

## Resource Management

### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

### Custom Control Group Resources (overrides Cgroup settings)

**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

### Cgroup I/O Weight

**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

## Security

### Ranger Tagsync TLS/SSL Trust Store File

**Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ranger Tagsync might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

xasecure.policymgr.clientssl.truststore

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

### Ranger Tagsync TLS/SSL Trust Store Password

**Description**

The password for the Ranger Tagsync TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

xasecure.policymgr.clientssl.truststore.password

**Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

### Enable TLS/SSL for Ranger Tagsync

**Description**

Encrypt communication between clients and Ranger Tagsync using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name****Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

### Ranger Tagsync TLS/SSL Server Keystore File Location

**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Ranger Tagsync is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

<b>Related Name</b>	xasecure.policymgr.clientssl.keystore
<b>Default Value</b>	
<b>API Name</b>	ssl_server_keystore_location
<b>Required</b>	false

**Ranger Tagsync TLS/SSL Server Keystore File Password**

<b>Description</b>	The password for the Ranger Tagsync keystore file.
<b>Related Name</b>	xasecure.policymgr.clientssl.keystore.password
<b>Default Value</b>	
<b>API Name</b>	ssl_server_keystore_password
<b>Required</b>	false

**Stacks Collection**

**Stacks Collection Data Retention**

<b>Description</b>	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
<b>Related Name</b>	stacks_collection_data_retention
<b>Default Value</b>	100 MiB
<b>API Name</b>	stacks_collection_data_retention
<b>Required</b>	false

**Stacks Collection Directory**

<b>Description</b>	The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
<b>Related Name</b>	stacks_collection_directory
<b>Default Value</b>	
<b>API Name</b>	stacks_collection_directory

**Required**

false

**Stacks Collection Enabled****Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

**Suppressions****Suppress Parameter Validation: Atlas Source: Kafka Consumer Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Atlas Source: Kafka Consumer Group parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_atlas.kafka.entities.group.id

**Required**

true

**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/atlas-application.properties\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_conf/ranger-tagsync-policymgr-ssl.xml_role_safety_valve`**Required**`true`**Suppress Parameter Validation: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_conf/ranger-tagsync-site.xml_role_safety_valve`**Required**`true`**Suppress Parameter Validation: Ranger Tagsync Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_log4j_safety_valve`**Required**`true`**Suppress Parameter Validation: Ranger Tagsync Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Log Directory parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_log_dir`**Required**`true`

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Capture Cluster name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Capture Cluster name parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.tagsync.atlas.default.cluster.name

**Required**

true

**Suppress Parameter Validation: Ranger Tagsync Username****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Username parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.tagsync.dest.ranger.username

**Required**

true

**Suppress Parameter Validation: File Source: Filename****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the File Source: Filename parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ranger.tagsync.source.file.filename`**Required**`true`**Suppress Parameter Validation: Ranger Tagsync Conf Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Conf Path parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_tagsync_conf_path`**Required**`true`**Suppress Parameter Validation: Ranger Tagsync Max Heapsize****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Max Heapsize parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_tagsync_max_heap_size`**Required**`true`**Suppress Parameter Validation: Ranger Tagsync Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger_tagsync_role_env_safety_valve`**Required**`true`**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Ranger Tagsync TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Ranger Tagsync TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Parameter Validation: Ranger Tagsync TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: Ranger Tagsync TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role_health_suppression_ranger_ranger_tagsync_audit_health
<b>Required</b>
true

Suppress Health Test: File Descriptors

<b>Description</b>
Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_health_suppression_ranger_ranger_tagsync_file_descriptor
<b>Required</b>
true

Suppress Health Test: Host Health

<b>Description</b>
Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_health_suppression_ranger_ranger_tagsync_host_health
<b>Required</b>
true

Suppress Health Test: Log Directory Free Space

<b>Description</b>
Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_health_suppression_ranger_ranger_tagsync_log_directory_free_space
<b>Required</b>
true

Suppress Health Test: Process Status

<b>Description</b>
--------------------

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_tagsync\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_tagsync\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_tagsync\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_tagsync\_unexpected\_exits

**Required**

true

## Ranger Usersync

### Advanced

#### Ranger Usersync Advanced Configuration Snippet (Safety Valve) for conf/ranger-ugsync-site.xml

**Description**

For advanced use only. A string to be inserted into conf/ranger-ugsync-site.xml for this role only.

**Related Name****Default Value****API Name**

conf/ranger-ugsync-site.xml\_role\_safety\_valve

**Required**

false

#### Ranger Usersync Logging Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

#### Enable auto refresh for metric configurations

**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

#### Heap Dump Directory

**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists,

it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**Ranger Usersync Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment.  
Applies to configurations of this role except client configuration.

**Related Name**

**Default Value**

**API Name**

RANGER\_USERSYNC\_role\_env\_safety\_valve

**Required**

false

Logs

Ranger Usersync Log Directory

**Description**

The log directory for log files of the role Ranger Usersync.

**Related Name**

ranger.usersync.logdir

**Default Value**

/var/log/ranger/usersync

**API Name**

log\_dir

**Required**

false

Ranger Usersync Logging Threshold

**Description**

The minimum log level for Ranger Usersync logs

**Related Name**

**Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

Ranger Usersync Maximum Log File Backups

**Description**

The maximum number of rolled log files to keep for Ranger Usersync logs. Typically used by log4j or logback.

**Related Name**

**Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

**Ranger Usersync Max Log Size**

**Description**

The maximum size, in megabytes, per log file for Ranger Usersync logs. Typically used by log4j or logback.

**Related Name**

**Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring**

**Enable Health Alerts for this Role**

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name**

**Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts**

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name**

**Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds**

**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name**

**Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

### Swap Memory Usage Rate Thresholds

**Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

### File Descriptor Monitoring Thresholds

**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

ranger\_usersync\_fd\_thresholds

**Required**

false

**Ranger Usersync Host Health Test****Description**

When computing the overall Ranger Usersync health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

ranger\_usersync\_host\_health\_enabled

**Required**

false

**Ranger Usersync Process Health Test****Description**

Enables the health test that the Ranger Usersync's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

ranger\_usersync\_scm\_health\_enabled

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part of the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more

details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

### Unexpected Exits Thresholds

**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

### Unexpected Exits Monitoring Period

**Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

### Other

#### Graceful Shutdown Timeout

**Description**

The timeout in milliseconds to wait for graceful shutdown to complete.

**Related Name****Default Value**

18 second(s)

**API Name**

graceful\_stop\_timeout

**Required**

false

### Enable Ranger Usersync Cookie Authentication

#### Description

Enable cookie-based authentication for requests going from Ranger Usersync to Ranger Admin.

#### Related Name

ranger.usersync.cookie.enabled

#### Default Value

true

#### API Name

ranger.usersync.cookie.enabled

#### Required

false

### Enable User Sync

#### Description

Should users and groups be synchronized to Ranger Database? Required to setup Ranger policies.

#### Related Name

ranger.usersync.enabled

#### Default Value

true

#### API Name

ranger.usersync.enabled

#### Required

false

### Usersync Filesource File Name

#### Description

Path to the file with the users and groups information. Only used when Usersync Sync Source is set to "org.apache.ranger.unixusersync.process.FileSourceUserGroupBuilder". Example: /tmp/usergroup.json or /tmp/usergroup.csv or /tmp/usergroup.txt

#### Related Name

ranger.usersync.filesource.file

#### Default Value

#### API Name

ranger.usersync.filesource.file

#### Required

false

### Usersync Filesource Delimiter

#### Description

Delimiter used in file, if File based user sync is used

#### Related Name

ranger.usersync.filesource.text.delimiter

#### Default Value

**API Name**`ranger.usersync.filesource.text.delimiter`**Required**`false`**Ranger Usersync Group Based Role Assignment Rules****Description**

The parameter is used to assign roles to users and groups synced in Ranger Admin. Based on the given values specified in the above delimiter parameters, Ranger Usersync will parse the value specified in this parameter and sync users and groups along with roles given.

**Related Name**`ranger.usersync.group.based.role.assignment.rules`**Default Value****API Name**`ranger.usersync.group.based.role.assignment.rules`**Required**`false`**Usersync Group Member Attribute****Description**

LDAP group member attribute name. Example: member

**Related Name**`ranger.usersync.group.memberattributename`**Default Value****API Name**`ranger.usersync.group.memberattributename`**Required**`false`**Usersync Group Name Attribute****Description**

LDAP group name attribute. Example: cn

**Related Name**`ranger.usersync.group.nameattribute`**Default Value****API Name**`ranger.usersync.group.nameattribute`**Required**`false`**Usersync Group Object Class****Description**

LDAP Group object class. Example: group

**Related Name**

ranger.usersync.group.objectclass

**Default Value****API Name**

ranger.usersync.group.objectclass

**Required**

false

**Usersync Enable Group Search First****Description**

Enable Group Search First.

**Related Name**

ranger.usersync.group.search.first.enabled

**Default Value**

false

**API Name**

ranger.usersync.group.search.first.enabled

**Required**

false

**Usersync Group Search Base****Description**

Search base for groups. Sample value would be ou=groups,dc=hadoop,dc=apache,dc=org. The parameter overrides value specified in ranger.usersync.ldap.searchBase, ranger.usersync.ldap.user.searchbase. If a value is not specified, takes the value of ranger.usersync.ldap.searchBase. If ranger.usersync.ldap.searchBase is also not specified, takes the value of ranger.usersync.ldap.user.searchbase. Multiple Ous can be configured with ; (semicolon) separated eg: ou=groups,DC=example,DC=com;ou=group1,ou=group2

**Related Name**

ranger.usersync.group.searchbase

**Default Value****API Name**

ranger.usersync.group.searchbase

**Required**

false

**Usersync Enable Group Sync****Description**

Whether Usersync should use ldapsearch to find groups instead of relying on user entry attributes.

**Related Name**

ranger.usersync.group.searchenabled

**Default Value**

true

**API Name**

ranger.usersync.group.searchenabled

**Required**

false

**Usersync Group Search Filter****Description**

Optional additional filter constraining the groups selected for syncing. A sample value would be (dept=eng)

**Related Name**

ranger.usersync.group.searchfilter

**Default Value****API Name**

ranger.usersync.group.searchfilter

**Required**

false

**Usersync Group Search Scope****Description**

Search scope for the groups. Value "base" indicates that only the entry specified as the search base in ranger.usersync.group.searchbase should be considered. One "indicates" that only the immediate children of the entry specified as the search base in ranger.usersync.group.searchbase should be considered. "Sub" indicates that the entry specified as the search base in ranger.usersync.group.searchbase, and all of its subordinates to any depth, should be considered.

**Related Name**

ranger.usersync.group.searchscope

**Default Value**

sub

**API Name**

ranger.usersync.group.searchscope

**Required**

false

**Usersync Group Usermap Sync****Description**

Whether to sync all groups for a user.

**Related Name**

ranger.usersync.group.usermapsyncenabled

**Default Value**

true

**API Name**

ranger.usersync.group.usermapsyncenabled

**Required**

false

**Usersync Bind User****Description**

Full distinguished name (DN), including common name (CN), of an LDAP user account that has privileges to search for users. This user is used for searching the users. This could be read-only LDAP user. Example: cn=admin,dc=example,dc=com

**Related Name**

ranger.usersync.ldap.binddn

**Default Value****API Name**

ranger.usersync.ldap.binddn

**Required**

false

### Usersync Incremental Sync

**Description**

Enable Incremental Sync.

**Related Name**

ranger.usersync.ldap.deltasync

**Default Value**

true

**API Name**

ranger.usersync.ldap.deltasync

**Required**

false

### Usersync Group Hierarchy Levels

**Description**

Levels of LDAP directory tree where the groups need to be searched.

**Related Name**

ranger.usersync.ldap.grouphierarchylevels

**Default Value**

0

**API Name**

ranger.usersync.ldap.grouphierarchylevels

**Required**

false

### Usersync Groupname Case Conversion

**Description**

Used for converting syncing groups to the selected case conversion.

**Related Name**

ranger.usersync.ldap.groupname.caseconversion

**Default Value**

none

**API Name**

ranger.usersync.ldap.groupname.caseconversion

**Required**

false

**Usersync Referral****Description**

Set to follow if multiple LDAP/AD servers are configured to return continuation references for results. Set to ignore if no referrals should be followed. When this parameter is set to throw, all of the normal entries are returned in the enumeration first, before the ReferralException is thrown.

**Related Name**

ranger.usersync.ldap.referral

**Default Value**

ignore

**API Name**

ranger.usersync.ldap.referral

**Required**

false

**Usersync Search Base****Description**

Search base for users and groups. Sample value would be dc=hadoop,dc=apache,dc=org. Multiple OUs can be configured with ; (semicolon) separated.

**Related Name**

ranger.usersync.ldap.searchBase

**Default Value****API Name**

ranger.usersync.ldap.searchBase

**Required**

false

**Usersync Enable STARTTLS****Description**

Enable LDAP STARTTLS.

**Related Name**

ranger.usersync.ldap.starttls

**Default Value**

false

**API Name**

ranger.usersync.ldap.starttls

**Required**

false

**Usersync LDAP/AD URL****Description**

LDAP server URL. Example: value = ldap://localhost:389 or ldaps://localhost:636

**Related Name**

`ranger.usersync.ldap.url`**Default Value****API Name**`ranger.usersync.ldap.url`**Required**`false`**Usersync User Group Name Attribute****Description**

LDAP user group name attribute. Generally it is the same as username attribute. Example: sAMAccountName in AD, uid or cn in OpenLDAP

**Related Name**`ranger.usersync.ldap.user.groupnameattribute`**Default Value****API Name**`ranger.usersync.ldap.user.groupnameattribute`**Required**`false`**Usersync User Name Attribute****Description**

LDAP user name attribute. Example: sAMAccountName in AD, uid or cn in OpenLDAP

**Related Name**`ranger.usersync.ldap.user.nameattribute`**Default Value****API Name**`ranger.usersync.ldap.user.nameattribute`**Required**`false`**Usersync User Object Class****Description**

LDAP User Object Class. Example: person or user

**Related Name**`ranger.usersync.ldap.user.objectclass`**Default Value****API Name**`ranger.usersync.ldap.user.objectclass`**Required**`false`**Usersync User Search Base****Description**

Search base for users. Sample value would be ou=users,dc=hadoop,dc=apache,dc=org. Overrides value specified in ranger.usersync.ldap.searchBase. Multiple Ous can be configured with ; (semicolon) separated eg: cn=users,dc=example,dc=com;ou=example1,ou=example2

**Related Name**

ranger.usersync.ldap.user.searchbase

**Default Value****API Name**

ranger.usersync.ldap.user.searchbase

**Required**

false

### Usersync User Search Filter

**Description**

Optional additional filter constraining the users selected for syncing. A sample value would be (dept=eng). Customize the value to suit your deployment.

**Related Name**

ranger.usersync.ldap.user.searchfilter

**Default Value****API Name**

ranger.usersync.ldap.user.searchfilter

**Required**

false

### Usersync User Search Scope

**Description**

Search scope for the users. Value "base" indicates that only the entry specified as the search base in ranger.usersync.ldap.user.searchbase should be considered. "One" indicates that only the immediate children of the entry specified as the search base in ranger.usersync.ldap.user.searchbase should be considered. "Sub" indicates that the entry specified as the search base in ranger.usersync.ldap.user.searchbase, and all of its subordinates to any depth, should be considered.

**Related Name**

ranger.usersync.ldap.user.searchscope

**Default Value**

sub

**API Name**

ranger.usersync.ldap.user.searchscope

**Required**

false

### Usersync Username Case Conversion

**Description**

Used for converting syncing users to the selected case conversion.

**Related Name**

ranger.usersync.ldap.username.caseconversion

**Default Value**

none

**API Name**

ranger.usersync.ldap.username.caseconversion

**Required**

false

**Enable Results to be Paged for User/Group Request****Description**

Whether results can be paged for User/Group requests.

**Related Name**

ranger.usersync.pagedresultsenabled

**Default Value**

true

**API Name**

ranger.usersync.pagedresultsenabled

**Required**

false

**User/Group Request Page size.****Description**

Enter Page size for User/Group Request.

**Related Name**

ranger.usersync.pagedresultssize

**Default Value**

500

**API Name**

ranger.usersync.pagedresultssize

**Required**

false

**Maximum Records Per API Call****Description**

Maximum number of records to be returned per API call.

**Related Name**

ranger.usersync.policymanager.maxrecordsperapicall

**Default Value**

1000

**API Name**

ranger.usersync.policymanager.maxrecordsperapicall

**Required**

true

**Ranger Usersync Policymgr Username****Description**

Ranger Usersync username in Ranger Admin.

**Related Name**

ranger.usersync.policymgr.username

**Default Value**

rangerusersync

**API Name**

ranger.usersync.policymgr.username

**Required**

false

**Ranger Usersync Unix Service Port****Description**

Port for Unix authentication service.

**Related Name**

ranger.usersync.port

**Default Value**

5151

**API Name**

ranger.usersync.port

**Required**

true

**Ranger Usersync Role Assignment List Delimiter****Description**

The parameter is used to specify delimiter while syncing roles to users and groups in Ranger Admin. It is a delimiter for roles. Example - "ROLE\_SYS\_ADMIN:u:username1,username2&ROLE\_KEY\_ADMIN:g:groupname1", where ROLE\_SYS\_ADMIN and ROLE\_KEY\_ADMIN are roles in Ranger Admin separated by delimiter &. Note - All the delimiters parameters ranger.usersync.role.assignment.list.delimiter, ranger.usersync.users.groups.assignment.list.delimiter and ranger.usersync.username.groupname.assignment.list.delimiter should have different values. The delimiters should not contain characters that are allowed in username or groupname.

**Related Name**

ranger.usersync.role.assignment.list.delimiter

**Default Value**

&amp;

**API Name**

ranger.usersync.role.assignment.list.delimiter

**Required**

false

**Usersync Sleeptime interval****Description**

Sleep time interval between user sync operations in milliseconds.

**Related Name**

ranger.usersync.sleeptimeinmillisbetween sync cycle

**Default Value**

1 minute(s) (for non-ldap sync sources)

60 minutes (for ldap sync sources)

**Note:** For ldap sync sources, you cannot change the 60 min. default value below 60 minutes.

#### API Name

ranger.usersync.sleepTimeInMillisBetweenSyncCycle

#### Required

false

### Source for Syncing User and Groups

#### Description

For syncing from Ldap source, use "org.apache.ranger.ldapusersync.process.LdapUserGroupBuilder". For syncing from Unix source, use "org.apache.ranger.unixusersync.process.UnixUserGroupBuilder". For syncing from File source, use "org.apache.ranger.unixusersync.process.FileSourceUserGroupBuilder"

#### Related Name

ranger.usersync.source.impl.class

#### Default Value

org.apache.ranger.unixusersync.process.UnixUserGroupBuilder

#### API Name

ranger.usersync.source.impl.class

#### Required

true

### Ranger Usersync Unix Backend

#### Description

The backend mechanism to read users and groups from a UNIX system. The value is applicable only on UNIX-based systems.

#### Related Name

ranger.usersync.unix.backend

#### Default Value

nss

#### API Name

ranger.usersync.unix.backend

#### Required

false

### Usersync UNIX Minimum User ID

#### Description

Minimum User ID to start syncing. This should be set to avoid syncing of UNIX system-level users in the Ranger Admin.

#### Related Name

ranger.usersync.unix.minUserId

#### Default Value

500

**API Name**

ranger.usersync.unix.minUserId

**Required**

false

**Usersync Enable User Search****Description**

Enable User Search, when ranger.usersync.group.search.first.enabled is set to true.

**Related Name**

ranger.usersync.user.searchenabled

**Default Value**

false

**API Name**

ranger.usersync.user.searchenabled

**Required**

false

**Ranger Usersync Username Groupname Assignment List Delimiter****Description**

The parameter is used to specify a delimiter while syncing users and groups in Ranger Admin. Used as a delimiter to differentiate between two or more users and groups. Example - "ROLE\_SYS\_ADMIN:u:username1,username2", where username1 and username2 are separated by ,. Note - All the delimiters parameters ranger.usersync.role.assignment.list.delimiter, ranger.usersync.users.groups.assignment.list.delimiter and ranger.usersync.username.groupname.assignment.list.delimiter should have different values. The delimiters should not contain characters that are allowed in username or groupname.

**Related Name**

ranger.usersync.username.groupname.assignment.list.delimiter

**Default Value**

,

**API Name**

ranger.usersync.username.groupname.assignment.list.delimiter

**Required**

false

**Ranger Usersync User Groups Assignment List Delimiter****Description**

The parameter is used to specify delimiter while syncing users and groups along with specified roles in Ranger Admin. It is a delimiter to differentiate between users and groups from respective roles. Example - "ROLE\_SYS\_ADMIN:u:username1,username2&ROLE\_SYS\_ADMIN:g:groupname1,groupname2", where ROLE\_SYS\_ADMIN is a role. "u" is used to denote the list of users followed by actual usernames which are username1 and username2. While "g" is used to denote the list of groups followed by actual groupnames which are groupname1 and groupname2. Note - All the delimiters parameters ranger.usersync.role.assignment.list.delimiter, ranger.usersync.users.groups.assignment.list.delimiter and ranger.usersync.username.groupname.assignment.list.delimiter should have different values. The delimiters should not contain characters that are allowed in username or groupname.

**Related Name**`ranger.usersync.users.groups.assignment.list.delimiter`**Default Value**`:`**API Name**`ranger.usersync.users.groups.assignment.list.delimiter`**Required**`false`**Ranger Usersync Conf Path****Description**

Staging directory for Ranger Usersync Configuration. This should generally not be changed.

**Related Name**`ranger_usersync_conf_path`**Default Value**`/etc/ranger/usersync`**API Name**`ranger_usersync_conf_path`**Required**`true`**Usersync Bind User Password****Description**

Password for the LDAP bind user used for searching users.

**Related Name**`ranger.usersync.ldap.ldapbindpassword`**Default Value****API Name**`ranger_usersync_ldap_ldapbindpassword`**Required**`false`**Ranger Usersync Max Heapsize****Description**

Maximum size for the Java Process heap. Passed to Java -Xmx. Measured in megabytes.

**Related Name**`ranger_usersync_max_heap_size`**Default Value**`1 GiB`**API Name**`ranger_usersync_max_heap_size`**Required**`true`

## Performance

### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

## Resource Management

### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

### Custom Control Group Resources (overrides Cgroup settings)

**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

### Cgroup I/O Weight

**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

### Cgroup Memory Hard Limit

**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

### Cgroup Memory Soft Limit

**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

Security

Ranger Usersync TLS/SSL Trust Store File

Description	The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Ranger Usersync might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.
Related Name	ranger.usersync.truststore.file
Default Value	
API Name	ssl_client_truststore_location
Required	false

Ranger Usersync TLS/SSL Trust Store Password

Description	The password for the Ranger Usersync TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.
Related Name	ranger.usersync.truststore.password
Default Value	
API Name	ssl_client_truststore_password
Required	false

Stacks Collection

Stacks Collection Data Retention

Description	The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
Related Name	stacks_collection_data_retention
Default Value	100 MiB
API Name	stacks_collection_data_retention
Required	false

Stacks Collection Directory

Description	
-------------	--

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value****API Name**

stacks\_collection\_directory

**Required**

false

**Stacks Collection Enabled****Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Ranger Usersync Advanced Configuration Snippet (Safety Valve) for conf/ranger-ugsync-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Advanced Configuration Snippet (Safety Valve) for conf/ranger-ugsync-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/ranger-ugsync-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ranger Usersync Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

---

true

### Suppress Parameter Validation: Ranger Usersync Log Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

### Suppress Parameter Validation: Heap Dump Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

### Suppress Parameter Validation: Usersync Filesource File Name

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Filesource File Name parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.filesource.file

**Required**

true

### Suppress Parameter Validation: Usersync Filesource Delimiter

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Filesource Delimiter parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_ranger.usersync.filesource.text.delimiter`**Required**`true`**Suppress Parameter Validation: Ranger Usersync Group Based Role Assignment Rules****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Group Based Role Assignment Rules parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.group.based.role.assignment.rules`**Required**`true`**Suppress Parameter Validation: Usersync Group Member Attribute****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Group Member Attribute parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.group.memberattributename`**Required**`true`**Suppress Parameter Validation: Usersync Group Name Attribute****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Group Name Attribute parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.group.nameattribute`**Required**`true`**Suppress Parameter Validation: Usersync Group Object Class****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Group Object Class parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.group.objectclass

**Required**

true

**Suppress Parameter Validation: Usersync Group Search Base****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Group Search Base parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.group.searchbase

**Required**

true

**Suppress Parameter Validation: Usersync Group Search Filter****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Group Search Filter parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.group.searchfilter

**Required**

true

**Suppress Parameter Validation: Usersync Bind User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Bind User parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.ldap.binddn

**Required**

true

**Suppress Parameter Validation: Usersync Search Base****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Search Base parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.ldap.searchbase

**Required**

true

**Suppress Parameter Validation: Usersync LDAP/AD URL****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync LDAP/AD URL parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.ldap.url

**Required**

true

**Suppress Parameter Validation: Usersync User Group Name Attribute****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync User Group Name Attribute parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.ldap.user.groupnameattribute

**Required**

true

**Suppress Parameter Validation: Usersync User Name Attribute****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync User Name Attribute parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ranger.usersync.ldap.user.nameattribute`**Required**`true`**Suppress Parameter Validation: Usersync User Object Class****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync User Object Class parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.ldap.user.objectclass`**Required**`true`**Suppress Parameter Validation: Usersync User Search Base****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync User Search Base parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.ldap.user.searchbase`**Required**`true`**Suppress Parameter Validation: Usersync User Search Filter****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync User Search Filter parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.ldap.user.searchfilter`**Required**`true`**Suppress Parameter Validation: Ranger Usersync Policymgr Username****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Policymgr Username parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.policymgr.username

**Required**

true

**Suppress Parameter Validation: Ranger Usersync Unix Service Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Unix Service Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.port

**Required**

true

**Suppress Parameter Validation: Ranger Usersync Role Assignment List Delimiter****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Role Assignment List Delimiter parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.role.assignment.list.delimiter

**Required**

true

**Suppress Parameter Validation: Ranger Usersync Username Groupname Assignment List Delimiter****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Username Groupname Assignment List Delimiter parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.username.groupname.assignment.list.delimiter

**Required**

true

**Suppress Parameter Validation: Ranger Usersync User Groups Assignment List Delimiter****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync User Groups Assignment List Delimiter parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.users.groups.assignment.list.delimiter

**Required**

true

**Suppress Parameter Validation: Ranger Usersync Conf Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Conf Path parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_usersync\_conf\_path

**Required**

true

**Suppress Parameter Validation: Usersync Bind User Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Usersync Bind User Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_usersync\_ldap\_ldapbindpassword

**Required**

true

**Suppress Parameter Validation: Ranger Usersync Max Heapspace****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Max Heapspace parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_usersync\_max\_heap\_size

**Required**

true

**Suppress Parameter Validation: Ranger Usersync Environment Advanced Configuration Snippet (Safety Valve)**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_usersync\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Ranger Usersync TLS/SSL Trust Store File**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync TLS/SSL Trust Store File parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Ranger Usersync TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_usersync\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_usersync\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_usersync\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_ranger\_ranger\_usersync\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**`role_health_suppression_ranger_ranger_usersync_scm_health`**Required**`true`**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_ranger_ranger_usersync_swap_memory_usage`**Required**`true`**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_ranger_ranger_usersync_swap_memory_usage_rate`**Required**`true`**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_ranger_ranger_usersync_unexpected_exits`**Required**`true`

Service-Wide

Advanced

System Group

Description	The group that this service's processes should run as.
Related Name	
Default Value	ranger
API Name	process_groupname
Required	true

System User

Description	The user that this service's processes should run as.
Related Name	
Default Value	ranger
API Name	process_username
Required	true

Ranger Service Environment Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
Related Name	
Default Value	
API Name	RANGER_service_env_safety_valve
Required	false

Monitoring

Enable Service Level Health Alerts

Description	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
Related Name	
Default Value	

	true
API Name	
	enable_alerts
Required	
	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	
	enable_config_alerts
Required	
	false

Healthy Ranger Admin Monitoring Thresholds

Description	The health test thresholds of the overall Ranger Admin health. The check returns "Concerning" health if the percentage of "Healthy" Ranger Admins falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Ranger Admins falls below the critical threshold.
Related Name	
Default Value	Warning: 99.0 %, Critical: 49.0 %
API Name	
	RANGER_RANGER_ADMIN_healthy_thresholds
Required	
	false

Ranger Tagsync Role Health Test

Description	When computing the overall RANGER health, consider Ranger Tagsync's health
Related Name	
Default Value	true
API Name	
	RANGER_RANGER_TAGSYNC_health_enabled
Required	
	false

Ranger Usersync Role Health Test

Description	When computing the overall RANGER health, consider Ranger Usersync's health
-------------	---

**Related Name****Default Value**

true

**API Name**

RANGER\_RANGER\_USERSYNC\_health\_enabled

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part of the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

Other

HDFS Service

Description	Name of the HDFS service that this Ranger service instance depends on
Related Name	
Default Value	
API Name	hdfs_service
Required	true

Ranger KMS Keyadmin User Initial Password

Description	Password for the Ranger administrator, whose login name is "keyadmin". The password should be minimum 8 characters long, with at least one alphabetic and one numeric character. The following characters are invalid: " '\ ` ". Note that this password is only used to setup Ranger in the cluster: any subsequent changes will not be effective. This password can be later changed from the Ranger Admin UI under the user profile page.
Related Name	keyadmin_user_password
Default Value	
API Name	keyadmin_user_password
Required	true

Load Balancer Address

Description	Load Balancer Address used by clients to access Ranger Admin. Only required when Ranger Admin is running with High Availability. Example: http://load-balancer-host:load-balancer-port
Related Name	ranger.externalurl
Default Value	
API Name	load_balancer_url
Required	false

Ranger Plugin DFS Audit Enabled

Description	Whether DFS audit is enabled.
Related Name	ranger_plugin_hdfs_audit_enabled

**Default Value**

true

**API Name**

ranger\_plugin\_hdfs\_audit\_enabled

**Required**

false

**Ranger Plugin DFS Audit URL****Description**

An absolute URL with no trailing slash should be entered, or leave the value empty. Allows setting up a centralized storage location for Ranger audits. This URL is used as the base for audit directories: all services plugging into Ranger will prepend this URL to their configured path used to store Ranger audits.

**Related Name**

ranger\_plugin\_hdfs\_audit\_url

**Default Value**

/ranger/audit

**API Name**

ranger\_plugin\_hdfs\_audit\_url

**Required**

false

**Ranger Admin User Initial Password****Description**

Password for the Ranger administrator, whose login name is "admin". The password should be minimum 8 characters long, with at least one alphabetic and one numeric character. The following characters are invalid: " ' \ ` ´ . Note that this password is only used to setup Ranger in the cluster: any subsequent changes will not be effective. This password can be later changed from the Ranger Admin UI under the user profile page.

**Related Name**

rangeradmin\_user\_password

**Default Value****API Name**

rangeradmin\_user\_password

**Required**

true

**Ranger Tagsync User Initial Password****Description**

Password for the Ranger administrator, whose login name is "rangertagsync". The password should be minimum 8 characters long, with at least one alphabetic and one numeric character. The following characters are invalid: " ' \ ` ´ . Note that this password is only used to setup Ranger in the cluster: any subsequent changes will not be effective. This password can be later changed from the Ranger Admin UI under the user profile page.

**Related Name**

rangertagsync\_user\_password

**Default Value**

<b>API Name</b>	rangertagsync_user_password
<b>Required</b>	true

**Ranger Usersync User Initial Password**

<b>Description</b>	Password for the Ranger administrator, whose login name is "rangerusersync". The password should be minimum 8 characters long, with at least one alphabetic and one numeric character. The following characters are invalid: " '\ ` ´. Note that this password is only used to setup Ranger in the cluster; any subsequent changes will not be effective. This password can be later changed from the Ranger Admin UI under the user profile page.
<b>Related Name</b>	rangerusersync_user_password
<b>Default Value</b>	
<b>API Name</b>	rangerusersync_user_password
<b>Required</b>	true

**Solr Service**

<b>Description</b>	Name of the Solr service that this Ranger service instance depends on
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	solr_service
<b>Required</b>	true

**Ports and Addresses**

**Admin HTTP Port**

<b>Description</b>	HTTP Port for Ranger Admin.
<b>Related Name</b>	ranger.service.http.port
<b>Default Value</b>	6080
<b>API Name</b>	ranger_service_http_port
<b>Required</b>	true

**Admin HTTPS port****Description**

HTTPS Port for Ranger Admin. Only used when SSL is enabled for Ranger Admin.

**Related Name**

ranger.service.https.port

**Default Value**

6182

**API Name**

ranger\_service\_https\_port

**Required**

true

**Suppressions****Suppress Configuration Validator: Atlas Source: Kafka Consumer Group****Description**

Whether to suppress configuration warnings produced by the Atlas Source: Kafka Consumer Group configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_atlas.kafka.entities.group.id

**Required**

true

**Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Configuration Validator: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties****Description**

Whether to suppress configuration warnings produced by the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/atlas-application.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/atlas-application.properties\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml****Description**

Whether to suppress configuration warnings produced by the Ranger Admin Advanced Configuration Snippet (Safety Valve) for conf/ranger-admin-site.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/ranger-admin-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml****Description**

Whether to suppress configuration warnings produced by the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-policymgr-ssl.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/ranger-tagsync-policymgr-ssl.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml****Description**

Whether to suppress configuration warnings produced by the Ranger Tagsync Advanced Configuration Snippet (Safety Valve) for conf/ranger-tagsync-site.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/ranger-tagsync-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ranger Usersync Advanced Configuration Snippet (Safety Valve) for conf/ranger-ugsync-site.xml****Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Advanced Configuration Snippet (Safety Valve) for conf/ranger-ugsync-site.xml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_conf/ranger-ugsync-site.xml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ranger Admin Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Ranger Admin Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ranger Admin Log Directory****Description**

Whether to suppress configuration warnings produced by the Ranger Admin Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_oom_heap_dump_dir`**Required**`true`**Suppress Configuration Validator: Exclude Users from Audit Access Tab****Description**

Whether to suppress configuration warnings produced by the Exclude Users from Audit Access Tab configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.accesslogs.exclude.users.list`**Required**`true`**Suppress Configuration Validator: Kerberos Cookie Path****Description**

Whether to suppress configuration warnings produced by the Kerberos Cookie Path configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.admin.kerberos.cookie.path`**Required**`true`**Suppress Configuration Validator: Default Policy Groups****Description**

Whether to suppress configuration warnings produced by the Default Policy Groups configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.default.policy.groups`**Required**`true`**Suppress Configuration Validator: Default Policy Users****Description**

Whether to suppress configuration warnings produced by the Default Policy Users configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.default.policy.users

**Required**

true

**Suppress Configuration Validator: Admin AD Auth Base DN****Description**

Whether to suppress configuration warnings produced by the Admin AD Auth Base DN configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.ad.base.dn

**Required**

true

**Suppress Configuration Validator: Admin AD Auth Bind DN****Description**

Whether to suppress configuration warnings produced by the Admin AD Auth Bind DN configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.ad.bind.dn

**Required**

true

**Suppress Configuration Validator: Admin AD Auth Domain Name****Description**

Whether to suppress configuration warnings produced by the Admin AD Auth Domain Name configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.ad.domain

**Required**

true

**Suppress Configuration Validator: Admin AD Auth URL****Description**

Whether to suppress configuration warnings produced by the Admin AD Auth URL configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.ad.url

**Required**

true

**Suppress Configuration Validator: Admin AD Auth User Search Filter****Description**

Whether to suppress configuration warnings produced by the Admin AD Auth User Search Filter configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.ad.user.searchfilter

**Required**

true

**Suppress Configuration Validator: Admin LDAP Auth Base DN****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth Base DN configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.base.dn

**Required**

true

**Suppress Configuration Validator: Admin LDAP Auth Bind User****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth Bind User configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ranger.ldap.bind.dn`**Required**`true`**Suppress Configuration Validator: Admin LDAP Auth Group Role Attribute****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth Group Role Attribute configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.group.roleattribute`**Required**`true`**Suppress Configuration Validator: Admin LDAP Auth Group Search Base****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth Group Search Base configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.group.searchbase`**Required**`true`**Suppress Configuration Validator: Admin LDAP Auth Group Search Filter****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth Group Search Filter configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.ldap.group.searchfilter`**Required**`true`**Suppress Configuration Validator: Admin LDAP Auth URL****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth URL configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.url

**Required**

true

**Suppress Configuration Validator: Admin LDAP Auth User DN Pattern****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth User DN Pattern configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.user.dnpattern

**Required**

true

**Suppress Configuration Validator: Admin LDAP Auth User Search Filter****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth User Search Filter configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.ldap.user.searchfilter

**Required**

true

**Suppress Configuration Validator: SSO Browser Useragent****Description**

Whether to suppress configuration warnings produced by the SSO Browser Useragent configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.sso.browser.useragent

**Required**

true

**Suppress Configuration Validator: SSO Provider Url****Description**

Whether to suppress configuration warnings produced by the SSO Provider Url configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.sso.providerurl

**Required**

true

**Suppress Configuration Validator: SSO Public Key****Description**

Whether to suppress configuration warnings produced by the SSO Public Key configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.sso.publickey

**Required**

true

**Suppress Configuration Validator: Tag Service Name****Description**

Whether to suppress configuration warnings produced by the Tag Service Name configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.tagservice.auto.name

**Required**

true

**Suppress Configuration Validator: Capture Cluster name****Description**

Whether to suppress configuration warnings produced by the Capture Cluster name configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.tagsync.atlas.default.cluster.name

**Required**

---

true

### Suppress Configuration Validator: Ranger Tagsync Username

**Description**

Whether to suppress configuration warnings produced by the Ranger Tagsync Username configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.tagsync.dest.ranger.username

**Required**

true

### Suppress Configuration Validator: File Source: Filename

**Description**

Whether to suppress configuration warnings produced by the File Source: Filename configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.tagsync.source.file.filename

**Required**

true

### Suppress Configuration Validator: Admin UNIX Auth Service Hostname

**Description**

Whether to suppress configuration warnings produced by the Admin UNIX Auth Service Hostname configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.unixauth.service.hostname

**Required**

true

### Suppress Configuration Validator: Admin Unix Auth Service Port

**Description**

Whether to suppress configuration warnings produced by the Admin Unix Auth Service Port configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_ranger.unixauth.service.port`**Required**`true`**Suppress Configuration Validator: Usersync Filesource File Name****Description**

Whether to suppress configuration warnings produced by the Usersync Filesource File Name configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.filesource.file`**Required**`true`**Suppress Configuration Validator: Usersync Filesource Delimiter****Description**

Whether to suppress configuration warnings produced by the Usersync Filesource Delimiter configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.filesource.text.delimiter`**Required**`true`**Suppress Configuration Validator: Ranger Usersync Group Based Role Assignment Rules****Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Group Based Role Assignment Rules configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.group.based.role.assignment.rules`**Required**`true`**Suppress Configuration Validator: Usersync Group Member Attribute****Description**

Whether to suppress configuration warnings produced by the Usersync Group Member Attribute configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.group.memberattributename

**Required**

true

**Suppress Configuration Validator: Usersync Group Name Attribute****Description**

Whether to suppress configuration warnings produced by the Usersync Group Name Attribute configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.group.nameattribute

**Required**

true

**Suppress Configuration Validator: Usersync Group Object Class****Description**

Whether to suppress configuration warnings produced by the Usersync Group Object Class configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.group.objectclass

**Required**

true

**Suppress Configuration Validator: Usersync Group Search Base****Description**

Whether to suppress configuration warnings produced by the Usersync Group Search Base configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.group.searchbase

**Required**

true

**Suppress Configuration Validator: Usersync Group Search Filter****Description**

Whether to suppress configuration warnings produced by the Usersync Group Search Filter configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.group.searchfilter

**Required**

true

**Suppress Configuration Validator: Usersync Bind User****Description**

Whether to suppress configuration warnings produced by the Usersync Bind User configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.ldap.binddn

**Required**

true

**Suppress Configuration Validator: Usersync Search Base****Description**

Whether to suppress configuration warnings produced by the Usersync Search Base configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.ldap.searchbase

**Required**

true

**Suppress Configuration Validator: Usersync LDAP/AD URL****Description**

Whether to suppress configuration warnings produced by the Usersync LDAP/AD URL configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ranger.usersync.ldap.url`**Required**`true`**Suppress Configuration Validator: Usersync User Group Name Attribute****Description**

Whether to suppress configuration warnings produced by the Usersync User Group Name Attribute configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.ldap.user.groupnameattribute`**Required**`true`**Suppress Configuration Validator: Usersync User Name Attribute****Description**

Whether to suppress configuration warnings produced by the Usersync User Name Attribute configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.ldap.user.nameattribute`**Required**`true`**Suppress Configuration Validator: Usersync User Object Class****Description**

Whether to suppress configuration warnings produced by the Usersync User Object Class configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ranger.usersync.ldap.user.objectclass`**Required**`true`**Suppress Configuration Validator: Usersync User Search Base****Description**

Whether to suppress configuration warnings produced by the Usersync User Search Base configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.ldap.user.searchbase

**Required**

true

**Suppress Configuration Validator: Usersync User Search Filter****Description**

Whether to suppress configuration warnings produced by the Usersync User Search Filter configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.ldap.user.searchfilter

