Cloudera Data Visualization certifies compatibility with the following component categories

Related Information

[Supported metastores](#)

[Mobile devices](#)

[Internet browsers](#)

Supported metastores

Cloudera Data Visualization is certified with the following metadata servers:

- *SQLite*

This option does not support multi-process Cloudera Data Visualization.

Arcadia Instant is regularly certified with SQLite MetaStore.

- *MySQL*

Supports multi-process Cloudera Data Visualization in CDH, with 3 processes by default.

- *Oracle*

Supports multi-process Cloudera Data Visualization in CDH, with 3 processes by default.

- *PostgreSQL*

Supports multi-process Cloudera Data Visualization in CDH, with 3 processes by default.

Mobile devices

In addition to desktop use, you may access Cloudera Data Visualization (in View mode only) from many mobile devices.

This allows you to provide access to insightful information at a summary level, and quickly informs the user if there is an issue that needs deeper investigation.

The following devices has been certified to display visuals and dashboards:

- Android OS smartphones
- iOS smartphones
- iOS tablets

While you cannot manipulate datasets, or edit visuals and dashboards, you can access all existing visuals for which you have view permissions in View mode, and use existing filters and drill-downs. The URL address syntax is of the following type:

```
[ip_address]/arc/apps/app/[app_id]
```

Tip:

Cloudera recommends that dashboards designed for mobile viewing be simple and intuitive, and minimize the need for scrolling. The visuals should use a small number of dimensions so as not to clutter a small screen, and filters should be minimal.

Internet browsers

We certify Cloudera Data Visualization to run on the latest versions Chrome, and Microsoft Edge browsers.