**Required**

true

**Suppress Configuration Validator: Ranger Usersync Polycmgr Username****Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Polycmgr Username configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.policymgr.username

**Required**

true

**Suppress Configuration Validator: Ranger Usersync Unix Service Port****Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Unix Service Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.port

**Required**

true

**Suppress Configuration Validator: Ranger Usersync Role Assignment List Delimiter****Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Role Assignment List Delimiter configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.role.assignment.list.delimiter

**Required**

true

**Suppress Configuration Validator: Ranger Usersync Username Groupname Assignment List Delimiter****Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Username Groupname Assignment List Delimiter configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.username.groupname.assignment.list.delimiter

**Required**

true

**Suppress Configuration Validator: Ranger Usersync User Groups Assignment List Delimiter****Description**

Whether to suppress configuration warnings produced by the Ranger Usersync User Groups Assignment List Delimiter configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger.usersync.users.groups.assignment.list.delimiter

**Required**

true

**Suppress Configuration Validator: Ranger Admin Conf Path****Description**

Whether to suppress configuration warnings produced by the Ranger Admin Conf Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_admin\_conf\_path

**Required**

true

**Suppress Configuration Validator: Ranger Admin Max Heapsize****Description**

Whether to suppress configuration warnings produced by the Ranger Admin Max Heapsize configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_admin\_max\_heap\_size

**Required**

true

**Suppress Configuration Validator: Ranger Admin Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Ranger Admin Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_admin\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Ranger Database Host****Description**

Whether to suppress configuration warnings produced by the Ranger Database Host configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_database\_host

**Required**

true

**Suppress Configuration Validator: Ranger Database Name****Description**

Whether to suppress configuration warnings produced by the Ranger Database Name configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_database\_name

**Required**

true

**Suppress Configuration Validator: Ranger Database User Password****Description**

Whether to suppress configuration warnings produced by the Ranger Database User Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_database\_password

**Required**

true

**Suppress Configuration Validator: Ranger Database User****Description**

Whether to suppress configuration warnings produced by the Ranger Database User configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_database\_user

**Required**

true

**Suppress Configuration Validator: Admin AD Auth Bind Password****Description**

Whether to suppress configuration warnings produced by the Admin AD Auth Bind Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_ldap\_ad\_bind\_password

**Required**

true

**Suppress Configuration Validator: Admin LDAP Auth Bind User Password****Description**

Whether to suppress configuration warnings produced by the Admin LDAP Auth Bind User Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_ldap\_bind\_password

**Required**

true

**Suppress Configuration Validator: Knox Proxy User Groups****Description**

Whether to suppress configuration warnings produced by the Knox Proxy User Groups configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_proxyuser\_knox\_groups

**Required**

true

**Suppress Configuration Validator: Knox Proxy User Hosts****Description**

Whether to suppress configuration warnings produced by the Knox Proxy User Hosts configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_proxyuser\_knox\_hosts

**Required**

true

**Suppress Configuration Validator: Knox Proxy User Users****Description**

Whether to suppress configuration warnings produced by the Knox Proxy User Users configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_proxyuser\_knox\_users

**Required**

---

true

### Suppress Configuration Validator: Ranger Tagsync Conf Path

**Description**

Whether to suppress configuration warnings produced by the Ranger Tagsync Conf Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_tagsync\_conf\_path

**Required**

true

### Suppress Configuration Validator: Ranger Tagsync Max Heapsize

**Description**

Whether to suppress configuration warnings produced by the Ranger Tagsync Max Heapsize configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_tagsync\_max\_heap\_size

**Required**

true

### Suppress Configuration Validator: Ranger Tagsync Environment Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the Ranger Tagsync Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_tagsync\_role\_env\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Ranger Tomcat Work Dir

**Description**

Whether to suppress configuration warnings produced by the Ranger Tomcat Work Dir configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_tomcat\_work\_dir

**Required**

true

**Suppress Configuration Validator: Ranger Usersync Conf Path****Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Conf Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_usersync\_conf\_path

**Required**

true

**Suppress Configuration Validator: Usersync Bind User Password****Description**

Whether to suppress configuration warnings produced by the Usersync Bind User Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_usersync\_ldap\_ldapbindpassword

**Required**

true

**Suppress Configuration Validator: Ranger Usersync Max Heapsize****Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Max Heapsize configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_usersync\_max\_heap\_size

**Required**

true

**Suppress Configuration Validator: Ranger Usersync Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ranger\_usersync\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Ranger Admin TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the Ranger Admin TLS/SSL Trust Store File configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Configuration Validator: Ranger Admin TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the Ranger Admin TLS/SSL Trust Store Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Configuration Validator: Ranger Admin TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the Ranger Admin TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Configuration Validator: Ranger Admin TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the Ranger Admin TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_stacks_collection_directory`**Required**`true`**Suppress Parameter Validation: Ranger KMS Keyadmin User Initial Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger KMS Keyadmin User Initial Password parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_keyadmin_user_password`**Required**`true`**Suppress Parameter Validation: Load Balancer Address****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Load Balancer Address parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_load_balancer_url`**Required**`true`**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_process_groupname`**Required**`true`**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Configuration Validator: Ranger Admin Count Validator****Description**

Whether to suppress configuration warnings produced by the Ranger Admin Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_admin\_count\_validator

**Required**

true

**Suppress Parameter Validation: Ranger Plugin DFS Audit URL****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Plugin DFS Audit URL parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_plugin\_hdfs\_audit\_url

**Required**

true

**Suppress Parameter Validation: Ranger Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_service\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Admin HTTP Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin HTTP Port parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_service\_http\_port

**Required**

true

**Suppress Parameter Validation: Admin HTTPS port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin HTTPS port parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_service\_https\_port

**Required**

true

**Suppress Configuration Validator: Ranger Tagsync Count Validator****Description**

Whether to suppress configuration warnings produced by the Ranger Tagsync Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_tagsync\_count\_validator

**Required**

true

**Suppress Configuration Validator: Ranger Usersync Count Validator****Description**

Whether to suppress configuration warnings produced by the Ranger Usersync Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

`service_config_suppression_ranger_usersync_count_validator`**Required**`true`**Suppress Parameter Validation: Ranger Admin User Initial Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Admin User Initial Password parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_rangeradmin_user_password`**Required**`true`**Suppress Parameter Validation: Ranger Tagsync User Initial Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Tagsync User Initial Password parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_rangertagsync_user_password`**Required**`true`**Suppress Parameter Validation: Ranger Usersync User Initial Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Usersync User Initial Password parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_rangerusersync_user_password`**Required**`true`**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Health Test: Ranger Admin Health****Description**

Whether to suppress the results of the Ranger Admin Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

service\_health\_suppression\_ranger\_ranger\_admin\_healthy

**Required**

true

**Suppress Health Test: Ranger Tagsync Health****Description**

Whether to suppress the results of the Ranger Tagsync Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

service\_health\_suppression\_ranger\_ranger\_ranger\_tagsync\_health

**Required**

true

**Suppress Health Test: Ranger Usersync Health**

<b>Description</b>	Whether to suppress the results of the Ranger Usersync Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	service_health_suppression_ranger_ranger_ranger_usersync_health
<b>Required</b>	true

**S3 Connector Properties in Cloudera Runtime 7.1.8**

Role groups:

**Service-Wide**

**Advanced**

**S3 Connector Service Environment Advanced Configuration Snippet (Safety Valve)**

<b>Description</b>	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	AWS_S3_service_env_safety_valve
<b>Required</b>	false

**Default S3 Endpoint**

<b>Description</b>	Optional, default endpoint used by CDH services accessing S3, indicating the AWS region.To see a list of valid values for this parameter please consult <a href="#">AWS Regions and Endpoints for S3</a> : use one of the values listed in the 'Endpoint' column, eg. 's3.us-east-2.amazonaws.com'.When not specified the endpoint used is s3.amazonaws.com
<b>Related Name</b>	fs.s3a.endpoint
<b>Default Value</b>	
<b>API Name</b>	s3_endpoint
<b>Required</b>	false

Monitoring

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts
Required	false

Other

Cloud Account Name

Description	Name of an AWS account. The associated AWS keys are emitted to Hue, Impala and the Hive Metastore Server.
Related Name	
Default Value	
API Name	cloud_account
Required	true

Security

Credentials Protection Policy

Description	Determines a security policy for the distribution of AWS account credentials to cluster services. 'More Secure': Encrypted at all times and directly available to a limited set of services. 'Less Secure': Credentials may be in plain text in some configuration files for specific services in the cluster. When IAM profiles are used, credentials are externally managed in AWS and there are no AWS credentials in any configuration files, so this setting is not applicable.
Related Name	
Default Value	SECURE
API Name	key_distribution_policy
Required	true

Suppressions

Suppress Parameter Validation: S3 Connector Service Environment Advanced Configuration Snippet (Safety Valve)

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the S3 Connector Service Environment Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_aws_s3_service_env_safety_valve
Required	true

Suppress Parameter Validation: Default S3 Endpoint

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Default S3 Endpoint parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_s3_endpoint
Required	true

Suppress Configuration Validator: S3Guard CDH Validator

Description	Whether to suppress configuration warnings produced by the S3Guard CDH Validator configuration validator.
Related Name	
Default Value	false
API Name	service_config_suppression_s3guard_unsupported_cdh_validator
Required	true

Schema Registry Properties in Cloudera Runtime 7.1.8

Role groups:

## Schema Registry Server

### Advanced

#### Schema Registry Server XML Override

**Description**

For advanced use only, replace entire XML in the logback configuration file for Schema Registry Server, ignoring all logging configuration.

**Related Name**

logback\_safety\_valve

**Default Value****API Name**

logback\_safety\_valve

**Required**

false

#### Enable auto refresh for metric configurations

**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

#### Heap Dump Directory

**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

### Dump Heap When Out of Memory

**Description**

When set, generates a heap dump file when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

### Kill When Out of Memory

**Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

### Automatically Restart Process

**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

### Enable Metric Collection

**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

`process_should_monitor`**Required**`true`**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**`3`**API Name**`process_start_retries`**Required**`false`**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**`20`**API Name**`process_start_secs`**Required**`false`**Schema Registry Server Advanced Configuration Snippet (Safety Valve) for registry.yaml****Description**

For advanced use only. A string to be inserted into registry.yaml for this role only.

**Related Name****Default Value****API Name**`registry.yaml_role_safety_valve`**Required**`false`**Schema Registry Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name**

<b>Default Value</b>
<b>API Name</b>
SCHEMA_REGISTRY_SERVER_role_env_safety_valve
<b>Required</b>
false

Logs

Schema Registry Server Log Directory

<b>Description</b>
The log directory for log files of the role Schema Registry Server.
<b>Related Name</b>
log_dir
<b>Default Value</b>
/var/log/schemaregistry
<b>API Name</b>
log_dir
<b>Required</b>
false

Schema Registry Server Logging Threshold

<b>Description</b>
The minimum log level for Schema Registry Server logs
<b>Related Name</b>
<b>Default Value</b>
INFO
<b>API Name</b>
log_threshold
<b>Required</b>
false

Schema Registry Server Maximum Log File Backups

<b>Description</b>
The maximum number of rolled log files to keep for Schema Registry Server logs. Typically used by log4j or logback.
<b>Related Name</b>
<b>Default Value</b>
10
<b>API Name</b>
max_log_backup_index
<b>Required</b>
false

Schema Registry Server Max Log Size

<b>Description</b>
--------------------

The maximum size, in megabytes, per log file for Schema Registry Server logs. Typically used by log4j or logback.

**Related Name**

**Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring**

**Enable Health Alerts for this Role**

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name**

**Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts**

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name**

**Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds**

**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name**

**Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the jvm\_heap\_used\_mb metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: jvm\_heap\_used\_mb

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

### Role Triggers

**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.

- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

schema\_registry\_server\_fd\_thresholds

**Required**

false

**Schema Registry Server Host Health Test****Description**

When computing the overall Schema Registry Server health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

schema\_registry\_server\_host\_health\_enabled

**Required**

false

**Schema Registry Server Process Health Test****Description**

Enables the health test that the Schema Registry Server's process state is consistent with the role configuration

**Related Name**

**Default Value**

true

**API Name**

schema\_registry\_server\_scm\_health\_enabled

**Required**

false

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other****Schema Registry Admin Port****Description**

The admin port for the server.

**Related Name**

schema.registry.adminPort

**Default Value**

7789

**API Name**

schema.registry.adminPort

**Required**

true

### Schema Registry Allowed Resources

**Description**

Allowed resources for Schema Registry.

**Related Name**

schema.registry.allowed.resources

**Default Value**

401.html, back-default.png, favicon.ico

**API Name**

schema.registry.allowed.resources

**Required**

false

### Schema Version Cache Expiry Interval

**Description**

Schema version cache expiry interval.

**Related Name**

schema.registry.cache.expiry.interval

**Default Value**

3600

**API Name**

schema.registry.cache.expiry.interval

**Required**

true

### Schema Registry Cache Size

**Description**

Schema Registry cache size.

**Related Name**

schema.registry.cache.size

**Default Value**

1000

**API Name**

schema.registry.cache.size

**Required**

true

### Password For HTTP Proxy Server Username

**Description**

Password For HTTP Proxy Server Username.

**Related Name**

schema.registry.httpProxyPassword

**Default Value****API Name**

schema.registry.httpProxyPassword

**Required**

false

**HTTP Proxy Server****Description**

URL for http proxy server. Please enter it in format protocol\_name://host\_name:port\_number.

**Related Name**

schema.registry.httpProxyServer

**Default Value****API Name**

schema.registry.httpProxyServer

**Required**

false

**HTTP Proxy Server Availability****Description**

Boolean to set if HTTP Proxy Server is available or not.

**Related Name**

schema.registry.httpProxyServer.available

**Default Value**

false

**API Name**

schema.registry.httpProxyServer.available

**Required**

false

**Username For HTTP Proxy Server****Description**

Username for http proxy server.

**Related Name**

schema.registry.httpProxyUsername

**Default Value****API Name**

schema.registry.httpProxyUsername

**Required**

false

**Schema Registry Jar Storage Directory Path****Description**

Jar storage directory path.

**Related Name**

schema.registry.jar.storage.directory.path

**Default Value**

/tmp/schema-registry/local-jars

**API Name**

schema.registry.jar.storage.directory.path

**Required**

false

**Schema Registry Jar Storage HDFS URL****Description**

URL of the directory to be used for storing jars on HDFS when HDFS is not selected as an optional dependency.

**Related Name**

schema.registry.jar.storage.hdfs.url

**Default Value**

hdfs://localhost:8020

**API Name**

schema.registry.jar.storage.hdfs.url

**Required**

false

**Schema Registry Jar Storage Type****Description**

Jar storage type for storing jars on the local filesystem or on HDFS. If 'hdfs' is set but HDFS is not selected as an optional dependency, please provide a value for the 'Schema Registry Jar Storage HDFS URL' property.

**Related Name**

schema.registry.jar.storage.type

**Default Value**

local

**API Name**

schema.registry.jar.storage.type

**Required**

false

**Java Home Path Override****Description**

Java home path override for Schema Registry.

**Related Name**

schema.registry.jdk.home

**Default Value****API Name**

schema.registry.jdk.home

**Required**

false

**Schema Registry Kerberos Name Rules****Description**

Kerberos name rules for Schema Registry.

**Related Name**

schema.registry.kerberos.name.rules

**Default Value**

RULE:[2:\$1@\$0]([jt]t@.\*EXAMPLE.COM)s/.\*/\$MAPRED\_USER/ RULE:[2:\$1@\$0]  
([nd]n@.\*EXAMPLE.COM)s/.\*/\$HDFS\_USER/DEFAULT

**API Name**

schema.registry.kerberos.name.rules

**Required**

false

### Schema Registry Kerberos Non Browser User Agents

**Description**

Non browser user agents if kerberos is enabled.

**Related Name**

schema.registry.kerberos.non.browser.user.agents

**Default Value****API Name**

schema.registry.kerberos.non.browser.user.agents

**Required**

false

### Schema Registry Port

**Description**

The port on which server accepts connections.

**Related Name**

schema.registry.port

**Default Value**

7788

**API Name**

schema.registry.port

**Required**

true

### Schema Registry Servlet Filter

**Description**

Schema Registry servlet filter class.

**Related Name**

schema.registry.servlet.filter

**Default Value**

com.hortonworks.registries.auth.server.AuthenticationFilter

**API Name**

schema.registry.servlet.filter

**Required**

true

**Schema Registry Admin Port (SSL)**

<b>Description</b>	HTTPS admin port Schema Registry node runs on when SSL is enabled.
<b>Related Name</b>	schema.registry.ssl.adminPort
<b>Default Value</b>	7791
<b>API Name</b>	schema.registry.ssl.adminPort
<b>Required</b>	false

**SSL Keystore Type**

<b>Description</b>	The keystore type. It is blank by default but required if schema registry's ssl is enabled. e.g. PKCS12 or JKS.
<b>Related Name</b>	schema.registry.ssl.keyStoreType
<b>Default Value</b>	jks
<b>API Name</b>	schema.registry.ssl.keyStoreType
<b>Required</b>	false

**Schema Registry Port (SSL)**

<b>Description</b>	HTTPS port Schema Registry node runs on when SSL is enabled.
<b>Related Name</b>	schema.registry.ssl.port
<b>Default Value</b>	7790
<b>API Name</b>	schema.registry.ssl.port
<b>Required</b>	false

**SSL TrustStore Type**

<b>Description</b>	The truststore type. It is blank by default but required if schema registry's ssl is enabled. e.g. PKCS12 or JKS.
<b>Related Name</b>	schema.registry.ssl.trustStoreType

**Default Value**

jks

**API Name**

schema.registry.ssl.trustStoreType

**Required**

false

**SSL ValidateCerts****Description**

Whether or not to validate TLS certificates before starting. If enabled, it will refuse to start with expired or otherwise invalid certificates.

**Related Name**

schema.registry.ssl.validateCerts

**Default Value**

false

**API Name**

schema.registry.ssl.validateCerts

**Required**

false

**SSL ValidatePeers****Description**

Whether or not to validate TLS peer certificates.

**Related Name**

schema.registry.ssl.validatePeers

**Default Value**

false

**API Name**

schema.registry.ssl.validatePeers

**Required**

false

**Schema Registry Query Timeout****Description**

Schema Registry query timeout.

**Related Name**

schema.registry.storage.query.timeout

**Default Value**

30 second(s)

**API Name**

schema.registry.storage.query.timeout

**Required**

true

### Schema Registry Token Validity

**Description**

Kerberos token validity for Schema Registry in ms.

**Related Name**

schema.registry.token.validity

**Default Value**

36000

**API Name**

schema.registry.token.validity

**Required**

false

### Schema Registry Log Max Backup Index

**Description**

The number of backup files.

**Related Name**

schema\_registry\_log\_maxbackupindex

**Default Value**

20

**API Name**

schema\_registry\_log\_maxbackupindex

**Required**

false

### Schema Registry Log Max File Size

**Description**

The maximum size of backup file before the log is rotated.

**Related Name**

schema\_registry\_log\_maxfilesize

**Default Value**

256MB

**API Name**

schema\_registry\_log\_maxfilesize

**Required**

false

## Performance

### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

`rlimit_fds`**Required**`false`**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**`cpu.shares`**Default Value**`1024`**API Name**`rm_cpu_shares`**Required**`true`**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the `cgexec` command: `resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`  
\*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**`custom.cgroups`**Default Value****API Name**`rm_custom_resources`**Required**`false`**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**`blkio.weight`**Default Value**`500`**API Name**`rm_io_weight`

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Schema Registry Server TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Schema Registry Server might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

schema.registry.ssl.trustStorePath

**Default Value**

**API Name**`ssl_client_truststore_location`**Required**`false`**Schema Registry Server TLS/SSL Trust Store Password****Description**

The password for the Schema Registry Server TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**`schema.registry.ssl.trustStorePassword`**Default Value****API Name**`ssl_client_truststore_password`**Required**`false`**Enable TLS/SSL for Schema Registry Server****Description**

Encrypt communication between clients and Schema Registry Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**`ssl.enable`**Default Value**`false`**API Name**`ssl_enabled`**Required**`false`**Schema Registry Server TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Schema Registry Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**`schema.registry.ssl.keyStorePath`**Default Value****API Name**`ssl_server_keystore_location`**Required**`false`

### Schema Registry Server TLS/SSL Server Keystore File Password

**Description**

The password for the Schema Registry Server keystore file.

**Related Name**

schema.registry.ssl.keyStorePassword

**Default Value****API Name**

ssl\_server\_keystore\_password

**Required**

false

### Stacks Collection

#### Stacks Collection Data Retention

**Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

#### Stacks Collection Directory

**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value****API Name**

stacks\_collection\_directory

**Required**

false

#### Stacks Collection Enabled

**Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Schema Registry Server Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Schema Registry Server XML Override****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server XML Override parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_logback\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Schema Registry Server Advanced Configuration Snippet (Safety Valve) for registry.yaml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server Advanced Configuration Snippet (Safety Valve) for registry.yaml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_registry.yaml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Schema Registry Admin Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Admin Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.adminport

**Required**

true

**Suppress Parameter Validation: Schema Registry Allowed Resources****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Allowed Resources parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.allowed.resources

**Required**

true

**Suppress Parameter Validation: Password For HTTP Proxy Server Username****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Password For HTTP Proxy Server Username parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.httpproxypassword

**Required**

true

**Suppress Parameter Validation: HTTP Proxy Server****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HTTP Proxy Server parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.httpproxyserver

**Required**

true

**Suppress Parameter Validation: Username For HTTP Proxy Server****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Username For HTTP Proxy Server parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_schema.registry.httpproxyusername`**Required**`true`**Suppress Parameter Validation: Schema Registry Jar Storage Directory Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Jar Storage Directory Path parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_schema.registry.jar.storage.directory.path`**Required**`true`**Suppress Parameter Validation: Schema Registry Jar Storage HDFS URL****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Jar Storage HDFS URL parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_schema.registry.jar.storage.hdfs.url`**Required**`true`**Suppress Parameter Validation: Java Home Path Override****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Home Path Override parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_schema.registry.jdk.home`**Required**`true`**Suppress Parameter Validation: Schema Registry Kerberos Name Rules****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Kerberos Name Rules parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.kerberos.name.rules

**Required**

true

**Suppress Parameter Validation: Schema Registry Kerberos Non Browser User Agents****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Kerberos Non Browser User Agents parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.kerberos.non.browser.user.agents

**Required**

true

**Suppress Parameter Validation: Schema Registry Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.port

**Required**

true

**Suppress Parameter Validation: Schema Registry Servlet Filter****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Servlet Filter parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.servlet.filter

**Required**

true

**Suppress Parameter Validation: Schema Registry Admin Port (SSL)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Admin Port (SSL) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.ssl.adminport

**Required**

true

**Suppress Parameter Validation: SSL Keystore Type****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL Keystore Type parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.ssl.keystoretype

**Required**

true

**Suppress Parameter Validation: Schema Registry Port (SSL)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Port (SSL) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.ssl.port

**Required**

true

**Suppress Parameter Validation: SSL TrustStore Type****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL TrustStore Type parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.ssl.truststoretype

**Required**

---

true

### Suppress Parameter Validation: SSL ValidateCerts

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL ValidateCerts parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.ssl.validatecerts

**Required**

true

### Suppress Parameter Validation: SSL ValidatePeers

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL ValidatePeers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.ssl.validatepeers

**Required**

true

### Suppress Parameter Validation: Schema Registry Log Max Backup Index

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Log Max Backup Index parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema\_registry\_log\_maxbackupindex

**Required**

true

### Suppress Parameter Validation: Schema Registry Log Max File Size

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Log Max File Size parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_schema_registry_log_maxfilesize`**Required**`true`**Suppress Parameter Validation: Schema Registry Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_schema_registry_server_role_env_safety_valve`**Required**`true`**Suppress Parameter Validation: Schema Registry Server TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server TLS/SSL Trust Store File parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_client_truststore_location`**Required**`true`**Suppress Parameter Validation: Schema Registry Server TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_client_truststore_password`**Required**`true`**Suppress Parameter Validation: Schema Registry Server TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: Schema Registry Server TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Server TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_schemaregistry\_schema\_registry\_server\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_schemaregistry\_schema\_registry\_server\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_schemaregistry\_schema\_registry\_server\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_schemaregistry\_schema\_registry\_server\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_schemaregistry\_schema\_registry\_server\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_schemaregistry\_schema\_registry\_server\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_schemaregistry\_schema\_registry\_server\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

<b>API Name</b>	role_health_suppression_schemaregistry_schema_registry_server_unexpected_exits
<b>Required</b>	true

Service-Wide

Advanced

System Group

<b>Description</b>	The group that this service's processes should run as.
<b>Related Name</b>	
<b>Default Value</b>	hadoop
<b>API Name</b>	process_groupname
<b>Required</b>	true

System User

<b>Description</b>	The user that this service's processes should run as.
<b>Related Name</b>	
<b>Default Value</b>	schemaregistry
<b>API Name</b>	process_username
<b>Required</b>	true

Schema Registry Service Environment Advanced Configuration Snippet (Safety Valve)

<b>Description</b>	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	SCHEMAREGISTRY_service_env_safety_valve
<b>Required</b>	false

Database

Schema Registry Database Host

Description	Hostname of the database used by Schema Registry. If the port is non-default for your database type, use host:port notation.
Related Name	schema.registry.storage.connector.host
Default Value	localhost
API Name	database_host
Required	true

Schema Registry Database Name

Description	Name of Schema Registry database.
Related Name	schema.registry.storage.connector.name
Default Value	schemaregistry
API Name	database_name
Required	true

Schema Registry Database User Password

Description	Password for Schema Registry database.
Related Name	schema.registry.storage.connector.password
Default Value	
API Name	database_password
Required	true

Schema Registry Database Port

Description	Port for Schema Registry database.
Related Name	schema.registry.storage.connector.port
Default Value	3306

<b>API Name</b>	database_port
<b>Required</b>	true

Schema Registry Database Type

<b>Description</b>	Database type to be used (postgres).
<b>Related Name</b>	schema.registry.storage.connector.type
<b>Default Value</b>	mysql
<b>API Name</b>	database_type
<b>Required</b>	true

Schema Registry Database User

<b>Description</b>	User for Schema Registry database.
<b>Related Name</b>	schema.registry.storage.connector.user
<b>Default Value</b>	schemaregistry
<b>API Name</b>	database_user
<b>Required</b>	true

Monitoring

Enable Service Level Health Alerts

<b>Description</b>	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>	
<b>Default Value</b>	true
<b>API Name</b>	enable_alerts
<b>Required</b>	false

Enable Configuration Change Alerts

<b>Description</b>	
--------------------	--

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Healthy Schema Registry Server Monitoring Thresholds****Description**

The health test thresholds of the overall Schema Registry Server health. The check returns "Concerning" health if the percentage of "Healthy" Schema Registry Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Schema Registry Servers falls below the critical threshold.

**Related Name****Default Value**

Warning: 99.99 %, Critical: 49.99 %

**API Name**

SCHEMAREGISTRY\_SCHEMA\_REGISTRY\_SERVER\_healthy\_thresholds

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific service.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.
- streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd\_open WHERE roleType = DataNode and last(fd\_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

**Other****Enable Kerberos Authentication****Description**

Enables Kerberos authentication for this Schema Registry service.

**Related Name**

kerberos.auth.enable

**Default Value**

false

**API Name**

kerberos.auth.enable

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Configuration Validator: Schema Registry Server Log Directory****Description**

Whether to suppress configuration warnings produced by the Schema Registry Server Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Schema Registry Server XML Override****Description**

Whether to suppress configuration warnings produced by the Schema Registry Server XML Override configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_logback\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: Schema Registry Server Advanced Configuration Snippet (Safety Valve) for registry.yaml****Description**

Whether to suppress configuration warnings produced by the Schema Registry Server Advanced Configuration Snippet (Safety Valve) for registry.yaml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_registry.yaml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Schema Registry Admin Port****Description**

Whether to suppress configuration warnings produced by the Schema Registry Admin Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.adminport

**Required**

true

**Suppress Configuration Validator: Schema Registry Allowed Resources****Description**

Whether to suppress configuration warnings produced by the Schema Registry Allowed Resources configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.allowed.resources

**Required**

true

**Suppress Configuration Validator: Password For HTTP Proxy Server Username****Description**

Whether to suppress configuration warnings produced by the Password For HTTP Proxy Server Username configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.httpproxypassword

**Required**

true

**Suppress Configuration Validator: HTTP Proxy Server****Description**

Whether to suppress configuration warnings produced by the HTTP Proxy Server configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.httpproxyserver

**Required**

true

**Suppress Configuration Validator: Username For HTTP Proxy Server****Description**

Whether to suppress configuration warnings produced by the Username For HTTP Proxy Server configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.httpproxyusername

**Required**

true

**Suppress Configuration Validator: Schema Registry Jar Storage Directory Path****Description**

Whether to suppress configuration warnings produced by the Schema Registry Jar Storage Directory Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.jar.storage.directory.path

**Required**

true

**Suppress Configuration Validator: Schema Registry Jar Storage HDFS URL****Description**

Whether to suppress configuration warnings produced by the Schema Registry Jar Storage HDFS URL configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.jar.storage.hdfs.url

**Required**

true

**Suppress Configuration Validator: Java Home Path Override****Description**

Whether to suppress configuration warnings produced by the Java Home Path Override configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.jdk.home

**Required**

true

**Suppress Configuration Validator: Schema Registry Kerberos Name Rules****Description**

Whether to suppress configuration warnings produced by the Schema Registry Kerberos Name Rules configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.kerberos.name.rules

**Required**

---

true

### Suppress Configuration Validator: Schema Registry Kerberos Non Browser User Agents

**Description**

Whether to suppress configuration warnings produced by the Schema Registry Kerberos Non Browser User Agents configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.kerberos.non.browser.user.agents

**Required**

true

### Suppress Configuration Validator: Schema Registry Port

**Description**

Whether to suppress configuration warnings produced by the Schema Registry Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.port

**Required**

true

### Suppress Configuration Validator: Schema Registry Servlet Filter

**Description**

Whether to suppress configuration warnings produced by the Schema Registry Servlet Filter configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.servlet.filter

**Required**

true

### Suppress Configuration Validator: Schema Registry Admin Port (SSL)

**Description**

Whether to suppress configuration warnings produced by the Schema Registry Admin Port (SSL) configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_schema.registry.ssl.adminport`**Required**`true`**Suppress Configuration Validator: SSL Keystore Type****Description**

Whether to suppress configuration warnings produced by the SSL Keystore Type configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_schema.registry.ssl.keystoretype`**Required**`true`**Suppress Configuration Validator: Schema Registry Port (SSL)****Description**

Whether to suppress configuration warnings produced by the Schema Registry Port (SSL) configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_schema.registry.ssl.port`**Required**`true`**Suppress Configuration Validator: SSL TrustStore Type****Description**

Whether to suppress configuration warnings produced by the SSL TrustStore Type configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_schema.registry.ssl.truststoretype`**Required**`true`**Suppress Configuration Validator: SSL ValidateCerts****Description**

Whether to suppress configuration warnings produced by the SSL ValidateCerts configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.ssl.validatecerts

**Required**

true

**Suppress Configuration Validator: SSL ValidatePeers****Description**

Whether to suppress configuration warnings produced by the SSL ValidatePeers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema.registry.ssl.validatepeers

**Required**

true

**Suppress Configuration Validator: Schema Registry Log Max Backup Index****Description**

Whether to suppress configuration warnings produced by the Schema Registry Log Max Backup Index configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema\_registry\_log\_maxbackupindex

**Required**

true

**Suppress Configuration Validator: Schema Registry Log Max File Size****Description**

Whether to suppress configuration warnings produced by the Schema Registry Log Max File Size configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema\_registry\_log\_maxfilesize

**Required**

true

**Suppress Configuration Validator: Schema Registry Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Schema Registry Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_schema\_registry\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Schema Registry Server TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the Schema Registry Server TLS/SSL Trust Store File configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Configuration Validator: Schema Registry Server TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the Schema Registry Server TLS/SSL Trust Store Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Configuration Validator: Schema Registry Server TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the Schema Registry Server TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ssl_server_keystore_location`**Required**`true`**Suppress Configuration Validator: Schema Registry Server TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the Schema Registry Server TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_password`**Required**`true`**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_stacks_collection_directory`**Required**`true`**Suppress Parameter Validation: Schema Registry Database Host****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Database Host parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_database_host`**Required**`true`**Suppress Parameter Validation: Schema Registry Database Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Database Name parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_database\_name

**Required**

true

**Suppress Parameter Validation: Schema Registry Database User Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Database User Password parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_database\_password

**Required**

true

**Suppress Parameter Validation: Schema Registry Database Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Database Port parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_database\_port

**Required**

true

**Suppress Parameter Validation: Schema Registry Database User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Database User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_database\_user

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Configuration Validator: Schema Registry Server Count Validator****Description**

Whether to suppress configuration warnings produced by the Schema Registry Server Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_schema\_registry\_server\_count\_validator

**Required**

true

**Suppress Parameter Validation: Schema Registry Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

`service_config_suppression_schemaregistry_service_env_safety_valve`**Required**`true`**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_service_triggers`**Required**`true`**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_smon_derived_configs_safety_valve`**Required**`true`**Suppress Health Test: Schema Registry Server Health****Description**

Whether to suppress the results of the Schema Registry Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`service_health_suppression_schemaregistry_schema_registry_server_healthy`**Required**`true`**Solr Properties in Cloudera Runtime 7.1.8**

Role groups:

Gateway

Advanced

Deploy Directory

Description	The directory where the client configs will be deployed
Related Name	
Default Value	/etc/solr
API Name	client_config_root_dir
Required	true

Gateway Logging Advanced Configuration Snippet (Safety Valve)

Description	For advanced use only, a string to be inserted into log4j.properties for this role only.
Related Name	
Default Value	
API Name	log4j_safety_valve
Required	false

Logs

Gateway Logging Threshold

Description	The minimum log level for Gateway logs
Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

Monitoring

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	

	false
API Name	
	enable_config_alerts
Required	
	false

Other

Alternatives Priority

Description	The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.
Related Name	
Default Value	90
API Name	client_config_priority
Required	true

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_cdh_version_validator
Required	true

Suppress Parameter Validation: Deploy Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.
Related Name	
Default Value	false
API Name	role_config_suppression_client_config_root_dir
Required	true

**Suppress Parameter Validation: Gateway Logging Advanced Configuration Snippet (Safety Valve)**

<b>Description</b>	Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	role_config_suppression_log4j_safety_valve
<b>Required</b>	true

**Service-Wide**

**Advanced**

**System Group**

<b>Description</b>	The group that this service's processes should run as.
<b>Related Name</b>	
<b>Default Value</b>	solr
<b>API Name</b>	process_groupname
<b>Required</b>	true

**System User**

<b>Description</b>	The user that this service's processes should run as.
<b>Related Name</b>	
<b>Default Value</b>	solr
<b>API Name</b>	process_username
<b>Required</b>	true

**Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-audit.xml**

<b>Description</b>	For advanced use only, a string to be inserted into ranger-solr-audit.xml. Applies to configurations of all roles in this service except client configuration.
<b>Related Name</b>	
<b>Default Value</b>	

**API Name**

ranger\_audit\_safety\_valve

**Required**

false

**Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-policymgr-ssl.xml****Description**

For advanced use only, a string to be inserted into ranger-solr-policymgr-ssl.xml. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

ranger\_policymgr\_ssl\_safety\_valve

**Required**

false

**Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-security.xml****Description**

For advanced use only, a string to be inserted into ranger-solr-security.xml. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

ranger\_security\_safety\_valve

**Required**

false

**Solr Service Advanced Configuration Snippet (Safety Valve) for core-site.xml****Description**

For advanced use only, a string to be inserted into core-site.xml. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

solr\_core\_site\_safety\_valve

**Required**

false

**Solr Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value**

**API Name**

solr\_env\_safety\_valve

**Required**

false

**Solr Service Advanced Configuration Snippet (Safety Valve) for hdfs-site.xml****Description**

For advanced use only, a string to be inserted into hdfs-site.xml. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

solr\_hdfs\_site\_safety\_valve

**Required**

false

**Enable Solrd Watchdog****Description**

Enable the background watchdog thread that can kill Catalina process if Solr is not responsive.

**Related Name****Default Value**

true

**API Name**

solrd\_enable\_watchdog

**Required**

false

**Monitoring****Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name**

**Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific service.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd\_open WHERE roleType = DataNode and last(fd\_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

### Healthy Solr Server Monitoring Thresholds

**Description**

The health test thresholds of the overall Solr Server health. The check returns "Concerning" health if the percentage of "Healthy" Solr Servers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" Solr Servers falls below the critical threshold.

**Related Name****Default Value**

Warning: 95.0 %, Critical: 90.0 %

**API Name**

solr\_solr\_servers\_healthy\_thresholds

**Required**

false

### Other

### HDFS Data Directory

**Description**

HDFS directory used for storage by this Solr service.

**Related Name****Default Value**

/solr

**API Name**

hdfs\_data\_dir

**Required**

true

### HDFS Service

**Description**

Name of the HDFS service that this Search service instance depends on

**Related Name****Default Value****API Name**

hdfs\_service

**Required**

true

### Ranger Plugin Trusted Proxy IP Address

**Description**

Accepts a list of IP addresses of proxy servers for trusting.

**Related Name**

ranger.plugin.solr.trusted.proxy.ipaddress

**Default Value****API Name**

ranger\_plugin\_trusted\_proxy\_ipaddress

**Required**

false

**Ranger Plugin Use X-Forwarded for IP Address****Description**

The parameter is used for identifying the originating IP address of a user connecting to a component through proxy for audit logs.

**Related Name**

ranger.plugin.solr.use.x-forwarded-for.ipaddress

**Default Value**

false

**API Name**

ranger\_plugin\_use\_x\_forwarded\_for\_ipaddress

**Required**

false

**Ranger Service****Description**

Name of the Ranger service that this Solr service instance depends on. This config is used for enabling Ranger authorization in the Solr instance not used by Ranger.

**Related Name****Default Value****API Name**

ranger\_service

**Required**

false

**Solr Server for Upgrade****Description**

Solr server to be used while upgrading from CDH 5 to CDH 6 or to Cloudera Runtime 7.

**Related Name****Default Value****API Name**

solr\_server\_for\_upgrade

**Required**

false

**Upgrade Backup Directory****Description**

Directory on the HDFS file system that is used as the backup directory while upgrading from CDH 5 to CDH 6 or to Cloudera Runtime 7.

**Related Name****Default Value**

/user/solr/upgrade\_backup

**API Name**

solr\_upgrade\_backup\_dir

**Required**

false

**Upgrade Metadata Directory****Description**

Directory on the local file system containing the migrated configurations and metadata required while upgrading from CDH 5 to CDH 6 or to Cloudera Runtime 7. Note: This directory should be present in the Solr Server specified in 'Solr Server for Upgrade'.

**Related Name****Default Value**

/var/lib/upgrade/solr\_config

**API Name**

solr\_upgrade\_metadata\_dir

**Required**

true

**Solrd Watchdog Timeout****Description**

If Solr does not respond on its web URL within this time interval, the Catalina process is killed.

**Related Name****Default Value**

1 minute(s), 10 second(s)

**API Name**

solrd\_watchdog\_timeout

**Required**

false

**ZooKeeper Service****Description**

Name of the ZooKeeper service that this Search service instance depends on

**Related Name****Default Value****API Name**

zookeeper\_service

**Required**

true

**ZooKeeper Znode****Description**

ZooKeeper znode used to store information about this Solr service.

**Related Name****Default Value**

`/solr`**API Name**`zookeeper_znode`**Required**`true`**Security****Enable Ranger Authorization for the Infrastructure Solr Service****Description**

Enable fine-grained security using Ranger for the infrastructure (infra) Solr service. This option is only for the Solr service that the Ranger service is using (for ranger-audits, etc.). No other Solr service can or should enable this option.

**Related Name****Default Value**`false`**API Name**`enable_ranger_authorization`**Required**`false`**Kerberos Principal****Description**

Kerberos principal short name used by all roles of this service.

**Related Name****Default Value**`solr`**API Name**`kerberos_princ_name`**Required**`true`**Active Directory Domain****Description**

Use this field for Active Directory configurations only, when combined with a simple username value in the "LDAP Bind User Distinguished Name" field, it will result in a UPM of user@example.com used for search/bind operations for authenticated user lookups.

**Related Name****Default Value****API Name**`ldap_domain`**Required**`false`

**Ranger DFS Audit Path****Description**

The DFS path on which Ranger audits are written. The special placeholder '\${ranger\_base\_audit\_url}' should be used as the prefix, in order to use the centralized location defined in the Ranger service.

**Related Name**

xasecure.audit.destination.hdfs.dir

**Default Value**

\$ranger\_base\_audit\_url/solr

**API Name**

ranger\_audit\_hdfs\_dir

**Required**

false

**Ranger Audit DFS Spool Dir****Description**

Spool directory for Ranger audits being written to DFS.

**Related Name**

xasecure.audit.destination.hdfs.batch.filespool.dir

**Default Value**

/var/log/solr/audit/hdfs/spool

**API Name**

ranger\_audit\_hdfs\_spool\_dir

**Required**

false

**Ranger Audit Solr Spool Dir****Description**

Spool directory for Ranger audits being written to Solr.

**Related Name**

xasecure.audit.destination.solr.batch.filespool.dir

**Default Value**

/var/log/solr/audit/solr/spool

**API Name**

ranger\_audit\_solr\_spool\_dir

**Required**

false

**Ranger Policy Cache Directory****Description**

The directory where Ranger security policies are cached locally.

**Related Name**

ranger.plugin.solr.policy.cache.dir

**Default Value**

/var/lib/ranger/solr/policy-cache

**API Name**

ranger\_policy\_cache\_dir

**Required**

false

**Enable LDAP Authentication****Description**

When checked, LDAP-based authentication for users is enabled.

**Related Name****Default Value**

false

**API Name**

solr\_enable\_ldap\_auth

**Required**

false

**Solr TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Solr is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name****Default Value****API Name**

solr\_https\_keystore\_file

**Required**

false

**Solr TLS/SSL Server Keystore File Password****Description**

The password for the Solr keystore file.

**Related Name**

solr.jetty.keystore.password

**Default Value****API Name**

solr\_https\_keystore\_password

**Required**

false

**Solr TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Solr might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name****Default Value****API Name**

solr\_https\_truststore\_file

**Required**

false

**Solr TLS/SSL Trust Store Password****Description**

The password for the Solr TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

solr.jetty.truststore.password

**Default Value****API Name**

solr\_https\_truststore\_password

**Required**

false

**LDAP BaseDN****Description**

This parameter is useful when authenticating against a non-Active Directory server, such as OpenLDAP. When set, this parameter is used to convert the username into the LDAP Distinguished Name (DN), so that the resulting DN looks like uid=username,\*this parameter\*. For example, if this parameter is set to "ou=People,dc=cloudera,dc=com", and the username passed in is "mike", the resulting authentication passed to the LDAP server look like "uid=mike,ou=People,dc=cloudera,dc=com". This parameter is mutually exclusive with Active Directory Domain.

**Related Name****Default Value****API Name**

solr\_ldap\_basedn

**Required**

false

**Enable LDAP TLS****Description**

If true, attempts to establish a TLS (Transport Layer Security) connection with an LDAP server that was specified with ldap://. Not required when using an LDAP URL with prefix ldaps://, because that already specifies TLS. This option is also known as "Use StartTLS".

**Related Name****Default Value**

false

**API Name**

`solr_ldap_enable_starttls`**Required**`false`**LDAP URL****Description**

The URL of the LDAP Server. The URL must be prefixed with `ldap://` or `ldaps://`. The URL can optionally specify a custom port if necessary, but by default the `ldap://` will connect to port 389, and the `ldaps://` will connect to port 636. Note that passwords will be in the clear if `ldap://` is used, and by fall 2020 Active directory servers will no longer allow non LDAPS connections to bind to AD hosts with LDAP signing enabled. See microsoft knowledge document 935834 for more information.

**Related Name****Default Value****API Name**`solr_ldap_uri`**Required**`false`**Solr Secure Authentication****Description**

Choose the authentication mechanism used by Solr.

**Related Name****Default Value**`simple`**API Name**`solr_security_authentication`**Required**`false`**Enable TLS/SSL for Solr****Description**

Encrypt communication between clients and Solr using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)). Additional manual steps must be performed; see [Enabling TLS/SSL for Solr](#).

**Related Name****Default Value**`false`**API Name**`solr_use_ssl`**Required**`false`

## Suppressions

### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

### Suppress Configuration Validator: Deploy Directory

**Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

### Suppress Configuration Validator: Solr Server Logging Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the Solr Server Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Heap Dump Directory

**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Solr Admin Port****Description**

Whether to suppress configuration warnings produced by the Solr Admin Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_admin\_port

**Required**

true

**Suppress Configuration Validator: Solr Data Directory****Description**

Whether to suppress configuration warnings produced by the Solr Data Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_data\_dir

**Required**

true

**Suppress Configuration Validator: Solr HTTP Port****Description**

Whether to suppress configuration warnings produced by the Solr HTTP Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_http\_port

**Required**

true

**Suppress Configuration Validator: Solr HTTPS port****Description**

Whether to suppress configuration warnings produced by the Solr HTTPS port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_https\_port

**Required**

true

**Suppress Configuration Validator: Java Heap Size of Solr Server in Bytes****Description**

Whether to suppress configuration warnings produced by the Java Heap Size of Solr Server in Bytes configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_java\_heapsize

**Required**

true

**Suppress Configuration Validator: Java Configuration Options for Solr Server****Description**

Whether to suppress configuration warnings produced by the Java Configuration Options for Solr Server configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_java\_opts

**Required**

true

**Suppress Configuration Validator: Solr Load Balancer****Description**

Whether to suppress configuration warnings produced by the Solr Load Balancer configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_load\_balancer

**Required**

true

**Suppress Configuration Validator: Solr Server Log Directory****Description**

Whether to suppress configuration warnings produced by the Solr Server Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_log\_dir

**Required**

true

**Suppress Configuration Validator: Solr Plugins Directory****Description**

Whether to suppress configuration warnings produced by the Solr Plugins Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_solr_plugins_dir`**Required**`true`**Suppress Configuration Validator: Solr Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Solr Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_solr_server_role_env_safety_valve`**Required**`true`**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_stacks_collection_directory`**Required**`true`**Suppress Configuration Validator: Gateway Count Validator****Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_gateway_count_validator`**Required**`true`**Suppress Parameter Validation: HDFS Data Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the HDFS Data Directory parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_hdfs\_data\_dir

**Required**

true

**Suppress Parameter Validation: Kerberos Principal****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kerberos\_princ\_name

**Required**

true

**Suppress Parameter Validation: Active Directory Domain****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Active Directory Domain parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ldap\_domain

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Ranger DFS Audit Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger DFS Audit Path parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_audit\_hdfs\_dir

**Required**

true

**Suppress Parameter Validation: Ranger Audit DFS Spool Dir****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Audit DFS Spool Dir parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_audit\_hdfs\_spool\_dir

**Required**

true

**Suppress Parameter Validation: Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-audit.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-audit.xml parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_audit\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Ranger Audit Solr Spool Dir****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Audit Solr Spool Dir parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_audit\_solr\_spool\_dir

**Required**

true

**Suppress Parameter Validation: Ranger Plugin Trusted Proxy IP Address****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Plugin Trusted Proxy IP Address parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_plugin\_trusted\_proxy\_ipaddress

**Required**

true

**Suppress Parameter Validation: Ranger Policy Cache Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Ranger Policy Cache Directory parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_policy\_cache\_dir

**Required**

true

**Suppress Parameter Validation: Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-policymgr-ssl.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-policymgr-ssl.xml parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_policymgr\_ssl\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-security.xml

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Service Advanced Configuration Snippet (Safety Valve) for ranger-solr-security.xml parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_ranger\_security\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Service Triggers

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

### Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**`service_config_suppression_smon_derived_configs_safety_valve`**Required**`true`**Suppress Parameter Validation: Solr Service Advanced Configuration Snippet (Safety Valve) for core-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Service Advanced Configuration Snippet (Safety Valve) for core-site.xml parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_solr_core_site_safety_valve`**Required**`true`**Suppress Parameter Validation: Solr Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_solr_env_safety_valve`**Required**`true`**Suppress Parameter Validation: Solr Service Advanced Configuration Snippet (Safety Valve) for hdfs-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Service Advanced Configuration Snippet (Safety Valve) for hdfs-site.xml parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_solr_hdfs_site_safety_valve`**Required**`true`

**Suppress Parameter Validation: Solr TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_solr\_https\_keystore\_file

**Required**

true

**Suppress Parameter Validation: Solr TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_solr\_https\_keystore\_password

**Required**

true

**Suppress Parameter Validation: Solr TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_solr\_https\_truststore\_file

**Required**

true

**Suppress Parameter Validation: Solr TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_solr\_https\_truststore\_password

**Required**

true

**Suppress Parameter Validation: LDAP BaseDN****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP BaseDN parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_solr\_ldap\_basedn

**Required**

true

**Suppress Configuration Validator: LDAP TLS Validator****Description**

Whether to suppress configuration warnings produced by the LDAP TLS Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_solr\_ldap\_tls\_validator

**Required**

true

**Suppress Parameter Validation: LDAP URL****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LDAP URL parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_solr\_ldap\_uri

**Required**

true

**Suppress Configuration Validator: LDAP Secure URI and Start TLS Validator****Description**

Whether to suppress configuration warnings produced by the LDAP Secure URI and Start TLS Validator configuration validator.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_solr\_ldaps\_or\_tls\_validator

**Required**

true

**Suppress Configuration Validator: Solr Server Count Validator****Description**

Whether to suppress configuration warnings produced by the Solr Server Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_solr\_server\_count\_validator

**Required**

true

**Suppress Parameter Validation: Upgrade Backup Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Upgrade Backup Directory parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_solr\_upgrade\_backup\_dir

**Required**

true

**Suppress Parameter Validation: Upgrade Metadata Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Upgrade Metadata Directory parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_solr\_upgrade\_metadata\_dir

**Required**

true

**Suppress Parameter Validation: Solr Watchdog Timeout****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Watchdog Timeout parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_solr\_watchdog\_timeout

**Required**

true

**Suppress Parameter Validation: ZooKeeper Znode****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ZooKeeper Znode parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_zookeeper\_znode

**Required**

true

**Suppress Health Test: Solr Server Health****Description**

Whether to suppress the results of the Solr Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

service\_health\_suppression\_solr\_solr\_servers\_healthy

**Required**

true

**Solr Server****Advanced****Solr Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

`log4j_safety_valve`**Required**`false`**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**`false`**API Name**`metric_config_auto_refresh`**Required**`false`**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when `java.lang.OutOfMemoryError` error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**`oom_heap_dump_dir`**Default Value**`/tmp`**API Name**`oom_heap_dump_dir`**Required**`false`**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**`true`**API Name**`oom_heap_dump_enabled`**Required**`true`**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name**

**Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process**

**Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name**

**Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection**

**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name**

**Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts**

**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name**

**Default Value**

3

**API Name**

`process_start_retries`**Required**`false`**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**`20`**API Name**`process_start_secs`**Required**`false`**Java Configuration Options for Solr Server****Description**

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here. Note: When CM version is 6.3.0 or greater, `{{JAVA_GC_ARGS}}` will be replaced by JVM Garbage Collection arguments based on the runtime Java JVM version.

**Related Name****Default Value**`JAVA_GC_ARGS`**API Name**`solr_java_opts`**Required**`false`**Solr Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**`SOLR_SERVER_role_env_safety_valve`**Required**`false`**ZooKeeper Client Timeout****Description**

The time in milliseconds a client is allowed to not talk to ZooKeeper before its session expires.

<b>Related Name</b>	zkClientTimeout
<b>Default Value</b>	15 second(s)
<b>API Name</b>	zookeeper_client_timeout
<b>Required</b>	true

Logs

Solr Server Logging Threshold

<b>Description</b>	The minimum log level for Solr Server logs
<b>Related Name</b>	
<b>Default Value</b>	INFO
<b>API Name</b>	log_threshold
<b>Required</b>	false

Solr Server Maximum Log File Backups

<b>Description</b>	The maximum number of rolled log files to keep for Solr Server logs. Typically used by log4j or logback.
<b>Related Name</b>	
<b>Default Value</b>	10
<b>API Name</b>	max_log_backup_index
<b>Required</b>	false

Solr Server Max Log Size

<b>Description</b>	The maximum size, in megabytes, per log file for Solr Server logs. Typically used by log4j or logback.
<b>Related Name</b>	
<b>Default Value</b>	200 MiB
<b>API Name</b>	max_log_size
<b>Required</b>	

false

**Solr Server Log Directory**

**Description**

Directory where Solr Server will place its log files.

**Related Name**

**Default Value**

/var/log/solr

**API Name**

solr\_log\_dir

**Required**

true

**Monitoring**

**Enable Health Alerts for this Role**

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name**

**Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts**

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name**

**Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Heap Dump Directory Free Space Monitoring Absolute Thresholds**

**Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory.

**Related Name**

**Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

heap\_dump\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Heap Dump Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Heap Dump Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

heap\_dump\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Navigator Audit Failure Thresholds****Description**

The health test thresholds for failures encountered when monitoring audits within a recent period specified by the `mgmt_navigator_failure_window` configuration for the role. The value that can be specified for this threshold is the number of bytes of audits data that is left to be sent to audit server.

**Related Name**

`mgmt.navigator.failure.thresholds`

**Default Value**

Warning: Never, Critical: Any

**API Name**

`mgmt_navigator_failure_thresholds`

**Required**

false

**Monitoring Period For Audit Failures****Description**

The period to review when checking if audits are blocked and not getting processed.

**Related Name**

`mgmt.navigator.failure.window`

**Default Value**

20 minute(s)

**API Name**

`mgmt_navigator_failure_window`

**Required**

false

**Navigator Audit Pipeline Health Check****Description**

Enable test of audit events processing pipeline. This will test if audit events are not getting processed by Audit Server for a role that generates audit.

**Related Name**

`mgmt.navigator.status.check.enabled`

**Default Value**

true

**API Name**

`mgmt_navigator_status_check_enabled`

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.

- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**`monitoring_metric_filter`**Required**`false`**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**`Warning: Never, Critical: Never`**API Name**`process_swap_memory_rate_thresholds`**Required**`false`**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**`common.process.swap_memory_rate_window`**Default Value**`5 minute(s)`**API Name**`process_swap_memory_rate_window`**Required**`false`

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

### Role Triggers

**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd_open WHERE roleName=$ROLENAME and last(fd_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

### Solr Server API Liveness

**Description**

Enables the health test that the Cloudera Manager Agent can successfully contact and gather status of Solr Cores from the Solr Server with a simple API request.

**Related Name****Default Value**

true
<b>API Name</b>
solr_core_status_collection_health_enabled
<b>Required</b>
false

**Solr Server API Liveness Request Duration**

<b>Description</b>
The health test thresholds on the duration of the Solr Server API request.
<b>Related Name</b>
<b>Default Value</b>
Warning: 10 second(s), Critical: Never
<b>API Name</b>
solr_core_status_collection_thresholds
<b>Required</b>
false

**File Descriptor Monitoring Thresholds**

<b>Description</b>
The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.
<b>Related Name</b>
<b>Default Value</b>
Warning: 50.0 %, Critical: 70.0 %
<b>API Name</b>
solr_server_fd_thresholds
<b>Required</b>
false

**Garbage Collection Duration Thresholds**

<b>Description</b>
The health test thresholds for the weighted average time spent in Java garbage collection. Specified as a percentage of elapsed wall clock time.
<b>Related Name</b>
<b>Default Value</b>
Warning: 30.0, Critical: 60.0
<b>API Name</b>
solr_server_gc_duration_thresholds
<b>Required</b>
false

**Garbage Collection Duration Monitoring Period**

<b>Description</b>
The period to review when computing the moving average of garbage collection time.

**Related Name****Default Value**

5 minute(s)

**API Name**

solr\_server\_gc\_duration\_window

**Required**

false

**Solr Server Host Health Test****Description**

When computing the overall Solr Server health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

solr\_server\_host\_health\_enabled

**Required**

false

**Solr Server Process Health Test****Description**

Enables the health test that the Solr Server's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

solr\_server\_scm\_health\_enabled

**Required**

false

**Web Metric Collection****Description**

Enables the health test that the Cloudera Manager Agent can successfully contact and gather metrics from the web server.

**Related Name****Default Value**

true

**API Name**

solr\_server\_web\_metric\_collection\_enabled

**Required**

false

**Web Metric Collection Duration****Description**

The health test thresholds on the duration of the metrics request to the web server.

**Related Name****Default Value**

Warning: 10 second(s), Critical: Never

**API Name**

solr\_server\_web\_metric\_collection\_thresholds

**Required**

false

### Unexpected Exits Thresholds

**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

### Unexpected Exits Monitoring Period

**Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

### Other

#### Solr Data Directory

**Description**

Directory on local file system where Solr Server keeps the configurations for collections.

**Related Name****Default Value**

/var/lib/solr

**API Name**

solr\_data\_dir

**Required**

true

### Graceful Shutdown Timeout

**Description**

Timeout (in seconds) for graceful shutdown of this Solr server. Once this timeout is reached, Solr server is abruptly shutdown. A value of 0 means no timeout.

**Related Name****Default Value**

3 minute(s)

**API Name**

solr\_graceful\_stop\_timeout

**Required**

false

### Solr Load Balancer

**Description**

Address of the load balancer, specified in host:port format.

**Related Name****Default Value****API Name**

solr\_load\_balancer

**Required**

false

### Solr Plugins Directory

**Description**

Directory on local file system where Solr Server can find additional JARs. This directory is not monitored for changes during the lifetime of a solr server, and a restart is required to read any updates to the directory contents.

**Related Name****Default Value****API Name**

solr\_plugins\_dir

**Required**

false

### Performance

#### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

<b>Required</b>
false

**Solr Max Connector Threads**

<b>Description</b>
The maximum number of request processing threads to be created by Solr server, which determines the maximum number of simultaneous requests that can be handled.
<b>Related Name</b>
<b>Default Value</b>
10000
<b>API Name</b>
solr_max_connector_thread
<b>Required</b>
true

**Ports and Addresses**

**Solr Admin Port**

<b>Description</b>
Admin port of the Solr Server.
<b>Related Name</b>
<b>Default Value</b>
8984
<b>API Name</b>
solr_admin_port
<b>Required</b>
true

**Solr HTTP Port**

<b>Description</b>
HTTP port of Solr Server.
<b>Related Name</b>
solr_http_port
<b>Default Value</b>
8983
<b>API Name</b>
solr_http_port
<b>Required</b>
true

**Resource Management**

**Cgroup CPU Shares**

<b>Description</b>
--------------------

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the

value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**HDFS Block Cache Blocks per Slab****Description**

Number of blocks per cache slab. The size of the cache is 8 KB (the block size) times the number of blocks per slab times the number of slabs.

**Related Name**

solr.hdfs.blockcache.blocksperbank

**Default Value**

16384

**API Name**

solr\_hdfs\_blockcache\_blocksperbank

**Required**

true

**HDFS Block Cache Off-Heap Memory****Description**

Use off-heap memory when caching HDFS blocks in Solr.

**Related Name**

solr.hdfs.blockcache.direct.memory.allocation

**Default Value**

true

**API Name**

solr\_hdfs\_blockcache\_direct\_memory\_allocation

**Required**

true

**HDFS Block Cache****Description**

Enable caching of HDFS blocks in Solr. There is one block cache per Solr collection. configured to use off-heap memory, Maximum Off-Heap Memory must be set high enough to account for all block caches.

**Related Name**

solr.hdfs.blockcache.enabled

**Default Value**

true

**API Name**

solr\_hdfs\_blockcache\_enabled

**Required**

true

**HDFS Block Cache Number of Slabs****Description**

Number of slabs per block cache. The size of the cache is 8 KB (the block size) times the number of blocks per slab times the number of slabs.

**Related Name**

solr.hdfs.blockcache.slab.count

**Default Value**

1

**API Name**

solr\_hdfs\_blockcache\_slab\_count

**Required**

true

**Java Direct Memory Size of Solr Server in Bytes****Description**

Maximum amount of off-heap memory in bytes that may be allocated by the Java process. Passed to Java -XX:MaxDirectMemorySize. If unset, defaults to the size of the heap.

**Related Name****Default Value**

1 GiB

**API Name**

solr\_java\_direct\_memory\_size

**Required**

false

### Java Heap Size of Solr Server in Bytes

**Description**

Maximum size in bytes for the Java Process heap memory. Passed to Java -Xmx.

**Related Name****Default Value**

1 GiB

**API Name**

solr\_java\_heapsize

**Required**

false

### Security

#### Solr HTTPS port

**Description**

HTTPS port of Solr Server.

**Related Name**

solr\_https\_port

**Default Value**

8985

**API Name**

solr\_https\_port

**Required**

false

### Stacks Collection

#### Stacks Collection Data Retention

**Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

#### Stacks Collection Directory

**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value****API Name**

stacks\_collection\_directory

**Required**

false

**Stacks Collection Enabled****Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

## Suppressions

### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

### Suppress Parameter Validation: Solr Server Logging Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Server Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

### Suppress Parameter Validation: Heap Dump Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

### Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Solr Admin Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Admin Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_admin\_port

**Required**

true

**Suppress Parameter Validation: Solr Data Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Data Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_data\_dir

**Required**

true

**Suppress Parameter Validation: Solr HTTP Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr HTTP Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_http\_port

**Required**

true

**Suppress Parameter Validation: Solr HTTPS port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr HTTPS port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_https\_port

**Required**

true

**Suppress Parameter Validation: Java Heap Size of Solr Server in Bytes****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of Solr Server in Bytes parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_java\_heapsize

**Required**

true

**Suppress Parameter Validation: Java Configuration Options for Solr Server****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Configuration Options for Solr Server parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_java\_opts

**Required**

---

true

### Suppress Parameter Validation: Solr Load Balancer

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Load Balancer parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_load\_balancer

**Required**

true

### Suppress Parameter Validation: Solr Server Log Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Server Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_log\_dir

**Required**

true

### Suppress Parameter Validation: Solr Plugins Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Plugins Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_plugins\_dir

**Required**

true

### Suppress Parameter Validation: Solr Server Environment Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Solr Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_solr\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Solr Server API Liveness****Description**

Whether to suppress the results of the Solr Server API Liveness health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_solr\_core\_status\_collection\_health

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_solr\_server\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_solr\_server\_file\_descriptor

**Required**

true

**Suppress Health Test: GC Duration****Description**

Whether to suppress the results of the GC Duration health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_solr\_server\_gc\_duration

**Required**

true

**Suppress Health Test: Heap Dump Directory Free Space****Description**

Whether to suppress the results of the Heap Dump Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_solr\_server\_heap\_dump\_directory\_free\_space

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_solr\_server\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_solr\_server\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_solr\_server\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_solr\_server\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_solr\_server\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_solr\_server\_unexpected\_exits

**Required**

true

**Suppress Health Test: Web Server Status****Description**

Whether to suppress the results of the Web Server Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_solr\_server\_web\_metric\_collection

**Required**

true

**Spark Properties in Cloudera Runtime 7.1.8**

Role groups:

## Gateway

### Advanced

#### Deploy Directory

**Description**

The directory where the client configs will be deployed

**Related Name****Default Value**

/etc/spark

**API Name**

client\_config\_root\_dir

**Required**

true

#### Gateway Logging Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

#### Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-defaults.conf

**Description**

For advanced use only, a string to be inserted into the client configuration for spark-conf/spark-defaults.conf.

**Related Name****Default Value****API Name**

spark-conf/spark-defaults.conf\_client\_config\_safety\_valve

**Required**

false

#### Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh

**Description**

For advanced use only, a string to be inserted into the client configuration for spark-conf/spark-env.sh.

**Related Name****Default Value****API Name**

spark-conf/spark-env.sh\_client\_config\_safety\_valve

<b>Required</b>
false

Logs

Gateway Logging Threshold

<b>Description</b>
The minimum log level for Gateway logs
<b>Related Name</b>
<b>Default Value</b>
INFO
<b>API Name</b>
log_threshold
<b>Required</b>
false

Monitoring

Enable Configuration Change Alerts

<b>Description</b>
When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
enable_config_alerts
<b>Required</b>
false

Other

Alternatives Priority

<b>Description</b>
The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.
<b>Related Name</b>
<b>Default Value</b>
51
<b>API Name</b>
client_config_priority
<b>Required</b>
true

Spark Data Serializer

<b>Description</b>
Name of class implementing org.apache.spark.serializer.Serializer to use in Spark applications.

**Related Name**

spark.serializer

**Default Value**

org.apache.spark.serializer.KryoSerializer

**API Name**

spark\_data\_serializer

**Required**

true

**Default Application Deploy Mode****Description**

Which deploy mode to use by default. Can be overridden by users when launching applications.

**Related Name**

spark\_deploy\_mode

**Default Value**

client

**API Name**

spark\_deploy\_mode

**Required**

false

**Caching Executor Idle Timeout****Description**

When dynamic allocation is enabled, time after which idle executors with cached RDDs blocks will be stopped. By default, they're never stopped.

**Related Name**

spark.dynamicAllocation.cachedExecutorIdleTimeout

**Default Value****API Name**

spark\_dynamic\_allocation\_cached\_idle\_timeout

**Required**

false

**Enable Dynamic Allocation****Description**

Enable dynamic allocation of executors in Spark applications.

**Related Name**

spark.dynamicAllocation.enabled

**Default Value**

true

**API Name**

spark\_dynamic\_allocation\_enabled

**Required**

false

### Executor Idle Timeout

**Description**

When dynamic allocation is enabled, time after which idle executors will be stopped.

**Related Name**

spark.dynamicAllocation.executorIdleTimeout

**Default Value**

1 minute(s)

**API Name**

spark\_dynamic\_allocation\_idle\_timeout

**Required**

false

### Initial Executor Count

**Description**

When dynamic allocation is enabled, number of executors to allocate when the application starts. By default, this is the same value as the minimum number of executors.

**Related Name**

spark.dynamicAllocation.initialExecutors

**Default Value****API Name**

spark\_dynamic\_allocation\_initial\_executors

**Required**

false

### Maximum Executor Count

**Description**

When dynamic allocation is enabled, maximum number of executors to allocate. By default, Spark relies on YARN to control the maximum number of executors for the application.

**Related Name**

spark.dynamicAllocation.maxExecutors

**Default Value****API Name**

spark\_dynamic\_allocation\_max\_executors

**Required**

false

### Minimum Executor Count

**Description**

When dynamic allocation is enabled, minimum number of executors to keep alive while the application is running.

**Related Name**

spark.dynamicAllocation.minExecutors

**Default Value**

0

**API Name**

`spark_dynamic_allocation_min_executors`**Required**`false`**Scheduler Backlog Timeout****Description**

When dynamic allocation is enabled, timeout before requesting new executors when there are backlogged tasks.

**Related Name**`spark.dynamicAllocation.schedulerBacklogTimeout`**Default Value**`1 second(s)`**API Name**`spark_dynamic_allocation_scheduler_backlog_timeout`**Required**`false`**Sustained Scheduler Backlog Timeout****Description**

When dynamic allocation is enabled, timeout before requesting new executors after the initial backlog timeout has already expired. By default this is the same value as the initial backlog timeout.

**Related Name**`spark.dynamicAllocation.sustainedSchedulerBacklogTimeout`**Default Value****API Name**`spark_dynamic_allocation_sustained_scheduler_backlog_timeout`**Required**`false`**Shell Logging Threshold****Description**

The minimum log level for the Spark shell.

**Related Name**`spark_gateway_shell_logging_threshold`**Default Value**`WARN`**API Name**`spark_gateway_shell_logging_threshold`**Required**`true`**Enable Kill From UI****Description**

Whether to allow users to kill running stages from the Spark Web UI.

**Related Name**

spark.ui.killEnabled
<b>Default Value</b>
true
<b>API Name</b>
spark_gateway_ui_kill_enabled
<b>Required</b>
true

Enable History

<b>Description</b>
Write Spark application history logs to HDFS.
<b>Related Name</b>
spark.eventLog.enabled
<b>Default Value</b>
true
<b>API Name</b>
spark_history_enabled
<b>Required</b>
false

Enable I/O Encryption

<b>Description</b>
Whether to encrypt temporary shuffle and cache files stored by Spark on the local disks.
<b>Related Name</b>
spark.io.encryption.enabled
<b>Default Value</b>
false
<b>API Name</b>
spark_io_encryption_enabled
<b>Required</b>
false

Enable Spark Lineage

<b>Description</b>
Whether to enable spark lineage support. If enabled, spark lineage is sent to Atlas.
<b>Related Name</b>
spark.lineage.enabled
<b>Default Value</b>
true
<b>API Name</b>
spark_lineage_enabled
<b>Required</b>
false

### Enable Network Encryption

**Description**

Whether to encrypt communication between Spark processes belonging to the same application. Requires authentication (spark.authenticate) to be enabled.

**Related Name**

spark.network.crypto.enabled

**Default Value**

false

**API Name**

spark\_network\_encryption\_enabled

**Required**

false

### Enable Optimized S3 Committers

**Description**

Whether use optimized committers when writing data to S3.

**Related Name**

spark.cloudera.s3\_committers.enabled

**Default Value**

true

**API Name**

spark\_optimized\_s3\_committers\_enabled

**Required**

false

### Extra Python Path

**Description**

Python library paths to add to PySpark applications.

**Related Name**

spark\_python\_path

**Default Value****API Name**

spark\_python\_path

**Required**

false

### Enable Shuffle Service

**Description**

Enables the external shuffle service. The external shuffle service preserves shuffle files written by executors so that the executors can be deallocated without losing work. Must be enabled if Enable Dynamic Allocation is enabled. Recommended and enabled by default.

**Related Name**

spark.shuffle.service.enabled

**Default Value**

true

**API Name**

spark\_shuffle\_service\_enabled

**Required**

true

**Enable Spark Web UI****Description**

Whether to enable the Spark Web UI on individual applications. It's recommended that the UI be disabled in secure clusters.

**Related Name**

spark.ui.enabled

**Default Value**

true

**API Name**

spark\_ui\_enabled

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Deploy Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

**Suppress Parameter Validation: Gateway Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-defaults.conf****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-defaults.conf parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark-conf/spark-defaults.conf\_client\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark-conf/spark-env.sh\_client\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Spark Data Serializer****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Data Serializer parameter.

**Related Name****Default Value**

false

<b>API Name</b>	role_config_suppression_spark_data_serializer
<b>Required</b>	true

**Suppress Parameter Validation: Extra Python Path**

<b>Description</b>	Whether to suppress configuration warnings produced by the built-in parameter validation for the Extra Python Path parameter.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	role_config_suppression_spark_python_path
<b>Required</b>	true

**History Server**

**Advanced**

**History Server Logging Advanced Configuration Snippet (Safety Valve)**

<b>Description</b>	For advanced use only, a string to be inserted into log4j.properties for this role only.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	log4j_safety_valve
<b>Required</b>	false

**Enable auto refresh for metric configurations**

<b>Description</b>	When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	metric_config_auto_refresh
<b>Required</b>	false

**Heap Dump Directory**

<b>Description</b>	
--------------------	--

Path to directory where heap dumps are generated when `java.lang.OutOfMemoryError` error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

`oom_heap_dump_dir`

**Default Value**

`/tmp`

**API Name**

`oom_heap_dump_dir`

**Required**

`false`

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

`true`

**API Name**

`oom_heap_dump_enabled`

**Required**

`true`

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

**Related Name****Default Value**

`true`

**API Name**

`oom_sigkill_enabled`

**Required**

`true`

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

`false`

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh****Description**

For advanced use only. A string to be inserted into spark-conf/spark-env.sh for this role only.

**Related Name****Default Value****API Name**

spark-conf/spark-env.sh\_role\_safety\_valve

**Required**

false

**History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-history-server.conf****Description**

For advanced use only. A string to be inserted into spark-conf/spark-history-server.conf for this role only.

**Related Name****Default Value****API Name**

spark-conf/spark-history-server.conf\_role\_safety\_valve

**Required**

false

**History Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

SPARK\_YARN\_HISTORY\_SERVER\_role\_env\_safety\_valve

**Required**

false

**Logs****History Server Log Directory****Description**

The log directory for log files of the role History Server.

**Related Name**

log\_dir

**Default Value**

/var/log/spark

**API Name**

log\_dir

<b>Required</b>
false

History Server Logging Threshold

<b>Description</b>
The minimum log level for History Server logs
<b>Related Name</b>
<b>Default Value</b>
INFO
<b>API Name</b>
log_threshold
<b>Required</b>
false

History Server Maximum Log File Backups

<b>Description</b>
The maximum number of rolled log files to keep for History Server logs. Typically used by log4j or logback.
<b>Related Name</b>
<b>Default Value</b>
10
<b>API Name</b>
max_log_backup_index
<b>Required</b>
false

History Server Max Log Size

<b>Description</b>
The maximum size, in megabytes, per log file for History Server logs. Typically used by log4j or logback.
<b>Related Name</b>
<b>Default Value</b>
200 MiB
<b>API Name</b>
max_log_size
<b>Required</b>
false

Monitoring

Enable Health Alerts for this Role

<b>Description</b>
When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>

<b>Default Value</b>
true
<b>API Name</b>
enable_alerts
<b>Required</b>
false

Enable Configuration Change Alerts

<b>Description</b>
When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
enable_config_alerts
<b>Required</b>
false

Log Directory Free Space Monitoring Absolute Thresholds

<b>Description</b>
The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
<b>Related Name</b>
<b>Default Value</b>
Warning: 10 GiB, Critical: 5 GiB
<b>API Name</b>
log_directory_free_space_absolute_thresholds
<b>Required</b>
false

Log Directory Free Space Monitoring Percentage Thresholds

<b>Description</b>
The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.
<b>Related Name</b>
<b>Default Value</b>
Warning: Never, Critical: Never
<b>API Name</b>
log_directory_free_space_percentage_thresholds
<b>Required</b>
false

Metric Filter

<b>Description</b>
--------------------

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- **Health Test Metric Set** - Select this parameter to collect only metrics required for health tests.
- **Default Dashboard Metric Set** - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- **Include/Exclude Custom Metrics** - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- **Metric Name** - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- **Include only Health Test Metric Set:** Selected.
- **Include/Exclude Custom Metrics:** Set to Include.
- **Metric Name:** `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

`monitoring_metric_filter`

**Required**

`false`

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

`process_swap_memory_rate_thresholds`

**Required**

`false`

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

`common.process.swap_memory_rate_window`

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

### File Descriptor Monitoring Thresholds

**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

spark\_yarn\_history\_server\_fd\_thresholds

**Required**

false

### History Server Host Health Test

**Description**

When computing the overall History Server health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

spark\_yarn\_history\_server\_host\_health\_enabled

**Required**

false

### History Server Process Health Test

**Description**

Enables the health test that the History Server's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

spark\_yarn\_history\_server\_scm\_health\_enabled

**Required**

false

### Unexpected Exits Thresholds

**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other****Use Local Storage****Description**

Whether to use local storage for caching application history data, which reduces memory usage and makes service restarts faster.

**Related Name**

enable\_local\_storage

**Default Value**

false

**API Name**

enable\_local\_storage

**Required**

false

**Enable Event Log Cleaner****Description**

Specifies whether the History Server should periodically clean up event logs from storage.

**Related Name**

spark.history.fs.cleaner.enabled

**Default Value**

true

**API Name**

event\_log\_cleaner\_enabled

**Required**

false

**Event Log Cleaner Interval****Description**

How often the History Server will clean up event log files.

**Related Name**

`spark.history.fs.cleaner.interval`**Default Value**`1 day(s)`**API Name**`event_log_cleaner_interval`**Required**`false`**Maximum Event Log Age****Description**

Specifies the maximum age of the event logs.

**Related Name**`spark.history.fs.cleaner.maxAge`**Default Value**`7 day(s)`**API Name**`event_log_cleaner_max_age`**Required**`false`**Admin Users****Description**

Comma-separated list of users who can view all applications when authentication is enabled.

**Related Name**`spark.history.ui.admin.acls`**Default Value**`knox`**API Name**`history_server_admin_users`**Required**`false`**HDFS Polling Interval****Description**

How often to poll HDFS for new applications.

**Related Name**`spark.history.fs.update.interval.seconds`**Default Value**`10 second(s)`**API Name**`history_server_fs_poll_interval`**Required**`false`

### Java Heap Size of History Server in Bytes

**Description**

Maximum size for the Java process heap memory. Passed to Java -Xmx. Measured in bytes.

**Related Name**

history\_server\_max\_heapsize

**Default Value**

512 MiB

**API Name**

history\_server\_max\_heapsize

**Required**

true

### Retained App Count

**Description**

Max number of application UIs to keep in the History Server's memory. All applications will still be available, but may take longer to load if they're not in memory.

**Related Name**

spark.history.retainedApplications

**Default Value**

50

**API Name**

history\_server\_retained\_apps

**Required**

false

### Enable User Authentication

**Description**

Enables user authentication using SPNEGO (requires Kerberos), and enables access control to application history data.

**Related Name**

history\_server\_spnego\_enabled

**Default Value**

false

**API Name**

history\_server\_spnego\_enabled

**Required**

false

### Local Storage Directory

**Description**

Directory where to keep local caches of application history data.

**Related Name**

spark.history.store.path

**Default Value**

/var/lib/spark/history

**API Name**

local\_storage\_dir

**Required**

false

**Max Local Storage Size****Description**

Approximate maximum amount of data to use in local storage for caching application history data.

**Related Name**

spark.history.store.maxDiskUsage

**Default Value**

10 GiB

**API Name**

local\_storage\_max\_usage

**Required**

false

**Enabled SSL/TLS Algorithms****Description**

A comma-separated list of algorithm names to enable when TLS/SSL is enabled. By default, all algorithms supported by the JRE are enabled.

**Related Name**

spark.ssl.historyServer.enabledAlgorithms

**Default Value****API Name**

ssl\_server\_algorithms

**Required**

false

**TLS/SSL Protocol****Description**

The version of the TLS/SSL protocol to use when TLS/SSL is enabled.

**Related Name**

spark.ssl.historyServer.protocol

**Default Value**

TLSv1.2

**API Name**

ssl\_server\_protocol

**Required**

false

**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

## Ports and Addresses

### History Server WebUI Port

**Description**

The port of the history server WebUI

**Related Name**

spark.history.ui.port

**Default Value**

18088

**API Name**

history\_server\_web\_port

**Required**

true

### TLS/SSL Port Number

**Description**

Port where to listen for TLS/SSL connections. HTTP connections will be redirected to this port when TLS/SSL is enabled.

**Related Name**

spark.ssl.historyServer.port

**Default Value**

18488

**API Name**

ssl\_server\_port

**Required**

false

## Resource Management

### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Enable TLS/SSL for History Server****Description**

Encrypt communication between clients and History Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

spark.ssl.historyServer.enabled

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**History Server TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when History Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

spark.ssl.historyServer.keyStore

**Default Value****API Name**

ssl_server_keystore_location
<b>Required</b>
false

History Server TLS/SSL Server Keystore File Password

<b>Description</b>
The password for the History Server keystore file.
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
ssl_server_keystore_password
<b>Required</b>
false

Stacks Collection

Stacks Collection Data Retention

<b>Description</b>
The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
<b>Related Name</b>
stacks_collection_data_retention
<b>Default Value</b>
100 MiB
<b>API Name</b>
stacks_collection_data_retention
<b>Required</b>
false

Stacks Collection Directory

<b>Description</b>
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
<b>Related Name</b>
stacks_collection_directory
<b>Default Value</b>
<b>API Name</b>
stacks_collection_directory
<b>Required</b>
false

Stacks Collection Enabled

<b>Description</b>
Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_cdh_version_validator`**Required**`true`**Suppress Parameter Validation: Admin Users****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Users parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_history_server_admin_users`**Required**`true`**Suppress Parameter Validation: History Server WebUI Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server WebUI Port parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_history_server_web_port`**Required**`true`**Suppress Parameter Validation: Local Storage Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Local Storage Directory parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_local_storage_dir`**Required**`true`**Suppress Parameter Validation: History Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: History Server Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

---

true
------

### Suppress Parameter Validation: Role Triggers

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

### Suppress Parameter Validation: History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark-conf/spark-env.sh\_role\_safety\_valve

**Required**

true

### Suppress Parameter Validation: History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-history-server.conf

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-history-server.conf parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark-conf/spark-history-server.conf\_role\_safety\_valve

**Required**

true

### Suppress Parameter Validation: History Server Environment Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark\_yarn\_history\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Enabled SSL/TLS Algorithms****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Enabled SSL/TLS Algorithms parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_algorithms

**Required**

true

**Suppress Parameter Validation: History Server TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: History Server TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

---

true

### Suppress Parameter Validation: TLS/SSL Port Number

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the TLS/SSL Port Number parameter.

#### Related Name

#### Default Value

false

#### API Name

role\_config\_suppression\_ssl\_server\_port

#### Required

true

### Suppress Parameter Validation: TLS/SSL Protocol

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the TLS/SSL Protocol parameter.

#### Related Name

#### Default Value

false

#### API Name

role\_config\_suppression\_ssl\_server\_protocol

#### Required

true

### Suppress Parameter Validation: Stacks Collection Directory

#### Description

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

#### Related Name

#### Default Value

false

#### API Name

role\_config\_suppression\_stacks\_collection\_directory

#### Required

true

### Suppress Health Test: Audit Pipeline Test

#### Description

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

#### Related Name

#### Default Value

false

**API Name**

role\_health\_suppression\_spark\_on\_yarn\_spark\_yarn\_history\_server\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_spark\_on\_yarn\_spark\_yarn\_history\_server\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_spark\_on\_yarn\_spark\_yarn\_history\_server\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_spark\_on\_yarn\_spark\_yarn\_history\_server\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_spark\_on\_yarn\_spark\_yarn\_history\_server\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_spark\_on\_yarn\_spark\_yarn\_history\_server\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_spark\_on\_yarn\_spark\_yarn\_history\_server\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_spark\_on\_yarn\_spark\_yarn\_history\_server\_unexpected\_exits

**Required**

true

## Service-Wide

### Advanced

#### System Group

**Description**

The group that this service's processes should run as.

**Related Name****Default Value**

spark

**API Name**

process\_groupname

**Required**

true

#### System User

**Description**

The user that this service's processes should run as.

**Related Name****Default Value**

spark

**API Name**

process\_username

**Required**

true

#### Spark Service Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh

**Description**

For advanced use only, a string to be inserted into spark-conf/spark-env.sh. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

spark-conf/spark-env.sh\_service\_safety\_valve

**Required**

false

### Spark Service Environment Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

SPARK\_ON\_YARN\_service\_env\_safety\_valve

**Required**

false

### Monitoring

#### Enable Service Level Health Alerts

**Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

#### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

### Service Triggers

**Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific service.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.

- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

`service_triggers`

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

`smon_derived_configs_safety_valve`

**Required**

false

**History Server Role Health Test****Description**

When computing the overall SPARK\_ON\_YARN health, consider History Server's health

**Related Name****Default Value**

true

**API Name**

`SPARK_ON_YARN_SPARK_YARN_HISTORY_SERVER_health_enabled`

**Required**

false

**Other****Atlas Service****Description**

Name of the Atlas service that this Spark service instance depends on

**Related Name****Default Value****API Name**

atlas\_service

**Required**

false

**HBase Service****Description**

Name of the HBase service that this Spark service instance depends on

**Related Name****Default Value****API Name**

hbase\_service

**Required**

false

**Spark Authentication****Description**

Enable whether the Spark communication protocols do authentication using a shared secret.

**Related Name**

spark.authenticate

**Default Value**

false

**API Name**

spark\_authenticate

**Required**

true

**Spark Driver Log Location (HDFS)****Description**

The location of Spark driver logs in HDFS when Spark application runs in client mode. Changing this value will not move existing logs to the new location.

**Related Name**

spark.driver.log.dir

**Default Value**

/user/spark/driverLogs

**API Name**

spark\_driver\_log\_dir

**Required**

true

### Persist Driver Logs to Dfs

**Description**

If enabled, driver logs in YARN client mode will be persisted to the configured Spark Driver Log Location (HDFS)

**Related Name**

spark.driver.log.persistToDfs.enabled

**Default Value**

true

**API Name**

spark\_driver\_log\_persist\_to\_dfs

**Required**

true

### Spark History Location (HDFS)

**Description**

The location of Spark application history logs in HDFS. Changing this value will not move existing logs to the new location.

**Related Name**

spark.eventLog.dir

**Default Value**

/user/spark/applicationHistory

**API Name**

spark\_history\_log\_dir

**Required**

true

### Shuffle Service AES Encryption

**Description**

Whether to enable AES-based authentication and encryption in the shuffle service. Requires authentication to be enabled to take effect.

**Related Name**

spark\_shuffle\_aes\_enabled

**Default Value**

true

**API Name**

spark\_shuffle\_aes\_enabled

**Required**

true

### YARN Service

**Description**

Name of the YARN service that this Spark service instance depends on

**Related Name****Default Value****API Name**

yarn_service
<b>Required</b>
true

Ports and Addresses

Spark Shuffle Service Port

<b>Description</b>
The port the Spark Shuffle Service listens for fetch requests.
<b>Related Name</b>
spark.shuffle.service.port
<b>Default Value</b>
7337
<b>API Name</b>
spark_shuffle_service_port
<b>Required</b>
true

Security

Kerberos Principal

<b>Description</b>
Kerberos principal short name used by all roles of this service.
<b>Related Name</b>
<b>Default Value</b>
spark
<b>API Name</b>
kerberos_princ_name
<b>Required</b>
true

Suppressions

Suppress Configuration Validator: CDH Version Validator

<b>Description</b>
Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_cdh_version_validator
<b>Required</b>
true

**Suppress Configuration Validator: Deploy Directory****Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

**Suppress Configuration Validator: Admin Users****Description**

Whether to suppress configuration warnings produced by the Admin Users configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_history\_server\_admin\_users

**Required**

true

**Suppress Configuration Validator: History Server WebUI Port****Description**

Whether to suppress configuration warnings produced by the History Server WebUI Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_history\_server\_web\_port

**Required**

true

**Suppress Configuration Validator: Local Storage Directory****Description**

Whether to suppress configuration warnings produced by the Local Storage Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_local\_storage\_dir

**Required**

true

**Suppress Configuration Validator: History Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the History Server Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Configuration Validator: History Server Log Directory****Description**

Whether to suppress configuration warnings produced by the History Server Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-defaults.conf****Description**

Whether to suppress configuration warnings produced by the Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-defaults.conf configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark-conf/spark-defaults.conf\_client\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh****Description**

Whether to suppress configuration warnings produced by the Spark Client Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark-conf/spark-env.sh\_client\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh****Description**

Whether to suppress configuration warnings produced by the History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark-conf/spark-env.sh\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-history-server.conf****Description**

Whether to suppress configuration warnings produced by the History Server Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-history-server.conf configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark-conf/spark-history-server.conf\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Spark Data Serializer****Description**

Whether to suppress configuration warnings produced by the Spark Data Serializer configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark\_data\_serializer

**Required**

true

**Suppress Configuration Validator: Extra Python Path****Description**

Whether to suppress configuration warnings produced by the Extra Python Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark\_python\_path

**Required**

true

**Suppress Configuration Validator: History Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the History Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark\_yarn\_history\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Enabled SSL/TLS Algorithms****Description**

Whether to suppress configuration warnings produced by the Enabled SSL/TLS Algorithms configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_algorithms

**Required**

true

**Suppress Configuration Validator: History Server TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the History Server TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Configuration Validator: History Server TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the History Server TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Configuration Validator: TLS/SSL Port Number****Description**

Whether to suppress configuration warnings produced by the TLS/SSL Port Number configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_port

**Required**

true

**Suppress Configuration Validator: TLS/SSL Protocol****Description**

Whether to suppress configuration warnings produced by the TLS/SSL Protocol configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_protocol

**Required**

true

**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

---

true

### Suppress Configuration Validator: Gateway Count Validator

**Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_gateway\_count\_validator

**Required**

true

### Suppress Parameter Validation: Kerberos Principal

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kerberos\_princ\_name

**Required**

true

### Suppress Parameter Validation: System Group

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

### Suppress Parameter Validation: System User

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Spark Service Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Service Advanced Configuration Snippet (Safety Valve) for spark-conf/spark-env.sh parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_spark-conf/spark-env.sh\_service\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Spark Driver Log Location (HDFS)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Driver Log Location (HDFS) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_spark\_driver\_log\_dfs\_dir

**Required**

true

**Suppress Parameter Validation: Spark History Location (HDFS)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark History Location (HDFS) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_spark\_history\_log\_dir

**Required**

true

**Suppress Configuration Validator: Hive Gateway for Spark Validator****Description**

Whether to suppress configuration warnings produced by the Hive Gateway for Spark Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_spark\_hive\_gateway\_validator

**Required**

true

**Suppress Parameter Validation: Spark Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service_config_suppression_spark_on_yarn_service_env_safety_valve
<b>Required</b>
true

**Suppress Parameter Validation: Spark Shuffle Service Port**

<b>Description</b>
Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Shuffle Service Port parameter.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
service_config_suppression_spark_shuffle_service_port
<b>Required</b>
true

**Suppress Configuration Validator: History Server Count Validator**

<b>Description</b>
Whether to suppress configuration warnings produced by the History Server Count Validator configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
service_config_suppression_spark_yarn_history_server_count_validator
<b>Required</b>
true

**Suppress Health Test: History Server Health**

<b>Description</b>
Whether to suppress the results of the History Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
service_health_suppression_spark_on_yarn_spark_on_yarn_spark_yarn_history_server_health
<b>Required</b>
true

**Spark 3 Properties in Cloudera Runtime 7.1.8**

Role groups:

## Gateway

### Advanced

#### Deploy Directory

**Description**

The directory where the client configs will be deployed

**Related Name****Default Value**

/etc/spark3

**API Name**

client\_config\_root\_dir

**Required**

true

#### Gateway Logging Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

#### Spark 3 Client Advanced Configuration Snippet (Safety Valve) for meta/version

**Description**

For advanced use only, a string to be inserted into the client configuration for meta/version.

**Related Name****Default Value****API Name**

meta/version\_client\_config\_safety\_valve

**Required**

false

#### Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-defaults.conf

**Description**

For advanced use only, a string to be inserted into the client configuration for spark3-conf/spark-defaults.conf.

**Related Name****Default Value****API Name**

spark3-conf/spark-defaults.conf\_client\_config\_safety\_valve

<b>Required</b>
false

**Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh**

<b>Description</b>
For advanced use only, a string to be inserted into the client configuration for spark3-conf/spark-env.sh.
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
spark3-conf/spark-env.sh_client_config_safety_valve
<b>Required</b>
false

**Logs**

**Gateway Logging Threshold**

<b>Description</b>
The minimum log level for Gateway logs
<b>Related Name</b>
<b>Default Value</b>
INFO
<b>API Name</b>
log_threshold
<b>Required</b>
false

**Monitoring**

**Enable Configuration Change Alerts**

<b>Description</b>
When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
enable_config_alerts
<b>Required</b>
false

**Other**

**Alternatives Priority**

<b>Description</b>
The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

**Related Name****Default Value**

51

**API Name**

client\_config\_priority

**Required**

true

**Spark Data Serializer****Description**

Name of class implementing org.apache.spark.serializer.Serializer to use in Spark applications.

**Related Name**

spark.serializer

**Default Value**

org.apache.spark.serializer.KryoSerializer

**API Name**

spark\_data\_serializer

**Required**

true

**Default Application Deploy Mode****Description**

Which deploy mode to use by default. Can be overridden by users when launching applications.

**Related Name**

spark\_deploy\_mode

**Default Value**

client

**API Name**

spark\_deploy\_mode

**Required**

false

**Caching Executor Idle Timeout****Description**

When dynamic allocation is enabled, time after which idle executors with cached RDDs blocks will be stopped. By default, they're never stopped.

**Related Name**

spark.dynamicAllocation.cachedExecutorIdleTimeout

**Default Value****API Name**

spark\_dynamic\_allocation\_cached\_idle\_timeout

**Required**

false

### Enable Dynamic Allocation

**Description**

Enable dynamic allocation of executors in Spark applications.

**Related Name**

spark.dynamicAllocation.enabled

**Default Value**

true

**API Name**

spark\_dynamic\_allocation\_enabled

**Required**

false

### Executor Idle Timeout

**Description**

When dynamic allocation is enabled, time after which idle executors will be stopped.

**Related Name**

spark.dynamicAllocation.executorIdleTimeout

**Default Value**

1 minute(s)

**API Name**

spark\_dynamic\_allocation\_idle\_timeout

**Required**

false

### Initial Executor Count

**Description**

When dynamic allocation is enabled, number of executors to allocate when the application starts. By default, this is the same value as the minimum number of executors.

**Related Name**

spark.dynamicAllocation.initialExecutors

**Default Value****API Name**

spark\_dynamic\_allocation\_initial\_executors

**Required**

false

### Maximum Executor Count

**Description**

When dynamic allocation is enabled, maximum number of executors to allocate. By default, Spark relies on YARN to control the maximum number of executors for the application.

**Related Name**

spark.dynamicAllocation.maxExecutors

**Default Value****API Name**

`spark_dynamic_allocation_max_executors`**Required**`false`**Minimum Executor Count****Description**

When dynamic allocation is enabled, minimum number of executors to keep alive while the application is running.

**Related Name**`spark.dynamicAllocation.minExecutors`**Default Value**`0`**API Name**`spark_dynamic_allocation_min_executors`**Required**`false`**Scheduler Backlog Timeout****Description**

When dynamic allocation is enabled, timeout before requesting new executors when there are backlogged tasks.

**Related Name**`spark.dynamicAllocation.schedulerBacklogTimeout`**Default Value**`1 second(s)`**API Name**`spark_dynamic_allocation_scheduler_backlog_timeout`**Required**`false`**Sustained Scheduler Backlog Timeout****Description**

When dynamic allocation is enabled, timeout before requesting new executors after the initial backlog timeout has already expired. By default this is the same value as the initial backlog timeout.

**Related Name**`spark.dynamicAllocation.sustainedSchedulerBacklogTimeout`**Default Value****API Name**`spark_dynamic_allocation_sustained_scheduler_backlog_timeout`**Required**`false`**Shell Logging Threshold****Description**

The minimum log level for the Spark shell.

**Related Name**

spark\_gateway\_shell\_logging\_threshold

**Default Value**

WARN

**API Name**

spark\_gateway\_shell\_logging\_threshold

**Required**

true

**Enable Kill From UI****Description**

Whether to allow users to kill running stages from the Spark Web UI.

**Related Name**

spark.ui.killEnabled

**Default Value**

true

**API Name**

spark\_gateway\_ui\_kill\_enabled

**Required**

true

**Enable History****Description**

Write Spark application history logs to HDFS.

**Related Name**

spark.eventLog.enabled

**Default Value**

true

**API Name**

spark\_history\_enabled

**Required**

false

**Enable I/O Encryption****Description**

Whether to encrypt temporary shuffle and cache files stored by Spark on the local disks.

**Related Name**

spark.io.encryption.enabled

**Default Value**

false

**API Name**

spark\_io\_encryption\_enabled

**Required**

false

### Enable Spark Lineage

**Description**

Whether to enable spark lineage support. If enabled, spark lineage is sent to Atlas.

**Related Name**

spark.lineage.enabled

**Default Value**

true

**API Name**

spark\_lineage\_enabled

**Required**

false

### Enable Network Encryption

**Description**

Whether to encrypt communication between Spark processes belonging to the same application.  
Requires authentication (spark.authenticate) to be enabled.

**Related Name**

spark.network.crypto.enabled

**Default Value**

false

**API Name**

spark\_network\_encryption\_enabled

**Required**

false

### Enable Optimized S3 Committers

**Description**

Whether use optimized committers when writing data to S3.

**Related Name**

spark.cloudera.s3\_committers.enabled

**Default Value**

true

**API Name**

spark\_optimized\_s3\_committers\_enabled

**Required**

false

### Extra Python Path

**Description**

Python library paths to add to PySpark applications.

**Related Name**

spark\_python\_path

**Default Value****API Name**

`spark_python_path`**Required**`false`**Enable Shuffle Service****Description**

Enables the external shuffle service. The external shuffle service preserves shuffle files written by executors so that the executors can be deallocated without losing work. Must be enabled if Enable Dynamic Allocation is enabled. Recommended and enabled by default.

**Related Name**`spark.shuffle.service.enabled`**Default Value**`true`**API Name**`spark_shuffle_service_enabled`**Required**`true`**Enable Spark Web UI****Description**

Whether to enable the Spark Web UI on individual applications. It's recommended that the UI be disabled in secure clusters.

**Related Name**`spark.ui.enabled`**Default Value**`true`**API Name**`spark_ui_enabled`**Required**`false`**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_cdh_version_validator`**Required**`true`

**Suppress Parameter Validation: Deploy Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

**Suppress Parameter Validation: Gateway Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Spark 3 Client Advanced Configuration Snippet (Safety Valve) for meta/version****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark 3 Client Advanced Configuration Snippet (Safety Valve) for meta/version parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_meta/version\_client\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-defaults.conf****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-defaults.conf parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark3-conf/spark-defaults.conf\_client\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark3-conf/spark-env.sh\_client\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Spark Data Serializer****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Data Serializer parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark\_data\_serializer

**Required**

true

**Suppress Parameter Validation: Extra Python Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Extra Python Path parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark\_python\_path

**Required**

true

## History Server

### Advanced

#### History Server Logging Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

#### History Server Advanced Configuration Snippet (Safety Valve) for meta/version

**Description**

For advanced use only. A string to be inserted into meta/version for this role only.

**Related Name****Default Value****API Name**

meta/version\_role\_safety\_valve

**Required**

false

#### Enable auto refresh for metric configurations

**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

#### Heap Dump Directory

**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

`oom_heap_dump_dir`**Default Value**`/tmp`**API Name**`oom_heap_dump_dir`**Required**`false`**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when an out-of-memory error occurs.

**Related Name****Default Value**`true`**API Name**`oom_heap_dump_enabled`**Required**`true`**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

**Related Name****Default Value**`true`**API Name**`oom_sigkill_enabled`**Required**`true`**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**`false`**API Name**`process_auto_restart`**Required**`true`

### Enable Metric Collection

**Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

### Process Start Retry Attempts

**Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

### Process Start Wait Timeout

**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

### History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh

**Description**

For advanced use only. A string to be inserted into spark3-conf/spark-env.sh for this role only.

**Related Name****Default Value**

<b>API Name</b>	spark3-conf/spark-env.sh_role_safety_valve
<b>Required</b>	false

**History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-history-server.conf**

<b>Description</b>	For advanced use only. A string to be inserted into spark3-conf/spark-history-server.conf for this role only.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	spark3-conf/spark-history-server.conf_role_safety_valve
<b>Required</b>	false

**History Server Environment Advanced Configuration Snippet (Safety Valve)**

<b>Description</b>	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	SPARK3_YARN_HISTORY_SERVER_role_env_safety_valve
<b>Required</b>	false

**Logs**

**History Server Log Directory**

<b>Description</b>	The log directory for log files of the role History Server.
<b>Related Name</b>	log_dir
<b>Default Value</b>	/var/log/spark3
<b>API Name</b>	log_dir
<b>Required</b>	false

**History Server Logging Threshold**

<b>Description</b>	The minimum log level for History Server logs
--------------------	---

**Related Name****Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

**History Server Maximum Log File Backups****Description**

The maximum number of rolled log files to keep for History Server logs. Typically used by log4j or logback.

**Related Name****Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

**History Server Max Log Size****Description**

The maximum size, in megabytes, per log file for History Server logs. Typically used by log4j or logback.

**Related Name****Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring****Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

### Enable Configuration Change Alerts

#### Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

#### Related Name

#### Default Value

false

#### API Name

enable\_config\_alerts

#### Required

false

### Log Directory Free Space Monitoring Absolute Thresholds

#### Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

#### Related Name

#### Default Value

Warning: 10 GiB, Critical: 5 GiB

#### API Name

log\_directory\_free\_space\_absolute\_thresholds

#### Required

false

### Log Directory Free Space Monitoring Percentage Thresholds

#### Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

#### Related Name

#### Default Value

Warning: Never, Critical: Never

#### API Name

log\_directory\_free\_space\_percentage\_thresholds

#### Required

false

### Metric Filter

#### Description

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.

- **Default Dashboard Metric Set** - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- **Include/Exclude Custom Metrics** - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- **Metric Name** - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- **Include only Health Test Metric Set:** Selected.
- **Include/Exclude Custom Metrics:** Set to Include.
- **Metric Name:** `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

`monitoring_metric_filter`

**Required**

`false`

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

`process_swap_memory_rate_thresholds`

**Required**

`false`

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

`common.process.swap_memory_rate_window`

**Default Value**

5 minute(s)

**API Name**

`process_swap_memory_rate_window`

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.
- streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

spark3\_yarn\_history\_server\_fd\_thresholds

**Required**

false

**History Server Host Health Test****Description**

When computing the overall History Server health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

spark3\_yarn\_history\_server\_host\_health\_enabled

**Required**

false

**History Server Process Health Test****Description**

Enables the health test that the History Server's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

spark3\_yarn\_history\_server\_scm\_health\_enabled

**Required**

false

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

### Unexpected Exits Monitoring Period

**Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

### Other

### Use Local Storage

**Description**

Whether to use local storage for caching application history data, which reduces memory usage and makes service restarts faster.

**Related Name**

enable\_local\_storage

**Default Value**

false

**API Name**

enable\_local\_storage

**Required**

false

### Enable Event Log Cleaner

**Description**

Specifies whether the History Server should periodically clean up event logs from storage.

**Related Name**

spark.history.fs.cleaner.enabled

**Default Value**

true

**API Name**

event\_log\_cleaner\_enabled

**Required**

false

### Event Log Cleaner Interval

**Description**

How often the History Server will clean up event log files.

**Related Name**

spark.history.fs.cleaner.interval

**Default Value**

1 day(s)

**API Name**

event\_log\_cleaner\_interval

**Required**

false

**Maximum Event Log Age****Description**

Specifies the maximum age of the event logs.

**Related Name**

spark.history.fs.cleaner.maxAge

**Default Value**

7 day(s)

**API Name**

event\_log\_cleaner\_max\_age

**Required**

false

**Admin Users****Description**

Comma-separated list of users who can view all applications when authentication is enabled.

**Related Name**

spark.history.ui.admin.acls

**Default Value**

knox

**API Name**

history\_server\_admin\_users

**Required**

false

**HDFS Polling Interval****Description**

How often to poll HDFS for new applications.

**Related Name**

spark.history.fs.update.interval.seconds

**Default Value**

10 second(s)

**API Name**

history\_server\_fs\_poll\_interval

**Required**

false

**Java Heap Size of History Server in Bytes****Description**

Maximum size for the Java process heap memory. Passed to Java -Xmx. Measured in bytes.

**Related Name**

`history_server_max_heapsize`**Default Value**`512 MiB`**API Name**`history_server_max_heapsize`**Required**`true`**Retained App Count****Description**

Max number of application UIs to keep in the History Server's memory. All applications will still be available, but may take longer to load if they're not in memory.

**Related Name**`spark.history.retainedApplications`**Default Value**`50`**API Name**`history_server_retained_apps`**Required**`false`**Enable User Authentication****Description**

Enables user authentication using SPNEGO (requires Kerberos), and enables access control to application history data.

**Related Name**`history_server_spnego_enabled`**Default Value**`false`**API Name**`history_server_spnego_enabled`**Required**`false`**Local Storage Directory****Description**

Directory where to keep local caches of application history data.

**Related Name**`spark.history.store.path`**Default Value**`/var/lib/spark3/history`**API Name**`local_storage_dir`**Required**`false`

### Max Local Storage Size

**Description**

Approximate maximum amount of data to use in local storage for caching application history data.

**Related Name**

spark.history.store.maxDiskUsage

**Default Value**

10 GiB

**API Name**

local\_storage\_max\_usage

**Required**

false

### Enabled SSL/TLS Algorithms

**Description**

A comma-separated list of algorithm names to enable when TLS/SSL is enabled. By default, all algorithms supported by the JRE are enabled.

**Related Name**

spark.ssl.historyServer.enabledAlgorithms

**Default Value****API Name**

ssl\_server\_algorithms

**Required**

false

### TLS/SSL Protocol

**Description**

The version of the TLS/SSL protocol to use when TLS/SSL is enabled.

**Related Name**

spark.ssl.historyServer.protocol

**Default Value**

TLSv1.2

**API Name**

ssl\_server\_protocol

**Required**

false

### Performance

#### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit_fds
<b>Required</b>
false

Ports and Addresses

History Server WebUI Port

<b>Description</b>
The port of the history server WebUI
<b>Related Name</b>
spark.history.ui.port
<b>Default Value</b>
18089
<b>API Name</b>
history_server_web_port
<b>Required</b>
true

TLS/SSL Port Number

<b>Description</b>
Port where to listen for TLS/SSL connections. HTTP connections will be redirected to this port when TLS/SSL is enabled.
<b>Related Name</b>
spark.ssl.historyServer.port
<b>Default Value</b>
18489
<b>API Name</b>
ssl_server_port
<b>Required</b>
false

Resource Management

Cgroup CPU Shares

<b>Description</b>
Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.
<b>Related Name</b>
cpu.shares
<b>Default Value</b>
1024
<b>API Name</b>
rm_cpu_shares
<b>Required</b>
true

### Custom Control Group Resources (overrides Cgroup settings)

**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

### Cgroup I/O Weight

**Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

### Cgroup Memory Hard Limit

**Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

### Cgroup Memory Soft Limit

**Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

### Security

#### Enable TLS/SSL for History Server

**Description**

Encrypt communication between clients and History Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

spark.ssl.historyServer.enabled

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

#### History Server TLS/SSL Server Keystore File Location

**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when History Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

spark.ssl.historyServer.keyStore

**Default Value****API Name**

ssl\_server\_keystore\_location

**Required**

false

#### History Server TLS/SSL Server Keystore File Password

**Description**

The password for the History Server keystore file.

**Related Name**

**Default Value**

**API Name**

ssl\_server\_keystore\_password

**Required**

false

**Stacks Collection**

**Stacks Collection Data Retention**

**Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

**Stacks Collection Directory**

**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value**

**API Name**

stacks\_collection\_directory

**Required**

false

**Stacks Collection Enabled**

**Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

`stacks_collection_enabled`**Required**`true`**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**`stacks_collection_frequency`**Default Value**`5.0 second(s)`**API Name**`stacks_collection_frequency`**Required**`false`**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**`stacks_collection_method`**Default Value**`jstack`**API Name**`stacks_collection_method`**Required**`false`**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_cdh_version_validator`**Required**`true`

**Suppress Parameter Validation: Admin Users****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Admin Users parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_history\_server\_admin\_users

**Required**

true

**Suppress Parameter Validation: History Server WebUI Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server WebUI Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_history\_server\_web\_port

**Required**

true

**Suppress Parameter Validation: Local Storage Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Local Storage Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_local\_storage\_dir

**Required**

true

**Suppress Parameter Validation: History Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_log4j_safety_valve`**Required**`true`**Suppress Parameter Validation: History Server Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Log Directory parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_log_dir`**Required**`true`**Suppress Parameter Validation: History Server Advanced Configuration Snippet (Safety Valve) for meta/version****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Advanced Configuration Snippet (Safety Valve) for meta/version parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_meta/version_role_safety_valve`**Required**`true`**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_oom_heap_dump_dir`**Required**`true`**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark3-conf/spark-env.sh\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-history-server.conf****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-history-server.conf parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark3-conf/spark-history-server.conf\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: History Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark3\_yarn\_history\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Enabled SSL/TLS Algorithms****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Enabled SSL/TLS Algorithms parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_algorithms

**Required**

true

**Suppress Parameter Validation: History Server TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: History Server TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History Server TLS/SSL Server Keystore File Password parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Parameter Validation: TLS/SSL Port Number****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the TLS/SSL Port Number parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_port

**Required**

true

**Suppress Parameter Validation: TLS/SSL Protocol****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the TLS/SSL Protocol parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_protocol

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_spark3\_on\_yarn\_spark3\_yarn\_history\_server\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_spark3\_on\_yarn\_spark3\_yarn\_history\_server\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_spark3\_on\_yarn\_spark3\_yarn\_history\_server\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**`role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_log_directory_free_space`**Required**`true`**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_scm_health`**Required**`true`**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_swap_memory_usage`**Required**`true`**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_swap_memory_usage_rate`**Required**`true`

**Suppress Health Test: Unexpected Exits**

<b>Description</b>	Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	role_health_suppression_spark3_on_yarn_spark3_yarn_history_server_unexpected_exits
<b>Required</b>	true

**Service-Wide**

**Advanced**

**Spark 3 Service Advanced Configuration Snippet (Safety Valve) for meta/version**

<b>Description</b>	For advanced use only, a string to be inserted into meta/version. Applies to configurations of all roles in this service except client configuration.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	meta/version_service_safety_valve
<b>Required</b>	false

**System Group**

<b>Description</b>	The group that this service's processes should run as.
<b>Related Name</b>	
<b>Default Value</b>	spark
<b>API Name</b>	process_groupname
<b>Required</b>	true

**System User**

<b>Description</b>	The user that this service's processes should run as.
<b>Related Name</b>	
<b>Default Value</b>	spark

**API Name**

process\_username

**Required**

true

**Spark 3 Service Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh****Description**

For advanced use only, a string to be inserted into spark3-conf/spark-env.sh. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

spark3-conf/spark-env.sh\_service\_safety\_valve

**Required**

false

**Spark 3 Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

SPARK3\_ON\_YARN\_service\_env\_safety\_valve

**Required**

false

**Monitoring****Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name**

**Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific service.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd\_open WHERE roleType = DataNode and last(fd\_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

### History Server Role Health Test

**Description**

When computing the overall SPARK3\_ON\_YARN health, consider History Server's health

**Related Name****Default Value**

true

**API Name**

SPARK3\_ON\_YARN\_SPARK3\_YARN\_HISTORY\_SERVER\_health\_enabled

**Required**

false

### Other

### Atlas Service

**Description**

Name of the Atlas service that this Spark 3 service instance depends on

**Related Name****Default Value****API Name**

atlas\_service

**Required**

false

### HBase Service

**Description**

Name of the HBase service that this Spark 3 service instance depends on

**Related Name****Default Value****API Name**

hbase\_service

**Required**

false

### Spark Authentication

**Description**

Enable whether the Spark communication protocols do authentication using a shared secret. If using SPARK\_ON\_YARN service (i.e. Spark 1 based service), ensure that value of this property is the same in both services.

**Related Name**

spark.authenticate

**Default Value**

false

**API Name**

spark\_authenticate

**Required**

true

**Spark Driver Log Location (HDFS)****Description**

The location of Spark driver logs in HDFS when Spark application runs in client mode. Changing this value will not move existing logs to the new location.

**Related Name**

spark.driver.log.dfsDir

**Default Value**

/user/spark/driver3Logs

**API Name**

spark\_driver\_log\_dfs\_dir

**Required**

true

**Persist Driver Logs to Dfs****Description**

If enabled, driver logs in YARN client mode will be persisted to the configured Spark Driver Log Location (HDFS)

**Related Name**

spark.driver.log.persistToDfs.enabled

**Default Value**

true

**API Name**

spark\_driver\_log\_persist\_to\_dfs

**Required**

true

**Spark History Location (HDFS)****Description**

The location of Spark application history logs in HDFS. Changing this value will not move existing logs to the new location.

**Related Name**

spark.eventLog.dir

**Default Value**

/user/spark/spark3ApplicationHistory

**API Name**

spark\_history\_log\_dir

**Required**

true

**YARN Service****Description**

Name of the YARN service that this Spark 3 service instance depends on

**Related Name****Default Value****API Name**

yarn\_service

**Required**

true

**Ports and Addresses****Spark Shuffle Service Port****Description**

The port the Spark Shuffle Service listens for fetch requests. If using SPARK\_ON\_YARN service (i.e. Spark 2 based service), ensure a unique port is given here.

**Related Name**

spark.shuffle.service.port

**Default Value**

7447

**API Name**

spark\_shuffle\_service\_port

**Required**

true

**Security****Kerberos Principal****Description**

Kerberos principal short name used by all roles of this service.

**Related Name****Default Value**

spark

**API Name**

kerberos\_princ\_name

**Required**

true

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role_config_suppression_cdh_version_validator
<b>Required</b>
true

Suppress Configuration Validator: Deploy Directory

<b>Description</b>
Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_client_config_root_dir
<b>Required</b>
true

Suppress Configuration Validator: Admin Users

<b>Description</b>
Whether to suppress configuration warnings produced by the Admin Users configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_history_server_admin_users
<b>Required</b>
true

Suppress Configuration Validator: History Server WebUI Port

<b>Description</b>
Whether to suppress configuration warnings produced by the History Server WebUI Port configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_history_server_web_port
<b>Required</b>
true

Suppress Configuration Validator: Local Storage Directory

<b>Description</b>
Whether to suppress configuration warnings produced by the Local Storage Directory configuration validator.
<b>Related Name</b>

**Default Value**

false

**API Name**

role\_config\_suppression\_local\_storage\_dir

**Required**

true

**Suppress Configuration Validator: History Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the History Server Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Configuration Validator: History Server Log Directory****Description**

Whether to suppress configuration warnings produced by the History Server Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Spark 3 Client Advanced Configuration Snippet (Safety Valve) for meta/version****Description**

Whether to suppress configuration warnings produced by the Spark 3 Client Advanced Configuration Snippet (Safety Valve) for meta/version configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_meta/version\_client\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: History Server Advanced Configuration Snippet (Safety Valve) for meta/version****Description**

Whether to suppress configuration warnings produced by the History Server Advanced Configuration Snippet (Safety Valve) for meta/version configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_meta/version\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-defaults.conf****Description**

Whether to suppress configuration warnings produced by the Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-defaults.conf configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark3-conf/spark-defaults.conf\_client\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh****Description**

Whether to suppress configuration warnings produced by the Spark 3 Client Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark3-conf/spark-env.sh\_client\_config\_safety\_valve

**Required**

true

**Suppress Configuration Validator: History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh****Description**

Whether to suppress configuration warnings produced by the History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark3-conf/spark-env.sh\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-history-server.conf****Description**

Whether to suppress configuration warnings produced by the History Server Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-history-server.conf configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark3-conf/spark-history-server.conf\_role\_safety\_valve

**Required**

true

### Suppress Configuration Validator: History Server Environment Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the History Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark3\_yarn\_history\_server\_role\_env\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Spark Data Serializer

**Description**

Whether to suppress configuration warnings produced by the Spark Data Serializer configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark\_data\_serializer

**Required**

true

### Suppress Configuration Validator: Extra Python Path

**Description**

Whether to suppress configuration warnings produced by the Extra Python Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_spark\_python\_path

**Required**

true

**Suppress Configuration Validator: Enabled SSL/TLS Algorithms****Description**

Whether to suppress configuration warnings produced by the Enabled SSL/TLS Algorithms configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_algorithms

**Required**

true

**Suppress Configuration Validator: History Server TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the History Server TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Configuration Validator: History Server TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the History Server TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Configuration Validator: TLS/SSL Port Number****Description**

Whether to suppress configuration warnings produced by the TLS/SSL Port Number configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_port

**Required**

true

**Suppress Configuration Validator: TLS/SSL Protocol****Description**

Whether to suppress configuration warnings produced by the TLS/SSL Protocol configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_protocol

**Required**

true

**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Configuration Validator: Gateway Count Validator****Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_gateway\_count\_validator

**Required**

true

**Suppress Parameter Validation: Kerberos Principal****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kerberos\_princ\_name

**Required**

true

**Suppress Parameter Validation: Spark 3 Service Advanced Configuration Snippet (Safety Valve) for meta/version****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark 3 Service Advanced Configuration Snippet (Safety Valve) for meta/version parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_meta/version\_service\_safety\_valve

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Spark 3 Service Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark 3 Service Advanced Configuration Snippet (Safety Valve) for spark3-conf/spark-env.sh parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_spark3-conf/spark-env.sh\_service\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Spark 3 Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark 3 Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_spark3\_on\_yarn\_service\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: History Server Count Validator****Description**

Whether to suppress configuration warnings produced by the History Server Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_spark3\_yarn\_history\_server\_count\_validator

**Required**

true

**Suppress Parameter Validation: Spark Driver Log Location (HDFS)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Driver Log Location (HDFS) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_spark\_driver\_log\_dfs\_dir

**Required**

true

**Suppress Parameter Validation: Spark History Location (HDFS)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark History Location (HDFS) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_spark\_history\_log\_dir

**Required**

true

**Suppress Parameter Validation: Spark Shuffle Service Port**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Spark Shuffle Service Port parameter.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_spark\_shuffle\_service\_port

**Required**

true

**Suppress Health Test: History Server Health**

**Description**

Whether to suppress the results of the History Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

service\_health\_suppression\_spark3\_on\_yarn\_spark3\_on\_yarn\_spark3\_yarn\_history\_server\_health

**Required**

true

**SQOOP\_CLIENT Properties in Cloudera Runtime 7.1.8**

Role groups:

**Gateway**

**Advanced**

**Deploy Directory**

**Description**

The directory where the client configs will be deployed

**Related Name**

**Default Value**

/etc/sqoop

**API Name**

client\_config\_root\_dir

**Required**

true

**Gateway Advanced Configuration Snippet (Safety Valve) for cm\_manager\_overrides****Description**

For advanced use only. A string to be inserted into cm\_manager\_overrides for this role only.

**Related Name****Default Value****API Name**

sqoop-conf/managers.d/cm\_manager\_overrides\_client\_config\_safety\_valve

**Required**

false

**Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-env.sh****Description**

For advanced use only. A string to be inserted into sqoop-env.sh for this role only.

**Related Name****Default Value****API Name**

sqoop-conf/sqoop-env.sh\_client\_config\_safety\_valve

**Required**

false

**Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-site.xml****Description**

For advanced use only. A string to be inserted into sqoop-site.xml for this role only.

**Related Name****Default Value****API Name**

sqoop-conf/sqoop-site.xml\_client\_config\_safety\_valve

**Required**

false

**Monitoring****Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

Other

Alternatives Priority

Description	The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.
Related Name	
Default Value	90
API Name	client_config_priority
Required	true

Sqoop Connection Factories

Description	A list of ManagerFactory implementations which are consulted, in order to instantiate ConnManager instances used to drive connections to databases.
Related Name	sqoop.connection.factories
Default Value	
API Name	sqoop_connection_factories
Required	false

Sqoop Tool Plugins

Description	A list of ToolPlugin implementations which are consulted, in order to register SqoopTool instances which allow third-party tools to be used.
Related Name	sqoop.tool.plugins
Default Value	
API Name	sqoop_tool_plugins
Required	false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	

**Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Deploy Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

**Suppress Parameter Validation: Gateway Advanced Configuration Snippet (Safety Valve) for cm\_manager\_overrides****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Advanced Configuration Snippet (Safety Valve) for cm\_manager\_overrides parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_sqoop-conf/managers.d/cm\_manager\_overrides\_client\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-env.sh****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-env.sh parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_sqoop-conf/sqoop-env.sh\_client\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-site.xml**

<b>Description</b>	Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-site.xml parameter.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	role_config_suppression_sqoop-conf/sqoop-site.xml_client_config_safety_valve
<b>Required</b>	true

**Suppress Parameter Validation: Sqoop Connection Factories**

<b>Description</b>	Whether to suppress configuration warnings produced by the built-in parameter validation for the Sqoop Connection Factories parameter.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	role_config_suppression_sqoop_connection_factories
<b>Required</b>	true

**Suppress Parameter Validation: Sqoop Tool Plugins**

<b>Description</b>	Whether to suppress configuration warnings produced by the built-in parameter validation for the Sqoop Tool Plugins parameter.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	role_config_suppression_sqoop_tool_plugins
<b>Required</b>	true

**Service-Wide**

**Advanced**

**SQOOP\_CLIENT Service Environment Advanced Configuration Snippet (Safety Valve)**

<b>Description</b>	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
<b>Related Name</b>	

**Default Value****API Name**

SQOOP\_CLIENT\_service\_env\_safety\_valve

**Required**

false

**Monitoring****Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Other****Parquet Writer Implementation****Description**

Configure the library used during parquet jobs for writing and reading data. Possible values: hadoop, kite (legacy).

**Related Name**

parquetjob.configurator.implementation

**Default Value**

hadoop

**API Name**

parquetjob.configurator.implementation

**Required**

false

**Sqoop Decimal Padding****Description**

Enables padding for fixed point number types (decimal, number, numeric) in case of Avro and Parquet imports.

**Related Name**

sqoop.avro.decimal\_padding.enable

**Default Value**

true

**API Name**

sqoop.avro.decimal\_padding.enable

**Required**

false

Default Precision for Logical Types

Description

Specifies the default precision for fixed point number types. This value is only used if the precision was not specified in the source table.

Related Name

sqoop.avro.logical\_types.decimal.default.precision

Default Value

38

API Name

sqoop.avro.logical\_types.decimal.default.precision

Required

false

Default Scale for Logical Types

Description

Default scale for fixed point number types. This value is only used if the scale was not specified in the source table.

Related Name

sqoop.avro.logical\_types.decimal.default.scale

Default Value

10

API Name

sqoop.avro.logical\_types.decimal.default.scale

Required

false

Enable Avro Logical Types

Description

Enables the use of logical types in avro files, so that fixed point number types are converted to decimal during an import. Fixed point number types are converted to String if this property is set to false.

Related Name

sqoop.avro.logical\_types.decimal.enable

Default Value

true

API Name

sqoop.avro.logical\_types.decimal.enable

Required

false

Enable Parquet Logical Types

Description

Enables the use of logical types in parquet files, so that fixed point number types are converted to decimal during an import. Fixed point number types are converted to String if this property is set to false.

**Related Name**

sqoop.parquet.logical\_types.decimal.enable

**Default Value**

true

**API Name**

sqoop.parquet.logical\_types.decimal.enable

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Configuration Validator: Deploy Directory****Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

**Suppress Configuration Validator: Gateway Advanced Configuration Snippet (Safety Valve) for cm\_manager\_overrides****Description**

Whether to suppress configuration warnings produced by the Gateway Advanced Configuration Snippet (Safety Valve) for cm\_manager\_overrides configuration validator.

**Related Name****Default Value**

	false
API Name	role_config_suppression_sqoop-conf/managers.d/cm_manager_overrides_client_config_safety_valve
Required	true

Suppress Configuration Validator: Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-env.sh

Description	Whether to suppress configuration warnings produced by the Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-env.sh configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_sqoop-conf/sqoop-env.sh_client_config_safety_valve
Required	true

Suppress Configuration Validator: Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-site.xml

Description	Whether to suppress configuration warnings produced by the Gateway Advanced Configuration Snippet (Safety Valve) for sqoop-site.xml configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_sqoop-conf/sqoop-site.xml_client_config_safety_valve
Required	true

Suppress Configuration Validator: Sqoop Connection Factories

Description	Whether to suppress configuration warnings produced by the Sqoop Connection Factories configuration validator.
Related Name	
Default Value	false
API Name	role_config_suppression_sqoop_connection_factories
Required	true

**Suppress Configuration Validator: Sqoop Tool Plugins****Description**

Whether to suppress configuration warnings produced by the Sqoop Tool Plugins configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_sqoop\_tool\_plugins

**Required**

true

**Suppress Configuration Validator: Gateway Count Validator****Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_gateway\_count\_validator

**Required**

true

**Suppress Parameter Validation: Parquet Writer Implementation****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Parquet Writer Implementation parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_parquetjob.configurator.implementation

**Required**

true

**Suppress Parameter Validation: SQOOP\_CLIENT Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SQOOP\_CLIENT Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service_config_suppression_sqoop_client_service_env_safety_valve
<b>Required</b>
true

Streams Messaging Manager Properties in Cloudera Runtime 7.1.8

Role groups:

Service-Wide

Advanced

System Group

<b>Description</b>
The group that this service's processes should run as.
<b>Related Name</b>
<b>Default Value</b>
streamsmgmgr
<b>API Name</b>
process_groupname
<b>Required</b>
true

System User

<b>Description</b>
The user that this service's processes should run as.
<b>Related Name</b>
<b>Default Value</b>
streamsmgmgr
<b>API Name</b>
process_username
<b>Required</b>
true

Streams Messaging Manager Service Environment Advanced Configuration Snippet (Safety Valve)

<b>Description</b>
For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
STREAMS_MESSAGING_MANAGER_service_env_safety_valve
<b>Required</b>
false

Database

Streams Messaging Manager Database Host

Description	Hostname of the database used by Streams Messaging Manager. If the port is non-default for your database type, use host:port notation.
Related Name	streams.messaging.manager.storage.connector.host
Default Value	localhost
API Name	smm_database_host
Required	true

Streams Messaging Manager Database Name

Description	Name of Streams Messaging Manager database.
Related Name	streams.messaging.manager.storage.connector.name
Default Value	streamsmgmr
API Name	smm_database_name
Required	true

Streams Messaging Manager Database User Password

Description	Password for Streams Messaging Manager database.
Related Name	streams.messaging.manager.storage.connector.password
Default Value	
API Name	smm_database_password
Required	true

Streams Messaging Manager Database Port

Description	Port for Streams Messaging Manager database.
Related Name	streams.messaging.manager.storage.connector.port
Default Value	3306

<b>API Name</b>	smm_database_port
<b>Required</b>	true

Streams Messaging Manager Database Type

<b>Description</b>	Database type to be used (postgres).
<b>Related Name</b>	streams.messaging.manager.storage.connector.type
<b>Default Value</b>	mysql
<b>API Name</b>	smm_database_type
<b>Required</b>	true

Streams Messaging Manager Database User

<b>Description</b>	User for Streams Messaging Manager database.
<b>Related Name</b>	streams.messaging.manager.storage.connector.user
<b>Default Value</b>	streamsmgmr
<b>API Name</b>	smm_database_user
<b>Required</b>	true

Monitoring

Enable Service Level Health Alerts

<b>Description</b>	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>	
<b>Default Value</b>	true
<b>API Name</b>	enable_alerts
<b>Required</b>	false

Enable Configuration Change Alerts

<b>Description</b>
--------------------

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific service.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd\_open WHERE roleType = DataNode and last(fd\_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

<b>Required</b>
false

**Streams Messaging Manager Rest Admin Server Role Health Test**

<b>Description</b>
When computing the overall STREAMS_MESSAGING_MANAGER health, consider Streams Messaging Manager Rest Admin Server's health
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
STREAMS_MESSAGING_MANAGER_STREAMS_MESSAGING_MANAGER_SERVER_health_enabled
<b>Required</b>
false

**Streams Messaging Manager UI Server Role Health Test**

<b>Description</b>
When computing the overall STREAMS_MESSAGING_MANAGER health, consider Streams Messaging Manager UI Server's health
<b>Related Name</b>
<b>Default Value</b>
true
<b>API Name</b>
STREAMS_MESSAGING_MANAGER_STREAMS_MESSAGING_MANAGER_UI_health_enabled
<b>Required</b>
false

**Other**

**Kafka Service**

<b>Description</b>
Name of the Kafka service that this Streams Messaging Manager service instance depends on
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
kafka_service
<b>Required</b>
true

**Enable Kerberos Authentication**

<b>Description</b>
Enables Kerberos authentication for this Streams Messaging Manager.
<b>Related Name</b>

	kerberos.auth.enable
Default Value	false
API Name	kerberos.auth.enable
Required	false

Sentry Service

Description	Name of the Sentry service that this Streams Messaging Manager service instance depends on
Related Name	
Default Value	
API Name	sentry_service
Required	false

Streams Messaging Manager Port

Description	The port on which server accepts connections.
Related Name	streams.messaging.manager.port
Default Value	8585
API Name	streams.messaging.manager.port
Required	true

Streams Messaging Manager port (SSL)

Description	HTTPS port Streams Messaging Manager rest server runs on when SSL is enabled.
Related Name	streams.messaging.manager.ssl.port
Default Value	8587
API Name	streams.messaging.manager.ssl.port
Required	false

ZooKeeper Service

Description	
-------------	--

Name of the ZooKeeper service that this Streams Messaging Manager service instance depends on

**Related Name****Default Value****API Name**

zookeeper\_service

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Configuration Validator: Cloudera Manager Service Monitor Port****Description**

Whether to suppress configuration warnings produced by the Cloudera Manager Service Monitor Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cm.metrics.service.monitor.port

**Required**

true

**Suppress Configuration Validator: Cloudera Manager Metrics TrustStore Type****Description**

Whether to suppress configuration warnings produced by the Cloudera Manager Metrics TrustStore Type configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cm.metrics.truststore.type

**Required**

---

true

### Suppress Configuration Validator: Streams Messaging Manager UI Server Advanced Configuration Snippet (Safety Valve) for config.json

**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server Advanced Configuration Snippet (Safety Valve) for config.json configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_config.json\_role\_safety\_valve

**Required**

true

### Suppress Configuration Validator: consumer.group.refresh.interval.ms

**Description**

Whether to suppress configuration warnings produced by the consumer.group.refresh.interval.ms configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_consumer.group.refresh.interval.ms

**Required**

true

### Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for env.sh

**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for env.sh configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_env.sh\_role\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Inactive Group Timeout

**Description**

Whether to suppress configuration warnings produced by the Inactive Group Timeout configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_inactive.group.timeout.ms

**Required**

true

**Suppress Configuration Validator: inactive.producer.timeout.ms****Description**

Whether to suppress configuration warnings produced by the inactive.producer.timeout.ms configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_inactive.producer.timeout.ms

**Required**

true

**Suppress Configuration Validator: LatencyMetricsConfig Metrics 15m Ttl Secs****Description**

Whether to suppress configuration warnings produced by the LatencyMetricsConfig Metrics 15m Ttl Secs configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_latencymetricsconfig.metrics.15m.ttl.secs

**Required**

true

**Suppress Configuration Validator: LatencyMetricsConfig Metrics Clean Frequency ms****Description**

Whether to suppress configuration warnings produced by the LatencyMetricsConfig Metrics Clean Frequency ms configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_latencymetricsconfig.metrics.clean.frequency.ms

**Required**

true

**Suppress Configuration Validator: Latency Metrics Data Storage Path****Description**

Whether to suppress configuration warnings produced by the Latency Metrics Data Storage Path configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_latencymetricsconfig.metrics.storage

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server Log Directory****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Configuration Validator: Metrics Cache Refresh Interval ms****Description**

Whether to suppress configuration warnings produced by the Metrics Cache Refresh Interval ms configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_metrics.cache.refresh.interval.ms

**Required**

true

**Suppress Configuration Validator: Metrics Fetcher Class****Description**

Whether to suppress configuration warnings produced by the Metrics Fetcher Class configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_metrics.fetcher.class

**Required**

---

true

### Suppress Configuration Validator: Number of Metrics Fetcher Threads

**Description**

Whether to suppress configuration warnings produced by the Number of Metrics Fetcher Threads configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_metrics.fetcher.threads

**Required**

true

### Suppress Configuration Validator: Heap Dump Directory

**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

### Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)

**Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

### Suppress Configuration Validator: Role Triggers

**Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: Java Heap Size of SMM****Description**

Whether to suppress configuration warnings produced by the Java Heap Size of SMM configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_smm\_heap\_size

**Required**

true

**Suppress Configuration Validator: SMM\_JMX\_OPTS****Description**

Whether to suppress configuration warnings produced by the SMM\_JMX\_OPTS configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_smm\_jmx\_opts

**Required**

true

**Suppress Configuration Validator: SMM\_JVM\_PERF\_OPTS****Description**

Whether to suppress configuration warnings produced by the SMM\_JVM\_PERF\_OPTS configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_smm\_jvm\_perf\_opts

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store File configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager UI Server TLS/SSL Server CA Certificate (PEM Format)****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server TLS/SSL Server CA Certificate (PEM Format) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_ca\_certificate\_location

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager UI Server TLS/SSL Server Certificate File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server TLS/SSL Server Certificate File (PEM Format) configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ssl_server_certificate_location`**Required**`true`**Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore Key Password configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_keypassword`**Required**`true`**Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_location`**Required**`true`**Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_password`**Required**`true`**Suppress Configuration Validator: Streams Messaging Manager UI Server TLS/SSL Server Private Key File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server TLS/SSL Server Private Key File (PEM Format) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_location

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager UI Server TLS/SSL Private Key Password****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server TLS/SSL Private Key Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_password

**Required**

true

**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for streams-messaging-manager.yaml****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for streams-messaging-manager.yaml configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_streams-messaging-manager.yaml_role_safety_valve`**Required**`true`**Suppress Configuration Validator: Streams Messaging Manager Admin Port****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Admin Port configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.messaging.manager.adminport`**Required**`true`**Suppress Configuration Validator: Allow All Alert Notifications****Description**

Whether to suppress configuration warnings produced by the Allow All Alert Notifications configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.messaging.manager.allow.all.alert.notifications`**Required**`true`**Suppress Configuration Validator: Allowed resources****Description**

Whether to suppress configuration warnings produced by the Allowed resources configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.messaging.manager.allowed.resources`**Required**`true`**Suppress Configuration Validator: Java Home Path Override****Description**

Whether to suppress configuration warnings produced by the Java Home Path Override configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.jdk.home

**Required**

true

**Suppress Configuration Validator: Kafka Alert Notification Topic****Description**

Whether to suppress configuration warnings produced by the Kafka Alert Notification Topic configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.kafka.alert.notifications.topic

**Required**

true

**Suppress Configuration Validator: Kafka Cache Refresh Interval ms****Description**

Whether to suppress configuration warnings produced by the Kafka Cache Refresh Interval ms configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.kafka.cache.refresh.interval.ms

**Required**

true

**Suppress Configuration Validator: Kerberos Name Rules****Description**

Whether to suppress configuration warnings produced by the Kerberos Name Rules configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.kerberos.name.rules

**Required**

true

**Suppress Configuration Validator: Kerberos Non Browser User Agents****Description**

Whether to suppress configuration warnings produced by the Kerberos Non Browser User Agents configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.kerberos.non.browser.user.agents

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager Log Max Backup Index****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Log Max Backup Index configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.log.maxbackupindex

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager Log Max File Size****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Log Max File Size configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.log.maxfilesize

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager NotifierProviders Config Classes****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager NotifierProviders Config Classes configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.providerclasses

**Required**

---

true

### Suppress Configuration Validator: Save Notification Read Status Per User

**Description**

Whether to suppress configuration warnings produced by the Save Notification Read Status Per User configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.save.notification.read.status.per.user

**Required**

true

### Suppress Configuration Validator: Schema Registry API url

**Description**

Whether to suppress configuration warnings produced by the Schema Registry API url configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.schema.registry.url

**Required**

true

### Suppress Configuration Validator: Servlet filter

**Description**

Whether to suppress configuration warnings produced by the Servlet filter configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.servlet.filter

**Required**

true

### Suppress Configuration Validator: Streams Messaging Manager Admin Port (SSL)

**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Admin Port (SSL) configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_streams.messaging.manager.ssl.adminport`**Required**`true`**Suppress Configuration Validator: SSL Keystore Type****Description**

Whether to suppress configuration warnings produced by the SSL Keystore Type configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.messaging.manager.ssl.keystoretype`**Required**`true`**Suppress Configuration Validator: SSL TrustStore Type****Description**

Whether to suppress configuration warnings produced by the SSL TrustStore Type configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.messaging.manager.ssl.truststoretype`**Required**`true`**Suppress Configuration Validator: SSL ValidateCerts****Description**

Whether to suppress configuration warnings produced by the SSL ValidateCerts configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.messaging.manager.ssl.validatecerts`**Required**`true`**Suppress Configuration Validator: SSL validatePeers****Description**

Whether to suppress configuration warnings produced by the SSL validatePeers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.ssl.validatepeers

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager UI Port****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.ui.port

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager Configuration Directory****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Configuration Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.working.directory

**Required**

true

**Suppress Configuration Validator: Streams Replication Manager Rest Host****Description**

Whether to suppress configuration warnings produced by the Streams Replication Manager Rest Host configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.host

**Required**

true

**Suppress Configuration Validator: Streams Replication Manager Rest Port****Description**

Whether to suppress configuration warnings produced by the Streams Replication Manager Rest Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.port

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams\_messaging\_manager\_server\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager UI Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams\_messaging\_manager\_ui\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Database Host****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Database Host parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smm\_database\_host

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Database Name****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Database Name parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smm\_database\_name

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Database User Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Database User Password parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smm\_database\_password

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Database Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Database Port parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smm\_database\_port

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Database User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Database User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smm\_database\_user

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Port**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Port parameter.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_streams.messaging.manager.port

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager port (SSL)**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager port (SSL) parameter.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_streams.messaging.manager.ssl.port

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager Rest Admin Server Count Validator**

**Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager Rest Admin Server Count Validator configuration validator.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_streams\_messaging\_manager\_server\_count\_validator

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_streams\_messaging\_manager\_service\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Streams Messaging Manager UI Server Count Validator****Description**

Whether to suppress configuration warnings produced by the Streams Messaging Manager UI Server Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_streams\_messaging\_manager\_ui\_count\_validator

**Required**

true

**Suppress Health Test: Streams Messaging Manager Rest Admin Server Health****Description**

Whether to suppress the results of the Streams Messaging Manager Rest Admin Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

service\_health\_suppression\_streams\_messaging\_manager\_streams\_messaging\_manager\_streams\_messaging\_manager\_server\_health

**Required**

true

### Suppress Health Test: Streams Messaging Manager UI Server Health

**Description**

Whether to suppress the results of the Streams Messaging Manager UI Server Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

service\_health\_suppression\_streams\_messaging\_manager\_streams\_messaging\_manager\_streams\_messaging\_manager\_ui\_health

**Required**

true

## Streams Messaging Manager Rest Admin Server

### Advanced

#### Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for env.sh

**Description**

For advanced use only. A string to be inserted into env.sh for this role only.

**Related Name****Default Value****API Name**

env.sh\_role\_safety\_valve

**Required**

false

### Enable auto refresh for metric configurations

**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

### Heap Dump Directory

**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among

multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for streams-messaging-manager.yaml****Description**

For advanced use only. A string to be inserted into streams-messaging-manager.yaml for this role only.

**Related Name****Default Value****API Name**

streams-messaging-manager.yaml\_role\_safety\_valve

**Required**

false

### Streams Messaging Manager Rest Admin Server Environment Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

STREAMS\_MESSAGING\_MANAGER\_SERVER\_role\_env\_safety\_valve

**Required**

false

### Logs

### Streams Messaging Manager Rest Admin Server Log Directory

**Description**

The log directory for log files of the role Streams Messaging Manager Rest Admin Server.

**Related Name**

log\_dir

**Default Value**

/var/log/streams-messaging-manager

**API Name**

log\_dir

**Required**

false

### Monitoring

### Enable Health Alerts for this Role

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.

- **Default Dashboard Metric Set** - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- **Include/Exclude Custom Metrics** - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- **Metric Name** - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- **Include only Health Test Metric Set:** Selected.
- **Include/Exclude Custom Metrics:** Set to Include.
- **Metric Name:** `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**`monitoring_metric_filter`**Required**`false`**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**`Warning: Never, Critical: Never`**API Name**`process_swap_memory_rate_thresholds`**Required**`false`**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**`common.process.swap_memory_rate_window`**Default Value**`5 minute(s)`**API Name**`process_swap_memory_rate_window`

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- triggerName (mandatory) - The name of the trigger. This value must be unique for the specific role.
- triggerExpression (mandatory) - A tsquery expression representing the trigger.
- streamThreshold (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- enabled (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- expressionEditorConfig (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

streams\_messaging\_manager\_server\_fd\_thresholds

**Required**

false

**Streams Messaging Manager Rest Admin Server Host Health Test****Description**

When computing the overall Streams Messaging Manager Rest Admin Server health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

streams\_messaging\_manager\_server\_host\_health\_enabled

**Required**

false

**Streams Messaging Manager Rest Admin Server Process Health Test****Description**

Enables the health test that the Streams Messaging Manager Rest Admin Server's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

streams\_messaging\_manager\_server\_scm\_health\_enabled

**Required**

false

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

Unexpected Exits Monitoring Period

Description

The period to review when computing unexpected exits.

Related Name

Default Value

5 minute(s)

API Name

unexpected\_exits\_window

Required

false

Other

Cloudera Manager Service Monitor Port

Description

Port of Cloudera Manager's Service Monitor.

Related Name

cm.metrics.service.monitor.port

Default Value

9997

API Name

cm.metrics.service.monitor.port

Required

true

Cloudera Manager Metrics TrustStore Type

Description

Cloudera Manager's truststore type.

Related Name

cm.metrics.truststore.type

Default Value

jks

API Name

cm.metrics.truststore.type

Required

true

consumer.group.refresh.interval.ms

Description

Refresh interval for consumer group's consumption.

Related Name

consumer.group.refresh.interval.ms

Default Value

50000
<b>API Name</b>
consumer.group.refresh.interval.ms
<b>Required</b>
true

Graceful Shutdown Timeout

<b>Description</b>
The timeout in milliseconds to wait for graceful shutdown to complete.
<b>Related Name</b>
<b>Default Value</b>
30 second(s)
<b>API Name</b>
graceful_stop_timeout
<b>Required</b>
false

Inactive Group Timeout

<b>Description</b>
Timeout in ms for inactive group.
<b>Related Name</b>
inactive.group.timeout.ms
<b>Default Value</b>
1800000
<b>API Name</b>
inactive.group.timeout.ms
<b>Required</b>
true

inactive.producer.timeout.ms

<b>Description</b>
Timeout in ms for Inactive producer.
<b>Related Name</b>
inactive.producer.timeout.ms
<b>Default Value</b>
1800000
<b>API Name</b>
inactive.producer.timeout.ms
<b>Required</b>
true

Enable Latency Metrics Processing

<b>Description</b>
--------------------

To enable Latency Metrics Processing and Servicing, SMM will launch a service which continuously processes metrics received from producers and consumers and be able to provide responses to queries.

**Related Name**

latencyMetricsConfig.enable.latency.metrics.processing

**Default Value**

true

**API Name**

latencyMetricsConfig.enable.latency.metrics.processing

**Required**

true

**LatencyMetricsConfig Metrics 15m Ttl Secs****Description**

Determines the default TTL (Time To Live) for 15m granularity metrics (metrics are queryable in 15m).

**Related Name**

latencyMetricsConfig.metrics.15m.ttl.secs

**Default Value**

1209600

**API Name**

latencyMetricsConfig.metrics.15m.ttl.secs

**Required**

false

**LatencyMetricsConfig Metrics Clean Frequency ms****Description**

Frequency with which the metrics are cleaned from the above store in ms.

**Related Name**

latencyMetricsConfig.metrics.clean.frequency.ms

**Default Value**

21600000

**API Name**

latencyMetricsConfig.metrics.clean.frequency.ms

**Required**

false

**Latency Metrics Data Storage Path****Description**

Path to store latency metrics data.

**Related Name**

latencyMetricsConfig.metrics.storage

**Default Value**

/var/lib/streamsmgmgr/latencymetrics/data

**API Name**

latencyMetricsConfig.metrics.storage
<b>Required</b>
false

logging threshold for logger appenders

<b>Description</b>
logging threshold for logger appenders
<b>Related Name</b>
loggers.appenders.threshold
<b>Default Value</b>
TRACE
<b>API Name</b>
loggers.appenders.threshold
<b>Required</b>
false

logging level of all loggers

<b>Description</b>
logging level of all loggers
<b>Related Name</b>
logging.level
<b>Default Value</b>
INFO
<b>API Name</b>
logging.level
<b>Required</b>
false

Logger org.apache.kafka Logging Level

<b>Description</b>
Logger org.apache.kafka logging level.
<b>Related Name</b>
logging.org.apache.kafka.level
<b>Default Value</b>
INFO
<b>API Name</b>
logging.org.apache.kafka.level
<b>Required</b>
false

Logger samm.kafka.webservice.common Logging Level

<b>Description</b>
Logger samm.kafka.webservice.common logging level.
<b>Related Name</b>
logging.samm.kafka.webservice.common.level

**Default Value**

DEBUG

**API Name**

logging.smm.kafka.webservice.common.level

**Required**

false

**Metrics Cache Refresh Interval ms****Description**

Refresh interval for data collection from CM Metrics's Collector cache.

**Related Name**

metrics.cache.refresh.interval.ms

**Default Value**

50000

**API Name**

metrics.cache.refresh.interval.ms

**Required**

true

**Metrics Fetcher Class****Description**

SMM's kafka metrics fetcher class.

**Related Name**

metrics.fetcher.class

**Default Value**

com.hortonworks.smm.kafka.services.metric.cm.CMMetricsFetcher

**API Name**

metrics.fetcher.class

**Required**

true

**Number of Metrics Fetcher Threads****Description**

Number of metrics fetcher threads.

**Related Name**

metrics.fetcher.threads

**Default Value**

25

**API Name**

metrics.fetcher.threads

**Required**

true

**Java Heap Size of SMM****Description**

Maximum size for the SMM Java process heap memory. Passed to Java -Xmx. Measured in megabytes.

**Related Name**

SMM\_HEAP\_SIZE

**Default Value**

6 GiB

**API Name**

SMM\_HEAP\_SIZE

**Required**

false

**SMM\_JMX\_OPTS****Description**

Change parameters to setup jmxremote.

**Related Name**

SMM\_JMX\_OPTS

**Default Value**

-Dcom.sun.management.jmxremote -Dcom.sun.management.jmxremote.authenticate=false -  
Dcom.sun.management.jmxremote.ssl=false

**API Name**

SMM\_JMX\_OPTS

**Required**

false

**SMM\_JVM\_PERF\_OPTS****Description**

SMM JVM perf and gc opts.

**Related Name**

SMM\_JVM\_PERF\_OPTS

**Default Value**

-server -XX:+UseG1GC -XX:MaxGCPauseMillis=20 -XX:InitiatingHeapOccupancyPercent=35 -  
XX:+ExplicitGCInvokesConcurrent -Djava.awt.headless=true

**API Name**

SMM\_JVM\_PERF\_OPTS

**Required**

false

**Streams Messaging Manager Admin Port****Description**

The admin port for the server.

**Related Name**

streams.messaging.manager.adminPort

**Default Value**

8586

**API Name**

streams.messaging.manager.adminPort
<b>Required</b>
true

**AlertTopicConsumerConfig Poll Timeout ms**

<b>Description</b>
Alert topic Consumer config poll timeout in ms.
<b>Related Name</b>
streams.messaging.manager.alertTopicConsumerConfig.poll.timeout.ms
<b>Default Value</b>
1 second(s)
<b>API Name</b>
streams.messaging.manager.alertTopicConsumerConfig.poll.timeout.ms
<b>Required</b>
false

**Allow All Alert Notifications**

<b>Description</b>
Whether to send the alert notifications periodically.
<b>Related Name</b>
streams.messaging.manager.allow.all.alert.notifications
<b>Default Value</b>
true
<b>API Name</b>
streams.messaging.manager.allow.all.alert.notifications
<b>Required</b>
false

**Allowed resources**

<b>Description</b>
Allowed resources for Streams Messaging Manager.
<b>Related Name</b>
streams.messaging.manager.allowed.resources
<b>Default Value</b>
401.html, back-default.png, favicon.ico
<b>API Name</b>
streams.messaging.manager.allowed.resources
<b>Required</b>
false

**Streams Messaging Manager Executor Thread Count**

<b>Description</b>
Alerts config executor thread count.
<b>Related Name</b>
streams.messaging.manager.executor.thread.count

<b>Default Value</b>	30
<b>API Name</b>	streams.messaging.manager.executor.thread.count
<b>Required</b>	true

**Streams Messaging Manager Executor Thread Pool Size**

<b>Description</b>	NotifierProviders executor thread pool size.
<b>Related Name</b>	streams.messaging.manager.executor.thread.pool.size
<b>Default Value</b>	16
<b>API Name</b>	streams.messaging.manager.executor.thread.pool.size
<b>Required</b>	true

**Java Home Path Override**

<b>Description</b>	Java Home Path Override for Streams Messaging Manager
<b>Related Name</b>	streams.messaging.manager.jdk.home
<b>Default Value</b>	
<b>API Name</b>	streams.messaging.manager.jdk.home
<b>Required</b>	false

**Kafka Alert Notification Topic**

<b>Description</b>	Kafka alert notification topic name.
<b>Related Name</b>	streams.messaging.manager.kafka.alert.notifications.topic
<b>Default Value</b>	__smm_alert_notifications
<b>API Name</b>	streams.messaging.manager.kafka.alert.notifications.topic
<b>Required</b>	true

**Kafka Cache Refresh Interval ms**

<b>Description</b>	
--------------------	--

SMM's cache refresh interval in ms for kafka.

**Related Name**

streams.messaging.manager.kafka.cache.refresh.interval.ms

**Default Value**

60000

**API Name**

streams.messaging.manager.kafka.cache.refresh.interval.ms

**Required**

false

**Kafka Client Security Protocol****Description**

Protocol to be used for communicating with Kafka, INFERRED setup assumes that Kafka service is set up the same as SMM regarding kerberos and ssl.

**Related Name**

streams.messaging.manager.kafka.client.security.protocol

**Default Value**

INFERRED

**API Name**

streams.messaging.manager.kafka.client.security.protocol

**Required**

false

**Streams Messaging Manager KafkaConsumerClient Poll Timeout ms****Description**

SMM's Kafka Consumer Client poll timeout in ms.

**Related Name**

streams.messaging.manager.kafkaConsumerClient.poll.timeout.ms

**Default Value**

1 second(s)

**API Name**

streams.messaging.manager.kafkaConsumerClient.poll.timeout.ms

**Required**

false

**Kerberos Name Rules****Description**

Kerberos name rules for Streams Messaging Manager.

**Related Name**

streams.messaging.manager.kerberos.name.rules

**Default Value**

RULE:[2:\$1@\$0]([jt]t@.\*EXAMPLE.COM)s/.\*/\$MAPRED\_USER/ RULE:[2:\$1@\$0]  
([nd]n@.\*EXAMPLE.COM)s/.\*/\$HDFS\_USER/DEFAULT

**API Name**

streams.messaging.manager.kerberos.name.rules

**Required**

false

**Kerberos Non Browser User Agents****Description**

Non browser user agents if kerberos is enabled.

**Related Name**

streams.messaging.manager.kerberos.non.browser.user.agents

**Default Value****API Name**

streams.messaging.manager.kerberos.non.browser.user.agents

**Required**

false

**Streams Messaging Manager Log Max Backup Index****Description**

The number of backup files

**Related Name**

streams.messaging.manager.log.maxbackupindex

**Default Value**

20

**API Name**

streams.messaging.manager.log.maxbackupindex

**Required**

false

**Streams Messaging Manager Log Max File Size****Description**

The maximum size of backup file before the log is rotated

**Related Name**

streams.messaging.manager.log.maxfilesize

**Default Value**

256MB

**API Name**

streams.messaging.manager.log.maxfilesize

**Required**

false

**Streams Messaging Manager NotifierProviders Config Classes****Description**

NotifierProviders config classes in list format.

**Related Name**

streams.messaging.manager.providerClasses

**Default Value**

```
[com.hortonworks.smm.notifier.http.HttpNotifierProvider,  
com.hortonworks.smm.notifier.email.EmailNotifierProvider]
```

**API Name**

```
streams.messaging.manager.providerClasses
```

**Required**

```
true
```

**Save Notification Read Status Per User****Description**

Alert notification save status flag per user.

**Related Name**

```
streams.messaging.manager.save.notification.read.status.per.user
```

**Default Value**

```
true
```

**API Name**

```
streams.messaging.manager.save.notification.read.status.per.user
```

**Required**

```
false
```

**Schema Registry API url****Description**

Provide API URL for Schema Registry. e.g `http://SR_HOST:7788/api/v1` or `https://SR_HOST:7790/api/v1`

**Related Name**

```
streams.messaging.manager.schema.registry.url
```

**Default Value****API Name**

```
streams.messaging.manager.schema.registry.url
```

**Required**

```
false
```

**Servlet filter****Description**

Streams Messaging Manager servlet filter class.

**Related Name**

```
streams.messaging.manager.servlet.filter
```

**Default Value**

```
com.hortonworks.registries.auth.server.AuthenticationFilter
```

**API Name**

```
streams.messaging.manager.servlet.filter
```

**Required**

```
true
```

**Streams Messaging Manager Admin Port (SSL)****Description**

HTTPS admin port Streams Messaging Manager rest server runs on when SSL is enabled.

**Related Name**

streams.messaging.manager.ssl.adminPort

**Default Value**

8588

**API Name**

streams.messaging.manager.ssl.adminPort

**Required**

false

**SSL Keystore Type****Description**

The keystore type. Required if Streams Messaging Manager rest server's SSL is enabled. e.g. PKCS12 or JKS.

**Related Name**

streams.messaging.manager.ssl.keyStoreType

**Default Value**

jks

**API Name**

streams.messaging.manager.ssl.keyStoreType

**Required**

false

**SSL TrustStore Type****Description**

The truststore type. Required if streams messaging manager's ssl is enabled. e.g. PKCS12 or JKS.

**Related Name**

streams.messaging.manager.ssl.trustStoreType

**Default Value**

jks

**API Name**

streams.messaging.manager.ssl.trustStoreType

**Required**

false

**SSL ValidateCerts****Description**

Whether or not to validate TLS certificates before starting. If enabled, it will refuse to start with expired or otherwise invalid certificates.

**Related Name**

streams.messaging.manager.ssl.validateCerts

**Default Value**

false

**API Name**

streams.messaging.manager.ssl.validateCerts

**Required**

false

**SSL validatePeers****Description**

Whether or not to validate TLS peer certificates.

**Related Name**

streams.messaging.manager.ssl.validatePeers

**Default Value**

false

**API Name**

streams.messaging.manager.ssl.validatePeers

**Required**

false

**Streams Messaging Manager Query Timeout****Description**

Streams Messaging Manager query timeout.

**Related Name**

streams.messaging.manager.storage.query.timeout

**Default Value**

30 millisecond(s)

**API Name**

streams.messaging.manager.storage.query.timeout

**Required**

true

**Token validity****Description**

Kerberos token validity for Streams Messaging Manager in ms.

**Related Name**

streams.messaging.manager.token.validity

**Default Value**

36000

**API Name**

streams.messaging.manager.token.validity

**Required**

false

**Streams Messaging Manager Configuration Directory****Description**

Directory to Streams messaging manager additional libs, jars, isos, etc.

**Related Name**

streams.messaging.manager.working.directory

**Default Value**

/var/lib/streamsmgmgr

**API Name**

streams.messaging.manager.working.directory

**Required**

false

**Configure Streams Replication Manager****Description**

Configure Streams Replication Manager.

**Related Name**

streams.replication.manager.configure

**Default Value**

false

**API Name**

streams.replication.manager.configure

**Required**

false

**Streams Replication Manager Rest Host****Description**

Streams Replication Manager rest host.

**Related Name**

streams.replication.manager.host

**Default Value****API Name**

streams.replication.manager.host

**Required**

false

**Streams Replication Manager Rest Port****Description**

Streams Replication Manager rest port.

**Related Name**

streams.replication.manager.port

**Default Value**

6670

**API Name**

streams.replication.manager.port

**Required**

false

**Streams Replication Manager Rest Protocol****Description**

Streams Replication Manager rest protocol.

**Related Name**`streams.replication.manager.protocol`**Default Value**`http`**API Name**`streams.replication.manager.protocol`**Required**`false`**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**`rlimit_fds`**Required**`false`**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**`cpu.shares`**Default Value**`1024`**API Name**`rm_cpu_shares`**Required**`true`**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: `resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`  
\*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**`custom.cgroups`

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that Streams Messaging Manager Rest Admin Server might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

streams.messaging.manager.ssl.trustStorePath

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

**Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store Password****Description**

The password for the Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name****Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

**Enable TLS/SSL for Streams Messaging Manager Rest Admin Server****Description**

Encrypt communication between clients and Streams Messaging Manager Rest Admin Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

ssl.enable

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore Key Password****Description**

The password that protects the private key contained in the keystore used when Streams Messaging Manager Rest Admin Server is acting as a TLS/SSL server.

**Related Name****Default Value****API Name**

ssl\_server\_keystore\_keypassword

**Required**

false

**Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when Streams Messaging Manager Rest Admin Server is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

streams.messaging.manager.ssl.keyStorePath

**Default Value****API Name**

ssl\_server\_keystore\_location

**Required**

false

**Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Password****Description**

The password for the Streams Messaging Manager Rest Admin Server keystore file.

**Related Name****Default Value****API Name**

ssl\_server\_keystore\_password

**Required**

false

**Stacks Collection****Stacks Collection Data Retention****Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks_collection_data_retention
<b>Default Value</b>
100 MiB
<b>API Name</b>
stacks_collection_data_retention
<b>Required</b>
false

Stacks Collection Directory

<b>Description</b>
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
<b>Related Name</b>
stacks_collection_directory
<b>Default Value</b>
<b>API Name</b>
stacks_collection_directory
<b>Required</b>
false

Stacks Collection Enabled

<b>Description</b>
Whether or not periodic stacks collection is enabled.
<b>Related Name</b>
stacks_collection_enabled
<b>Default Value</b>
false
<b>API Name</b>
stacks_collection_enabled
<b>Required</b>
true

Stacks Collection Frequency

<b>Description</b>
The frequency with which stacks are collected.
<b>Related Name</b>
stacks_collection_frequency
<b>Default Value</b>
5.0 second(s)
<b>API Name</b>
stacks_collection_frequency
<b>Required</b>
false

### Stacks Collection Method

**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

### Suppressions

#### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

#### Suppress Parameter Validation: Cloudera Manager Service Monitor Port

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Cloudera Manager Service Monitor Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cm.metrics.service.monitor.port

**Required**

true

#### Suppress Parameter Validation: Cloudera Manager Metrics TrustStore Type

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Cloudera Manager Metrics TrustStore Type parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_cm.metrics.truststore.type

**Required**

true

**Suppress Parameter Validation: consumer.group.refresh.interval.ms****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the consumer.group.refresh.interval.ms parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_consumer.group.refresh.interval.ms

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for env.sh****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for env.sh parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_env.sh\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Inactive Group Timeout****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Inactive Group Timeout parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_inactive.group.timeout.ms

**Required**

true

**Suppress Parameter Validation: inactive.producer.timeout.ms****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the inactive.producer.timeout.ms parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_inactive.producer.timeout.ms

**Required**

true

**Suppress Parameter Validation: LatencyMetricsConfig Metrics 15m Ttl Secs****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LatencyMetricsConfig Metrics 15m Ttl Secs parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_latencymetricsconfig.metrics.15m.ttl.secs

**Required**

true

**Suppress Parameter Validation: LatencyMetricsConfig Metrics Clean Frequency ms****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the LatencyMetricsConfig Metrics Clean Frequency ms parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_latencymetricsconfig.metrics.clean.frequency.ms

**Required**

true

**Suppress Parameter Validation: Latency Metrics Data Storage Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Latency Metrics Data Storage Path parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_latencymetricsconfig.metrics.storage`**Required**`true`**Suppress Parameter Validation: Streams Messaging Manager Rest Admin Server Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Rest Admin Server Log Directory parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_log_dir`**Required**`true`**Suppress Parameter Validation: Metrics Cache Refresh Interval ms****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Metrics Cache Refresh Interval ms parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_metrics.cache.refresh.interval.ms`**Required**`true`**Suppress Parameter Validation: Metrics Fetcher Class****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Metrics Fetcher Class parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_metrics.fetcher.class`**Required**`true`**Suppress Parameter Validation: Number of Metrics Fetcher Threads****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Metrics Fetcher Threads parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_metrics.fetcher.threads

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Java Heap Size of SMM****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Heap Size of SMM parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_smm\_heap\_size

**Required**

true

**Suppress Parameter Validation: SMM\_JMX\_OPTS****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SMM\_JMX\_OPTS parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_smm\_jmx\_opts

**Required**

true

**Suppress Parameter Validation: SMM\_JVM\_PERF\_OPTS****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SMM\_JVM\_PERF\_OPTS parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_smm\_jvm\_perf\_opts

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Rest Admin Server TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_keypassword

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Rest Admin Server TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for streams-messaging-manager.yaml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Rest Admin Server Advanced Configuration Snippet (Safety Valve) for streams-messaging-manager.yaml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams-messaging-manager.yaml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Admin Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Admin Port parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.adminport

**Required**

true

**Suppress Parameter Validation: Allow All Alert Notifications****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Allow All Alert Notifications parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.allow.all.alert.notifications

**Required**

true

**Suppress Parameter Validation: Allowed resources****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Allowed resources parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.allowed.resources

**Required**

true

**Suppress Parameter Validation: Java Home Path Override****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Home Path Override parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.jdk.home

**Required**

true

**Suppress Parameter Validation: Kafka Alert Notification Topic****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Alert Notification Topic parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.kafka.alert.notifications.topic

**Required**

true

**Suppress Parameter Validation: Kafka Cache Refresh Interval ms****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kafka Cache Refresh Interval ms parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.kafka.cache.refresh.interval.ms

**Required**

true

**Suppress Parameter Validation: Kerberos Name Rules****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Name Rules parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.kerberos.name.rules

**Required**

true

**Suppress Parameter Validation: Kerberos Non Browser User Agents****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Non Browser User Agents parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.kerberos.non.browser.user.agents

**Required**

---

true

### Suppress Parameter Validation: Streams Messaging Manager Log Max Backup Index

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Log Max Backup Index parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.log.maxbackupindex

**Required**

true

### Suppress Parameter Validation: Streams Messaging Manager Log Max File Size

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Log Max File Size parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.log.maxfilesize

**Required**

true

### Suppress Parameter Validation: Streams Messaging Manager NotifierProviders Config Classes

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager NotifierProviders Config Classes parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.providerclasses

**Required**

true

### Suppress Parameter Validation: Save Notification Read Status Per User

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Save Notification Read Status Per User parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_streams.messaging.manager.save.notification.read.status.per.user`**Required**`true`**Suppress Parameter Validation: Schema Registry API url****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Schema Registry API url parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.messaging.manager.schema.registry.url`**Required**`true`**Suppress Parameter Validation: Servlet filter****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Servlet filter parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.messaging.manager.servlet.filter`**Required**`true`**Suppress Parameter Validation: Streams Messaging Manager Admin Port (SSL)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Admin Port (SSL) parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.messaging.manager.ssl.adminport`**Required**`true`**Suppress Parameter Validation: SSL Keystore Type****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL Keystore Type parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.ssl.keystoretype

**Required**

true

**Suppress Parameter Validation: SSL TrustStore Type****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL TrustStore Type parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.ssl.truststoretype

**Required**

true

**Suppress Parameter Validation: SSL ValidateCerts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL ValidateCerts parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.ssl.validatecerts

**Required**

true

**Suppress Parameter Validation: SSL validatePeers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL validatePeers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.ssl.validatepeers

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Configuration Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Configuration Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.working.directory

**Required**

true

**Suppress Parameter Validation: Streams Replication Manager Rest Host****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager Rest Host parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.host

**Required**

true

**Suppress Parameter Validation: Streams Replication Manager Rest Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager Rest Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.port

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager Rest Admin Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager Rest Admin Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_streams_messaging_manager_server_role_env_safety_valve`**Required**`true`**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_streams_messaging_manager_streams_messaging_manager_server_audit_health`**Required**`true`**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_streams_messaging_manager_streams_messaging_manager_server_file_descriptor`**Required**`true`**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_streams_messaging_manager_streams_messaging_manager_server_host_health`**Required**`true`

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_messaging\_manager\_streams\_messaging\_manager\_server\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_messaging\_manager\_streams\_messaging\_manager\_server\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_messaging\_manager\_streams\_messaging\_manager\_server\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_messaging\_manager\_streams\_messaging\_manager\_server\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_messaging\_manager\_streams\_messaging\_manager\_server\_unexpected\_exits

**Required**

true

**Streams Messaging Manager UI Server****Advanced****Streams Messaging Manager UI Server Advanced Configuration Snippet (Safety Valve) for config.json****Description**

For advanced use only. A string to be inserted into config.json for this role only.

**Related Name****Default Value****API Name**

config.json\_role\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name**

**Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

### Process Start Wait Timeout

**Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

### Streams Messaging Manager UI Server Environment Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

STREAMS\_MESSAGING\_MANAGER\_UI\_role\_env\_safety\_valve

**Required**

false

### Logs

#### Streams Messaging Manager UI Server Log Directory

**Description**

The log directory for log files of the role Streams Messaging Manager UI Server.

**Related Name**

log\_dir

**Default Value**

/var/log/streams-messaging-manager

**API Name**

log\_dir

**Required**

false

### Monitoring

#### Enable Health Alerts for this Role

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name**

**Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

`monitoring_metric_filter`

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

`process_swap_memory_rate_thresholds`

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

`common.process.swap_memory_rate_window`

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

### File Descriptor Monitoring Thresholds

**Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

streams\_messaging\_manager\_ui\_fd\_thresholds

**Required**

false

### Streams Messaging Manager UI Server Host Health Test

**Description**

When computing the overall Streams Messaging Manager UI Server health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

streams\_messaging\_manager\_ui\_host\_health\_enabled

**Required**

false

### Streams Messaging Manager UI Server Process Health Test

**Description**

Enables the health test that the Streams Messaging Manager UI Server's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

streams\_messaging\_manager\_ui\_scm\_health\_enabled

**Required**

false

### Unexpected Exits Thresholds

**Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected_exits_thresholds
<b>Required</b>
false

Unexpected Exits Monitoring Period

<b>Description</b>
The period to review when computing unexpected exits.
<b>Related Name</b>
<b>Default Value</b>
5 minute(s)
<b>API Name</b>
unexpected_exits_window
<b>Required</b>
false

Other

Graceful Shutdown Timeout

<b>Description</b>
The timeout in milliseconds to wait for graceful shutdown to complete.
<b>Related Name</b>
<b>Default Value</b>
30 second(s)
<b>API Name</b>
graceful_stop_timeout
<b>Required</b>
false

Streams Messaging Manager UI Port

<b>Description</b>
The port on which server accepts connections.
<b>Related Name</b>
streams.messaging.manager.ui.port
<b>Default Value</b>
9991
<b>API Name</b>
streams.messaging.manager.ui.port
<b>Required</b>
true

Performance

Maximum Process File Descriptors

<b>Description</b>
If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Streams Messaging Manager UI Server TLS/SSL Certificate Trust Store File****Description**

The location on disk of the trust store, in .pem format, used to confirm the authenticity of TLS/SSL servers that Streams Messaging Manager UI Server might connect to. This is used when Streams Messaging Manager UI Server is the client in a TLS/SSL connection. This trust store must contain

the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

streams.messaging.manager.ui.ssl.trust.store.location

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

**Enable TLS/SSL for Streams Messaging Manager UI Server****Description**

Encrypt communication between clients and Streams Messaging Manager UI Server using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

streams.messaging.manager.ui.ssl.enable

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**Streams Messaging Manager UI Server TLS/SSL Server CA Certificate (PEM Format)****Description**

The path to the TLS/SSL file containing the certificate of the certificate authority (CA) and any intermediate certificates used to sign the server certificate. Used when Streams Messaging Manager UI Server is acting as a TLS/SSL server. The certificate file must be in PEM format, and is usually created by concatenating all of the appropriate root and intermediate certificates.

**Related Name**

streams.messaging.manager.ui.ssl.ca.cert.location

**Default Value****API Name**

ssl\_server\_ca\_certificate\_location

**Required**

false

**Streams Messaging Manager UI Server TLS/SSL Server Certificate File (PEM Format)****Description**

The path to the TLS/SSL file containing the server certificate key used for TLS/SSL. Used when Streams Messaging Manager UI Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

**Related Name**

streams.messaging.manager.ui.ssl.cert.location

**Default Value**

**API Name**

ssl\_server\_certificate\_location

**Required**

false

**Streams Messaging Manager UI Server TLS/SSL Server Private Key File (PEM Format)****Description**

The path to the TLS/SSL file containing the private key used for TLS/SSL. Used when Streams Messaging Manager UI Server is acting as a TLS/SSL server. The certificate file must be in PEM format.

**Related Name**

streams.messaging.manager.ui.ssl.private.key.location

**Default Value****API Name**

ssl\_server\_privatekey\_location

**Required**

false

**Streams Messaging Manager UI Server TLS/SSL Private Key Password****Description**

The password for the private key in the Streams Messaging Manager UI Server TLS/SSL Server Certificate and Private Key file. If left blank, the private key is not protected by a password.

**Related Name****Default Value****API Name**

ssl\_server\_privatekey\_password

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager UI Server Advanced Configuration Snippet (Safety Valve) for config.json****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server Advanced Configuration Snippet (Safety Valve) for config.json parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_config.json\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager UI Server Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager UI Server TLS/SSL Certificate Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server TLS/SSL Certificate Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager UI Server TLS/SSL Server CA Certificate (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server TLS/SSL Server CA Certificate (PEM Format) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_ca\_certificate\_location

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager UI Server TLS/SSL Server Certificate File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server TLS/SSL Server Certificate File (PEM Format) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_certificate\_location

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager UI Server TLS/SSL Server Private Key File (PEM Format)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server TLS/SSL Server Private Key File (PEM Format) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_location

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager UI Server TLS/SSL Private Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server TLS/SSL Private Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_privatekey\_password

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager UI Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.messaging.manager.ui.port

**Required**

true

**Suppress Parameter Validation: Streams Messaging Manager UI Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Messaging Manager UI Server Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_streams_messaging_manager_ui_role_env_safety_valve`**Required**`true`**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_streams_messaging_manager_streams_messaging_manager_ui_audit_health`**Required**`true`**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_streams_messaging_manager_streams_messaging_manager_ui_file_descriptor`**Required**`true`**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**`false`**API Name**`role_health_suppression_streams_messaging_manager_streams_messaging_manager_ui_host_health`**Required**`true`

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_messaging\_manager\_streams\_messaging\_manager\_ui\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_messaging\_manager\_streams\_messaging\_manager\_ui\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_messaging\_manager\_streams\_messaging\_manager\_ui\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_messaging\_manager\_streams\_messaging\_manager\_ui\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_messaging\_manager\_streams\_messaging\_manager\_ui\_unexpected\_exits

**Required**

true

## Streams Replication Manager Properties in Cloudera Runtime 7.1.8

Role groups:

### Service-Wide

#### Advanced

#### System Group

**Description**

The group that this service's processes should run as.

**Related Name****Default Value**

streamsrepmgr

**API Name**

process\_groupname

**Required**

true

**System User****Description**

The user that this service's processes should run as.

**Related Name****Default Value**

streamsrepmgr

**API Name**

process\_username

**Required**

true

**Streams Replication Manager Service Advanced Configuration Snippet (Safety Valve) for srm.properties****Description**

For advanced use only, a string to be inserted into srm.properties. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

srm.properties\_service\_safety\_valve

**Required**

false

**Streams Replication Manager Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

**Related Name****Default Value****API Name**

STREAMS\_REPLICATION\_MANAGER\_service\_env\_safety\_valve

**Required**

false

**Monitoring****Enable Service Level Health Alerts****Description**

When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

`enable_alerts`**Required**`false`**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**`false`**API Name**`enable_config_alerts`**Required**`false`**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**`[]`**API Name**`service_triggers`**Required**`true`**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

**Healthy SRM Driver Monitoring Thresholds****Description**

The health test thresholds of the overall SRM Driver health. The check returns "Concerning" health if the percentage of "Healthy" SRM Drivers falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" SRM Drivers falls below the critical threshold.

**Related Name****Default Value**

Warning: 94.99 %, Critical: 49.99 %

**API Name**

STREAMS\_REPLICATION\_MANAGER\_STREAMS\_REPLICATION\_MANAGER\_DRIVER\_healthy\_thresholds

**Required**

false

**Healthy SRM Service Monitoring Thresholds****Description**

The health test thresholds of the overall SRM Service health. The check returns "Concerning" health if the percentage of "Healthy" SRM Services falls below the warning threshold. The check is unhealthy if the total percentage of "Healthy" and "Concerning" SRM Services falls below the critical threshold.

**Related Name****Default Value**

Warning: 94.99 %, Critical: 49.99 %

**API Name**

STREAMS\_REPLICATION\_MANAGER\_STREAMS\_REPLICATION\_MANAGER\_SERVICE\_healthy\_thresholds

**Required**

false

**Other****Streams Replication Manager Cluster alias****Description**

Specifies cluster aliases for the clusters SRM is connecting to. Cluster aliases are comma delimited. For example, 'primary, backup'.

**Related Name**

clusters
<b>Default Value</b>
<b>API Name</b>
clusters
<b>Required</b>
true

Emit Checkpoints Interval Seconds

<b>Description</b>
The interval at which SRM emits checkpoint information.
<b>Related Name</b>
emit.checkpoints.interval.seconds
<b>Default Value</b>
5 second(s)
<b>API Name</b>
emit.checkpoints.interval.seconds
<b>Required</b>
true

Kafka Service

<b>Description</b>
Name of the Kafka service that this Streams Replication Manager service instance depends on
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
kafka_service
<b>Required</b>
false

Enable Kerberos Authentication

<b>Description</b>
Enables Kerberos authentication for this Streams Replication Manager.
<b>Related Name</b>
kerberos.auth.enable
<b>Default Value</b>
false
<b>API Name</b>
kerberos.auth.enable
<b>Required</b>
false

Replication Factor for Metrics Topics

<b>Description</b>
Replication factor for all metrics topics.

**Related Name**

metrics.topic.replication.factor

**Default Value**

3

**API Name**

metrics.topic.replication.factor

**Required**

false

**Refresh Groups Interval Seconds****Description**

The interval at which SRM looks for new consumer groups on source clusters.

**Related Name**

refresh.groups.interval.seconds

**Default Value**

10 minute(s)

**API Name**

refresh.groups.interval.seconds

**Required**

true

**Refresh Topics Interval Seconds****Description**

The interval at which SRM looks for new topics on source clusters.

**Related Name**

refresh.topics.interval.seconds

**Default Value**

10 minute(s)

**API Name**

refresh.topics.interval.seconds

**Required**

true

**SRM\_HEAP\_OPTS****Description**

Memory heap params.

**Related Name**

SRM\_HEAP\_OPTS

**Default Value**

-Xmx8G -Xms1G

**API Name**

SRM\_HEAP\_OPTS

**Required**

false

**SRM\_JMX\_OPTS****Description**

Change parameters to setup jmxremote.

**Related Name**

SRM\_JMX\_OPTS

**Default Value**

-Dcom.sun.management.jmxremote -Dcom.sun.management.jmxremote.authenticate=false -  
Dcom.sun.management.jmxremote.ssl=false

**API Name**

SRM\_JMX\_OPTS

**Required**

false

**SRM\_JVM\_PERF\_OPTS****Description**

SRM JVM perf and gc opts.

**Related Name**

SRM\_JVM\_PERF\_OPTS

**Default Value**

-server -XX:+UseG1GC -XX:MaxGCPauseMillis=20 -XX:InitiatingHeapOccupancyPercent=35 -  
XX:+ExplicitGCInvokesConcurrent -Djava.awt.headless=true

**API Name**

SRM\_JVM\_PERF\_OPTS

**Required**

false

**Streams Replication Manager's Replication Configs****Description**

Specifies cluster bootstrap server information and cluster replication pairs. Bootstrap information for each alias defined in the clusters property has to be added as follows: 'primary.bootstrap.servers=mycluster1.example.com:9092,primary.bootstrap.servers=mycluster2.example.com:9092'.. Each cluster has to be added in a new line, if cluster has multiple nodes, add all nodes to the same line and delimit each with a comma. Cluster replication pairs can be defined as follows: 'primary->backup.enabled=true'.. Each unique replication pair has to be added in a new line.

**Related Name**

streams.replication.manager.config

**Default Value****API Name**

streams.replication.manager.config

**Required**

true

**Sync Topic Acls Enabled****Description**

Enables the monitoring of the source cluster for ACL changes.

**Related Name**

`sync.topic.acls.enabled`**Default Value**`false`**API Name**`sync.topic.acls.enabled`**Required**`true`**Sync Topic Acls Interval Seconds****Description**

The interval at which SRM checks the source cluster for ACL changes.

**Related Name**`sync.topic.acls.interval.seconds`**Default Value**`30 second(s)`**API Name**`sync.topic.acls.interval.seconds`**Required**`true`**Sync Topic Configs Interval Seconds****Description**

The interval at which SRM checks the source cluster for configuration changes.

**Related Name**`sync.topic.configs.interval.seconds`**Default Value**`10 minute(s)`**API Name**`sync.topic.configs.interval.seconds`**Required**`true`**Tasks Max****Description**

Maximum number of tasks for replication between clusters.

**Related Name**`tasks.max`**Default Value**`3`**API Name**`tasks.max`**Required**`true`

## Suppressions

### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

### Suppress Configuration Validator: SRM Driver Log Directory

**Description**

Whether to suppress configuration warnings produced by the SRM Driver Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

### Suppress Configuration Validator: SRM Driver XML Override

**Description**

Whether to suppress configuration warnings produced by the SRM Driver XML Override configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_logback\_safety\_valve

**Required**

true

### Suppress Configuration Validator: Heap Dump Directory

**Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Role Triggers****Description**

Whether to suppress configuration warnings produced by the Role Triggers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Configuration Validator: SRM Service Advanced Configuration Snippet (Safety Valve) for srm-service.yaml****Description**

Whether to suppress configuration warnings produced by the SRM Service Advanced Configuration Snippet (Safety Valve) for srm-service.yaml configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_srm-service.yaml\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: SRM Driver Advanced Configuration Snippet (Safety Valve) for srm.properties****Description**

Whether to suppress configuration warnings produced by the SRM Driver Advanced Configuration Snippet (Safety Valve) for srm.properties configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_srm.properties\_role\_safety\_valve

**Required**

true

**Suppress Configuration Validator: SRM Driver TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the SRM Driver TLS/SSL Trust Store File configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Configuration Validator: SRM Driver TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the SRM Driver TLS/SSL Trust Store Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Configuration Validator: SRM Driver TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the SRM Driver TLS/SSL Server Keystore Key Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_keypassword

**Required**

---

true

### Suppress Configuration Validator: SRM Driver TLS/SSL Server Keystore File Location

**Description**

Whether to suppress configuration warnings produced by the SRM Driver TLS/SSL Server Keystore File Location configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_location

**Required**

true

### Suppress Configuration Validator: SRM Driver TLS/SSL Server Keystore File Password

**Description**

Whether to suppress configuration warnings produced by the SRM Driver TLS/SSL Server Keystore File Password configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_password

**Required**

true

### Suppress Configuration Validator: Stacks Collection Directory

**Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

### Suppress Configuration Validator: Streams Replication Manager Driver Target Cluster

**Description**

Whether to suppress configuration warnings produced by the Streams Replication Manager Driver Target Cluster configuration validator.

**Related Name****Default Value**

false

**API Name**`role_config_suppression_streams.replication.manager.driver.target.cluster`**Required**`true`**Suppress Configuration Validator: Java Home Path Override****Description**

Whether to suppress configuration warnings produced by the Java Home Path Override configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.replication.manager.jdk.home`**Required**`true`**Suppress Configuration Validator: Log Format****Description**

Whether to suppress configuration warnings produced by the Log Format configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.replication.manager.log.format`**Required**`true`**Suppress Configuration Validator: SRM Service Port****Description**

Whether to suppress configuration warnings produced by the SRM Service Port configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.replication.manager.service.port`**Required**`true`**Suppress Configuration Validator: SRM Service Rpc Port****Description**

Whether to suppress configuration warnings produced by the SRM Service Rpc Port configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.service.rpcport

**Required**

true

**Suppress Configuration Validator: SRM Service Https Port****Description**

Whether to suppress configuration warnings produced by the SRM Service Https Port configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.service.ssl.port

**Required**

true

**Suppress Configuration Validator: Streams Replication Manager Service Target Cluster****Description**

Whether to suppress configuration warnings produced by the Streams Replication Manager Service Target Cluster configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.service.target.cluster

**Required**

true

**Suppress Configuration Validator: SSL Keystore Type****Description**

Whether to suppress configuration warnings produced by the SSL Keystore Type configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.ssl.keystoretype

**Required**

true

**Suppress Configuration Validator: SSL TrustStore Type****Description**

Whether to suppress configuration warnings produced by the SSL TrustStore Type configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.ssl.truststoretype

**Required**

true

**Suppress Configuration Validator: SSL ValidateCerts****Description**

Whether to suppress configuration warnings produced by the SSL ValidateCerts configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.ssl.validatecerts

**Required**

true

**Suppress Configuration Validator: SSL ValidatePeers****Description**

Whether to suppress configuration warnings produced by the SSL ValidatePeers configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.ssl.validatepeers

**Required**

true

**Suppress Configuration Validator: SRM Driver Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the SRM Driver Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams\_replication\_manager\_driver\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: SRM Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the SRM Service Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams\_replication\_manager\_service\_role\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Streams Replication Manager Cluster alias****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager Cluster alias parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_clusters

**Required**

true

**Suppress Parameter Validation: Replication Factor for Metrics Topics****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Replication Factor for Metrics Topics parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_metrics.topic.replication.factor

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Streams Replication Manager Service Advanced Configuration Snippet (Safety Valve) for srm.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager Service Advanced Configuration Snippet (Safety Valve) for srm.properties parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_srm.properties\_service\_safety\_valve

**Required**

true

**Suppress Parameter Validation: SRM\_HEAP\_OPTS****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM\_HEAP\_OPTS parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_srm\_heap\_opts

**Required**

true

**Suppress Parameter Validation: SRM\_JMX\_OPTS****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM\_JMX\_OPTS parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_srm\_jmx\_opts

**Required**

true

**Suppress Parameter Validation: SRM\_JVM\_PERF\_OPTS****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM\_JVM\_PERF\_OPTS parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_srm\_jvm\_perf\_opts

**Required**

true

**Suppress Parameter Validation: Streams Replication Manager's Replication Configs****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager's Replication Configs parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_streams.replication.manager.config

**Required**

true

**Suppress Configuration Validator: SRM Driver Count Validator****Description**

Whether to suppress configuration warnings produced by the SRM Driver Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_streams\_replication\_manager\_driver\_count\_validator

**Required**

true

**Suppress Configuration Validator: SRM Service Count Validator****Description**

Whether to suppress configuration warnings produced by the SRM Service Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_streams\_replication\_manager\_service\_count\_validator

**Required**

true

**Suppress Parameter Validation: Streams Replication Manager Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

	Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager Service Environment Advanced Configuration Snippet (Safety Valve) parameter.
Related Name	
Default Value	false
API Name	service_config_suppression_streams_replication_manager_service_env_safety_valve
Required	true

Suppress Health Test: SRM Driver Health

Description	Whether to suppress the results of the SRM Driver Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	service_health_suppression_streams_replication_manager_streams_replication_manager_driver_he althy
Required	true

Suppress Health Test: SRM Service Health

Description	Whether to suppress the results of the SRM Service Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.
Related Name	
Default Value	false
API Name	service_health_suppression_streams_replication_manager_streams_replication_manager_service_h ealthy
Required	true

SRM Driver

Advanced

SRM Driver XML Override

Description
-------------

For advanced use only, replace entire XML in the logback configuration file for SRM Driver, ignoring all logging configuration.

**Related Name**

logback\_safety\_valve

**Default Value****API Name**

logback\_safety\_valve

**Required**

false

### Enable auto refresh for metric configurations

**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

### Heap Dump Directory

**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

### Dump Heap When Out of Memory

**Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**SRM Driver Advanced Configuration Snippet (Safety Valve) for srm.properties****Description**

For advanced use only. A string to be inserted into srm.properties for this role only.

**Related Name****Default Value****API Name**

srm.properties\_role\_safety\_valve

**Required**

false

**SRM Driver Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

STREAMS\_REPLICATION\_MANAGER\_DRIVER\_role\_env\_safety\_valve

**Required**

false

Logs

SRM Driver Log Directory

Description	The log directory for log files of the role SRM Driver.
Related Name	log_dir
Default Value	/var/log/streams-replication-manager
API Name	log_dir
Required	false

SRM Driver Logging Threshold

Description	The minimum log level for SRM Driver logs
Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

SRM Driver Maximum Log File Backups

Description	The maximum number of rolled log files to keep for SRM Driver logs. Typically used by log4j or logback.
Related Name	
Default Value	10
API Name	max_log_backup_index
Required	false

SRM Driver Max Log Size

Description	The maximum size, in megabytes, per log file for SRM Driver logs. Typically used by log4j or logback.
Related Name	
Default Value	200 MiB

<b>API Name</b>	max_log_size
<b>Required</b>	false

Monitoring

Enable Health Alerts for this Role

<b>Description</b>	When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>	
<b>Default Value</b>	true
<b>API Name</b>	enable_alerts
<b>Required</b>	false

Enable Configuration Change Alerts

<b>Description</b>	When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	enable_config_alerts
<b>Required</b>	false

Log Directory Free Space Monitoring Absolute Thresholds

<b>Description</b>	The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
<b>Related Name</b>	
<b>Default Value</b>	Warning: 10 GiB, Critical: 5 GiB
<b>API Name</b>	log_directory_free_space_absolute_thresholds
<b>Required</b>	false

Log Directory Free Space Monitoring Percentage Thresholds

<b>Description</b>
--------------------

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**

monitoring\_metric\_filter

**Required**

false

**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

process\_swap\_memory\_rate\_thresholds

**Required**

false

**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

streams\_replication\_manager\_driver\_fd\_thresholds

**Required**

false

**SRM Driver Host Health Test****Description**

When computing the overall SRM Driver health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

streams\_replication\_manager\_driver\_host\_health\_enabled

**Required**

false

**SRM Driver Process Health Test****Description**

Enables the health test that the SRM Driver's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

streams\_replication\_manager\_driver\_scm\_health\_enabled

**Required**

false

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected\_exits\_window

**Required**

false

**Other****Streams Replication Manager Driver Target Cluster****Description**

Target cluster aliases for the srm-driver. When set, the srm-driver will collect data from all clusters, but will only write to the clusters specified here. Cluster aliases are comma separated.

**Related Name**

streams.replication.manager.driver.target.cluster

**Default Value****API Name**

streams.replication.manager.driver.target.cluster

**Required**

false

**Java Home Path Override****Description**

Java Home Path Override for Streams Replication Manager. If left empty, the java shipped with CM is used.

**Related Name**

streams.replication.manager.jdk.home

**Default Value****API Name**

streams.replication.manager.jdk.home

**Required**

false

**Performance****Maximum Process File Descriptors****Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

**Resource Management****Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value**

**API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****SRM Driver TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that SRM Driver might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

ssl.truststore.location

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

**SRM Driver TLS/SSL Trust Store Password****Description**

The password for the SRM Driver TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

ssl.truststore.password

**Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

**Enable TLS/SSL for SRM Driver****Description**

Encrypt communication between clients and SRM Driver using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

ssl\_enabled

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**SRM Driver TLS/SSL Server Keystore Key Password**

**Description**

The password that protects the private key contained in the keystore used when SRM Driver is acting as a TLS/SSL server.

**Related Name**

ssl.key.password

**Default Value**

**API Name**

ssl\_server\_keystore\_keypassword

**Required**

false

**SRM Driver TLS/SSL Server Keystore File Location**

**Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when SRM Driver is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

ssl.keystore.location

**Default Value**

**API Name**

ssl\_server\_keystore\_location

**Required**

false

**SRM Driver TLS/SSL Server Keystore File Password**

**Description**

The password for the SRM Driver keystore file.

**Related Name**

ssl.keystore.password

**Default Value**

**API Name**

ssl\_server\_keystore\_password

**Required**

false

**Stacks Collection**

**Stacks Collection Data Retention**

**Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

**Stacks Collection Directory****Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value****API Name**

stacks\_collection\_directory

**Required**

false

**Stacks Collection Enabled****Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

### Stacks Collection Method

**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

### Suppressions

#### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

#### Suppress Parameter Validation: SRM Driver Log Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

#### Suppress Parameter Validation: SRM Driver XML Override

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver XML Override parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_logback\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: SRM Driver Advanced Configuration Snippet (Safety Valve) for srm.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver Advanced Configuration Snippet (Safety Valve) for srm.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_srm.properties\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: SRM Driver TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: SRM Driver TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Parameter Validation: SRM Driver TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver TLS/SSL Server Keystore Key Password parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ssl_server_keystore_keypassword`**Required**`true`**Suppress Parameter Validation: SRM Driver TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_location`**Required**`true`**Suppress Parameter Validation: SRM Driver TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_password`**Required**`true`**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_stacks_collection_directory`**Required**`true`**Suppress Parameter Validation: Streams Replication Manager Driver Target Cluster****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager Driver Target Cluster parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.driver.target.cluster

**Required**

true

**Suppress Parameter Validation: Java Home Path Override****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Java Home Path Override parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.jdk.home

**Required**

true

**Suppress Parameter Validation: SRM Driver Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Driver Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams\_replication\_manager\_driver\_role\_env\_safety\_valve

**Required**

true

**Suppress Health Test: Audit Pipeline Test****Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_driver\_audit\_health

**Required**

true

**Suppress Health Test: File Descriptors****Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_driver\_file\_descriptor

**Required**

true

**Suppress Health Test: Host Health****Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_driver\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_driver\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_driver\_streams\_replication\_manager\_driver\_streams\_cm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_driver\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_driver\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_driver\_unexpected\_exits

**Required**

true

## SRM Service

### Advanced

#### SRM Service XML Override

**Description**

For advanced use only, replace entire XML in the logback configuration file for SRM Service, ignoring all logging configuration.

**Related Name**

logback\_safety\_valve

**Default Value****API Name**

logback\_safety\_valve

**Required**

false

#### Enable auto refresh for metric configurations

**Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

#### Heap Dump Directory

**Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name****Default Value**

true

**API Name**

process\_should\_monitor

**Required**

true

**Process Start Retry Attempts****Description**

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

**Related Name****Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**SRM Service Advanced Configuration Snippet (Safety Valve) for srm-service.yaml****Description**

For advanced use only. A string to be inserted into srm-service.yaml for this role only.

**Related Name****Default Value****API Name**

srm-service.yaml\_role\_safety\_valve

**Required**

false

**SRM Service Advanced Configuration Snippet (Safety Valve) for srm.properties****Description**

For advanced use only. A string to be inserted into srm.properties for this role only.

**Related Name****Default Value****API Name**

srm.properties\_role\_safety\_valve

**Required**

false

**SRM Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

STREAMS\_REPLICATION\_MANAGER\_SERVICE\_role\_env\_safety\_valve

**Required**

false

**Logs****SRM Service Log Directory****Description**

The log directory for log files of the role SRM Service.

**Related Name**

log\_dir

**Default Value**

/var/log/streams-replication-manager

**API Name**

log\_dir

**Required**

false

**SRM Service Logging Threshold****Description**

The minimum log level for SRM Service logs

**Related Name****Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

**SRM Service Maximum Log File Backups****Description**

The maximum number of rolled log files to keep for SRM Service logs. Typically used by log4j or logback.

**Related Name****Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

**SRM Service Max Log Size****Description**

The maximum size, in megabytes, per log file for SRM Service logs. Typically used by log4j or logback.

**Related Name****Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

**Monitoring****Enable Health Alerts for this Role****Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting eventserver\_health\_events\_alert\_threshold

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Log Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

log\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Log Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

log\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**`monitoring_metric_filter`**Required**`false`**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**`Warning: Never, Critical: Never`**API Name**`process_swap_memory_rate_thresholds`**Required**`false`**Swap Memory Usage Rate Window****Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**`common.process.swap_memory_rate_window`**Default Value**`5 minute(s)`**API Name**`process_swap_memory_rate_window`**Required**`false`**Process Swap Memory Thresholds****Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

**Role Triggers****Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part of the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- **triggerName** (mandatory) - The name of the trigger. This value must be unique for the specific role.
- **triggerExpression** (mandatory) - A tsquery expression representing the trigger.
- **streamThreshold** (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- **enabled** (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- **expressionEditorConfig** (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

role\_triggers

**Required**

true

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

streams\_replication\_manager\_service\_fd\_thresholds

**Required**

false

**SRM Service Host Health Test****Description**

When computing the overall SRM Service health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

streams\_replication\_manager\_service\_host\_health\_enabled

**Required**

false

**SRM Service Process Health Test****Description**

Enables the health test that the SRM Service's process state is consistent with the role configuration

**Related Name****Default Value**

true

**API Name**

streams\_replication\_manager\_service\_scm\_health\_enabled

**Required**

false

**Unexpected Exits Thresholds****Description**

The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected\_exits\_window configuration for the role.

**Related Name****Default Value**

Warning: Never, Critical: Any

**API Name**

unexpected\_exits\_thresholds

**Required**

false

**Unexpected Exits Monitoring Period****Description**

The period to review when computing unexpected exits.

**Related Name****Default Value**

5 minute(s)

**API Name**

unexpected_exits_window
<b>Required</b>
false

Other

Log Format

<b>Description</b>
Format of the messages output by logger.
<b>Related Name</b>
streams.replication.manager.log.format
<b>Default Value</b>
%dISO8601 %p %c: %m%n%rEx
<b>API Name</b>
streams.replication.manager.log.format
<b>Required</b>
false

SRM Service Port

<b>Description</b>
SRM Service port.
<b>Related Name</b>
streams.replication.manager.service.port
<b>Default Value</b>
6670
<b>API Name</b>
streams.replication.manager.service.port
<b>Required</b>
true

SRM Service Rpc Port

<b>Description</b>
SRM Service rpc port.
<b>Related Name</b>
streams.replication.manager.service.rpcPort
<b>Default Value</b>
6670
<b>API Name</b>
streams.replication.manager.service.rpcPort
<b>Required</b>
true

SRM Service Https Port

<b>Description</b>
SRM Service https port.

**Related Name**`streams.replication.manager.service.ssl.port`**Default Value**`6671`**API Name**`streams.replication.manager.service.ssl.port`**Required**`true`**Streams Replication Manager Service Target Cluster****Description**

Target cluster from which the SRM Service collects data.

**Related Name**`streams.replication.manager.service.target.cluster`**Default Value****API Name**`streams.replication.manager.service.target.cluster`**Required**`true`**SSL Keystore Type****Description**

The keystore type. Required if SSL is enabled for the SRM Service. For example, PKCS12 or JKS.

**Related Name**`streams.replication.manager.ssl.keyStoreType`**Default Value**`JKS`**API Name**`streams.replication.manager.ssl.keyStoreType`**Required**`false`**SSL TrustStore Type****Description**

The truststore type. Required if SSL is enabled for the SRM Service. For example, PKCS12 or JKS.

**Related Name**`streams.replication.manager.ssl.trustStoreType`**Default Value**`JKS`**API Name**`streams.replication.manager.ssl.trustStoreType`**Required**`false`

### SSL ValidateCerts

**Description**

Whether or not to validate TLS certificates before starting. If enabled, SRM will not start with expired or otherwise invalid certificates.

**Related Name**

streams.replication.manager.ssl.validateCerts

**Default Value**

false

**API Name**

streams.replication.manager.ssl.validateCerts

**Required**

false

### SSL ValidatePeers

**Description**

Whether or not to validate TLS peer certificates.

**Related Name**

streams.replication.manager.ssl.validatePeers

**Default Value**

false

**API Name**

streams.replication.manager.ssl.validatePeers

**Required**

false

### Performance

#### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

### Resource Management

#### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

`cpu.shares`**Default Value**`1024`**API Name**`rm_cpu_shares`**Required**`true`**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the `cgexec` command: `resource1,resource2:path1` or `resource3:path2` For example: `'cpu,memory:my/path blkio:my2/path2'`  
\*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**`custom.cgroups`**Default Value****API Name**`rm_custom_resources`**Required**`false`**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**`blkio.weight`**Default Value**`500`**API Name**`rm_io_weight`**Required**`true`**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**`memory.limit_in_bytes`

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****SRM Service TLS/SSL Trust Store File****Description**

The location on disk of the trust store, in .jks format, used to confirm the authenticity of TLS/SSL servers that SRM Service might connect to. This trust store must contain the certificate(s) used to sign the service(s) connected to. If this parameter is not provided, the default list of well-known certificate authorities is used instead.

**Related Name**

ssl.truststore.location

**Default Value****API Name**

ssl\_client\_truststore\_location

**Required**

false

**SRM Service TLS/SSL Trust Store Password****Description**

The password for the SRM Service TLS/SSL Trust Store File. This password is not required to access the trust store; this field can be left blank. This password provides optional integrity checking of the file. The contents of trust stores are certificates, and certificates are public information.

**Related Name**

ssl.truststore.password

**Default Value****API Name**

ssl\_client\_truststore\_password

**Required**

false

**Enable TLS/SSL for SRM Service****Description**

Encrypt communication between clients and SRM Service using Transport Layer Security (TLS) (formerly known as Secure Socket Layer (SSL)).

**Related Name**

ssl\_enabled

**Default Value**

false

**API Name**

ssl\_enabled

**Required**

false

**SRM Service TLS/SSL Server Keystore Key Password****Description**

The password that protects the private key contained in the keystore used when SRM Service is acting as a TLS/SSL server.

**Related Name**

ssl.key.password

**Default Value****API Name**

ssl\_server\_keystore\_keypassword

**Required**

false

**SRM Service TLS/SSL Server Keystore File Location****Description**

The path to the TLS/SSL keystore file containing the server certificate and private key used for TLS/SSL. Used when SRM Service is acting as a TLS/SSL server. The keystore must be in the format specified in Administration > Settings > Java Keystore Type.

**Related Name**

ssl.keystore.location

**Default Value****API Name**

ssl\_server\_keystore\_location

**Required**

false

### SRM Service TLS/SSL Server Keystore File Password

**Description**

The password for the SRM Service keystore file.

**Related Name**

ssl.keystore.password

**Default Value****API Name**

ssl\_server\_keystore\_password

**Required**

false

### Stacks Collection

#### Stacks Collection Data Retention

**Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

#### Stacks Collection Directory

**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value****API Name**

stacks\_collection\_directory

**Required**

false

#### Stacks Collection Enabled

**Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

false

**API Name**

stacks\_collection\_enabled

**Required**

true

**Stacks Collection Frequency****Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

**Stacks Collection Method****Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: SRM Service Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log\_dir

**Required**

true

**Suppress Parameter Validation: SRM Service XML Override****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service XML Override parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_logback\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Role Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Role Triggers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_role\_triggers

**Required**

true

**Suppress Parameter Validation: SRM Service Advanced Configuration Snippet (Safety Valve) for srm-service.yaml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service Advanced Configuration Snippet (Safety Valve) for srm-service.yaml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_srm-service.yaml\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: SRM Service Advanced Configuration Snippet (Safety Valve) for srm.properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service Advanced Configuration Snippet (Safety Valve) for srm.properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_srm.properties\_role\_safety\_valve

**Required**

true

**Suppress Parameter Validation: SRM Service TLS/SSL Trust Store File****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service TLS/SSL Trust Store File parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_location

**Required**

true

**Suppress Parameter Validation: SRM Service TLS/SSL Trust Store Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service TLS/SSL Trust Store Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_client\_truststore\_password

**Required**

true

**Suppress Parameter Validation: SRM Service TLS/SSL Server Keystore Key Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service TLS/SSL Server Keystore Key Password parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_ssl\_server\_keystore\_keypassword

**Required**

true

**Suppress Parameter Validation: SRM Service TLS/SSL Server Keystore File Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service TLS/SSL Server Keystore File Location parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_ssl_server_keystore_location`**Required**`true`**Suppress Parameter Validation: SRM Service TLS/SSL Server Keystore File Password****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service TLS/SSL Server Keystore File Password parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_ssl_server_keystore_password`**Required**`true`**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_stacks_collection_directory`**Required**`true`**Suppress Parameter Validation: Log Format****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Log Format parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_streams.replication.manager.log.format`**Required**`true`**Suppress Parameter Validation: SRM Service Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service Port parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.service.port

**Required**

true

**Suppress Parameter Validation: SRM Service Rpc Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service Rpc Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.service.rpcport

**Required**

true

**Suppress Parameter Validation: SRM Service Https Port****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service Https Port parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.service.ssl.port

**Required**

true

**Suppress Parameter Validation: Streams Replication Manager Service Target Cluster****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Streams Replication Manager Service Target Cluster parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.service.target.cluster

**Required**

true

**Suppress Parameter Validation: SSL Keystore Type****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL Keystore Type parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.ssl.keystoretype

**Required**

true

**Suppress Parameter Validation: SSL TrustStore Type****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL TrustStore Type parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.ssl.truststoretype

**Required**

true

**Suppress Parameter Validation: SSL ValidateCerts****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL ValidateCerts parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.ssl.validatecerts

**Required**

true

**Suppress Parameter Validation: SSL ValidatePeers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SSL ValidatePeers parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams.replication.manager.ssl.validatepeers

**Required**

---

true
------

### Suppress Parameter Validation: SRM Service Environment Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the SRM Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_streams\_replication\_manager\_service\_role\_env\_safety\_valve

**Required**

true

### Suppress Health Test: Audit Pipeline Test

**Description**

Whether to suppress the results of the Audit Pipeline Test health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_service\_audit\_health

**Required**

true

### Suppress Health Test: File Descriptors

**Description**

Whether to suppress the results of the File Descriptors health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_service\_file\_descriptor

**Required**

true

### Suppress Health Test: Host Health

**Description**

Whether to suppress the results of the Host Health health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_service\_host\_health

**Required**

true

**Suppress Health Test: Log Directory Free Space****Description**

Whether to suppress the results of the Log Directory Free Space health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_service\_log\_directory\_free\_space

**Required**

true

**Suppress Health Test: Process Status****Description**

Whether to suppress the results of the Process Status health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_service\_scm\_health

**Required**

true

**Suppress Health Test: Swap Memory Usage****Description**

Whether to suppress the results of the Swap Memory Usage health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name**

**Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_service\_swap\_memory\_usage

**Required**

true

**Suppress Health Test: Swap Memory Usage Rate Beta****Description**

Whether to suppress the results of the Swap Memory Usage Rate Beta health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_service\_swap\_memory\_usage\_rate

**Required**

true

**Suppress Health Test: Unexpected Exits****Description**

Whether to suppress the results of the Unexpected Exits health test. The results of suppressed health tests are ignored when computing the overall health of the associated host, role or service, so suppressed health tests will not generate alerts.

**Related Name****Default Value**

false

**API Name**

role\_health\_suppression\_streams\_replication\_manager\_streams\_replication\_manager\_service\_unexpected\_exits

**Required**

true

**Stub DFS Properties in Cloudera Runtime 7.1.8**

Stub DFS is a service for storage-less clusters. Stub DFS should be used in clusters where services have a mandatory DFS dependency. Setting a dependency on Stub DFS allows those services to access core configuration files, including but not limited to core-site.xml.

Add the Stub DFS service to each cluster managed by Cloudera Manager that contains the services.

In Stub DFS, there is Storage Operations as a role type; assigning this role to a host means that whenever a "hdfs" equivalent command needs to be run (for example, Create Directory), it will be run on such a host. Ensure that you assign at least one Storage Operations role to a host of your preference.

Role groups:

## Gateway

### Advanced

#### Deploy Directory

**Description**

The directory where the client configs will be deployed

**Related Name****Default Value**

/etc/hadoop

**API Name**

client\_config\_root\_dir

**Required**

true

#### Core Configuration Client Environment Advanced Configuration Snippet (Safety Valve) for hadoop-env.sh

**Description**

For advanced use only, key-value pairs (one on each line) to be inserted into the client configuration for hadoop-env.sh

**Related Name****Default Value****API Name**

core\_client\_env\_safety\_valve

**Required**

false

#### Client Java Configuration Options

**Description**

These are Java command-line arguments. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here.

**Related Name****Default Value**

-Djava.net.preferIPv4Stack=true

**API Name**

core\_client\_java\_opts

**Required**

false

#### Gateway Logging Advanced Configuration Snippet (Safety Valve)

**Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value**

<b>API Name</b>	log4j_safety_valve
<b>Required</b>	false

Logs

Gateway Logging Threshold

<b>Description</b>	The minimum log level for Gateway logs
<b>Related Name</b>	
<b>Default Value</b>	INFO
<b>API Name</b>	log_threshold
<b>Required</b>	false

Monitoring

Enable Configuration Change Alerts

<b>Description</b>	When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	enable_config_alerts
<b>Required</b>	false

Other

Alternatives Priority

<b>Description</b>	The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.
<b>Related Name</b>	
<b>Default Value</b>	90
<b>API Name</b>	client_config_priority
<b>Required</b>	true

## Resource Management

### Client Java Heap Size in Bytes

**Description**

Maximum size in bytes for the Java process heap memory. Passed to Java -Xmx.

**Related Name****Default Value**

256 MiB

**API Name**

core\_client\_java\_heapsize

**Required**

false

## Suppressions

### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

### Suppress Parameter Validation: Deploy Directory

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

### Suppress Parameter Validation: Core Configuration Client Environment Advanced Configuration Snippet (Safety Valve) for `hadoop-env.sh`

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Core Configuration Client Environment Advanced Configuration Snippet (Safety Valve) for `hadoop-env.sh` parameter.

**Related Name**

<b>Default Value</b>	false
<b>API Name</b>	role_config_suppression_core_client_env_safety_valve
<b>Required</b>	true

**Suppress Parameter Validation: Client Java Configuration Options**

<b>Description</b>	Whether to suppress configuration warnings produced by the built-in parameter validation for the Client Java Configuration Options parameter.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	role_config_suppression_core_client_java_opts
<b>Required</b>	true

**Suppress Parameter Validation: Gateway Logging Advanced Configuration Snippet (Safety Valve)**

<b>Description</b>	Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	role_config_suppression_log4j_safety_valve
<b>Required</b>	true

**Service-Wide**

**Advanced**

**System Group**

<b>Description</b>	The group that this service's processes should run as (except the HttpFS server, which has its own group)
<b>Related Name</b>	
<b>Default Value</b>	hdfs
<b>API Name</b>	process_groupname
<b>Required</b>	

true

System User

Description

The user that this service's processes should run as.

Related Name

Default Value

hdfs

API Name

process\_username

Required

true

Stub DFS Service Environment Advanced Configuration Snippet (Safety Valve)

Description

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.

Related Name

Default Value

API Name

STUB\_DFS\_service\_env\_safety\_valve

Required

false

Monitoring

Enable Configuration Change Alerts

Description

When set, Cloudera Manager will send alerts when this entity's configuration changes.

Related Name

Default Value

false

API Name

enable\_config\_alerts

Required

false

Other

Core Settings Connector

Description

Dependency on the Core Settings service for the cluster.

Related Name

Default Value

API Name

core_connector
<b>Required</b>
true

Security

Kerberos Principal

<b>Description</b>
Kerberos principal short name used by all roles of this service.
<b>Related Name</b>
<b>Default Value</b>
hdfs
<b>API Name</b>
kerberos_princ_name
<b>Required</b>
true

Suppressions

Suppress Configuration Validator: CDH Version Validator

<b>Description</b>
Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_cdh_version_validator
<b>Required</b>
true

Suppress Configuration Validator: Deploy Directory

<b>Description</b>
Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.
<b>Related Name</b>
<b>Default Value</b>
false
<b>API Name</b>
role_config_suppression_client_config_root_dir
<b>Required</b>
true

Suppress Configuration Validator: Core Configuration Client Environment Advanced Configuration Snippet (Safety Valve) for hadoop-env.sh

<b>Description</b>
--------------------

Whether to suppress configuration warnings produced by the Core Configuration Client Environment Advanced Configuration Snippet (Safety Valve) for hadoop-env.sh configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_core\_client\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Client Java Configuration Options****Description**

Whether to suppress configuration warnings produced by the Client Java Configuration Options configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_core\_client\_java\_opts

**Required**

true

**Suppress Configuration Validator: Gateway Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Gateway Logging Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the Heap Dump Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Configuration Validator: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the Custom Control Group Resources (overrides Cgroup settings) configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Configuration Validator: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the Stacks Collection Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Configuration Validator: Storage Operations Log Directory****Description**

Whether to suppress configuration warnings produced by the Storage Operations Log Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_storageoperations\_log\_dir

**Required**

true

**Suppress Configuration Validator: Storage Operations Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the Storage Operations Environment Advanced Configuration Snippet (Safety Valve) configuration validator.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_storageoperations\_role\_env\_safety\_valve

**Required**

true

**Suppress Configuration Validator: Gateway Count Validator****Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_gateway\_count\_validator

**Required**

true

**Suppress Parameter Validation: Kerberos Principal****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Kerberos Principal parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_kerberos\_princ\_name

**Required**

true

**Suppress Configuration Validator: Stub DFS only DFS Validator****Description**

Whether to suppress configuration warnings produced by the Stub DFS only DFS Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_only\_dfs\_in\_cluster\_validator

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Configuration Validator: Storage Operations Count Validator****Description**

Whether to suppress configuration warnings produced by the Storage Operations Count Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_storageoperations\_count\_validator

**Required**

true

**Suppress Parameter Validation: Stub DFS Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stub DFS Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_stub\_dfs\_service\_env\_safety\_valve

<b>Required</b>
true

Storage Operations

Advanced

Deploy Directory

<b>Description</b>
The directory where the client configs will be deployed
<b>Related Name</b>
<b>Default Value</b>
/etc/hadoop
<b>API Name</b>
client_config_root_dir
<b>Required</b>
true

Core Configuration Client Environment Advanced Configuration Snippet (Safety Valve) for hadoop-env.sh

<b>Description</b>
For advanced use only, key-value pairs (one on each line) to be inserted into the client configuration for hadoop-env.sh
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
core_client_env_safety_valve
<b>Required</b>
false

Client Java Configuration Options

<b>Description</b>
These are Java command-line arguments. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here.
<b>Related Name</b>
<b>Default Value</b>
-Djava.net.preferIPv4Stack=true
<b>API Name</b>
core_client_java_opts
<b>Required</b>
false

Storage Operations Logging Advanced Configuration Snippet (Safety Valve)

<b>Description</b>
For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name****Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

---

true

### Kill When Out of Memory

#### Description

When set, a SIGKILL signal is sent to the role process when `java.lang.OutOfMemoryError` is thrown.

#### Related Name

#### Default Value

true

#### API Name

oom\_sigkill\_enabled

#### Required

true

### Automatically Restart Process

#### Description

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

#### Related Name

#### Default Value

false

#### API Name

process\_auto\_restart

#### Required

true

### Enable Metric Collection

#### Description

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

#### Related Name

#### Default Value

true

#### API Name

process\_should\_monitor

#### Required

true

### Process Start Retry Attempts

#### Description

Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.

#### Related Name

**Default Value**

3

**API Name**

process\_start\_retries

**Required**

false

**Process Start Wait Timeout****Description**

The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.

**Related Name****Default Value**

20

**API Name**

process\_start\_secs

**Required**

false

**Storage Operations Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

STORAGEOPERATIONS\_role\_env\_safety\_valve

**Required**

false

**Logs****Storage Operations Logging Threshold****Description**

The minimum log level for Storage Operations logs

**Related Name****Default Value**

INFO

**API Name**

log\_threshold

**Required**

false

### Storage Operations Maximum Log File Backups

**Description**

The maximum number of rolled log files to keep for Storage Operations logs. Typically used by log4j or logback.

**Related Name****Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

### Storage Operations Max Log Size

**Description**

The maximum size, in megabytes, per log file for Storage Operations logs. Typically used by log4j or logback.

**Related Name****Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

### Storage Operations Log Directory

**Description**

Directory where Storage Operations will place its log files.

**Related Name**

hadoop.log.dir

**Default Value**

/var/log/

**API Name**

storageoperations\_log\_dir

**Required**

false

### Monitoring

#### Enable Configuration Change Alerts

**Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

`enable_config_alerts`**Required**`false`**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**`monitoring_metric_filter`**Required**`false`**Other****Alternatives Priority****Description**

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

**Related Name****Default Value**`90`**API Name**`client_config_priority`**Required**`true`

## Performance

### Maximum Process File Descriptors

**Description**

If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.

**Related Name****Default Value****API Name**

rlimit\_fds

**Required**

false

## Resource Management

### Client Java Heap Size in Bytes

**Description**

Maximum size in bytes for the Java process heap memory. Passed to Java -Xmx.

**Related Name****Default Value**

256 MiB

**API Name**

core\_client\_java\_heapsize

**Required**

false

### Cgroup CPU Shares

**Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

### Custom Control Group Resources (overrides Cgroup settings)

**Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command:

resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2'  
\*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not

managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

### Stacks Collection

#### Stacks Collection Data Retention

**Description**

The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.

**Related Name**

stacks\_collection\_data\_retention

**Default Value**

100 MiB

**API Name**

stacks\_collection\_data\_retention

**Required**

false

#### Stacks Collection Directory

**Description**

The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.

**Related Name**

stacks\_collection\_directory

**Default Value****API Name**

stacks\_collection\_directory

**Required**

false

#### Stacks Collection Enabled

**Description**

Whether or not periodic stacks collection is enabled.

**Related Name**

stacks\_collection\_enabled

**Default Value**

	false
API Name	
	stacks_collection_enabled
Required	
	true

Stacks Collection Frequency

Description	The frequency with which stacks are collected.
Related Name	
	stacks_collection_frequency
Default Value	
	5.0 second(s)
API Name	
	stacks_collection_frequency
Required	
	false

Stacks Collection Method

Description	The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.
Related Name	
	stacks_collection_method
Default Value	
	jstack
API Name	
	stacks_collection_method
Required	
	false

Suppressions

Suppress Configuration Validator: CDH Version Validator

Description	Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_cdh_version_validator
Required	

true

**Suppress Parameter Validation: Deploy Directory**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

**Suppress Parameter Validation: Core Configuration Client Environment Advanced Configuration Snippet (Safety Valve) for hadoop-env.sh**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Core Configuration Client Environment Advanced Configuration Snippet (Safety Valve) for hadoop-env.sh parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_core\_client\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Client Java Configuration Options**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Client Java Configuration Options parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_core\_client\_java\_opts

**Required**

true

**Suppress Parameter Validation: Storage Operations Logging Advanced Configuration Snippet (Safety Valve)**

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Operations Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Heap Dump Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Heap Dump Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_oom\_heap\_dump\_dir

**Required**

true

**Suppress Parameter Validation: Custom Control Group Resources (overrides Cgroup settings)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Custom Control Group Resources (overrides Cgroup settings) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_rm\_custom\_resources

**Required**

true

**Suppress Parameter Validation: Stacks Collection Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Stacks Collection Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_stacks\_collection\_directory

**Required**

true

**Suppress Parameter Validation: Storage Operations Log Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Operations Log Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_storageoperations\_log\_dir

**Required**

true

**Suppress Parameter Validation: Storage Operations Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Storage Operations Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_storageoperations\_role\_env\_safety\_valve

**Required**

true

**Tez Properties in Cloudera Runtime 7.1.8**

Role groups:

**Gateway****Advanced****Deploy Directory****Description**

The directory where the client configs will be deployed

**Related Name****Default Value**

/etc/tez

**API Name**

client\_config\_root\_dir

**Required**

true

**Tez Client Advanced Configuration Snippet (Safety Valve) for tez-conf/tez-site.xml****Description**

For advanced use only, a string to be inserted into the client configuration for tez-conf/tez-site.xml.

**Related Name****Default Value****API Name**

tez-conf/tez-site.xml\_client\_config\_safety\_valve

**Required**

false

**Monitoring****Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Other****Alternatives Priority****Description**

The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.

**Related Name****Default Value**

50

**API Name**

client\_config\_priority

**Required**

true

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

	false
API Name	
	role_config_suppression_cdh_version_validator
Required	
	true

Suppress Parameter Validation: Deploy Directory

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_client_config_root_dir
Required	
	true

Suppress Parameter Validation: Tez Client Advanced Configuration Snippet (Safety Valve) for tez-conf/tez-site.xml

Description	Whether to suppress configuration warnings produced by the built-in parameter validation for the Tez Client Advanced Configuration Snippet (Safety Valve) for tez-conf/tez-site.xml parameter.
Related Name	
Default Value	
	false
API Name	
	role_config_suppression_tez-conf/tez-site.xml_client_config_safety_valve
Required	
	true

Service-Wide

Advanced

System Group

Description	The group that this service's processes should run as.
Related Name	
Default Value	
	hadoop
API Name	
	process_groupname
Required	
	true

**System User**

<b>Description</b>	The user that this service's processes should run as.
<b>Related Name</b>	
<b>Default Value</b>	tez
<b>API Name</b>	process_username
<b>Required</b>	true

**Tez Service Environment Advanced Configuration Snippet (Safety Valve)**

<b>Description</b>	For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment. Applies to configurations of all roles in this service except client configuration.
<b>Related Name</b>	
<b>Default Value</b>	
<b>API Name</b>	TEZ_service_env_safety_valve
<b>Required</b>	false

**Monitoring**

**Enable Service Level Health Alerts**

<b>Description</b>	When set, Cloudera Manager will send alerts when the health of this service reaches the threshold specified by the EventServer setting eventserver_health_events_alert_threshold
<b>Related Name</b>	
<b>Default Value</b>	true
<b>API Name</b>	enable_alerts
<b>Required</b>	false

**Enable Configuration Change Alerts**

<b>Description</b>	When set, Cloudera Manager will send alerts when this entity's configuration changes.
<b>Related Name</b>	
<b>Default Value</b>	false
<b>API Name</b>	enable_config_alerts

**Required**

false

**Service Triggers****Description**

The configured triggers for this service. This is a JSON-formatted list of triggers. These triggers are evaluated as part of the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific service.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger fires if there are more than 10 DataNodes with more than 500 file descriptors opened: `[{"triggerName": "sample-trigger", "triggerExpression": "I F (SELECT fd_open WHERE roleType = DataNode and last(fd_open) > 500) DO health:bad", "streamThreshold": 10, "enabled": "true"}]` See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

[]

**API Name**

service\_triggers

**Required**

true

**Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a list of derived configuration properties that will be used by the Service Monitor instead of the default ones.

**Related Name****Default Value****API Name**

smon\_derived\_configs\_safety\_valve

**Required**

false

**Other****Maximum Heartbeat Interval****Description**

The maximum heartbeat interval between the Application Master and RM in milliseconds.

**Related Name**

tez.am.am-rm.heartbeat.interval-ms.max

**Default Value**

250 millisecond(s)

**API Name**

tez.am.am-rm.heartbeat.interval-ms.max

**Required**

true

**Maximum Timeout to Hold Idle Containers****Description**

The maximum amount of time to hold on to a container if no task can be assigned to it immediately. Only active when reuse is enabled.

**Related Name**

tez.am.container.idle.release-timeout-max.millis

**Default Value**

20 second(s)

**API Name**

tez.am.container.idle.release-timeout-max.millis

**Required**

true

**Minimum Timeout to Hold Idle Containers****Description**

The minimum amount of time to hold on to a container that is idle. Only active when reuse is enabled.

**Related Name**

tez.am.container.idle.release-timeout-min.millis

**Default Value**

10 second(s)

**API Name**

tez.am.container.idle.release-timeout-min.millis

**Required**

true

**Enable Container Reuse****Description**

Configuration to specify whether container should be reused.

**Related Name**

tez.am.container.reuse.enabled

**Default Value**

true

**API Name**

tez.am.container.reuse.enabled

**Required**

---

true

### Timeout Before Container Reuse

#### Description

The amount of time to wait before assigning a container to the next level of locality. NODE > RACK > NON\_LOCAL

#### Related Name

tez.am.container.reuse.locality.delay-allocation-millis

#### Default Value

250 millisecond(s)

#### API Name

tez.am.container.reuse.locality.delay-allocation-millis

#### Required

true

### Enable Container Reuse for Non-Local Tasks

#### Description

Whether to reuse containers for non-local tasks. Active only if reuse is enabled.

#### Related Name

tez.am.container.reuse.non-local-fallback.enabled

#### Default Value

false

#### API Name

tez.am.container.reuse.non-local-fallback.enabled

#### Required

true

### Enable Container Reuse for Rack Local Tasks

#### Description

Whether to reuse containers for rack local tasks. Active only if reuse is enabled.

#### Related Name

tez.am.container.reuse.rack-fallback.enabled

#### Default Value

true

#### API Name

tez.am.container.reuse.rack-fallback.enabled

#### Required

true

### Tez Application Master Default Command Line Options

#### Description

Cluster default Java options for the Tez Application Master process. These will be prepended to the properties specified via tez.am.launch.cmd-opts.

#### Related Name

tez.am.launch.cluster-default.cmd-opts

**Default Value**

-server -Djava.net.preferIPv4Stack=true

**API Name**

tez.am.launch.cluster-default.cmd-opts

**Required**

true

**Tez Application Master Command Line Options****Description**

Java options for the Tez Application Master process. The Xmx value is derived based on tez.am.resource.memory.mb and is 80% of the value by default. Used only if the value is not specified explicitly by the DAG definition.

**Related Name**

tez.am.launch.cmd-opts

**Default Value**

-XX:+PrintGCDetails -verbose:gc -XX:+UseNUMA -XX:+UseG1GC -XX:+ResizeTLAB -XX:+HeapDumpOnOutOfMemoryError -XX:HeapDumpPath=/tmp

**API Name**

tez.am.launch.cmd-opts

**Required**

true

**Tez Application Master Environment Settings****Description**

Additional execution environment entries for tez. This is not an additive property. You must preserve the original value if you want to have access to native libraries. Used only if the value is not specified explicitly by the DAG definition.

**Related Name**

tez.am.launch.env

**Default Value**

LD\_LIBRARY\_PATH=\$PARCELS\_ROOT/CDH/lib/hadoop/lib/native

**API Name**

tez.am.launch.env

**Required**

true

**Log level for Application Masters****Description**

Root Logging level passed to the Tez Application Master.

**Related Name**

tez.am.log.level

**Default Value**

INFO

**API Name**

tez.am.log.level

**Required**

true

**Number of Recovery Runs****Description**

Specifies the total number of time the Application Master will run in case recovery is triggered.

**Related Name**

tez.am.max.app.attempts

**Default Value**

2

**API Name**

tez.am.max.app.attempts

**Required**

true

**Maximum Task Attempts****Description**

The maximum number of allowed task attempt failures on a node before it gets marked as blacklisted.

**Related Name**

tez.am.maxtaskfailures.per.node

**Default Value**

10

**API Name**

tez.am.maxtaskfailures.per.node

**Required**

true

**Tez Application Master Memory****Description**

The amount of memory to be used by the Application Master. Used only if the value is not specified explicitly by the DAG definition.

**Related Name**

tez.am.resource.memory.mb

**Default Value**

2 GiB

**API Name**

tez.am.resource.memory.mb

**Required**

true

**History URL Template****Description**

Template to generate the History URL for a particular Tez Application. Template replaces `__APPLICATION_ID__` with the actual applicationId and `__HISTORY_URL_BASE__` with the value from the `tez.tez-ui.history-url.base` config property

**Related Name**

tez.am.tez-ui.history-url.template

**Default Value**

\_\_HISTORY\_URL\_BASE\_\_?viewPath=%2F%23%2Ftez-app%2F\_\_APPLICATION\_ID\_\_

**API Name**

tez.am.tez-ui.history-url.template

**Required**

true

**Tez Application Master View ACLs****Description**

Application Master view ACLs. This allows the specified users/groups to view the status of the Application Master and all DAGs that run within this Application Master. Value format: Comma separated list of users, followed by whitespace, followed by a comma separated list of groups.

**Related Name**

tez.am.view-acls

**Default Value**

\*

**API Name**

tez.am.view-acls

**Required**

false

**Tez Additional Classpath****Description**

Specify additional classpath information to be used for Tez AM and all containers.

**Related Name**

tez.cluster.additional.classpath.prefix

**Default Value****API Name**

tez.cluster.additional.classpath.prefix

**Required**

false

**Maximum Number of Counters****Description**

The number of allowed counters for the executing DAG.

**Related Name**

tez.counters.max

**Default Value**

10000

**API Name**

tez.counters.max

**Required**

---

true

### Maximum Counter Groups

**Description**

The number of allowed counter groups for the executing DAG.

**Related Name**

tez.counters.max.groups

**Default Value**

3000

**API Name**

tez.counters.max.groups

**Required**

true

### Whether to generate debug artifacts

**Description**

Generate debug artifacts such as a text representation of the submitted DAG plan.

**Related Name**

tez.generate.debug.artifacts

**Default Value**

false

**API Name**

tez.generate.debug.artifacts

**Required**

true

### Grouped Split Maximum Size

**Description**

Upper bound on the size (in bytes) of a grouped split, to avoid generating excessively large split.

**Related Name**

tez.grouping.max-size

**Default Value**

1 GiB

**API Name**

tez.grouping.max-size

**Required**

true

### Grouped Split Minimum Size

**Description**

Lower bound on the size (in bytes) of a grouped split, to avoid generating too many splits.

**Related Name**

tez.grouping.min-size

**Default Value**

16 MiB

**API Name**

tez.grouping.min-size

**Required**

true

**Queue Capacity Multiplier****Description**

The multiplier for available queue capacity when determining number of tasks for a Vertex. 1.7 with 100% queue available implies generating a number of tasks roughly equal to 170% of the available containers on the queue.

**Related Name**

tez.grouping.split-waves

**Default Value**

1.7

**API Name**

tez.grouping.split-waves

**Required**

true

**Tez history events directory****Description**

Directory where proto logger writes the history events, should generally be sys.db database directory.

**Related Name**

tez.history.logging.proto-base-dir

**Default Value**

/warehouse/tablespace/managed/hive/sys.db

**API Name**

tez.history.logging.proto-base-dir

**Required**

true

**DAGs per Group****Description**

DAGs per group.

**Related Name**

tez.history.logging.timeline-cache-plugin.old-num-dags-per-group

**Default Value**

5

**API Name**

tez.history.logging.timeline-cache-plugin.old-num-dags-per-group

**Required**

true

### Enable Intermediate Data Compression

**Description**

Whether intermediate data should be compressed or not.

**Related Name**

tez.runtime.compress

**Default Value**

true

**API Name**

tez.runtime.compress

**Required**

true

### Codec for Compressing Intermediate Data

**Description**

The codec to be used if compressing intermediate data. Only applicable if tez.runtime.compress is enabled.

**Related Name**

tez.runtime.compress.codec

**Default Value**

org.apache.hadoop.io.compress.SnappyCodec

**API Name**

tez.runtime.compress.codec

**Required**

true

### Publish Configuration Information

**Description**

Whether to publish configuration information to History logger.

**Related Name**

tez.runtime.convert.user-payload.to.history-text

**Default Value**

false

**API Name**

tez.runtime.convert.user-payload.to.history-text

**Required**

true

### Sort Buffer Size

**Description**

The size of the sort buffer when output needs to be sorted.

**Related Name**

tez.runtime.io.sort.mb

**Default Value**

272 MiB

**API Name**

tez.runtime.io.sort.mb

**Required**

true

**Enable Accessing the Local Files Directly**

**Description**

If the shuffle input is on the local host bypass the http fetch and access the files directly.

**Related Name**

tez.runtime.optimize.local.fetch

**Default Value**

true

**API Name**

tez.runtime.optimize.local.fetch

**Required**

true

**Pipeline Sorter Sort Threads**

**Description**

Tez runtime pipelined sorter sort threads.

**Related Name**

tez.runtime.pipelined.sorter.sort.threads

**Default Value**

2

**API Name**

tez.runtime.pipelined.sorter.sort.threads

**Required**

true

**Fraction of Memory to Retain Shuffled Data**

**Description**

Fraction (0-1) of the available memory which can be used to retain shuffled data.

**Related Name**

tez.runtime.shuffle.fetch.buffer.percent

**Default Value**

0.6

**API Name**

tez.runtime.shuffle.fetch.buffer.percent

**Required**

true

**Keep the Shuffle Connection Alive**

**Description**

This property determines if the shuffle connection should be kept alive. If not, then the connection needs to be reestablished.

**Related Name**

`tez.runtime.shuffle.keep-alive.enabled`**Default Value**`true`**API Name**`tez.runtime.shuffle.keep-alive.enabled`**Required**`true`**Maximum Percent of Shuffle Segment****Description**

This property determines the maximum size of a shuffle segment which can be fetched to memory. Fraction (0-1) of shuffle memory (after applying `tez.runtime.shuffle.fetch.buffer.percent`).

**Related Name**`tez.runtime.shuffle.memory.limit.percent`**Default Value**`0.25`**API Name**`tez.runtime.shuffle.memory.limit.percent`**Required**`true`**Buffer Size for Unordered Output****Description**

The size of the buffer when output does not require to be sorted.

**Related Name**`tez.runtime.unordered.output.buffer.size-mb`**Default Value**`100 MiB`**API Name**`tez.runtime.unordered.output.buffer.size-mb`**Required**`true`**Timeout for Application Master for a Task****Description**

Time (in seconds) for which the Tez Application Master should wait for a DAG to be submitted before shutting down.

**Related Name**`tez.session.am.dag.submit.timeout.secs`**Default Value**`5 minute(s)`**API Name**`tez.session.am.dag.submit.timeout.secs`**Required**`true`

**Timeout for Application Master to Come up****Description**

Time (in seconds) to wait for Application Master to come up when trying to submit a DAG from the client.

**Related Name**

tez.session.client.timeout.secs

**Default Value**

-1 second(s)

**API Name**

tez.session.client.timeout.secs

**Required**

true

**ScatterGather Connection Maximum Fraction of Tasks****Description**

In case of a ScatterGather connection, once this fraction of source tasks have completed, all tasks on the current vertex can be scheduled. Number of tasks ready for scheduling on the current vertex scales linearly between min-fraction and max-fraction.

**Related Name**

tez.shuffle-vertex-manager.max-src-fraction

**Default Value**

0.4

**API Name**

tez.shuffle-vertex-manager.max-src-fraction

**Required**

true

**ScatterGather Connection Minimum Fraction of Tasks****Description**

In case of a ScatterGather connection, the fraction of source tasks which should complete before tasks for the current vertex are schedule.

**Related Name**

tez.shuffle-vertex-manager.min-src-fraction

**Default Value**

0.2

**API Name**

tez.shuffle-vertex-manager.min-src-fraction

**Required**

true

**TEZ Staging directory****Description**

The staging dir used while submitting DAGs.

**Related Name**

tez.staging-dir

**Default Value**`/tmp/$user.name/staging`**API Name**`tez.staging-dir`**Required**`true`**Heartbeat Interval****Description**

Time interval at which task counters are sent to the Application Master.

**Related Name**`tez.task.am.heartbeat.counter.interval-ms.max`**Default Value**`4 second(s)`**API Name**`tez.task.am.heartbeat.counter.interval-ms.max`**Required**`true`**Generate Counters on a Per-Edge Basis****Description**

Whether to generate counters on a per-edge basis for a Tez DAG. Helpful for in-depth analysis.

**Related Name**`tez.task.generate.counters.per.io`**Default Value**`true`**API Name**`tez.task.generate.counters.per.io`**Required**`true`**Maximum Time Between Tasks****Description**

The maximum amount of time, in seconds, to wait before a task asks an Application Master for another task.

**Related Name**`tez.task.get-task.sleep.interval-ms.max`**Default Value**`200 millisecond(s)`**API Name**`tez.task.get-task.sleep.interval-ms.max`**Required**`true`

### Tez Task Default Command Line Options

**Description**

Cluster default Java options for tasks. These will be prepended to the properties specified via `tez.task.launch.cmd-opts`.

**Related Name**

`tez.task.launch.cluster-default.cmd-opts`

**Default Value**

`-server -Djava.net.preferIPv4Stack=true`

**API Name**

`tez.task.launch.cluster-default.cmd-opts`

**Required**

`true`

### Tez Task Command Line Options

**Description**

Java options for tasks. The `Xmx` value is derived based on `tez.task.resource.memory.mb` and is 80% of this value by default. Used only if the value is not specified explicitly by the DAG definition.

**Related Name**

`tez.task.launch.cmd-opts`

**Default Value**

`-XX:+PrintGCDetails -verbose:gc -XX:+UseNUMA -XX:+UseG1GC -XX:+ResizeTLAB -XX:  
+HeapDumpOnOutOfMemoryError -XX:HeapDumpPath=/tmp`

**API Name**

`tez.task.launch.cmd-opts`

**Required**

`true`

### Tez Task Environment Settings

**Description**

Additional execution environment entries for tez. This is not an additive property. You must preserve the original value if you want to have access to native libraries. Used only if the value is not specified explicitly by the DAG definition.

**Related Name**

`tez.task.launch.env`

**Default Value**

`LD_LIBRARY_PATH=$PARCELS_ROOT/CDH/lib/hadoop/lib/native`

**API Name**

`tez.task.launch.env`

**Required**

`true`

### Maximum Number of Events in a Heartbeat

**Description**

Maximum number of events to fetch from the Application Master by the tasks in a single heartbeat.

**Related Name**

`tez.task.max-events-per-heartbeat`

**Default Value**

500

**API Name**

tez.task.max-events-per-heartbeat

**Required**

true

**Tez Task Memory****Description**

The amount of memory to be used by launched tasks. Used only if the value is not specified explicitly by the DAG definition.

**Related Name**

tez.task.resource.memory.mb

**Default Value**

1536 MiB

**API Name**

tez.task.resource.memory.mb

**Required**

true

**Tez UI URL Base****Description**

The base of the Tez UI URL.

**Related Name**

tez.tez-ui.history-url.base

**Default Value****API Name**

tez.tez-ui.history-url.base

**Required**

false

**Use Hadoop Libs****Description**

This being true implies that the deployment is relying on hadoop jars being available on the cluster on all nodes.

**Related Name**

tez.use.cluster.hadoop-lib

**Default Value**

false

**API Name**

tez.use.cluster.hadoop-lib

**Required**

true

### Enable Yarn Timeline-Service

**Description**

Timeline service version we're currently using.

**Related Name**

yarn.timeline-service.enabled

**Default Value**

false

**API Name**

yarn.timeline-service.enabled

**Required**

true

### YARN Service

**Description**

Name of the YARN service that this Tez service instance depends on

**Related Name****Default Value****API Name**

yarn\_service

**Required**

true

### Suppressions

#### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

#### Suppress Configuration Validator: Deploy Directory

**Description**

Whether to suppress configuration warnings produced by the Deploy Directory configuration validator.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_client_config_root_dir`**Required**`true`**Suppress Configuration Validator: Tez Client Advanced Configuration Snippet (Safety Valve) for tez-conf/tez-site.xml****Description**

Whether to suppress configuration warnings produced by the Tez Client Advanced Configuration Snippet (Safety Valve) for tez-conf/tez-site.xml configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_tez-conf/tez-site.xml_client_config_safety_valve`**Required**`true`**Suppress Configuration Validator: Gateway Count Validator****Description**

Whether to suppress configuration warnings produced by the Gateway Count Validator configuration validator.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_gateway_count_validator`**Required**`true`**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**`false`**API Name**`service_config_suppression_process_groupname`**Required**`true`**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_process\_username

**Required**

true

**Suppress Parameter Validation: Service Triggers****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Triggers parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_service\_triggers

**Required**

true

**Suppress Parameter Validation: Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Service Monitor Derived Configs Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_smon\_derived\_configs\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Tez Application Master Default Command Line Options****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tez Application Master Default Command Line Options parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.am.launch.cluster-default.cmd-opts

**Required**

true

**Suppress Parameter Validation: Tez Application Master Command Line Options****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tez Application Master Command Line Options parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.am.launch.cmd-opts

**Required**

true

**Suppress Parameter Validation: Tez Application Master Environment Settings****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tez Application Master Environment Settings parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.am.launch.env

**Required**

true

**Suppress Parameter Validation: Number of Recovery Runs****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Number of Recovery Runs parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.am.max.app.attempts

**Required**

true

**Suppress Parameter Validation: History URL Template****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the History URL Template parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.am.tez-ui.history-url.template

**Required**

true

**Suppress Parameter Validation: Tez Application Master View ACLs****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tez Application Master View ACLs parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.am.view-acls

**Required**

true

**Suppress Parameter Validation: Tez Additional Classpath****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tez Additional Classpath parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.cluster.additional.classpath.prefix

**Required**

true

**Suppress Parameter Validation: Tez history events directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tez history events directory parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.history.logging.proto-base-dir

**Required**

true

**Suppress Parameter Validation: DAGs per Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the DAGs per Group parameter.

**Related Name**

**Default Value**

false

**API Name**

service\_config\_suppression\_tez.history.logging.timeline-cache-plugin.old-num-dags-per-group

**Required**

true

**Suppress Parameter Validation: Codec for Compressing Intermediate Data****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Codec for Compressing Intermediate Data parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.runtime.compress.codec

**Required**

true

**Suppress Parameter Validation: TEZ Staging directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the TEZ Staging directory parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.staging-dir

**Required**

true

**Suppress Parameter Validation: Tez Task Default Command Line Options****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tez Task Default Command Line Options parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.task.launch.cluster-default.cmd-opts

**Required**

true

**Suppress Parameter Validation: Tez Task Command Line Options****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tez Task Command Line Options parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.task.launch.cmd-opts

**Required**

true

**Suppress Parameter Validation: Tez Task Environment Settings****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tez Task Environment Settings parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.task.launch.env

**Required**

true

**Suppress Parameter Validation: Tez UI URL Base****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tez UI URL Base parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez.tez-ui.history-url.base

**Required**

true

**Suppress Parameter Validation: Tez Service Environment Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Tez Service Environment Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

service\_config\_suppression\_tez\_service\_env\_safety\_valve

<b>Required</b>
true

YARN Properties in Cloudera Runtime 7.1.8

Role groups:

Gateway

Advanced

Deploy Directory

<b>Description</b>
The directory where the client configs will be deployed
<b>Related Name</b>
<b>Default Value</b>
/etc/hadoop
<b>API Name</b>
client_config_root_dir
<b>Required</b>
true

Gateway Logging Advanced Configuration Snippet (Safety Valve)

<b>Description</b>
For advanced use only, a string to be inserted into log4j.properties for this role only.
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
log4j_safety_valve
<b>Required</b>
false

MapReduce Client Advanced Configuration Snippet (Safety Valve) for mapred-site.xml

<b>Description</b>
For advanced use only, a string to be inserted into the client configuration for mapred-site.xml.
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
mapreduce_client_config_safety_valve
<b>Required</b>
false

Gateway Client Environment Advanced Configuration Snippet (Safety Valve) for hadoop-env.sh

<b>Description</b>
--------------------

For advanced use only, key-value pairs (one on each line) to be inserted into the client configuration for `hadoop-env.sh`

**Related Name****Default Value****API Name**

`mapreduce_client_env_safety_valve`

**Required**

`false`

### Client Java Configuration Options

**Description**

These are Java command-line arguments. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here.

**Related Name****Default Value**

`-Djava.net.preferIPv4Stack=true`

**API Name**

`mapreduce_client_java_opts`

**Required**

`false`

### YARN Client Advanced Configuration Snippet (Safety Valve) for yarn-site.xml

**Description**

For advanced use only, a string to be inserted into the client configuration for `yarn-site.xml`.

**Related Name****Default Value****API Name**

`yarn_client_config_safety_valve`

**Required**

`false`

### Compression

#### Compression Level of Codecs

**Description**

Compression level for the codec used to compress MapReduce outputs. Default compression is a balance between speed and compression ratio.

**Related Name**

`zlib.compress.level`

**Default Value**

`DEFAULT_COMPRESSION`

**API Name**

`zlib_compress_level`

**Required**

false

Logs

Gateway Logging Threshold

Description	The minimum log level for Gateway logs
Related Name	
Default Value	INFO
API Name	log_threshold
Required	false

Monitoring

Enable Log Event Capture

Description	When set, each role identifies important log events and forwards them to Cloudera Manager.
Related Name	
Default Value	true
API Name	catch_events
Required	false

Enable Configuration Change Alerts

Description	When set, Cloudera Manager will send alerts when this entity's configuration changes.
Related Name	
Default Value	false
API Name	enable_config_alerts
Required	false

Other

Alternatives Priority

Description	The priority level that the client configuration will have in the Alternatives system on the hosts. Higher priority levels will cause Alternatives to prefer this configuration over any others.
Related Name	

**Default Value**

92

**API Name**

client\_config\_priority

**Required**

true

**Client Failover Sleep Base Time****Description**

Base sleep time between failover attempts. Used only if RM HA is enabled.

**Related Name**

yarn.client.failover-sleep-base-ms

**Default Value**

100 millisecond(s)

**API Name**

client\_failover\_sleep\_base

**Required**

false

**Client Failover Sleep Max Time****Description**

Maximum sleep time between failover attempts. Used only if RM HA is enabled.

**Related Name**

yarn.client.failover-sleep-max-ms

**Default Value**

2 second(s)

**API Name**

client\_failover\_sleep\_max

**Required**

false

**Running Job History Location****Description**

Location to store the job history files of running jobs. This is a path on the host where the JobTracker is running.

**Related Name**

hadoop.job.history.location

**Default Value**

/var/log/hadoop-mapreduce/history

**API Name**

hadoop\_job\_history\_dir

**Required**

false

**SequenceFile I/O Buffer Size****Description**

Size of buffer for read and write operations of SequenceFiles.

**Related Name**

io.file.buffer.size

**Default Value**

64 KiB

**API Name**

io\_file\_buffer\_size

**Required**

false

**I/O Sort Factor****Description**

The number of streams to merge at the same time while sorting files. That is, the number of sort heads to use during the merge sort on the reducer side. This determines the number of open file handles. Merging more files in parallel reduces merge sort iterations and improves run time by eliminating disk I/O. Note that merging more files in parallel uses more memory. If 'io.sort.factor' is set too high or the maximum JVM heap is set too low, excessive garbage collection will occur. The Hadoop default is 10, but Cloudera recommends a higher value. Will be part of generated client configuration.

**Related Name**

mapreduce.task.io.sort.factor

**Default Value**

64

**API Name**

io\_sort\_factor

**Required**

false

**I/O Sort Memory Buffer (MiB)****Description**

The total amount of memory buffer, in megabytes, to use while sorting files. Note that this memory comes out of the user JVM heap size (meaning total user JVM heap - this amount of memory = total user usable heap space. Note that Cloudera's default differs from Hadoop's default; Cloudera uses a bigger buffer by default because modern machines often have more RAM. The smallest value across all TaskTrackers will be part of generated client configuration.

**Related Name**

mapreduce.task.io.sort.mb

**Default Value**

256 MiB

**API Name**

io\_sort\_mb

**Required**

false

### I/O Sort Spill Percent

**Description**

The soft limit in either the buffer or record collection buffers. When this limit is reached, a thread will begin to spill the contents to disk in the background. Note that this does not imply any chunking of data to the spill. A value less than 0.5 is not recommended. The syntax is in decimal units; the default is 80% and is formatted 0.8. Will be part of generated client configuration.

**Related Name**

mapreduce.map.sort.spill.percent

**Default Value**

0.8

**API Name**

io\_sort\_spill\_percent

**Required**

false

### Use Compression on Map Outputs

**Description**

If enabled, uses compression on the map outputs before they are sent across the network. Will be part of generated client configuration.

**Related Name**

mapreduce.map.output.compress

**Default Value**

true

**API Name**

mapred\_compress\_map\_output

**Required**

false

### Compression Codec of MapReduce Map Output

**Description**

For MapReduce map outputs that are compressed, specify the compression codec to use. Will be part of generated client configuration.

**Related Name**

mapreduce.map.output.compress.codec

**Default Value**

org.apache.hadoop.io.compress.SnappyCodec

**API Name**

mapred\_map\_output\_compression\_codec

**Required**

false

### Map Tasks Speculative Execution

**Description**

If enabled, multiple instances of some map tasks may be executed in parallel.

**Related Name**

mapreduce.map.speculative

**Default Value**

false

**API Name**

mapred\_map\_tasks\_speculative\_execution

**Required**

false

**Compress MapReduce Job Output****Description**

Compress the output of MapReduce jobs. Will be part of generated client configuration.

**Related Name**

mapreduce.output.fileoutputformat.compress

**Default Value**

false

**API Name**

mapred\_output\_compress

**Required**

false

**Compression Codec of MapReduce Job Output****Description**

For MapReduce job outputs that are compressed, specify the compression codec to use. Will be part of generated client configuration.

**Related Name**

mapreduce.output.fileoutputformat.compress.codec

**Default Value**

org.apache.hadoop.io.compress.DefaultCodec

**API Name**

mapred\_output\_compression\_codec

**Required**

false

**Compression Type of MapReduce Job Output****Description**

For MapReduce job outputs that are compressed as SequenceFiles, you can select one of these compression type options: NONE, RECORD or BLOCK. Cloudera recommends BLOCK. Will be part of generated client configuration.

**Related Name**

mapreduce.output.fileoutputformat.compress.type

**Default Value**

BLOCK

**API Name**

mapred\_output\_compression\_type

**Required**

false

### Default Number of Parallel Transfers During Shuffle

**Description**

The default number of parallel transfers run by reduce during the copy (shuffle) phase. This number is calculated by the following formula:  $\min(\text{number\_of\_nodes}, n * \min(\text{number\_of\_cores\_per\_node}, \text{number\_of\_spindles\_per\_node}))$  where the  $n$  represents how many streams you want to run per core/spindle. A value of 10 for  $n$  is appropriate in most cases. Will be part of generated client configuration.

**Related Name**

mapreduce.reduce.shuffle.parallelcopies

**Default Value**

10

**API Name**

mapred\_reduce\_parallel\_copies

**Required**

false

### Number of Map Tasks to Complete Before Reduce Tasks

**Description**

Fraction of the number of map tasks in the job which should be completed before reduce tasks are scheduled for the job.

**Related Name**

mapreduce.job.reduce.slowstart.completedmaps

**Default Value**

0.8

**API Name**

mapred\_reduce\_slowstart\_completed\_maps

**Required**

false

### Default Number of Reduce Tasks per Job

**Description**

The default number of reduce tasks per job. Will be part of generated client configuration.

**Related Name**

mapreduce.job.reduces

**Default Value**

1

**API Name**

mapred\_reduce\_tasks

**Required**

false

### Reduce Tasks Speculative Execution

**Description**

If enabled, multiple instances of some reduce tasks may be executed in parallel.

**Related Name**

mapreduce.reduce.speculative

**Default Value**

false

**API Name**

mapred\_reduce\_tasks\_speculative\_execution

**Required**

false

**Mapreduce Submit Replication****Description**

The replication level for submitted job files.

**Related Name**

mapreduce.client.submit.file.replication

**Default Value**

10

**API Name**

mapred\_submit\_replication

**Required**

false

**Mapreduce Task Timeout****Description**

The number of milliseconds before a task will be terminated if it neither reads an input, writes an output, nor updates its status string.

**Related Name**

mapreduce.task.timeout

**Default Value**

10 minute(s)

**API Name**

mapred\_task\_timeout

**Required**

false

**MR Application Environment****Description**

Additional execution environment entries for map and reduce task processes.

**Related Name**

mapreduce.admin.user.env

**Default Value**

LD\_LIBRARY\_PATH=\$HADOOP\_COMMON\_HOME/lib/native:\$JAVA\_LIBRARY\_PATH

**API Name**

mapreduce\_admin\_user\_env

**Required**

false

### Maximum Number of Attempts for MapReduce Jobs

**Description**

The maximum number of application attempts for MapReduce jobs. The value of this parameter overrides ApplicationMaster Maximum Attempts for MapReduce jobs.

**Related Name**

mapreduce.am.max-attempts

**Default Value**

2

**API Name**

mapreduce\_am\_max\_attempts

**Required**

false

### MR Application Classpath

**Description**

Classpaths to include for MapReduce applications. During evaluation, the string '{version}' in the value of this parameter will be replaced by the actual MapReduce version.

**Related Name**

mapreduce.application.classpath

**Default Value**

\$SHADOOP\_CLIENT\_CONF\_DIR \$PWD/mr-framework/\* \$MR2\_CLASSPATH

**API Name**

mapreduce\_application\_classpath

**Required**

false

### MR Application Framework Path

**Description**

Path for MapReduce application framework. During evaluation, the string '{version}' in the value of this parameter will be replaced by the actual MapReduce version.

**Related Name**

mapreduce.application.framework.path

**Default Value**

/user/yarn/mapreduce/mr-framework/version-mr-framework.tar.gz#mr-framework

**API Name**

mapreduce\_application\_framework\_path

**Required**

false

### Application Framework

**Description**

The application framework to run jobs with. If not set, jobs will be run with the local job runner.

**Related Name**

mapreduce.framework.name

**Default Value**

yarn

**API Name**

mapreduce\_framework\_name

**Required**

false

**ACL For Modifying A Job****Description**

Specifies a list of users and/or groups that are allowed to modify job operations. For specifying a list of users and groups the format to use is "user1,user2 group1,group". If set to '\*', it allows all users/groups to modify this job. If set to ' '(i.e. space), it allows none. Irrespective of this ACL configuration, (a) job-owner, (b) the user who started the cluster, (c) members of an admin configured supergroup configured via mapreduce.cluster.permissions.supergroup and (d) queue administrators of the queue to which this job was submitted to configured via acl-administer-jobs for the specific queue in mapred-queues.xml can do all the modification operations on a job. Ignored unless mapreduce.clouster.acls.enabled is true.

**Related Name**

mapreduce.job.acl-modify-job

**Default Value****API Name**

mapreduce\_job\_acl\_modify\_job

**Required**

false

**ACL For Viewing A Job****Description**

Specifies a list of users and/or groups that are allowed to view private job details. For specifying a list of users and groups the format to use is "user1,user2 group1,group". If set to '\*', it allows all users/groups to modify this job. If set to ' '(i.e. space), it allows none. Irrespective of this ACL configuration, (a) job-owner, (b) the user who started the cluster, (c) members of an admin configured supergroup configured via mapreduce.cluster.permissions.supergroup and (d) queue administrators of the queue to which this job was submitted to configured via acl-administer-jobs for the specific queue in mapred-queues.xml can do all the view operations on a job. Ignored unless mapreduce.cluster.acls.enabled is true.

**Related Name**

mapreduce.job.acl-view-job

**Default Value****API Name**

mapreduce\_job\_acl\_view\_job

**Required**

false

**Redacted MapReduce Job Properties****Description**

A comma-separated list of job properties to redact in MapReduce.

**Related Name**

mapreduce.job.redacted-properties

**Default Value**

fs.s3a.access.key fs.s3a.secret.key fs.adl.oauth2.credential dfs.adls.oauth2.credential  
fs.azure.account.oauth2.client.secret

**API Name**

mapreduce\_job\_redacted\_properties

**Required**

false

**JobTracker MetaInfo Maxsize****Description**

The maximum permissible size of the split metainfo file. The JobTracker won't attempt to read split metainfo files bigger than the configured value. No limits if set to -1.

**Related Name**

mapreduce.job.split.metainfo.maxsize

**Default Value**

10000000

**API Name**

mapreduce\_jobtracker\_split\_metainfo\_maxsize

**Required**

false

**Map Task Java Opts Base****Description**

Java opts for the map processes. The following symbol, if present, will be interpolated: @taskid@ is replaced by current TaskID. Any other occurrences of '@' will go unchanged. For example, to enable verbose gc logging to a file named for the taskid in /tmp pass a value of: "-verbose:gc -Xloggc:/tmp/@taskid@.gc". The configuration variable 'Map Task Memory' can be used to control the maximum memory of the map processes.

**Related Name**

mapreduce.map.java.opts

**Default Value**

-Djava.net.preferIPv4Stack=true

**API Name**

mapreduce\_map\_java\_opts

**Required**

false

**Reduce Task Java Opts Base****Description**

Java opts for the reduce processes. The following symbol, if present, will be interpolated: @taskid@ is replaced by current TaskID. Any other occurrences of '@' will go unchanged. For example, to enable verbose gc logging to a file named for the taskid in /tmp pass a value of: "-verbose:gc -Xloggc:/tmp/@taskid@.gc". The configuration variable 'Reduce Task Memory' can be used to control the maximum memory of the reduce processes.

**Related Name**

mapreduce.reduce.java.opts

**Default Value**

-Djava.net.preferIPv4Stack=true

**API Name**

mapreduce\_reduce\_java\_opts

**Required**

false

**ApplicationMaster Environment**

**Description**

Environment variables for the MapReduce ApplicationMaster. These settings can be overridden in the ApplicationMaster User Environment (yarn.app.mapreduce.am.env).

**Related Name**

yarn.app.mapreduce.am.admin.user.env

**Default Value**

LD\_LIBRARY\_PATH=\$HADOOP\_COMMON\_HOME/lib/native:\$JAVA\_LIBRARY\_PATH

**API Name**

yarn\_app\_mapreduce\_am\_admin\_user\_env

**Required**

false

**ApplicationMaster Java Opts Base**

**Description**

Java command line arguments passed to the MapReduce ApplicationMaster.

**Related Name**

yarn.app.mapreduce.am.command-opts

**Default Value**

-Djava.net.preferIPv4Stack=true

**API Name**

yarn\_app\_mapreduce\_am\_command\_opts

**Required**

false

**Performance**

**JHist File Format**

**Description**

File format the AM will use when generating the .jhist file. Valid values are "json" for text output and "binary" for faster parsing.

**Related Name**

mapreduce.jobhistory.jhist.format

**Default Value**

binary

**API Name**

mapred\_jobhistory\_jhist\_format

**Required**

false

### Enable Optimized Map-side Output Collector

**Description**

Whether map tasks should attempt to use the optimized native implementation of the map-side output collector. This can improve performance of many jobs that are shuffle-intensive. Experimental in CDH 5.2.

**Related Name****Default Value**

false

**API Name**

mapreduce\_enable\_native\_map\_output\_collector

**Required**

false

### Job Counter Groups Limit

**Description**

Limit on the number of counter groups allowed per job.

**Related Name**

mapreduce.job.counters.groups.max

**Default Value**

50

**API Name**

mapreduce\_job\_counter\_groups\_limit

**Required**

false

### Job Counters Limit

**Description**

Limit on the number of counters allowed per job.

**Related Name**

mapreduce.job.counters.max

**Default Value**

120

**API Name**

mapreduce\_job\_counters\_limit

**Required**

false

### Enable Ubertask Optimization

**Description**

Whether to enable ubertask optimization, which runs "sufficiently small" jobs sequentially within a single JVM. "Small" is defined by the mapreduce.job.ubertask.maxmaps, mapreduce.job.ubertask.maxreduces, and mapreduce.job.ubertask.maxbytes settings.

**Related Name**

mapreduce.job.ubertask.enable

**Default Value**

	false
<b>API Name</b>	
	mapreduce_job_ubertask_enabled
<b>Required</b>	
	false

**Ubertask Maximum Job Size**

<b>Description</b>	Threshold for number of input bytes, beyond which a job is considered too big for ubertask optimization. If no value is specified, dfs.block.size is used as a default.
<b>Related Name</b>	
	mapreduce.job.ubertask.maxbytes
<b>Default Value</b>	
<b>API Name</b>	
	mapreduce_job_ubertask_maxbytes
<b>Required</b>	
	false

**Ubertask Maximum Maps**

<b>Description</b>	Threshold for number of maps, beyond which a job is considered too big for ubertask optimization.
<b>Related Name</b>	
	mapreduce.job.ubertask.maxmaps
<b>Default Value</b>	
	9
<b>API Name</b>	
	mapreduce_job_ubertask_maxmaps
<b>Required</b>	
	false

**Ubertask Maximum Reduces**

<b>Description</b>	Threshold for number of reduces, beyond which a job is considered too big for ubertask optimization. Note: As of CDH 5, MR2 does not support more than one reduce in an ubertask. (Zero is valid.)
<b>Related Name</b>	
	mapreduce.job.ubertask.maxreduces
<b>Default Value</b>	
	1
<b>API Name</b>	
	mapreduce_job_ubertask_maxreduces
<b>Required</b>	
	false

## Resource Management

### Client Java Heap Size in Bytes

**Description**

Maximum size in bytes for the Java process heap memory. Passed to Java -Xmx.

**Related Name****Default Value**

825955249 B

**API Name**

mapreduce\_client\_java\_heapsize

**Required**

false

### Heap to Container Size Ratio

**Description**

The ratio of heap size to container size for both map and reduce tasks. The heap should be smaller than the container size to allow for some overhead of the JVM.

**Related Name**

mapreduce.job.heap.memory-mb.ratio

**Default Value**

0.8

**API Name**

mapreduce\_job\_heap\_memory\_mb\_ratio

**Required**

false

### Map Task CPU Virtual Cores

**Description**

The number of virtual CPU cores allocated for each map task of a job. This parameter has no effect prior to CDH 4.4.

**Related Name**

mapreduce.map.cpu.vcores

**Default Value**

1

**API Name**

mapreduce\_map\_cpu\_vcores

**Required**

false

### Map Task Maximum Heap Size

**Description**

The maximum Java heap size, in bytes, of the map processes. This number will be formatted and concatenated with 'Map Task Java Opts Base' to pass to Hadoop.

**Related Name****Default Value**

0 B
<b>API Name</b>
mapreduce_map_java_opts_max_heap
<b>Required</b>
false

Map Task Memory

<b>Description</b>
The amount of physical memory, in MiB, allocated for each map task of a job. For versions before CDH 5.5, if not specified, by default it is set to 1024. For CDH 5.5 and higher, a value less than 128 is not supported but if it is specified as 0, the amount of physical memory to request is inferred from Map Task Maximum Heap Size and Heap to Container Size Ratio. If Map Task Maximum Heap Size is not specified, by default the amount of physical memory to request is set to 1024.
<b>Related Name</b>
mapreduce.map.memory.mb
<b>Default Value</b>
0 B
<b>API Name</b>
mapreduce_map_memory_mb
<b>Required</b>
false

Reduce Task CPU Virtual Cores

<b>Description</b>
The number of virtual CPU cores for each reduce task of a job.
<b>Related Name</b>
mapreduce.reduce.cpu.vcores
<b>Default Value</b>
1
<b>API Name</b>
mapreduce_reduce_cpu_vcores
<b>Required</b>
false

Reduce Task Maximum Heap Size

<b>Description</b>
The maximum Java heap size, in bytes, of the reduce processes. This number will be formatted and concatenated with 'Reduce Task Java Opts Base' to pass to Hadoop.
<b>Related Name</b>
<b>Default Value</b>
0 B
<b>API Name</b>
mapreduce_reduce_java_opts_max_heap
<b>Required</b>
false

### Reduce Task Memory

**Description**

The amount of physical memory, in MiB, allocated for each reduce task of a job. For versions before CDH 5.5, if not specified, by default it is set to 1024. For CDH 5.5 and higher, a value less than 128 is not supported but if it is specified as 0, the amount of physical memory to request is inferred from Reduce Task Maximum Heap Size and Heap to Container Size Ratio. If Reduce Task Maximum Heap Size is not specified, by default the amount of physical memory to request is set to 1024. This parameter has no effect prior to CDH 4.4.

**Related Name**

mapreduce.reduce.memory.mb

**Default Value**

0 B

**API Name**

mapreduce\_reduce\_memory\_mb

**Required**

false

### ApplicationMaster Java Maximum Heap Size

**Description**

The maximum heap size, in bytes, of the Java MapReduce ApplicationMaster. This number will be formatted and concatenated with 'ApplicationMaster Java Opts Base' to pass to Hadoop.

**Related Name****Default Value**

825955249 B

**API Name**

yarn\_app\_mapreduce\_am\_max\_heap

**Required**

false

### ApplicationMaster Virtual CPU Cores

**Description**

The virtual CPU cores requirement, for the ApplicationMaster. This parameter has no effect prior to CDH 4.4.

**Related Name**

yarn.app.mapreduce.am.resource.cpu-vcores

**Default Value**

1

**API Name**

yarn\_app\_mapreduce\_am\_resource\_cpu\_vcores

**Required**

false

### ApplicationMaster Memory

**Description**

The physical memory requirement, in MiB, for the ApplicationMaster.

**Related Name**

yarn.app.mapreduce.am.resource.mb

**Default Value**

1 GiB

**API Name**

yarn\_app\_mapreduce\_am\_resource\_mb

**Required**

false

**Suppressions****Suppress Configuration Validator: CDH Version Validator****Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

**Suppress Parameter Validation: Deploy Directory****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Deploy Directory parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_client\_config\_root\_dir

**Required**

true

**Suppress Parameter Validation: Running Job History Location****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Running Job History Location parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_job\_history\_dir

**Required**

true

**Suppress Parameter Validation: I/O Sort Factor****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the I/O Sort Factor parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_io\_sort\_factor

**Required**

true

**Suppress Parameter Validation: Gateway Logging Advanced Configuration Snippet (Safety Valve)****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Logging Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_log4j\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Compression Codec of MapReduce Map Output****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Compression Codec of MapReduce Map Output parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mapred\_map\_output\_compression\_codec

**Required**

true

**Suppress Parameter Validation: Compression Codec of MapReduce Job Output****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Compression Codec of MapReduce Job Output parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_mapred_output_compression_codec`**Required**`true`**Suppress Parameter Validation: MR Application Environment****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the MR Application Environment parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_mapreduce_admin_user_env`**Required**`true`**Suppress Parameter Validation: Maximum Number of Attempts for MapReduce Jobs****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Maximum Number of Attempts for MapReduce Jobs parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_mapreduce_am_max_attempts`**Required**`true`**Suppress Parameter Validation: MR Application Classpath****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the MR Application Classpath parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_mapreduce_application_classpath`**Required**`true`**Suppress Parameter Validation: MR Application Framework Path****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the MR Application Framework Path parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_mapreduce\_application\_framework\_path

**Required**

true

**Suppress Parameter Validation: MapReduce Client Advanced Configuration Snippet (Safety Valve) for mapred-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the MapReduce Client Advanced Configuration Snippet (Safety Valve) for mapred-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mapreduce\_client\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Gateway Client Environment Advanced Configuration Snippet (Safety Valve) for hadoop-env.sh****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Gateway Client Environment Advanced Configuration Snippet (Safety Valve) for hadoop-env.sh parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mapreduce\_client\_env\_safety\_valve

**Required**

true

**Suppress Parameter Validation: Client Java Configuration Options****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Client Java Configuration Options parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mapreduce\_client\_java\_opts

**Required**

true

**Suppress Parameter Validation: ACL For Modifying A Job****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ACL For Modifying A Job parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mapreduce\_job\_acl\_modify\_job

**Required**

true

**Suppress Parameter Validation: ACL For Viewing A Job****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ACL For Viewing A Job parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mapreduce\_job\_acl\_view\_job

**Required**

true

**Suppress Parameter Validation: Redacted MapReduce Job Properties****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Redacted MapReduce Job Properties parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mapreduce\_job\_redacted\_properties

**Required**

true

**Suppress Parameter Validation: Map Task Java Opts Base****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Map Task Java Opts Base parameter.

**Related Name****Default Value**

false

**API Name**

`role_config_suppression_mapreduce_map_java_opts`**Required**`true`**Suppress Configuration Validator: Map Task Maximum Heap Size Validator****Description**

Whether to suppress configuration warnings produced by the Map Task Maximum Heap Size Validator configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_mapreduce_map_java_opts_max_heap_mapreduce_map_memory_mb_validator`**Required**`true`**Suppress Parameter Validation: Reduce Task Java Opts Base****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Reduce Task Java Opts Base parameter.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_mapreduce_reduce_java_opts`**Required**`true`**Suppress Configuration Validator: Reduce Task Maximum Heap Size Validator****Description**

Whether to suppress configuration warnings produced by the Reduce Task Maximum Heap Size Validator configuration validator.

**Related Name****Default Value**`false`**API Name**`role_config_suppression_mapreduce_reduce_java_opts_max_heap_mapreduce_reduce_memory_mb_validator`**Required**`true`**Suppress Configuration Validator: Job Submit Replication Validator****Description**

Whether to suppress configuration warnings produced by the Job Submit Replication Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_mapreduce\_replication\_validator

**Required**

true

**Suppress Parameter Validation: ApplicationMaster Environment****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ApplicationMaster Environment parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_yarn\_app\_mapreduce\_am\_admin\_user\_env

**Required**

true

**Suppress Parameter Validation: ApplicationMaster Java Opts Base****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the ApplicationMaster Java Opts Base parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_yarn\_app\_mapreduce\_am\_command\_opts

**Required**

true

**Suppress Configuration Validator: ApplicationMaster Java Maximum Heap Size Validator****Description**

Whether to suppress configuration warnings produced by the ApplicationMaster Java Maximum Heap Size Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_yarn\_app\_mapreduce\_am\_max\_heap\_yarn\_app\_mapreduce\_am\_resource\_mb\_validator

**Required**

true

**Suppress Parameter Validation: YARN Client Advanced Configuration Snippet (Safety Valve) for yarn-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the YARN Client Advanced Configuration Snippet (Safety Valve) for yarn-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_yarn\_client\_config\_safety\_valve

**Required**

true

**JobHistory Server****Advanced****Hadoop Metrics2 Advanced Configuration Snippet (Safety Valve)****Description**

Advanced Configuration Snippet (Safety Valve) for Hadoop Metrics2. Properties will be inserted into hadoop-metrics2.properties.

**Related Name****Default Value****API Name**

hadoop\_metrics2\_safety\_valve

**Required**

false

**System Group****Description**

The group that the JobHistory Server process should run as.

**Related Name****Default Value**

hadoop

**API Name**

history\_process\_groupname

**Required**

true

**System User****Description**

The user that the JobHistory Server process should run as.

**Related Name****Default Value**

mapred

**API Name**

history\_process\_username

**Required**

true

**JobHistory Server Advanced Configuration Snippet (Safety Valve) for yarn-site.xml****Description**

For advanced use only. A string to be inserted into yarn-site.xml for this role only.

**Related Name****Default Value****API Name**

jobhistory\_config\_safety\_valve

**Required**

false

**JobHistory Server Advanced Configuration Snippet (Safety Valve) for mapred-site.xml****Description**

For advanced use only. A string to be inserted into mapred-site.xml for this role only.

**Related Name****Default Value****API Name**

jobhistory\_mapred\_safety\_valve

**Required**

false

**JobHistory Server Environment Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, key-value pairs (one on each line) to be inserted into a role's environment.  
Applies to configurations of this role except client configuration.

**Related Name****Default Value****API Name**

JOBHISTORY\_role\_env\_safety\_valve

**Required**

false

**JobHistory Server Logging Advanced Configuration Snippet (Safety Valve)****Description**

For advanced use only, a string to be inserted into log4j.properties for this role only.

**Related Name**

**Default Value****API Name**

log4j\_safety\_valve

**Required**

false

**Enable auto refresh for metric configurations****Description**

When true, Enable Metric Collection and Metric Filter parameters will be set automatically if they're changed. Otherwise, a refresh by hand is required.

**Related Name****Default Value**

false

**API Name**

metric\_config\_auto\_refresh

**Required**

false

**Java Configuration Options for JobHistory Server****Description**

These arguments will be passed as part of the Java command line. Commonly, garbage collection flags, PermGen, or extra debugging flags would be passed here. Note: When CM version is 6.3.0 or greater, {{JAVA\_GC\_ARGS}} will be replaced by JVM Garbage Collection arguments based on the runtime Java JVM version.

**Related Name****Default Value**

JAVA\_GC\_ARGS -Dlibrary.leveldbjni.path=CMF\_CONF\_DIR

**API Name**

mr2\_jobhistory\_java\_opts

**Required**

false

**Heap Dump Directory****Description**

Path to directory where heap dumps are generated when java.lang.OutOfMemoryError error is thrown. This directory is automatically created if it does not exist. If this directory already exists, it will be owned by the current role user with 1777 permissions. Sharing the same directory among multiple roles will cause an ownership race. The heap dump files are created with 600 permissions and are owned by the role user. The amount of free space in this directory should be greater than the maximum Java Process heap size configured for this role.

**Related Name**

oom\_heap\_dump\_dir

**Default Value**

/tmp

**API Name**

oom\_heap\_dump\_dir

**Required**

false

**Dump Heap When Out of Memory****Description**

When set, generates a heap dump file when an out-of-memory error occurs.

**Related Name****Default Value**

true

**API Name**

oom\_heap\_dump\_enabled

**Required**

true

**Kill When Out of Memory****Description**

When set, a SIGKILL signal is sent to the role process when java.lang.OutOfMemoryError is thrown.

**Related Name****Default Value**

true

**API Name**

oom\_sigkill\_enabled

**Required**

true

**Automatically Restart Process****Description**

When set, this role's process is automatically (and transparently) restarted in the event of an unexpected failure. This configuration applies in the time after the Start Wait Timeout period.

**Related Name****Default Value**

false

**API Name**

process\_auto\_restart

**Required**

true

**Enable Metric Collection****Description**

Cloudera Manager agent monitors each service and each of its role by publishing metrics to the Cloudera Manager Service Monitor. Setting it to false will stop Cloudera Manager agent from publishing any metric for corresponding service/roles. This is usually helpful for services that generate large amount of metrics which Service Monitor is not able to process.

**Related Name**

<b>Default Value</b>	true
<b>API Name</b>	process_should_monitor
<b>Required</b>	true

Process Start Retry Attempts

<b>Description</b>	Number of times to try starting a role's process when the process exits before the Start Wait Timeout period. After a process is running beyond the Start Wait Timeout, the retry count is reset. Setting this configuration to zero will prevent restart of the process during the Start Wait Timeout period.
<b>Related Name</b>	
<b>Default Value</b>	3
<b>API Name</b>	process_start_retries
<b>Required</b>	false

Process Start Wait Timeout

<b>Description</b>	The time in seconds to wait for a role's process to start successfully on a host. Processes which exit/crash before this time will be restarted until reaching the limit specified by the Start Retry Attempts count parameter. Setting this configuration to zero will turn off this feature.
<b>Related Name</b>	
<b>Default Value</b>	20
<b>API Name</b>	process_start_secs
<b>Required</b>	false

Logs

JobHistory Server Logging Threshold

<b>Description</b>	The minimum log level for JobHistory Server logs
<b>Related Name</b>	
<b>Default Value</b>	INFO
<b>API Name</b>	log_threshold
<b>Required</b>	false

### JobHistory Server Maximum Log File Backups

**Description**

The maximum number of rolled log files to keep for JobHistory Server logs. Typically used by log4j or logback.

**Related Name****Default Value**

10

**API Name**

max\_log\_backup\_index

**Required**

false

### JobHistory Server Max Log Size

**Description**

The maximum size, in megabytes, per log file for JobHistory Server logs. Typically used by log4j or logback.

**Related Name****Default Value**

200 MiB

**API Name**

max\_log\_size

**Required**

false

### JobHistory Server Log Directory

**Description**

Directory where JobHistory Server will place its log files.

**Related Name**

hadoop.log.dir

**Default Value**

/var/log/hadoop-mapreduce

**API Name**

mr2\_jobhistory\_log\_dir

**Required**

false

### Monitoring

#### Enable Health Alerts for this Role

**Description**

When set, Cloudera Manager will send alerts when the health of this role reaches the threshold specified by the EventServer setting `eventserver_health_events_alert_threshold`

**Related Name****Default Value**

true

**API Name**

enable\_alerts

**Required**

false

**Enable Configuration Change Alerts****Description**

When set, Cloudera Manager will send alerts when this entity's configuration changes.

**Related Name****Default Value**

false

**API Name**

enable\_config\_alerts

**Required**

false

**Heap Dump Directory Free Space Monitoring Absolute Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory.

**Related Name****Default Value**

Warning: 10 GiB, Critical: 5 GiB

**API Name**

heap\_dump\_directory\_free\_space\_absolute\_thresholds

**Required**

false

**Heap Dump Directory Free Space Monitoring Percentage Thresholds****Description**

The health test thresholds for monitoring of free space on the filesystem that contains this role's heap dump directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Heap Dump Directory Free Space Monitoring Absolute Thresholds setting is configured.

**Related Name****Default Value**

Warning: Never, Critical: Never

**API Name**

heap\_dump\_directory\_free\_space\_percentage\_thresholds

**Required**

false

**File Descriptor Monitoring Thresholds****Description**

The health test thresholds of the number of file descriptors used. Specified as a percentage of file descriptor limit.

**Related Name****Default Value**

Warning: 50.0 %, Critical: 70.0 %

**API Name**

jobhistory\_fd\_thresholds

**Required**

false

**Garbage Collection Duration Thresholds****Description**

The health test thresholds for the weighted average time spent in Java garbage collection. Specified as a percentage of elapsed wall clock time.

**Related Name****Default Value**

Warning: 30.0, Critical: 60.0

**API Name**

jobhistory\_gc\_duration\_thresholds

**Required**

false

**Garbage Collection Duration Monitoring Period****Description**

The period to review when computing the moving average of garbage collection time.

**Related Name****Default Value**

5 minute(s)

**API Name**

jobhistory\_gc\_duration\_window

**Required**

false

**JobHistory Server Host Health Test****Description**

When computing the overall JobHistory Server health, consider the host's health.

**Related Name****Default Value**

true

**API Name**

jobhistory\_host\_health\_enabled

**Required**

false

**JobHistory Server Process Health Test****Description**

	Enables the health test that the JobHistory Server's process state is consistent with the role configuration
Related Name	
Default Value	true
API Name	jobhistory_scm_health_enabled
Required	false

Web Metric Collection

Description	Enables the health test that the Cloudera Manager Agent can successfully contact and gather metrics from the web server.
Related Name	
Default Value	true
API Name	jobhistory_web_metric_collection_enabled
Required	false

Web Metric Collection Duration

Description	The health test thresholds on the duration of the metrics request to the web server.
Related Name	
Default Value	Warning: 10 second(s), Critical: Never
API Name	jobhistory_web_metric_collection_thresholds
Required	false

Log Directory Free Space Monitoring Absolute Thresholds

Description	The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory.
Related Name	
Default Value	Warning: 10 GiB, Critical: 5 GiB
API Name	log_directory_free_space_absolute_thresholds
Required	false

## Log Directory Free Space Monitoring Percentage Thresholds

### Description

The health test thresholds for monitoring of free space on the filesystem that contains this role's log directory. Specified as a percentage of the capacity on that filesystem. This setting is not used if a Log Directory Free Space Monitoring Absolute Thresholds setting is configured.

### Related Name

### Default Value

Warning: Never, Critical: Never

### API Name

log\_directory\_free\_space\_percentage\_thresholds

### Required

false

## Rules to Extract Events from Log Files

### Description

This file contains the rules that govern how log messages are turned into events by the custom log4j appender that this role loads. It is in JSON format, and is composed of a list of rules. Every log message is evaluated against each of these rules in turn to decide whether or not to send an event for that message. If a log message matches multiple rules, the first matching rule is used.. Each rule has some or all of the following fields:

- **alert** - whether or not events generated from this rule should be promoted to alerts. A value of "true" will cause alerts to be generated. If not specified, the default is "false".
- **rate** (mandatory) - the maximum number of log messages matching this rule that can be sent as events every minute. If more than rate matching log messages are received in a single minute, the extra messages are ignored. If rate is less than 0, the number of messages per minute is unlimited.
- **periodminutes** - the number of minutes during which the publisher will only publish rate events or fewer. If not specified, the default is one minute
- **threshold** - apply this rule only to messages with this log4j severity level or above. An example is "WARN" for warning level messages or higher.
- **content** - match only those messages for which contents match this regular expression.
- **exceptiontype** - match only those messages that are part of an exception message. The exception type must match this regular expression.

Example:

- {"alert": false, "rate": 10, "exceptiontype": "java.lang.StringIndexOutOfBoundsException"} This rule sends events to Cloudera Manager for every StringIndexOutOfBoundsException, up to a maximum of 10 every minute.
- {"alert": false, "rate": 1, "periodminutes": 1, "exceptiontype": ".\*"}, {"alert": true, "rate": 1, "periodminutes": 1, "threshold": "ERROR"} In this example, an event generated may not be promoted to alert if an exception is in the ERROR log message, because the first rule with alert = false will match.

### Related Name

### Default Value

version: 0, rules: [ alert: false, rate: 1, periodminutes: 1, threshold: FATAL , alert: false, rate: 0, threshold: WARN, content: .\* is deprecated. Instead, use .\* , alert: false, rate: 0, threshold: WARN, content: .\* is deprecated. Use .\* instead , alert: false, rate: 1, periodminutes: 2, exceptiontype: .\* , alert: false, rate: 1, periodminutes: 1, threshold: WARN ]

### API Name

`log_event_whitelist`**Required**`false`**Metric Filter****Description**

Defines a Metric Filter for this role. Cloudera Manager Agents will not send filtered metrics to the Service Monitor. Define the following fields:

- Health Test Metric Set - Select this parameter to collect only metrics required for health tests.
- Default Dashboard Metric Set - Select this parameter to collect only metrics required for the default dashboards. For user-defined charts, you must add the metrics you require for the chart using the Custom Metrics parameter.
- Include/Exclude Custom Metrics - Select Include to specify metrics that should be collected. Select Exclude to specify metrics that should not be collected. Enter the metric names to be included or excluded using the Metric Name parameter.
- Metric Name - The name of a metric that will be included or excluded during metric collection.

If you do not select Health Test Metric Set or Default Dashboard Metric Set, or specify metrics by name, metric filtering will be turned off (this is the default behavior). For example, the following configuration enables the collection of metrics required for Health Tests and the `jvm_heap_used_mb` metric:

- Include only Health Test Metric Set: Selected.
- Include/Exclude Custom Metrics: Set to Include.
- Metric Name: `jvm_heap_used_mb`

You can also view the JSON representation for this parameter by clicking View as JSON. In this example, the JSON looks like this: { "includeHealthTestMetricSet": true, "filterType": "whitelist", "metrics": ["jvm\_heap\_used\_mb"] }

**Related Name****Default Value****API Name**`monitoring_metric_filter`**Required**`false`**Swap Memory Usage Rate Thresholds****Description**

The health test thresholds on the swap memory usage rate of the process. Specified as the change of the used swap memory during the predefined period.

**Related Name****Default Value**`Warning: Never, Critical: Never`**API Name**`process_swap_memory_rate_thresholds`**Required**`false`

### Swap Memory Usage Rate Window

**Description**

The period to review when computing unexpected swap memory usage change of the process.

**Related Name**

common.process.swap\_memory\_rate\_window

**Default Value**

5 minute(s)

**API Name**

process\_swap\_memory\_rate\_window

**Required**

false

### Process Swap Memory Thresholds

**Description**

The health test thresholds on the swap memory usage of the process. This takes precedence over the host level threshold.

**Related Name****Default Value**

Warning: 200 B, Critical: Never

**API Name**

process\_swap\_memory\_thresholds

**Required**

false

### Role Triggers

**Description**

The configured triggers for this role. This is a JSON-formatted list of triggers. These triggers are evaluated as part as the health system. Every trigger expression is parsed, and if the trigger condition is met, the list of actions provided in the trigger expression is executed. Each trigger has the following fields:

- `triggerName` (mandatory) - The name of the trigger. This value must be unique for the specific role.
- `triggerExpression` (mandatory) - A tsquery expression representing the trigger.
- `streamThreshold` (optional) - The maximum number of streams that can satisfy a condition of a trigger before the condition fires. By default set to 0, and any stream returned causes the condition to fire.
- `enabled` (optional) - By default set to 'true'. If set to 'false', the trigger is not evaluated.
- `expressionEditorConfig` (optional) - Metadata for the trigger editor. If present, the trigger should only be edited from the Edit Trigger page; editing the trigger here can lead to inconsistencies.

For example, the following JSON formatted trigger configured for a DataNode fires if the DataNode has more than 1500 file descriptors opened: [{"triggerName": "sample-trigger", "triggerExpression": "IF (SELECT fd\_open WHERE roleName=\$ROLENAME and last(fd\_open) > 1500) DO health:bad", "streamThreshold": 0, "enabled": "true"}] See the trigger rules documentation for more details on how to write triggers using tsquery. The JSON format is evolving and may change and, as a result, backward compatibility is not guaranteed between releases.

**Related Name****Default Value**

	[]
API Name	role_triggers
Required	true

Unexpected Exits Thresholds

Description	The health test thresholds for unexpected exits encountered within a recent period specified by the unexpected_exits_window configuration for the role.
Related Name	
Default Value	Warning: Never, Critical: Any
API Name	unexpected_exits_thresholds
Required	false

Unexpected Exits Monitoring Period

Description	The period to review when computing unexpected exits.
Related Name	
Default Value	5 minute(s)
API Name	unexpected_exits_window
Required	false

Other

Enable Job ACL

Description	Specifies whether ACLs should be checked for authorization when users perform various operations. If enabled, access control checks are made by MapReduce when requests are made by users for queue operations and job operations. Queue operations include submitting job to a queue or killing a job in the queue. Job operations include viewing the job-details (See mapreduce.job.acl-view-job), or modifying a job (See mapreduce.job.acl-modify-job).
Related Name	mapreduce.cluster.acls.enabled
Default Value	false
API Name	mapreduce_cluster_acls_enabled
Required	

false

### Job History Files Cleaner Interval

#### Description

Time interval for history cleaner to check for files to delete. Files are only deleted if they are older than `mapreduce.jobhistory.max-age-ms`.

#### Related Name

`mapreduce.jobhistory.cleaner.interval`

#### Default Value

1 day(s)

#### API Name

`mapreduce_jobhistory_cleaner_interval`

#### Required

false

### Job History Files Maximum Age

#### Description

Job history files older than this time duration will be deleted when the history cleaner runs.

#### Related Name

`mapreduce.jobhistory.max-age-ms`

#### Default Value

7 day(s)

#### API Name

`mapreduce_jobhistory_max_age_ms`

#### Required

false

### Max Shuffle Connections

#### Description

Maximum allowed connections for the shuffle. Set to 0 (zero) to indicate no limit on the number of connections.

#### Related Name

`mapreduce.jobhistory.loadedjob.tasks.max`

#### Default Value

-1

#### API Name

`mapreduce_shuffle_max_connections`

#### Required

false

### MapReduce ApplicationMaster Staging Root Directory

#### Description

The root HDFS directory of the staging area for users' MR2 jobs; for example `/user`. The staging directories are always named after the user.

#### Related Name

yarn.app.mapreduce.am.staging-dir
<b>Default Value</b>
/user
<b>API Name</b>
yarn_app_mapreduce_am_staging_dir
<b>Required</b>
false

Performance

Maximum Process File Descriptors

<b>Description</b>
If configured, overrides the process soft and hard rlimits (also called ulimits) for file descriptors to the configured value.
<b>Related Name</b>
<b>Default Value</b>
<b>API Name</b>
rlimit_fds
<b>Required</b>
false

Ports and Addresses

MapReduce JobHistory Server Port

<b>Description</b>
The port of the MapReduce JobHistory Server. Together with the hostname of the JobHistory role, forms the address.
<b>Related Name</b>
mapreduce.jobhistory.address
<b>Default Value</b>
10020
<b>API Name</b>
mapreduce_jobhistory_address
<b>Required</b>
false

MapReduce JobHistory Server Admin Interface Port

<b>Description</b>
The port of the MapReduce JobHistory Server administrative interface. Together with the host name of the JobHistory role forms the address.
<b>Related Name</b>
mapreduce.jobhistory.admin.address
<b>Default Value</b>
10033
<b>API Name</b>
mapreduce_jobhistory_admin_address

**Required**

false

**MapReduce JobHistory Web Application HTTP Port****Description**

The HTTP port of the MapReduce JobHistory Server web application. Together with the host name of the JobHistory role forms the address.

**Related Name**

mapreduce.jobhistory.webapp.address

**Default Value**

19888

**API Name**

mapreduce\_jobhistory\_webapp\_address

**Required**

false

**MapReduce JobHistory Web Application HTTPS Port (TLS/SSL)****Description**

The HTTPS port of the MapReduce JobHistory Server web application. Together with the host name of the JobHistory role forms the address.

**Related Name**

mapreduce.jobhistory.webapp.https.address

**Default Value**

19890

**API Name**

mapreduce\_jobhistory\_webapp\_https\_address

**Required**

false

**Bind JobHistory Server to Wildcard Address****Description**

If enabled, the JobHistory Server binds to the wildcard address ("0.0.0.0") on all of its ports.

**Related Name****Default Value**

false

**API Name**

yarn\_jobhistory\_bind\_wildcard

**Required**

false

**Resource Management****Java Heap Size of JobHistory Server in Bytes****Description**

Maximum size in bytes for the Java Process heap memory. Passed to Java -Xmx.

**Related Name**

**Default Value**

1 GiB

**API Name**

mr2\_jobhistory\_java\_heapsize

**Required**

false

**Cgroup CPU Shares****Description**

Number of CPU shares to assign to this role. The greater the number of shares, the larger the share of the host's CPUs that will be given to this role when the host experiences CPU contention. Must be between 2 and 262144. Defaults to 1024 for processes not managed by Cloudera Manager.

**Related Name**

cpu.shares

**Default Value**

1024

**API Name**

rm\_cpu\_shares

**Required**

true

**Custom Control Group Resources (overrides Cgroup settings)****Description**

Custom control group resources to assign to this role, which will be enforced by the Linux kernel. These resources should exist on the target hosts, otherwise an error will occur when the process starts. Use the same format as used for arguments to the cgexec command: resource1,resource2:path1 or resource3:path2 For example: 'cpu,memory:my/path blkio:my2/path2' \*\*\*These settings override other cgroup settings.\*\*\*

**Related Name**

custom.cgroups

**Default Value****API Name**

rm\_custom\_resources

**Required**

false

**Cgroup I/O Weight****Description**

Weight for the read I/O requests issued by this role. The greater the weight, the higher the priority of the requests when the host experiences I/O contention. Must be between 100 and 1000. Defaults to 1000 for processes not managed by Cloudera Manager.

**Related Name**

blkio.weight

**Default Value**

500

**API Name**

rm\_io\_weight

**Required**

true

**Cgroup Memory Hard Limit****Description**

Hard memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_hard\_limit

**Required**

true

**Cgroup Memory Soft Limit****Description**

Soft memory limit to assign to this role, enforced by the Linux kernel. When the limit is reached, the kernel will reclaim pages charged to the process if and only if the host is facing memory pressure. If reclaiming fails, the kernel may kill the process. Both anonymous as well as page cache pages contribute to the limit. Use a value of -1 to specify no limit. By default processes not managed by Cloudera Manager will have no limit. If the value is -1, Cloudera Manager will not monitor Cgroup memory usage therefore some of the charts will show 'No Data'

**Related Name**

memory.soft\_limit\_in\_bytes

**Default Value**

-1 MiB

**API Name**

rm\_memory\_soft\_limit

**Required**

true

**Security****Role-Specific Kerberos Principal****Description**

Kerberos principal used by the JobHistory Server roles.

**Related Name****Default Value**

mapred

<b>API Name</b>
kerberos_role_princ_name
<b>Required</b>
true

Stacks Collection

Stacks Collection Data Retention

<b>Description</b>
The amount of stacks data that is retained. After the retention limit is reached, the oldest data is deleted.
<b>Related Name</b>
stacks_collection_data_retention
<b>Default Value</b>
100 MiB
<b>API Name</b>
stacks_collection_data_retention
<b>Required</b>
false

Stacks Collection Directory

<b>Description</b>
The directory in which stacks logs are placed. If not set, stacks are logged into a stacks subdirectory of the role's log directory. If this directory already exists, it will be owned by the current role user with 755 permissions. Sharing the same directory among multiple roles will cause an ownership race.
<b>Related Name</b>
stacks_collection_directory
<b>Default Value</b>
<b>API Name</b>
stacks_collection_directory
<b>Required</b>
false

Stacks Collection Enabled

<b>Description</b>
Whether or not periodic stacks collection is enabled.
<b>Related Name</b>
stacks_collection_enabled

### Stacks Collection Frequency

**Description**

The frequency with which stacks are collected.

**Related Name**

stacks\_collection\_frequency

**Default Value**

5.0 second(s)

**API Name**

stacks\_collection\_frequency

**Required**

false

### Stacks Collection Method

**Description**

The method used to collect stacks. The jstack option involves periodically running the jstack command against the role's daemon process. The servlet method is available for those roles that have an HTTP server endpoint exposing the current stacks traces of all threads. When the servlet method is selected, that HTTP endpoint is periodically scraped.

**Related Name**

stacks\_collection\_method

**Default Value**

jstack

**API Name**

stacks\_collection\_method

**Required**

false

### Suppressions

#### Suppress Configuration Validator: CDH Version Validator

**Description**

Whether to suppress configuration warnings produced by the CDH Version Validator configuration validator.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_cdh\_version\_validator

**Required**

true

#### Suppress Parameter Validation: Hadoop Metrics2 Advanced Configuration Snippet (Safety Valve)

**Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the Hadoop Metrics2 Advanced Configuration Snippet (Safety Valve) parameter.

**Related Name**

**Default Value**

false

**API Name**

role\_config\_suppression\_hadoop\_metrics2\_safety\_valve

**Required**

true

**Suppress Parameter Validation: System Group****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System Group parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_history\_process\_groupname

**Required**

true

**Suppress Parameter Validation: System User****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the System User parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_history\_process\_username

**Required**

true

**Suppress Parameter Validation: JobHistory Server Advanced Configuration Snippet (Safety Valve) for yarn-site.xml****Description**

Whether to suppress configuration warnings produced by the built-in parameter validation for the JobHistory Server Advanced Configuration Snippet (Safety Valve) for yarn-site.xml parameter.

**Related Name****Default Value**

false

**API Name**

role\_config\_suppression\_jobhistory\_config\_safety\_valve

**Required**

true

**Suppress Parameter Validation: JobHistory Server Advanced Configuration Snippet (Safety Valve) for mapred-site.xml****Description**
